  - (2) Torpedoes and torpedo practices.
  - (3) Smoke screens, both offensive and defensive.
  - (4) Chemical warfare service—Material and training of personnel. (In collaboration with Fleet Maintenance Officer).
- (h) Supervises courses of study in Ordnance and Gunnery technical schools of the Fleet.
- (i) Assists War Plans Officer in preparation of War Plans and in matters of liaison with Army.
- (j) Reviews military and material inspection reports.
- (k) Consults with Fleet Maintenance Officer on Damage Control.
- (l) Exercises particular supervision over recommendations for changes to "Orders for Gunnery Exercises," "Gunnery Instructions" and other ordnance, gunnery and fire control publications.
- (m) Makes recommendations on designs of new ships (Bureau of Ordnance cognizance).
- (n) Member of Schedule Board.
- (o) Advises on gunnery features of tactical plans and publications.
- (p) With 86 has cognizance of matters involving landing forces.
- (q) Handles matters affecting training, assignments, rating, and qualifications of gunnery personnel (consults with 96).

**224. Fleet Aviation Officer—95.**

- (a) Advises with reference to:
  - (1) All aircraft operations and aviation matters including those pertaining to policy with respect to:
    - (A) Material.
    - (B) Personnel.
    - (C) Gunnery and Bombing.
    - (D) Radio.
  - (2) Aircraft Operations, and aviation shore facilities.
  - (3) Coordination of aviation activities of the Fleet.
  - (4) Employment of aircraft in tactical exercises, analysis and reports thereon.
  - (5) The development of aircraft tactics, gunnery and doctrine.
  - (6) Naval air operating policy.

- (b) Assists War Plans Officer in the preparation of War Plans.
- (c) Keeps informed as to the effectiveness of aircraft units of the Fleet.
- (d) Assists Operation Officer in the preparation of Fleet Schedules dealing with aircraft and aircraft services.
- (e) Consults with Gunnery Officer in connection with aircraft and anti-aircraft gunnery. Handles Aircraft Gunnery Reports.
- (f) Member of Schedule Board.
- (g) Has cognizance of, keeps informed of aircraft material matters.

**225. Fleet Aerological and Personnel Officer—96.**

- (a) In charge of the aerological office and keeps the Commander-in-Chief and members of his staff advised of weather conditions as concerns the planning and executions of Fleet Operations. Assists War Plans Officer.
- (b) Advises with reference to the establishment of new aerological units in matters concerning:
  - (1) Equipment.
  - (2) Personnel.
  - (3) Weather information required.
- (c) Coordinates aerological activities in the Fleet, including:
  - (1) Collection and dissemination of weather reports.
  - (2) Weather forecasts and advisory storm warnings.
  - (3) Aerological research.
- (d) Exercises supervision over the training and instruction of aerological personnel.
- (e) Prepares such weather summaries as are required in connection with orders for Fleet Problems and Tactics.
- (f) Consults with Gunnery Officer in connection with atmospheric ballistic information pertaining to gunnery.
- (g) Advises with reference to exchange of weather information between the Fleet and the U. S. Weather Bureau or other activities maintaining meteorological facilities.
- (h) In charge of all matters relating to:
  - (1) Orders for officers and enlisted personnel.
  - (2) Naval Reserve Officers on active duty.
  - (3) Transportation in ships of the Fleet.
  - (4) Congressional mail regarding personnel matters.
  - (5) Action on leave requests for all officers and preparation of endorsements for signature of Admiral, Chief of Staff and Flag Secretary, depending upon the rank of officer requesting leave.
  - (6) Examinations and promotions.
  - (7) Navy Relief and Red Cross.
- (i) In charge of entertainment and welfare of enlisted personnel.
- (j) Shore Patrol.
- (k) Liberty for the Fleet.

**226. Staff Duty Officer—14.**

- (a) Such Officers as may be designated by the Chief of Staff shall stand a day's duty in port and a watch on the Flag Bridge at sea when a watch is established.
- (b) The officer having the day's duty shall:
  - (1) Receive routine reports.
  - (2) Act on routine matters.
  - (3) Act as necessary on matters when the officer having cognizance and his relief are absent, informing officers concerned of action taken as soon as possible.
  - (4) Attend the side when the Flag Lieutenant is not available. The procedure for tending the side is laid down in Section X of these Staff instructions.
  - (5) Regulate movements of Admiral's Barge, Chief of Staff's Gig, and Staff boats in absence of Flag Lieutenant or outside of working hours. The Officer-of-the-Deck will keep the Staff Duty Officer and Flag Lieutenant informed of the movements of the Admiral's Barge, Chief of Staff's Gig, and Staff Duty boats.
  - (6) Keep informed as to Staff Officers on board or absent from the ship.
  - (7) In the absence of the Flag Lieutenant see that boarding calls on visiting men of war are made by an officer from Fleet flagship.

(8) Receive aerological forecasts from the Aerologist and when bad weather is forecast transmit the necessary information to the ships present.

(9) Initial all dispatches, taking action if necessary when action officer is not on board.

(10) See that the Commander-in-Chief and the Chief of Staff are kept informed of all important matters, and particularly that they are informed promptly upon their return to the ship of all important matters that occur during their absence; and similarly keep the Operations Officer informed of all ship movements observed by the signal watch.

(11) Examine all mail received during the absence of the Flag Secretary or his regularly designated relief, and decide what action if any shall be taken.

(c) Day's duty will begin at 0900, except Sundays and holidays when it will begin at 1100. The sequence will be uninterrupted by the fact that the ship may be at sea when regular watches are set.

(d) The duties of the Staff Duty Officer assume particular importance when, in the absence of the Commander-in-Chief, Chief of Staff, or other members of the staff, he is called upon to make decisions in cases of emergency, or on matters which cannot be delayed for reference to higher authority or to the officers having cognizance. This fact makes it imperative that all officers standing duty keep themselves informed as to existing situations, the policies of the Commander-in-Chief and the usual and proper manner of taking action on all matters which may arise.

(e) In important emergency cases the Staff Duty Officer will take such action as may be necessary. Instructions should be obtained by the most expeditious manner of communication with the Chief of Staff and, failing to locate him, with the Commander-in-Chief. The Operations Officer should, if practicable, be fully informed of the situation.

(f) When civilians or officials, other than personal friends of the Commander-in-Chief or officials whose status is a matter of doubt, come on board the flagship to confer with the Commander-in-Chief, he shall first present them to the Chief of Staff, Flag Lieutenant, or in their absence, to the Operations Officer.

(g) Should an emergency arise necessitating action involving the Fleet Relief Force, the Staff Duty Officer will carry out the following:

(1) Notify the Commander-in-Chief, Chief of Staff and Operations Officer.

(2) Send staff boats to landing, keeping one at ship as may be advisable.

(3) Land field radio and signalmen if BASRAD is out of commission.

(h) *Assignment of Berths.* Requests for berths are received occasionally by the Staff Duty Officer for immediate action during the absence of the Operations Officers. To assist the Staff Duty Officer in assigning berths, an anchorage chart is kept in the Operations Office, together with a copy of current instructions. See also the Commander-in-Chief's current letter in regard to anchorage assignments.

(i) In the absence of the Commander-in-Chief, or Chief of Staff, he shall take steps to correct any defects in external Fleet routine which would constitute an adverse reflection on the Fleet.

(j) *Leave—Relief for Day's Duty.* (1) The Day's Duty list for Staff Duty Officers is prepared on the basis that the sequence will not be interrupted by the fact that the ship may be at sea. Nor is it to be interrupted by absence on duty, illness or leave.

(2) Staff Duty Officers are "Relief Officers" in inverse order of seniority. A Relief Duty List is posted in the Staff Duty Book. When an officer stands a relief duty watch, he will inform the senior watch officer. The next officer on the list then becomes the "Relief Duty Officer."

(3) For extended periods of leave, greater than 10 days the Relief Duty Officer will take the duty for the officer scheduled for the Day's Duty. For shorter periods of leave, officers are expected to arrange for their own reliefs by agreeable shifts with other Staff Duty Officers. In every case, inform the Senior Staff Duty Officer of the arrangements made.

#### SEA WATCHES

(k) An officer of the Staff shall be on the bridge at all times when the Fleet flagship is underway in company with vessels of the Fleet acting as a unit.

(l) He is the representative of the Commander-in-Chief on the bridge and bears the same relation to him that the Officer-of-the-Deck bears to the Captain of the ship. He shall keep himself informed of the location of all units and ships in

whatever disposition or formation the Fleet is at the time; whatever land or lights are in sight; whether either are likely to be seen; and of all other particulars which may be of use to the Commander-in-Chief in keeping the ships of the formation out of danger.

(l) In case of emergency, when neither the Commander-in-Chief nor the Chief of Staff is on the bridge, he shall make such signals as are required by the circumstances, reporting his action immediately to the Commander-in-Chief, the Chief of Staff and the Operations Officer. **ACT FIRST, REPORT AFTERWARDS.** Under all other conditions the formation shall not be maneuvered without the authority of the Commander-in-Chief or the Chief of Staff. Furthermore, under these latter conditions, the Staff Duty Officer shall report the circumstances to the Operations Officer. Also, he shall call the Flag Lieutenant and Operations Officer to the bridge at once if immediate action is required—otherwise those officers shall be informed of the time when their presence on the flag bridge will be required and the reasons therefor.

(m) He shall promptly report to the Commander-in-Chief, through the Chief of Staff, all land, shoals, rocks, lighthouses, beacons, buoys, discolored water, vessels, or wrecks sighted; all changes of weather or shifts of wind; all signals made; all changes in speed, formation, disposition, or course; in general, all occurrences worthy of notice.

(n) He shall handle all dispatches which in port are routed to the Officer having the day's Staff duty.

(o) When the Flag Lieutenant is on the Bridge he will handle all tactical signals, relieving the Staff Duty Officer of this function of his usual duties.

(p) *Record of events.*—A Record of Events during the watch will be kept by the Staff Officer on watch assisted by a duty yeoman. This record will include items of importance, movements, major and minor contacts with the enemy, aerial and submarine activity, weather information, etc. **THE RECORD OF EVENTS** will be typed in quadruplicate, signed by the Officer on watch and handled as follows: Original to be placed in a file folder in Flag Plot. (This folder will be kept in Flag Plot until the completion of the exercise, when it shall be turned over to the file yeoman by the yeoman securing the watch). At 0800 each day the three copies of the **RECORD OF EVENTS** covering the watches of the preceding 24 hours shall be turned over to the **Flag Office** for the following distribution: one copy to the Admiral, one copy to the Chief of Staff, and one copy to the Operations Officer.)

(q) When necessary to make a signal to change course or speed to avoid a vessel or unit having the right of way, make such changes great enough, and execute the signal soon enough to leave no doubt in the minds of the other officers of the deck as to your intentions. Avoid crossing ahead of vessels or units having the right of way.

(r) When fog closes in:

(1) Order bridge radios manned if not already in effect.

(2) Order fog buoys streamed.

(3) Order fog searchlights manned.

(4) Comply with Fleet Communication letter—2RL-41 summarized briefly as follows:

(a) Take soundings at short intervals to ensure safety of the formation.

(b) Designate a ship to: At least half-hourly or oftener; obtain bearings from shore radio direction finder stations, and radio bearings of ships in company.

(c) Plot all bearings and soundings on a chart. This ensures safety.

(d) Establish a transmitting and receiving watch, (on distress frequency).

(e) Provided Radio, restrictions so permit broadcast in plain language followed by International Code: visibility conditions, names of ships in company, position, and time of origin GCT. If other ships reply to this safety transmission shift to 422 kcs. and exchange information.

227. The night order book is written by the Commander-in-Chief for guidance of officers having night watches. Each officer having a night watch shall initial the book after reading the orders, and before relieving the watch. The night order book is prepared by the Fleet Navigator (12).

228. Nothing herein is intended to contravene existing regulations or to preclude taking such additional precautions as may seem desirable.

## SECTION III. BATTLE STATIONS

300. The Combat Organization of the Staff is covered in a separate confidential issue of this section. It is distributed to the flagship and flag personnel only.

## SECTION IV. FLAG OFFICE PERSONNEL AND GENERAL INSTRUCTIONS

401. The authorized Flag Allowance of yeomen is:

|                       |    |
|-----------------------|----|
| Chief Yeoman.....     | 3  |
| Yeoman 1st class..... | 4  |
| Yeoman 2nd class..... | 5  |
| Yeoman 3rd class..... | 6  |
| Total.....            | 18 |

Yeoman on board are assigned in general as follows:

- 1 Yeoman—In general charge.
- 1 Yeoman—Admiral, Chief of Staff and Flag Lieutenant.
- 1 Yeoman—Flag Secretary and Division Officer.
- 3 Yeomen—Operations and Assistant Operations Officers.
- 2 Yeomen—War Plans Officers.
- 2 Yeomen—Communication, Radio, and Comm. Security Officers.
- 1 Yeoman—Intelligence Officer.
- 1 Yeoman—Aviation Officer.
- 1 Yeoman—Gunnery Officer.
- 1 Yeoman—Engineer and Maintenance Officer.
- 1 Yeoman—Aerological Officer.
- 1 Yeoman—Files and Correspondence Classification.
- 1 Yeoman—Outgoing Mail Desk.
- 1 Yeoman—Communication Office.

These assignments will be augmented by yeoman strikers. Yeoman strikers will also be assigned to other Flag Office details, such as incoming mail, File Section, Tracer desk, etc.

402. Assignment of yeomen will necessarily depend largely on their individual aptitude for certain duties, and their availability. One Pharmacist's Mate is included in the Flag Allowance and is assigned to the Fleet Medical Officer. One Marine Sergeant Major is assigned to the Marine Officer.

403. Whenever an officer finds that he requires additional clerical assistance, he will apply to the Flag Secretary. Additional clerical assistance can in this way be secured with a minimum of delay and without interfering with the routine of the office.

404. The Chief Yeoman in charge has general supervision of the Flag Office and personnel under the Flag Secretary, who is in direct charge of the offices of the Commander-in-Chief. The Chief Yeoman in Charge is responsible for the cleanliness of the offices and storerooms, for the carrying out of the office instructions, for the conduct and proper performance of duty by the enlisted personnel and for regulating watch lists, liberty and leave in accordance with existing instructions and orders. He will supervise the drawing of office supplies against the flag allotment, issuing of stationery, etc., and exercise care that expenditures are kept within requirements.

405. *Routine Duty.* (a) Routine hours of duty in flag offices and print shop are as follows:

|                    |              |
|--------------------|--------------|
| Daily.....         | 0800 to 1600 |
| Half Holidays..... | 0800 to 1130 |

(b) *Handling of work outside regular office hours.* Routine work outside of regular office hours will be handled by the yeoman of the officer desiring such work done, when that yeoman is on board, otherwise by the duty section. There is always a duty printer on board who sleeps in the print shop.

(c) No uncompleted work shall be stowed away in office desk drawers, but shall be kept above the desks in labeled baskets or envelopes, and available to the staff officers concerned, or to the duty section, if required.

406. *Handling of mail upon arrival in port.* The taking up and distribution of mail upon arrival in port will, without exception, be an "all hands" job. All yeomen will prepare routing sheets and assist in clearing up all mail received. No liberty will be granted on arrival in port until such mail has been received, routed and distributed to the cabinets of the officers concerned.

**407. Liberty and Leave.** (a) Liberty and leave for the flag office personnel will be regulated to conform, as closely as work will permit, to that of the flagship. Subject to the approval of the officers for whom the yeomen work, after routine working hours, or Saturdays after 1130, Wednesday afternoons, Sundays and holidays, will be considered routine liberty periods. Liberty cards are issued under the supervision of the Division Officer for all flag personnel.

(b) All requests for other than regular liberty shall first be referred to the officer for whom the yeoman works, the Flag Division Officer and to the Chief Yeoman in Charge for designation of relief if required, then to the Flag Secretary for approval or disapproval. If the request is one for leave and is approved by the Flag Secretary as Head of Department, it will then be sent to the Executive Officer for issuance of formal leave papers.

**408. Cleanliness of Offices.** (a) The cleanliness of flag offices and storerooms will be under the supervision of the Chief Yeoman in Charge. Each yeoman will be required to keep his own desk neat and clean, as well as the desk of the officer for whom he works. Offices will be cleaned daily, prior to 0800, and a field day shall be held between 1200 and 1300 each Friday.

(b) Flag offices, shops, storerooms and other spaces will be included in the commanding officer's inspection of adjacent ship spaces. Personnel in charge of offices, shops, storerooms and other flag spaces shall have their spaces open and ready and shall stand by for inspection at the times designated in the daily schedule issued by the flagship. Yeomen shall have the drawers of their desks neatly stowed and ready for removal should they be directed to do so by the inspecting officers.

**409. Flag Office Duty Section.** (a) The Flag Office personnel will be divided into duty sections of not less than three men, one of whom shall be a competent stenographer. Duty changes at 0900 daily, Sundays excepted. The Duty Section will function in the Flag Office during the following hours:

|                     |              |
|---------------------|--------------|
| Daily-----          | 0730 to 0815 |
|                     | 1130 to 1300 |
|                     | 1600 to 2200 |
| Half Holidays-----  | 0730 to 0815 |
|                     | 1130 to 2200 |
| Whole Holidays----- | 0730 to 2200 |

(b) The duty section will handle all emergency work outside of regular working hours and if the Outgoing Mail Yeoman is not on board, will mail all signed outgoing correspondence. The entire duty section will remain in the flag offices during the hours specified in subparagraph (a) except:

(1) Only one rated man need remain in the flag office during mealtimes.

(2) When the press of work permits and when in the discretion of the senior duty yeoman their services are not immediately required, members of the duty section may be allowed to attend the evening movies on deck, subject to call; however, one rated member of the duty section shall remain in the flag office during the authorized absence of the rest to attend the movies. From time to time, if the Staff Duty Officer grants permission to do so, the offices may be locked and keys turned over to him, during movies, smokers, etc.

(3) When the Flag is based temporarily ashore, the Duty Section will maintain a continuous one-man security watch in the Flag Office during the following hours:

|                    |              |
|--------------------|--------------|
| Daily-----         | 1600 to 0800 |
| Half-holidays----- | 1200 to 0800 |
| Holidays-----      | 0800 to 0800 |

This watch will be armed, the primary duty of which is to prevent unauthorized persons from entering the Fleet War Plans Offices and all other Flag Offices of the Commander-in-Chief. This Security Watch will normally be sufficient to remain in the Flag Office after working hours. The entire Duty Section is available for call by the Staff Duty Officer at any time.

(c) **Handling of mail and correspondence.** Before going on liberty the incoming and outgoing mail yeomen will inform the senior duty yeoman of any special instructions, who in turn will inform his section. Special instructions may be:—To watch for special correspondence expected in the incoming mail—to see that certain U. S. or guard mail is dispatched. File numbers will not be entered on incoming mail by the duty section unless the correspondence is of an urgent

nature, in which case a file number will be entered on the routing sheet and file yeoman notified when he returns from liberty. Incoming correspondence shall be made ready for the examination of the Staff Duty Officer with minimum delay and report shall be made to him that it is ready for his examination. *On board ship*, immediately after the end of working hours, the duty section shall gather up all confidential and other important correspondence from the Staff Officers' rooms and retain such correspondence in the Flag Office overnight, distributing it immediately after 0800 the following working day. *In offices ashore*, immediately after the end of working hours, the duty section shall gather up all confidential correspondence from the desks of the Staff officers and deposit it in the locked cabinet provided for this purpose. Just prior to 0800 the next working day, the correspondence shall be returned to the respective officers' desks.

(d) *Security of Flag Offices.* The duty section will stand watch in the main flag office. The offices will be secured promptly at 2200 and keys turned over to the Flag Secretary, if on board, otherwise to the Staff Duty Officer. If, for any urgent reason, it is desired to keep offices open after 2200, permission should be requested from the Staff Duty Officer. Flag offices shall never be left unguarded. Outside regular working hours a constant check should be kept on the Staff offices, operations office, and file room to see that it is either occupied by staff personnel, or locked. If it is necessary for everyone to leave flag offices on duty, the last person to leave will lock offices and take keys with him, posting a note on main flag office door as to who has keys. Offices should be reopened as soon as possible.

(e) *Visitors to flag offices.* No general visitors will be permitted. Other than flag personnel admitted by senior duty yeoman, only officers and men on duty, or persons accompanied by staff duty officer, will be permitted in the flag offices outside of working hours.

(f) *Waste paper baskets in Cabins and Staterooms.* Waste paper baskets in Admiral's Cabin, Chief of Staff's Cabin and Staff officers' staterooms will be emptied and the contents burned, or stowed in flag office pending burning, at the following times:

|                              |      |
|------------------------------|------|
| Regular working days.....    | 1500 |
| Half and Whole Holidays..... | 1115 |

410. *Security of Classified Matter.* All personnel of the staff of the Commander-in-Chief whose duties require handling of classified matter, shall acquaint themselves with the Navy Regulations and other instructions pertaining to the security of classified matter.

(a) *Offices, Print Shop, Multilith Shop, Flag Plot Officers' Staterooms.* Flag personnel are responsible that classified matter under staff routing, or in spaces in which flag activities are paramount, is constantly attended. *Attended, as employed herein, signifies that the matter is receiving care while being used, or that it is under surveillance with respect to possible pilferage or perusal by unauthorized persons, or that it is under lock.*

(b) *Trash and waste.* Will be removed from flag activities and burned at times specified in subparagraph 409 (f). Should the incinerator be secured, or out of commission, such rubbish will be returned to flag offices, flag plot, print or multilith shops for retention awaiting suitable opportunity for its burning. The Senior Duty Yeoman will personally supervise collection and burning as set out in 409 (f). However, during routine hours of duty (see Article 405), this may be done by a rated yeoman designated by the Chief Yeoman in Charge.

(c) *Keys.* The key to the flag storerooms, the keys to the flag offices and mimeograph shop, and duplicate keys to the print shop and multilith shop are in the custody of the Flag Secretary. The Chief Printer and the Duty Printer will each retain a key to the print shop, and the Multilith Printer will retain a key to the multilith shop. Keys to the Flag Office files will be in the custody of the Flag Secretary, Gunnery Yeoman, File Yeoman, or Duty Yeoman. At the end of working hours, whenever classified matter is being produced in the print shop or multilith shop, the keys to the print shop galley racks and stowage locker will be placed in the main flag office key locker. During office hours the key to the flag offices will be in the main flag office. When offices are secured for the night, the keys to confidential files will be placed in the main flag office key locker and the keys to the flag offices turned over to the Flag Secretary, if on board, otherwise to the Staff Duty Officer. Except as herein specified, personnel are forbidden to have duplicate keys to flag offices and print shop spaces in their possession.

(d) *Files, Lockers, Storerooms.* Access to the flag storeroom by other than

regularly authorized personnel may be had upon application to the Flag Secretary. In all cases when a confidential file jacket is to be removed from the flag offices, a receipt will be required from the recipient.

(e) Nonconfidential file jackets should be obtained from the File Yeoman or in his absence from the duty yeoman. If the file jacket is to be removed from the flag office, a receipt will be signed by the recipient.

(f) Classified matter may be removed from the Print Shop only at the instance of the officer for whom the work is being done, or an officer of the Staff. Classified matter will not be allowed to remain in the multilith shop overnight, but will be stowed under lock in the print shop stowage locker.

#### SECTION V. HANDLING OF CORRESPONDENCE

501. (a) *Incoming Mail*, is delivered to the Incoming Mail Desk.

(b) Upon receipt of Registered U. S. Mail in the Main Flag Office, it shall be taken immediately to the Secret Mail Officer or the Chief Yeoman designated as Secret Mail Yeoman. In their absence the mail shall be taken to the Duty Communication Watch Officer who shall open it and extract the envelopes marked "SECRET". A receipt for the envelopes so retained shall, in all cases, be obtained on the "Incoming Registered Guard Mail Log". The envelopes marked "CONFIDENTIAL" shall be returned to the Flag Duty Yeoman. All "SECRET" mail received by the C. W. O. shall be logged in the book provided for that purpose, and then taken to the Staff Duty Officer who shall open it in order to determine its urgency. If the Staff Duty Officer retains any of the Secret Mail his receipt therefor shall be obtained. All Secret Mail shall be delivered to the Secret Mail Officer at the first opportunity.

(c) Incoming *personal* mail for the Commander-in-Chief will be delivered to his orderly and placed on his desk. If Admiral is not on board, it will be placed in the routing cabinet in the Flag Office and will be delivered upon the Admiral's return to the ship.

(d) Incoming personal mail for other staff officers will be delivered by a Flag Office messenger immediately upon its receipt in the Flag Office. In the absence of any Staff Officer his personal mail will be placed in the routing cabinet in the Flag Office and delivered to him upon his return to the ship.

502. *Urgent Correspondence*. When URGENT correspondence is received on board, routing sheets shall be prepared immediately, an URGENT tag securely attached to and visible on the routing sheet, and correspondence delivered by hand to the Flag Secretary, or in his absence, to the Staff Duty Officer. Such correspondence shall be shown to Action Officer and a copy delivered to him if desired, prior to routing to other officers. If a copy is delivered to Action Officer, a notation of this fact will be made on routing sheet. If file yeomen are not on duty or in the office when URGENT mail is received, such mail shall be assigned a file number by the Duty Yeoman and handled as indicated above. No correspondence, or other papers, shall be kept visible as the top paper on the correspondence. If correspondence or other papers are of an urgent nature and no URGENT tag accompanies it, the officer concerned shall indicate to this yeoman that the matter is urgent and the latter shall then attach an URGENT tag.

503. *Routine Correspondence*.

(a) *Incoming Mail Yeoman*. Opens all incoming mail immediately upon its receipt, except U. S. registered mail, which is handled in accordance with subparagraph 501 (b), above. (See Section VI for method of handling registered U. S. mail by receiving officers.)

Logs the envelope number and descriptive data of all correspondence received via registered guard mail and U. S. Mail.

Carefully checks all incoming mail to insure that it is complete and the listed enclosures are attached, or in case enclosures have been forwarded under separate cover keeps a memorandum check-off record of such enclosures so that they can be readily identified and properly distributed upon receipt.

Passes correspondence to File Yeoman and then, after File Yeoman has assigned office file numbers, prepares routing slips for all matter received except certain routine reports designated by the Flag Secretary, and MAILGRAMS. MAILGRAMS received by registered mail are logged and then sent to the Flag Communication office without being taken up on routing slips.

After routing slips have been typed, detaches memorandum routing slip and delivers mail to Chief Mail Yeoman in Charge. From data shown on the retained memorandum routing slips, maintains the Incoming Mail Log in loose-leaf form.

This log shall be a permanent record of all correspondence received and will show:

- Date of receipt.
- Office of origin.
- File and serial number of office of origin.
- Date of correspondence.
- Subject.
- Circus file number of jacket in which permanently filed.
- Serial number of routing slip on which correspondence has been taken up.
- (b) *File Yeoman*. Assigns file numbers. (See Article 505.)
- (c) *Chief Yeoman in Charge*. Routes correspondence.
- (d) *Flag Secretary*. Confirms routing of correspondence, or changes routing where required.
- (e) *Tracer Yeoman*. Removes routed correspondence from the outgoing basket of the Flag Secretary, detaches duplicate routing sheet, stamps date of delivery to first officer indicated in order of routing and delivers the correspondence, (except URGENT—see Article 502), through routing cabinet to officers concerned in accordance with the assigned order of routing.
- Files duplicate routing sheet as a tracer against outstanding correspondence in the office.
- (f) *Yeoman Concerned*. Takes cognizance of and removes all correspondence from routing boxes of officers for whom he works and delivers to officers as directed.

When the officer for whom he works is absent, he will return the correspondence checked to that officer for information, to the Tracer Yeoman, to be checked to the next officer in the order of routing, and deliver Action correspondence to the assigned relief officer.

(g) *Officer Concerned*. In general, papers will pass from one officer to another via Tracer Yeoman as indicated on the routing sheet.

Correspondence requiring action will be routed first, if the Flag Secretary deems it necessary, to the Action Officer, the latter being responsible that other interested officers are consulted before letter or endorsement is prepared.

Correspondence routed for information should not be placed in the routing cabinet for an officer temporarily absent until it has been noted by all other officers checked for information.

Ordinarily, when necessary data is available, action should be completed on correspondence within forty-eight hours after receipt.

Any officer desiring to hold correspondence, in order to compile data, reports, etc., should return the correspondence to the files and draw it from the files when needed.

A list will be furnished each officer on Tuesday showing all correspondence which the records of the Flag Office indicate has been in his possession since the preceding Tuesday. Officers indicated as being charged with the correspondence should check this list and mark in the column provided the items which they have in their possession.

(h) *Yeoman Concerned*. Prepares outgoing letter or endorsement as directed (See Article 504).

Keeps outgoing basket of officer for whom he works empty—delivering routed correspondence on which action is required or taken to Tracer Yeoman.

Insures that officer concerned has initialed in the space provided on the routing sheet and that notation is made when action is taken by a method other than a letter or endorsement.

(i) *Tracer Yeoman*. Delivers through the routing cabinet, correspondence on which routing is incomplete.

Scrutinizes all correspondence on which routing is complete to see that no correspondence requiring action goes to file and that officers concerned have initialed in the space provided on the routing sheet.

The correspondence to be finally cleared by the Tracer Yeoman falls into three classes:

(1) Incoming letters on which no action is required, or on which dispatch action was taken and so noted on the original routing slip.

(2) Incoming letters which were endorsed or are the basis for additional correspondence.

(3) Letters originated by the Commander-in-Chief with no incoming correspondence attached.

When correspondence described by (1) above has completed its routing the Tracer Yeoman will destroy his duplicate routing slip, initial in the space pro-

vided on the original routing slip under "Tracer," and pass this correspondence to the File Yeoman. However, if there is a cross file, the duplicate routing slip shall not be destroyed but will be attached to the correspondence for filing.

When correspondence described by (2) above has completed its routing the Tracer Yeoman will destroy his duplicate routing slip (unless it has a cross file number) initial in the upper right-hand corner of the file copy of the Commander-in-Chief's action, and on the original routing slip, and pass this correspondence to the File Yeoman.

**504. Outgoing Mail.**

(a) *General.*—Dates and serial numbers will be stamped by the Outgoing Mail Yeoman after the letter is actually signed. The original sheet of correspondence of a personal nature shall not bear a file or serial number. The originator's yeoman shall address envelopes for this class of correspondence.

The use of staples in fastening correspondence should be limited to printed or mimeographed letters of two or more pages. Staples shall then be used in the upper left hand corner.

Letterhead paper shall be used for the original sheet and all copies of correspondence.

(b) Correspondence for signature shall be prepared and assembled as follows:

(1) Sheets shall be arranged in numerical order from bottom to top, i. e., page one on the bottom, last page or endorsement on top. Enclosures to the entire correspondence shall be in alphabetical sequence, fastened directly behind the letter or endorsement to which it is an enclosure and securely fastened by brass fasteners, with ends turned over the face of the sheet. When enclosures are too bulky to be attached, then a separate slip with notation should indicate that the enclosures have been temporarily retained by the originator.

(2) In preparing endorsements, reference should be made to the basic correspondence as prescribed by Fleet Regulations.

(3) In preparing a letter, the original shall: Indicate the distribution, acknowledgement (if desired), signature, and obtain file number from file yeoman or, in the case of a reply, assign same file number as has been placed on the routing sheet of the incoming letter plus the originator's symbol number.

Ascertain that there is a:

(A) Green file copy (pinned on top of a complete copy of the incoming correspondence with the routing sheet on the bottom.)

(B) Yellow information copy. The day following the mailing of correspondence, information copies shall be bound and routed to all officers. After completion of routing, these copies shall be destroyed.

(C) Pink Copy. This is retained by the tracer yeoman until the correspondence is signed, after which it is sent to the outgoing mail desk and subsequently returned to the originator bearing the date and serial number.

(4) The original and all copies shall show in the upper right-hand corner the initials of the yeoman typing the letter and the originator's symbol number immediately following the file number.

(5) Correspondence shall be clipped together with paper clips in the following order: Original and copies for information addresses; file copy (green); information copy (yellow); pink copy. The green copy shall extend at least an inch to the right side of the correspondence to permit the initials of the originator (indicated by red diagonal mark) as well as other interested officers (indicated by pencil diagonal mark).

(c) *Correspondence to be printed.* Four copies shall be typed, original on green paper, copy on white bond for the printer, one yellow information copy and one pink copy. The word "PRINT" shall be typed on the left side of the last page, opposite the signature, and immediately over the word "DISTRIBUTION." When the green copy (original) has been signed, it will pass through the outgoing mail desk to be numbered and dated, and for the preparation of a printing order.

(d) *Correspondence to be mimeographed.* In order to reduce the amount of typing required for letters that will be mimeographed, the yeoman doing the typing will insert a green sheet provided for this purpose under the stencil when cutting the latter. When this impression copy has been signed by the Admiral or Chief of Staff, the Flag Secretary affixes his authentication, using a stencil stylus, and the stencil and impression copy are then delivered to the Outgoing Mail Yeoman for entry of date and serial number, mimeographing, (done by the Mimeograph Yeoman), and ultimate mailing. (Article 504 (j) (10)).

(e) *Multiple Address Letters.* Multiple address letters are those addressed to more than one office. The original of the multiple address letter shall be

made on green paper, and one onion skin copy shall be made for each addressee. These onion skin copies shall be checked off by the yeoman preparing the correspondence, an arrow check being placed immediately after the office addressed. All action copies of multiple address letters shall be authenticated by the Flag Secretary. The original (green), arranged in the manner prescribed in Art. 504 (b) (5), will be signed by the Commander-in-Chief or Chief of Staff and is kept as the file copy.

(f) When a letter is required to be rewritten, the pink copy shall be removed from the file on the tracer desk and all copies of the letter as originally prepared shall be immediately destroyed except the one copy on which corrections have been indicated. This copy shall be attached to the pink copy of the letter as rewritten and will be returned with the pink copy to the yeoman of the officer taking action. With the exception of recommendations on a subject made by various staff officers, these instructions shall also apply to rough drafts of letters or endorsements. Copies of letters on which corrections have been made and rough drafts of letters or endorsements shall not be filed in the correspondence files unless retention in the file is indicated.

(g) Letters that have not been signed should be returned to the tracer yeoman in order that the latter may inform the originator accordingly, meanwhile returning to him the pink copy.

(h) When correspondence is signed by other than the Commander-in-Chief, the following words shall be typed immediately below the name of the officer signing:

| SIGNED BY                                                                       | SIGNATURE | Typewritten                                         |
|---------------------------------------------------------------------------------|-----------|-----------------------------------------------------|
| Chief of Staff                                                                  | —         | NAME<br>Chief of Staff                              |
| Operations Officer when Chief of Staff is absent                                | —         | NAME<br>Acting Chief of Staff                       |
| Flag Secretary or Flag Lieutenant (Authentication of multiple address letters). | —         | NAME<br>Flag Secretary      NAME<br>Flag Lieutenant |
| Flag Secretary or Flag Lieutenant (for single address letters).                 | —         | NAME<br>by direction                                |

(i) When information addressees are directed to take action by copy of letters or endorsements, such copy shall be authenticated by the Flag Secretary.

(j) When correspondence is ready for signature the following procedure shall be followed:

(1) Deliver to Tracer Yeoman.

(2) *Tracer Yeoman.* Uses the pink copy for tracing correspondence circulating through the staff for initialing. When correspondence is initialed by all officers except Flag Secretary and Chief of Staff, delivers to Chief Yeoman in Charge.

(3) *Chief Yeoman in Charge.* Checks correspondence to see that it is complete and in agreement with regulations, policies and current instructions.

(4) *Flag Secretary.* Checks correspondence to see that it is complete and that it is in agreement with regulations, policies and current instructions.

Brings to the attention of officers concerned any conflicting or inconsistent orders or instructions.

Authenticates all multiple address letters, and copies of letters or endorsements directing action. Signs single address letters.

Releases printed and mimeographed letters for mailing.

(5) *Tracer Yeoman.* Removes correspondence from the outgoing basket of Flag Secretary.

Delivers correspondence signed "By direction" to the Outgoing Mail Yeoman, attaching pink.

Places unsigned correspondence in the Chief of Staff's box in the routing cabinet and indicates by notation on pink copy date and time that it has been placed in Chief of Staff's box in the routing cabinet for signature or initialing.

(6) *Chief of Staff's Orderly or Yeoman.* Removes correspondence from Chief of Staff's box in the routing cabinet, and delivers to Chief of Staff for initials or signature.

Removes correspondence from outgoing basket of Chief of Staff and delivers to Tracer Desk.

(7) *Tracer Yeoman.* When correspondence is initialed by Chief of Staff, places it in Commander-in-Chief's box in the routing cabinet, indicating by

notation on pink copy date and time that it has been placed on Commander-in-Chief's box for signature. Delivers mail signed by the Chief of Staff to the Outgoing Mail Yeoman, attaching pinks.

(8) *Flag Secretary*. Removes correspondence from the Commander-in-Chief's box in the routing cabinet. Sees that all correspondence is initialed by Chief of Staff and delivers to the Commander-in-Chief for signature.

(9) *Tracer Yeoman*. When correspondence has been signed by the Commander-in-Chief removes pink copies from tracer file, and attaches same to the letters to which they belong; delivers them to Outgoing Mail Yeoman.

Makes daily check on pink copies where letters are outstanding.

(10) *Outgoing Mail Yeoman*. Insures that correspondence is complete; enclosures, if any, attached; properly arranged (See Art. 504 (b)); initialed by Flag Secretary; signed; that there are sufficient copies for all action and information addressees; that each copy of CONFIDENTIAL correspondence is so marked; that information and pink copies have been prepared where necessary.

Returns correspondence which is found to be delinquent in any of the above respects to the Chief Yeoman in Charge for corrective action.

Stamps serial number (except on personal letters) and date on original and all copies; stamps date of mailing on file information and pink copies, and initials file copy.

Provides for the registry of all records of proceedings of Naval Courts and Boards, all SECRET and CONFIDENTIAL correspondence and other correspondence as directed. Maintains a record of all registry numbers and records the serial file number or other description of the correspondence for which each register number is used.

Is responsible for the correct addressing of envelopes for all mail passing over the Outgoing Mail Desk and for its being placed in the mail properly protected to insure its delivery free from damage by normal handling. In connection with the former, he shall keep himself informed of the location and prospective movements of all ships and transfers of all Flags.

Requests instructions from Flag Secretary regarding mailing of multiple addressed letters, operation orders, plans, etc., to Commanders who are absent when several of the vessels under their command are present with the Commander-in-Chief.

Under the direction of Flag Secretary determines the distribution and number of copies necessary to be printed or mimeographed using "U. S. Fleet Mail Distribution Lists" or such other distribution as may be assigned. Prepares Distribution Memorandum on Printing Orders.

Prepares Printing Order and forwards with White copy of the letter to be printed to print shop. The print shop shall send the Printing Order with each proof to the yeoman designated to proof-read it. This yeoman shall initial in the space provided for each proof and when correct in all respects and considered ready for printing the yeoman shall refer the final proof and the printing order to the originating officer, who shall, if he approves for printing, initial on the Printing Order in the space "Read and found correct". The Flag Secretary will release all letters for printing and distribution. The green (file copy) is held by the Outgoing Mail Yeoman until the letter is printed and mailed, when it is given to the Tracer Yeoman for necessary action. Yellow and pink copies, are handled in the same manner as for other outgoing correspondence. The date sent to the print shop, instead of the date of mailing will appear on the file copy. When distribution is made and entered in the outgoing mail log, a printed copy with original "Printing Order" securely attached thereto, shall be sent to file.

**NOTE:** The Mimeograph Yeoman will mimeograph the required number of copies shown on the Distribution Memorandum.

A copy of each mimeographed letter originating in the office of the Commander-in-Chief will be marked "INFORMATION COPY", and will be handled in the same manner as other "Information" copies.

When the Distribution Memorandum is released for mailing by the Flag Secretary, the Outgoing Mail Yeoman mails the printed or mimeographed letter and furnishes the Tracer Yeoman with the necessary copies for a Staff Distribution; stamps date of mailing and initials on the Distribution Memorandum; sends file copy to the Tracer Yeoman with the Distribution Memorandum securely attached thereto.

Assigns and maintains a record of serial numbers, in their proper numerical sequence, of Operation Plans, Operation Orders, U. S. and Pacific Fleet Letters, Memoranda, Notices, etc.

Insures that when required, URGENT tags are securely attached to the correspondence, and to the outside envelope. (See Article 502).

Removes any SPECIAL NOTICE tags before mailing.

Handles all guard mail, incoming and outgoing, and will promptly inform Flag Secretary of any variation from the scheduled trips called for by Fleet Regulations. Logs registered number, originator and addressee of all incoming registered guard mail. Delivers incoming mail to Incoming mail Yeoman, and has outgoing mail ready for Guard Mail Petty Officers at the designated times. When the ship is at the Navy Yard, is responsible that necessary guard mail trips are made to the Commandant's Office.

At the end of each day, checks numerical sequence and enters in the outgoing mail log, loose leaf form, all correspondence mailed that day. This log shall be a permanent record of correspondence mailed and will show:

- (1) Serial number of letter.
- (2) Cincpac file number of jacket in which filed.
- (3) To whom sent.
- (4) Date of letter.
- (5) Subject.

The above data shall also be entered for all mimeographed and printed letters dated and serialled that day, even though they are not mailed on that day. A note "Mailed on \_\_\_\_\_" shall be made in "Subject" column of log and the date of mailing inserted on the date the mimeographed or printed letter is mailed.

Confidential and Secret correspondence will be so designated in the log and, in the case of secret correspondence, the subject will not be entered.

When correspondence has been entered in the log, gives file copies to Tracer Yeoman, pink copies to the yeoman of the officer taking action as indicated by the officer's number (not the initials of the yeoman).

Arranges yellow information copies in numerical sequence and prepares routing sheets next morning and delivers to Chief Yeoman in Charge.

(11) *Tracer Yeoman.* Takes appropriate action being governed by the preceding provisions of this Article.

(12) *File Yeoman.* Handles correspondence as directed in Article 506-1.

**505. FILE NUMBERS.** The file yeoman will assign file numbers to all correspondence. If the File Yeoman is not on duty or in the office when URGENT mail is received, such mail shall be handled as directed in Article 502. In assigning file numbers to correspondence, the File Yeoman shall use the U. S. Navy Filing Manual as the basis for filing arrangement. Correct file numbers are essential in order to locate correspondence readily. A new jacket shall be prepared for each new number so assigned.

**506.** In addition to the standard file numbers assigned to outgoing correspondence, the originator's symbol number and a serial number will be used. The originator's symbol number shall be placed after the file number and enclosed in parenthesis. The serial number will appear after the word "Serial" and will not be in parenthesis. New serial numbers will be started on each January 1st, and will run throughout the calendar year. The first figure of all CONFIDENTIAL serial numbers shall be a "0".

**506-1.** The File Yeoman shall:

Scrutinize correspondence to see that none goes to file unless complete action has been taken; that routing sheet has been initialed by all officers and the Tracer Yeoman and that original routing sheet is attached to correspondence.

Prepare correspondence for file, retain spare copies in the spare copy file when action is so indicated on routing sheet.

File correspondence. CONFIDENTIAL correspondence must actually be placed in the jackets by the File Yeoman himself. He may utilize his assistants for filing correspondence of a lower classification.

Check off, in colored pencil, all entries in the incoming and outgoing mail logs to see that all mail received and originated has been checked to file. Undue delays shall be reported after check has been made with the Tracer Yeoman.

Keep an up-to-date Index of the files.

Cooperate with the Tracer Yeoman in preparing the Weekly List of Outstanding Correspondence.

**507.** Where correspondence treats of more than one subject, it shall be filed under the principal subject, and cross-index tracers prepared and filed under the other subjects treated or referred to. Cross-index tracers shall be printed on white paper.

**508.** Yeomen preparing correspondence shall type the file number appearing on the routing sheet, the symbol number of the originator in parenthesis and

the word "Serial" below the file number after which the serial number will be entered by the Outgoing Mail Yeoman.

**500. FILING OF PRINTED MATTER.** Fleet Letters, Memoranda, Notices, etc., must be kept in an unbroken serial titled "file for ready reference" in addition to being placed in the subject file jacket. Care must be taken to make cross-index files complete and to make sure that signed copy is filed.

None of the above matter will be removed from the files merely because it has been cancelled or superseded, but a notation to this effect shall be made on the file copy showing reference numbers of the dispatch or letter cancelling and superseding it. Extra copies held for issue will, however be destroyed. Whenever the number of spare copies of a particular publication is low, or a request for spare copies is large, the requests will be referred to the Flag Secretary. Normally requests from ships should be handled by Type commanders.

**510. WEEKLY CHECK OF OUTSTANDING CORRESPONDENCE.** On Tuesdays of each week a sight check will be made by the Tracer Yeoman of all outstanding correspondence that records indicate has been in the possession of an officer since the preceding Tuesday, and a list prepared for each such officer showing correspondence thus outstanding. The duplicate routing sheet will be used as a "tickler" tracer for checking outstanding letters in the office. A notation will be made on the outstanding correspondence sheet showing the date the check was made and the officer who acknowledges having each piece of correspondence in his possession on that date.

**511.** If, after making a thorough canvass of the offices, no trace can be found of a letter that has not moved in its routing from one officer to another within the past week, the outstanding correspondence sheet will be delivered to the Flag Secretary with a report of the search.

**512.** Lists of outstanding correspondence checked to the Admiral and Chief of Staff will be delivered to the Flag Secretary.

#### SECTION VI.—CONFIDENTIAL AND SECRET CORRESPONDENCE

**601.** Confidential mail shall be handled in accordance with Article 410 and the following:

(a) All correspondence classified as **CONFIDENTIAL** will have the word "**CONFIDENTIAL**" stamped and typed, or printed in the upper left-hand corner, under file number, of each sheet.

(b) All routing sheets for confidential correspondence shall be printed on blue paper and are plainly marked "**CONFIDENTIAL**".

(c) All confidential correspondence will be filed in separate filing cases known as "the **CONFIDENTIAL** files".

(d) All confidential correspondence placed in U. S. or Guard Mail will be placed in double envelopes with the inner envelope stamped "**CONFIDENTIAL**". Confidential correspondence forwarded by U. S. Mail or Guard Mail must be registered.

**602. SECRET** correspondence shall be handled in accordance with the following instructions:

(a) *Storage and Handling.* (1) **SECRET** correspondence files shall be kept in a safe under the immediate supervision of the Secret Mail Officer; except correspondence regarding War Plans which may be retained by the War Plans Officer, and that concerning Communication Intelligence which may be retained by the Fleet Security Officer.

(2) The yeomen assigned to the War Plans Officer and the Secret Mail Yeoman are authorized to handle secret correspondence. Secret correspondence shall not be typed or handled by any enlisted personnel other than the yeoman who have been so authorized. Secret correspondence must not be permitted to pass out of the personal custody of staff officers at any time.

(b) *Incoming Mail.* (1) The Secret Mail Officer, or in his absence, his authorized relief, the duty communication officer, will receive all incoming Officer Messenger Mail, and show same to the Flag Secretary or in the latter's absence to the Staff Duty Officer.

(2) Incoming mail marked **SECRET** will be handled by the Secret Mail Officer subject to instructions by the Flag Secretary.

(3) The Secret Mail Yeoman, under the supervision of the Secret Mail Officer, shall log all incoming **SECRET** correspondence, attach secret routing slips, and deliver to the Flag Secretary for routing.

(4) The Secret Mail Officer or the Secret Mail Yeoman shall deliver the **SECRET** correspondence to the staff officers concerned. Receipts shall be obtained for all

SECRET correspondence left in the custody of officers. Officers not having authorized secret stowage shall not retain correspondence overnight.

(c) **Outgoing Mail.** (1) An officer desiring to originate a SECRET letter shall prepare a rough draft in long hand or dictate the letter to a yeoman authorized to handle secret correspondence. The letter shall be typed and delivered by personnel authorized to handle secret documents to staff officers concerned for initialling and signature.

(2) The file copy of outgoing secret correspondence prepared by the War Plans Officer may be retained in his files. In such cases a copy of the letter shall be delivered to the Secret Mail Officer for filing in the secret correspondence files.

(3) SECRET correspondence will be forwarded in accordance with Article 76(4), U. S. Navy Regulations.

(4) Outgoing SECRET mail will be marked with an identification number of five figures preceded by CINCPAC or CINCUS as appropriate. Franked cards bearing a return receipt shall be enclosed with each letter and will indicate the identity of the letter by both the serial and shipment numbers.

#### SECTION VII. LIBRARIES

701. Every effort will be made to maintain an office library of official publications required for reference by members of the Staff. Officers are requested to advise the Flag Secretary of publications they desire to have ordered.

The office library consists of various books and pamphlets such as:—Annual Reports, Regulations, Bureau Manuals, Registers, Directories and miscellaneous publications. The library will be added to as publications are received from time to time. Any publications carried in the library which have become obsolete will be submitted to the Flag Secretary, who will issue the necessary instructions as to their disposition.

Each publication is listed and assigned a serial number, and filed according to that number.

The File Yeoman will be responsible for the proper classification and filing of the library.

702. The Commander-in-Chief's Library is maintained under the supervision of the Fleet Public Relations Officer. It consists principally of non-fiction although some works of fiction may be included. The books are kept in book cases in the Admiral's and guest cabins and elsewhere as necessary. The Fleet Public Relations Officer will publish to the staff a list of books on hand and lists of additions as received. All members of the staff are invited to make use of the facilities afforded by this library. It is desired to augment and improve the Commander-in-Chief's library. To this end suggestions as to books which should be obtained are requested from all members of the Staff. Keys to the bookcase of the Commander-in-Chief's Library will be kept in the key locker in the flag office.

#### SECTION VIII. RAPID COMMUNICATIONS OF COMMANDER-IN-CHIEF, UNITED STATES PACIFIC FLEET

##### PART A—GENERAL

801. *Drafting of Despatches.* (a) In order that the Commander-in-Chief may set an example of propriety in drafting of despatches, all officers of the Staff will familiarize themselves with the provisions of Communication Instructions relative to that subject. Communication watch and coding board officers should bring to the attention of originating officers all violations of these instructions and recommend necessary corrections. In no case will a change in a despatch be made without the consent of the originating officer.

(b) An officer originating a non-classified or restricted despatch will have the message typed by his own yeoman, or duty seaman. After it has been initialed by the originating officer it will be delivered to the communication watch officer who will obtain the initials of the information and releasing officers and supervise the transmission of the despatch.

(c) An officer originating a classified despatch will write or type the message on an outgoing classified despatch blank. After initialing by the originating officer it will be delivered to the communication watch officer who will obtain initials of the information and releasing officers, have the despatch encrypted and supervise its transmission.

(d) All despatches will normally be released only by the Admiral or Chief of Staff. In case of emergencies or special circumstances, despatches may be released by other members of the Staff.

(e) An officer desiring to have a message passed to supplementary addresses for action or information will inform the communication watch officer who will prepare the necessary despatch or procedure signal and obtain initials of originating, information and releasing officers.

**802. Security of Communications.** (a) Visual methods or landline will be used for transmission of despatches whenever practicable. *The use of radio for transmission of administrative despatches shall be kept at a minimum.*

(b) If a delay in the delivery of a despatch is acceptable, such message should be sent by despatch mail (mailgram). Mailgrams should be used particularly for transmission of despatches to information addresses when it is desirable that their radio calls do not appear in the heading of the radio despatch.

**803. Distribution of Despatches.** (a) Copies of all outgoing and incoming non-classified and restricted administrative despatches are provided for the Admiral, Chief of Staff, Operations Officer, Staff Duty Officer, Flag Secretary and Communication Officer. Outgoing despatch books also contain a copy for the originating officer. Incoming despatch books also contain an action copy and two information copies which are available to any member of the Staff who may request such copies from the communication orderly. The Communication Officer's copies of despatches will be placed on a file in the Staff Office where they will be available for perusal by all members of the Staff.

(b) Only one copy of outgoing and incoming classified administrative despatches (other than restricted despatches) will be made. Paraphrases of secret and confidential despatches shall be kept at a minimum and will be furnished only at the specific request of officers, and must be returned to the coding room for burning when no longer needed. Paraphrases of secret messages will be furnished only to the action or originating officer, and shall be receipted for in the same manner as registered publications.

(c) Only four copies of the translations of tactical despatches will be made for distribution to appropriate boards.

**804. Routing and Delivery of Despatches.** (Internal) (a) Correct and complete routing of despatches is a function of the communication watch officer.

(b) The Staff Duty Officer should see all despatches when the action officer is not on board. In such cases instructions will be requested by the orderly from the Staff Duty Officer as to whether the latter will accept responsibility for the message or whether it should be held for the action officer.

(c) Whoever initials the message for the action officer and accepts the action copy assumes full responsibility for taking the required action and for informing the designated action officer of the action taken.

**805. Movement Reports.** (a) The movement report sheets and cards will be corrected and maintained by communication personnel under the supervision of the communication watch officer designated as Movement Report Officer.

(b) Movement reports of the flag plane will be originated by the pilot making the flight and will be prepared and released by the flagship.

**806. Fleet Coding Board.** (a) The fleet coding board will consist of four officers of the Staff and five officers detailed by the Commanding Officer of the Fleet Flagship.

(b) The fleet coding board will be charged with encrypting and decrypting messages sent or received by the Commander-in-Chief or the Fleet flagship, as directed by the Fleet Communication Officer.

(c) The Communication Security Officer will be responsible for the organization and training of the fleet coding board.

**807. Shutting Down Transmitters.** Except in case of emergency, permission for securing transmitters must be obtained from the Fleet Communication Officer.

#### PART B—INSTRUCTIONS FOR COMMUNICATION PERSONNEL

**808. Administrative Communication Organization.** (a) The following stations will normally be manned:

- (1) Main radio room;
- (2) Signal bridge;
- (3) Main communication station;
- (4) Flag communication office;
- (5) Coding room.

(b) The communication watch will normally consist of:

- (1) Communication Watch Officer
- (2) Coding Board Officer
- (3) Communication Supervisor

- (4) Communication Yeoman
- (5) Communication Orderly
- (6) Radio Supervisor
- (7) Signal Supervisor
- (8) Radio Operators
- (9) Signalmen

(c) The communication watch officer will stand a day's duty, relieving the watch at 0800. He will inform his relief regarding unfinished business, effective organization, frequency plan in effect, circuits up, visual signalling conditions, and all pertinent information necessary for the proper conduct of his duties.

(d) The coding board officer will stand a day's duty, relieving the watch at 0800. He will inform his relief regarding unfinished business and all pertinent information necessary for the proper conduct of his duties.

(e) Relief Communication Watch Officers. The first and second relief communication watch officers will maintain a continuous watch in the Flag Communication Office during working hours. The second relief communication watch officer will stand watch for 0800 until after lunch. The first relief communication officer will stand watch from after lunch until 1530, at which time he will be relieved by the communication watch officer with the day's duty. Other relief communication watch officers are available for duty when the traffic situation requires.

(f) The first and second relief coding board officers will maintain a continuous watch in the Coding Room during working hours. The watches will correspond to those stood by relief communication watch officers. Other relief coding board officers are available for duty when the traffic situation requires.

(g) Communication Supervisor. The communication supervisor will stand a day's duty under the administrative organization in the Main Communication Station. He will act as an assistant to the communication watch officer. The time of relieving and hours on watch will be the same as those prescribed for the communication watch officer. The watches for the communication supervisors will be arranged by the Senior Chief Radioman and will be approved by the Assistant Communication Officer.

(h) The radio and signal supervisors shall maintain continuous watches in the Main Radio Room and Signal Bridge respectively. The watches for supervisors will be arranged by the leading radio and signal chief petty officers and will be approved by the flagship's Radio and Signal Officers, respectively.

(i) Communication Yeoman. Communication yeomen will maintain a continuous watch in the Flag Communication Office. The watches will be arranged by the Senior Communication Yeoman and approved by the Assistant Communication Officer.

(j) The flagship will provide sufficient communication orderlies to permit a continuous watch in the Flag Communication Office. When the flagship is underway a continuous watch will also be maintained on the Flag Bridge. Orders for the communication orderlies will be promulgated by the Assistant Communication Officer.

(k) Watches prescribed in the preceding articles will not be exchanged without permission of the officers concerned.

**809. Tactical Communication Organisation.** (a) The following Stations will normally be manned:

- (1) Main Radio Room;
- (2) Signal Bridge
- (3) Main Communication Station;
- (4) Flag Communication Office
- (5) Flag Bridge Radio Station;
- (6) Flag Bridge Communication Office;
- (7) Coding Room.

(b) The communication watch normally consists of:

- (1) Communication watch officer;
- (2) Coding board officer;
- (3) Two communication yeomen;
- (4) Two communication orderlies;
- (5) Communication Supervisor;
- (6) Radio Supervisor;
- (7) Signal Supervisor;
- (8) Radio Operators;
- (9) Signalmen;
- (10) Additional members of coding board as necessary.

(c) Communication watch offices shall maintain a continuous watch in the Flag Bridge Communication Office. Off-watch communication watch officers are available for handling administrative traffic and coding duties as the situation requires.

(d) Coding Board Officers shall maintain a continuous watch in the Coding Room. Off-watch coding board officers are available for coding duties as the situation requires.

(e) The Chief Radiomen assigned to the Flag Allowance shall maintain a day's duty watch in the Main Communication Station, and a continuous watch as radio supervisor in the Flag Bridge Radio Station. This watch list may be augmented by qualified first class radiomen as required.

(f) The radio and signal supervisors shall maintain a continuous watch in the Main Radio Room and Signal Bridge.

(g) Communication yeomen shall maintain continuous watches in the Flag Bridge Communication Office and the Flag Communication Office.

(h) The flagship will provide sufficient communication orderlies to permit continuous watches in the Flag Communication Office and on the Flag Bridge.

**810. Duties of Communication Watch Officer.** (a) The communication watch officer is in direct charge of the communications of the Commander-in-Chief.

(b) The communication watch officer is responsible for the efficiency of the communication watch and will require an alert and military watch of all communication personnel.

(c) The communication watch officer is responsible for complete and rapid internal distribution of despatches and for the expeditious handling of outgoing traffic.

(d) The communication watch officer is responsible for the handling of encrypted despatches and the efficiency of the coding watch.

(e) The communication watch officer must be fully cognizant of the effective organization of the Fleet and is responsible for setting up and maintaining the communication channels required by the organization.

**811. Duties of Coding Board Officers.** (a) The coding board officer is in charge of the operation of the Commander-in-Chief's coding room.

(b) The coding board officer is responsible for expeditious, accurate and efficient encryption and decryption of despatches.

(c) The coding board officer must be fully cognizant of the rules for cryptographic security and will ensure strict observance of these rules in the handling of the encrypted traffic of the Commander-in-Chief.

(d) The coding board officer is responsible for the custody of the cryptographic aids, publications and devices in the coding room.

**812. Qualification of Communication Watch Officers and Coding Board Officers.** Upon reporting for duty communication watch officers and coding board officers must undergo sufficient instruction to qualify taking over a watch. To be considered qualified a communication watch officer or coding board officer must:

(a) have a working knowledge of Communication Instructions, Basic Communication Plan, Frequency Plans and Tactical Instructions;

(b) have a working knowledge of the call systems, the General Signal Book and Signal Vocabulary;

(c) have a thorough knowledge of the U. S. Fleet Staff Instructions and Staff Organization;

(d) have a thorough knowledge of the operation of the communication plant of the Fleet Flagship;

(e) be proficient in the use of all cryptographic systems held by the Commander-in-Chief.

(f) have a thorough knowledge of the principles and rules of communication and cryptographic security and their application.

**813. Routing of Despatches.** (a) Full and complete routing of despatches is a function of the communication watch officer. A despatch must be seen by every officer having a possible interest in it. Intelligent and complete routing requires a thorough knowledge of the Staff organization and a careful application of this knowledge to each despatch.

(b) Copies of dispatches concerning routine reports and requests should not be delivered to the Admiral. Such despatches will be marked "NN" and the Admiral's copy will be delivered to the Assistant Communication Officer for disposition.

(c) Classified despatches, other than restricted, shall be routed to the Chief of

Staff, Operations Officer, Communication Officer and Communication Security Officer in addition to action or information officers. The Chief of Staff shall be the first to see classified despatches and shall approve the routing prior to further delivery. When the Chief of Staff is not available despatches may be shown to the action officer prior to final approval of the routing.

(d) The flag is responsible for delivery of messages addressed to the flagship. Copies of such messages and copies of messages which are not addressed to, but which are of interest to the flagship, shall be delivered to the flagship communication office for internal distribution.

814. *Delivery of despatches.* (a) The communication watch officer will be responsible for requiring orderlies to deliver all messages promptly between 0800 and 2230 unless otherwise directed. Between 2230 and 0700 messages will be delivered to action and information officers when so directed by the communication watch officer. In case of doubt, messages will be delivered regardless of the hour. Priority despatches will always be delivered to the action officer immediately.

(b) Delivery of all traffic accumulated during the night will be completed by 0900 daily.

(c) Speed in delivery of despatches, especially those of priority precedence, is essential and the system must not be allowed to delay action. However, it is also essential that despatches be accurately written up. It is the responsibility of the communication watch officer to insure that a complete and accurate copy of all despatches is delivered to the proper officers as soon as possible.

815. *Emergencies.* (a) The communication watch officer should bear in mind that speed in the delivery of a message indicating an emergency is the primary consideration.

(b) Make use of the telephone as well as messengers. Above all, do not let the system delay action.

(c) Call relief watches as necessary to assist in handling the situation and retain them on watch as long as required.

(d) Be prepared to handle any emergency at night. Before turning in leave clear and definite instructions to be notified immediately in the case of any unusual occurrence.

816. *Encrypted Despatches.* (a) If time permits, the encryption of each outgoing encrypted despatch will be checked prior to transmission by an officer other than the one who encrypted the despatch. If time does not permit the encryption to be checked prior to transmission it will be checked as soon as possible thereafter.

(b) All intercepted encrypted despatches will be delivered to the coding room where they will be decrypted for information if traffic conditions permit.

817. *Intercepted Traffic.* Intercepted traffic of possible interest to the Commander-in-Chief will be written up and distributed for information. Each copy will be marked "Written up for Cincpac information."

818. *Radio Logs.* Radio logs shall be kept in accordance with Articles 1413-1417, Communication Instructions, 1937. The communication watch officer will examine radio logs carefully during his watch for despatches addressed to the Commander-in-Chief, for violations of communication instructions, for intercepted despatches of possible interest to the Commander-in-Chief, and to ascertain that circuit discipline is being maintained.

19. *Transmitting and Receiving Data.* Transmitting and receiving data will be recorded by the radio operator or signman as indicated below:

#### *Radio*

- (1) Time of Delivery or Receipt
- (2) Frequency
- (3) Operator's sign.

#### *Visual*

- (1) Time of Delivery or Receipt
- (2) System
- (3) Signman's sign.

820. *Communication Files.* (a) General File. The general file includes one copy of each message transmitted or received. Service messages (except despatches) shall be stapled to the message to which they refer. Procedure signals not classified as service messages and messages not bearing time groups shall

be filed according to time of receipt or delivery. Classified mailgrams (other than restricted) shall be filed in the classified files and a tickler filed in the general file.

(b) Shore station Schedule Files. A copy of each message received by I or F method shall be filed in these files. A separate file shall be maintained for each shore station. Messages shall be filed by shore station serial numbers.

(c) Movement Report File. A copy of each notice or modification to the Ship Movement Report Sheets shall be placed in this file.

(d) Flag Files. The flag file includes one copy of each message originated by the Commander-in-Chief, addressed to the Commander-in-Chief, or written up for information of the Commander-in-Chief. These messages shall be filed in chronological order of time groups under the headings incoming and outgoing.

(e) Alnav File. A copy of each alnav message shall be placed in this file in order of alnav number.

(f) Fleet File. A copy of each fleet message shall be placed in this file in order of fleet number.

(g) Classified Files. Translations of classified despatches shall be placed in these files in order of coding room serial number. Secret despatches shall be placed in a file separate from the regular classified files.

(h) Tactical Translation Files. The tactical translation files contain one copy of the exact translation of each encrypted tactical despatch and one copy of each plain language tactical despatch. Messages will be filed in chronological order of date time groups.

821. *Composition and Standard Distribution of Message Books:*

#### SECTION IX. REGISTERED AND OTHER SECRET AND CONFIDENTIAL PUBLICATIONS

901. The Communication Security Officer is responsible to the Commander-in-Chief and to the Department for the custody of all registered publications.

902. A Communication Watch Officer, designated as Registered Publications Officer, is the custodian of registered and other secret and confidential publications. He shall receipt to the Fleet Communication Security Officer for all registered publications and for other important confidential, secret or restricted documents which must be accounted for by the Commander-in-Chief.

903. All registered and other important publications shall be catalogued to show their receipt and the safes in which they are stowed. No registered publication shall be issued except on written receipt of an authorized individual, which receipt shall be obtained at the time of issue. Other confidential or secret publications and important documents shall be handled in a similar manner.

904. In accounting for registered publications when preparing quarterly returns, each publication actually must be sighted by the officers taking the inventory.

905. Confidential and secret publications shall be kept only in authorized storages.

906. The Coding Board Officer on watch shall be responsible for the publications in the communication office safes. The Registered Publications Officer shall make a weekly inventory of the contents of the communication office safes.

907. The Registered Publications Officer shall be the only person regularly in possession of the combinations of safes containing un-issued registered publications, except for: (a) communication office safes; (b) War plans safe; (c) Security Officer's safe. In order that access to any safe may be had in the absence of the regular custodian, the Registered Publications Officer shall maintain in sealed envelopes the combinations of all safes assigned to the Staff. These sealed envelopes shall be kept in the communication office secret safe. Prompt report shall be made to the regular custodian of a safe whenever the envelope containing the combination thereto is opened for any purpose.

908. The Registered Publications Officer shall change the combination of all safes when he first receipts for the registered publications, and from time to time thereafter; particularly subsequent to the opening of a safe by another officer.

909. The Registered Publications Officer shall keep a record of all "shipment memoranda" to insure receipt of all new matter. He is responsible that all publications in his custody are corrected to date. It is desirable that members of the staff correct their own publications; but even though they do so, their work shall be checked by the Registered Publications Officer, who is responsible for their being corrected.

910. When not actually in use, war plans shall be stowed in the safes especially provided for them. Corrections to the war plans shall be made under the direction of the War Plans Officer. War plans shall not remain out of the above safes overnight. The War Plans Officer shall have custody of all War Plans in use by the War Plans Section, receipting for them to the Registered Publication Officer.

SECTION X. RELATIONSHIP BETWEEN FLAG AND SHIP.

*A — Station keeping and maneuvering of flagship.*

1001. When in formation, the flagship will normally maneuver in obedience to signal in the same manner as other vessels of the formation.

1002. The Commander-in-Chief will, however, as circumstances warrant, verbally direct the flagship to make changes in course, speed, or position.

1003. When, for any reason, the movements of the flagship are no longer to be directed by the flag, the Captain of the flagship will be so informed. He will be further informed as may be practicable, of the interval during which he is expected to act independently.

1004. When in position, the commanding officer is responsible for the station keeping, course, and speed of the flagship as circumstances dictate.

*B — Honors.*

1005. Responsibility for rendering proper honors lies with the flagship except that no gun salutes shall be fired without the authority of the Commander-in-Chief. Advance information as to honors shall be furnished by the Flag Lieutenant or Staff Duty Officer.

*C — Personnel*

1006. Officers of the Staff shall be careful to preserve the unity of command of the flagship. To this end they shall give no orders to the officer-of-the-deck except in an emergency. Personal requests may be made to subordinate officers of the flagship but official requests to the ship shall always be made direct to the Captain or Executive Officer. Such requests should be headed, "The Admiral desires you.-----Etc."

1007. The Flag Division Officer and the Division Officers will be the Communication Watch Officers or Coding Board Officers so designated.

1008. Leave and liberty for all men assigned special duty with the flag will be regulated by the Flag Secretary who will regulate it to conform as closely to that of the flagship, as flag work will permit. (See Article 407(a)). The flagship will regulate, control, and administer the following functions pertaining to flag personnel:

- (a) Reports, inspections, records and accounts, and advancements in ratings.
- (b) Personal requests (via Flag Secretary).
- (c) Disciplinary matters.
- (d) The division parade is assigned by the flagship. The Flag Division Officer is in charge at division parade. He reports to the Executive Officer at quarters, the number of unauthorized absentees.

1009. The following instructions govern the routine muster or flag personnel:

- (a) All flag personnel except the marines will muster at quarters with the flagship.
- (b) The marines assigned as flag allowance, will muster with the ship's marine detachment.

1010. Flag Division personnel will be stationed for abandon ship drill and will report at quarters for this drill unless excused. At fire and collision drills and general quarters, Flag division personnel will, when men detailed by the ship have failed to do so, secure ports, etc., in offices and other places devoted strictly to Flag activities. The Flag division, will not go to quarters for these drills except that radio and visual communications will actually be manned.

1011. The Flag division officer and the junior Flag division officers will conduct bag and bedding inspections of the Flag Division. The ship will provide berthing and messing for all personnel of the Flag Division. Flag Division personnel under the direction and supervision of the Flag Division Officer will clean all compartments dedicated exclusively to Flag use. Boat crews, under the direction of the Flag Lieutenant, will clean the barges and staff boats; the signal force, under the direction of the Flag Lieutenant, will clean the Flag Signal Bridge and Flag Conning Tower.

1012. All members of the Staff shall be assigned battle stations which will be manned when "General Quarters" is sounded. Enlisted men of the Flag not required for Staff Battle Stations will be assigned to ship battle stations. Enlisted men of the Flag will stand Flag condition and cruising watches, but will not stand ship cruising watches.

1013. The Flag Lieutenant is in direct charge of the boat crews, chauffeur, signal force, Admiral's mess attendants, boats, and automobiles (Band and

Orchestra is assigned), and is directly responsible to the Commander-in-Chief for their appearance, training and performance. The ship is responsible for maintenance and upkeep. The Flag Lieutenant, and, in his absence, the Staff Duty Officer, regulates the employment of the Staff motor boats and the Chief of Staff's barge when it is used as the Staff duty boat. He will prepare the schedules for all staff motor boats, prescribing the routine hours for securing and the places of securing away from the ship and will furnish information as to liberty of boat crews, after securing, to the Flag Secretary. The Officer-of-the-Deck will keep the Flag Lieutenant, and in his absence, the Staff Duty Officer, informed of the movements of the barges and the staff motor boats.

1014. The Commanding Officer of the Flagship shall be responsible that all safety precautions of the barge and staff gig be made as are required by existing regulations and instructions.

#### *D—Routine Reports*

1015. In order that the routine reports to the Commander-in-Chief may be complete and uniform, the Commanding Officer of the flagship is requested to promulgate the following instructions:

##### *(a) AT ANCHOR*

(1) The Officer-of-the-Deck shall make reports to Commander-in-Chief as follows:

- (a) The hours of 0800, 1200 and 2000.
- (b) Ship's Movements.
- (c) All marked changes in the weather.
- (d) Display of storm signals.
- (e) All occurrences worthy of notice.

(2) The Officer-of-the-Deck shall report salutes fired, exchanges of official calls, shifting of personal flags and movements of ships to the Commander-in-Chief, the Chief of Staff, and to the Flag Lieutenant, or in the absence of the Flag Lieutenant to the Staff Duty Officer.

(3) The Officer-of-the-Deck shall announce requirements for Staff attendance at the accommodation ladder by loud speaker: "Staff Gangway". Boat gongs shall also be sounded in number equal to the number of side boys required in attendance; e. g., for Admiral and Vice Admiral, eight (8) gongs; for Rear Admiral, six (6) gongs; and for Captain, four (4) gongs. The above procedure shall be carried out by the Officer-of-the-Deck in sufficient time for the Commander-in-Chief, the Chief of Staff, and the Flag Lieutenant, or, in his absence, the Staff Duty Officer, to reach the Quarter Deck and properly meet visiting officers. When the Commander-in-Chief is leaving the ship, the Officer-of-the-Deck will notify the Flag Lieutenant, or in his absence, the Staff Duty Officer, and the Chief of Staff, when the barge or automobile is alongside.

(4) The signal Bridge supervisor shall report all movements of ships getting underway, or coming to anchor, shifting of personal flags, exchange of salutes, and any occurrences worthy of notice to the Officer-of-the-Deck.

(5) When the Admiral has retired, the Officer-of-the-Deck shall make necessary reports to the Staff Duty Officer who will indicate what action is to be taken.

(6) During the night the Officer-of-the-Deck shall report to the Staff Duty Officer only such movements of ships as he deems necessary. The Signal Bridge supervisor will report to the Flag Lieutenant or to the Staff Duty Office, prior to 0800, any movements of ships occurring during the preceding night.

##### *(b) UNDERWAY*

(1) The Officer-of-the-Deck shall report to the Commander-in-Chief via the Staff Duty Officer on watch on the Flag Bridge:

- (a) The sighting of land, rocks, shoals, lighthouses, beacons, buoys, and discolored water.
- (b) All vessels or wrecks discovered.
- (c) All marked changes in the weather.
- (d) All occurrences worthy of notice.

If the ship is operating independently, the Officer-of-the-Deck shall make the above listed reports direct to the Chief of Staff and officer with the day's Staff Duty.

(2) If the Commander-in-Chief should be on the Navigating Bridge, the Officer-of-the-Deck will make reports direct to him, reporting thereafter to the Staff Duty Officer on watch.

(3) When underway making passage or outside the usual operating areas the Navigator shall report the ship's position at 0800, 1200 and 2000.

HEWITT INQUIRY EXHIBIT No. 35

My

SECRET

UNITED STATES PACIFIC FLEET  
U. S. S. PENNSYLVANIA, Flagship

CinCpac file no.  
A16/WPPac-46(16)  
Serial 063W

PEARL HARBOR, T. H., July 25, 1941.

From: Commander-in-Chief, U. S. Pacific Fleet.  
To: Distribution List for WPPac-46.  
Subject: WPPac-46.

1. The subject publication is distributed herewith. This Plan has not yet been approved by the Chief of Naval Operations but may be placed in effect prior to the receipt of such approval.

2. Attention is invited to the Introduction, Chapter III, article 0301 of the Plan concerning the preparation of supporting plans by Task Force Commanders. At the present time it is desired that the following submit supporting plans for approval by the Commander-in-Chief:

Commanders Task Forces Two, Three, Six, Seven and Nine. (Commander Task Force Nine may, if he desires, delegate preparation of the plan to the Senior Officer of that type in the Hawaiian Area.)

The Commanders of the Naval Coastal Frontiers addressed may provide for the accomplishment of such tasks as are assigned them in this O-1 Plan by including suitable measures in their O-4 or other plans, rather than to prepare separate supporting plans for this O-1 Plan. The Commander Southeast Pacific Force (Commander Cruiser Division Three) is required to submit the plan for operations of that force after its detachment from the Fleet to the Chief of Naval Operations for approval.

3. Supporting Plans as required above will be submitted for approval of the Commander-in-Chief prior to 20 August 1941. After approval they will be incorporated with the Fleet Plan as annexes as prescribed by the Commander-in-Chief.

4. Further annexes prepared by the Commander-in-Chief to cover operations to be undertaken in later phases of the war will be distributed when completed and approved.

5. Suitable binders for this Plan will be forwarded as soon as received by this command.

H. E. Kimmel.

|                                                             | Section 5. Task Force Seven (Undersea Force).....                                    | 45                     |
|                                                             | Section 6. Task Force Eight (Mining Force).....                                      | 48                     |
|                                                             | Section 7. Task Force Six (Logistic and Control Force).....                          | 49                     |
|                                                             | Section 8. Naval Coastal Frontiers.....                                              | 50                     |
|                                                             | Section 9. Tasks Jointly Applicable.....                                             | 51                     |
|                                                             | Chapter III. Phases Succeeding Phase IA.....                                         | 52                     |
|                                                             | Section 1. Task Force One.....                                                       | 52a                    |
|                                                             | Section 2. Task Force Two.....                                                       | 52b                    |
|                                                             | Section 3. Task Force Three.....                                                     | 52c                    |
|                                                             | Section 4. Task Force Nine (Patrol Plane Force).....                                 | 52d                    |
|                                                             | Section 5. Task Force Seven (Undersea Force).....                                    | 52e                    |
|                                                             | Section 6. Task Force Eight (Mining Force).....                                      | 52f                    |
|                                                             | Section 7. Task Force Six (Logistic and Control Force).....                          | 52g                    |
|                                                             | Section 8. Naval Coastal Frontiers.....                                              | 52h                    |
|                                                             | Section 9. Tasks Jointly Applicable.....                                             | 53                     |
|                                                             | Chapter IV. Execution of the Plan.....                                               | 54                     |
|                                                             | Chapter V. Initial Transfer of Units.....                                            | 54                     |
| <i>Part IV. Logistics:</i>                                  |                                                                                      |                        |
|                                                             | Chapter I. General.....                                                              | 56                     |
|                                                             | Chapter II. Transportation.....                                                      | 56a                    |
|                                                             | Chapter III. Hospitalization and Evacuation.....                                     | 56b                    |
|                                                             | Chapter IV. Prize Crews.....                                                         | 56c                    |
|                                                             | Chapter V. Salvage.....                                                              | 56d                    |
| <i>Part V. Special Provisions:</i>                          |                                                                                      |                        |
|                                                             | Chapter I. Time to be Used.....                                                      | 57                     |
|                                                             | Chapter II. Communications.....                                                      | 58                     |
|                                                             | Chapter III. Location of Commander-in-Chief.....                                     | 59                     |
|                                                             | Chapter IV. Tentative Operations Plans—Phase I and IA.....                           | 60                     |
|                                                             | Section 1. Phase I.....                                                              | 61                     |
|                                                             | Section 2. Phase IA.....                                                             | 68                     |
| [2b]                                                        | Annex I. Patrol and Sweeping Plan.....                                               | I-1 to I-11            |
|                                                             | Annex II. Marshall Reconnaissance and Raiding Plan.....                              | II-1 to II-9           |
|                                                             | Annex III. Communication Plan.....                                                   | III-1 to III-5         |

**U. S. PACIFIC FLEET OPERATING PLAN RAINBOW FIVE  
(NAVY PLAN O-1, RAINBOW FIVE)**

**INTRODUCTION**

**CHAPTER I. NAVY BASIC WAR PLAN (RAINBOW FIVE)**

0101. Navy Basic War Plan (Rainbow Five) is the directive which this U. S. PACIFIC FLEET Operating Plan (Rainbow Five) is designed to implement in so far as the tasks assigned the U. S. PACIFIC FLEET are concerned. As the Basic Plan is in the possession of most of the recipients of this Fleet Plan, only particularly pertinent parts of it will be repeated herein. These parts have to do chiefly with assumptions, concepts of enemy action, and tasks.

[4]

**CHAPTER II. FORMAT OF FLEET PLANS**

0201. This Plan follows the standard War Plan form of WPL-8 except for small variations made for the purpose of facilitating ready reference and quick dissemination on the outbreak of war. These, in brief, are as follows:

- a. In Part I the order of presentation is:

Chapter I—Task Organization.

Chapter II—Assumptions.

Chapter III—Information.

- b. In Part II are incorporated:

Chapter I —Task assigned by Basic Plan.

Chapter II—Phases; and specific tasks, arranged by phases, for accomplishing the assigned mission together with (in a few instances) decisions as to how they will be initially carried out.

c. In Part III the first three chapters each cover one phase. Within each of those chapters the tasks assigned to each task force are grouped in a separate section, except the naval coastal frontiers, which are grouped together. Pertinent special information and logistic instructions are placed with the tasks given therein or they are placed in an appropriate annex of this O-1 Plan. Where a task requires coordinated action with other task forces, reference is simply made to the annex which comprises the plan for such coordinated action.

d. Sections 1 and 2 of Chapter IV, Part V are tentative fleet operation plans which, when completed by the assignment of forces actually available at the time, and modified to meet any change in the conditions which have been visualized in this Fleet War Plan (U. S. Pacific Fleet Operating Plan—Rainbow Five), are considered suitable, together with the annexes, for placing into effect the measures of Phase I and Phase IA of this Plan. In other words Chapter IV, Part V could be omitted as the material therein is completely covered in the text that precedes [5] them. They are included, however, for the sake of clarity and in order to have immediately available tentative fleet operation plans in the conventional form with which all concerned are familiar.

e. Annexes I, II, etc., are plans, special plans issued by the Commander-in-Chief for a particular purpose. They may be made effective separately if occasion requires. The forces affected are indicated in the annex itself. Some of the annexes may ultimately be only guides for promulgation of an operation order by despatch or letter.

f. Supporting plans of subordinate commanders, which are prescribed in the next chapter, are to be appended as lettered annexes.

[6]

**CHAPTER III. SUBORDINATE PLANS**

0301. Subordinate plans to support this Fleet Operating Plan will be prepared as follows:

a. The Commanders of the forces designated in the Task Organization in Chapter I, Part I of this Plan, will prepare supporting plans for each assigned task, the accomplishment of which would be facilitated by further planning.

b. These supporting plans will be, as closely as practicable, in the standard form of operation plans, and will be incorporated as annexes to this Fleet Operating Plan. Where the nature of the tasks lends itself to such procedure, the plan for their accomplishment may be in the form of a single annex. Where such is not the case, as where tasks are assigned in one or more of the Commander-in-Chief's annexes, several plans may be required.

c. Letter designations for annexes are assigned to each commander as listed below. The first annex to be prepared will be designated as "Letter-1", the second as "Letter-2", etc. It should be noted that if the nature of a task assigned at present does not require the preparation of a subordinate plan by a commander, the annex assigned him below will be vacant.

|                                              |           |
|----------------------------------------------|-----------|
| Task Force One.....                          | A-1, etc. |
| Task Force Two.....                          | B-1, "    |
| Task Force Three.....                        | C-1, "    |
| Aircraft Scouting Force.....                 | D-1, "    |
| Submarines Scouting Force.....               | E-1, "    |
| Minecraft Battle Force.....                  | F-1, "    |
| Base Force.....                              | G-1, "    |
| Hawaiian Naval Coastal Frontier.....         | H-1, "    |
| Pacific Southern Naval Coastal Frontier..... | J-1, "    |
| Pacific Northern Naval Coastal Frontier..... | K-1, "    |

d. In the subordinate plans, forces should, in general, be listed in the task organization by organizations and approximate numbers of types rather than by name, unless it is known that specific units will be available.

e. If a commander considers it desirable to disseminate the considerations which have governed his decision and task assignments, he should append a brief and summarized estimate of the situation as an addendum to his plan. Auxiliary directives such as communication plans should also be appended as addenda to the task force commander's plan.

f. If the execution of the subordinate plans would be facilitated by still further preliminary planning, task force commanders should require their group commanders to submit plans for the accomplishment of the tasks assigned them in the task force commander's plans. These will be designated as addenda, but will not be incorporated with this Fleet Plan. They need be submitted only to the task force commander for acceptance.

g. If appropriate, each subsidiary plan will include in an addendum, the logistic requirements for carrying out the plan in so far as they can be foreseen. Such addenda may or may not be incorporated in the Fleet Plan, but, in every case, copies will be supplied to Commander Base Force.

h. The plans must be predicated upon realities and must provide for maximum possible utilization of forces presently available. Unless absolutely necessary, plans should not be based upon either conceptions or material not reasonably attainable. When material, equipment or personnel, not immediately available, is necessary for the successful execution of the measures to be undertaken, this shall be made the subject of an addendum. The commander concerned shall take immediate action to remedy the deficiencies, forwarding necessary correspondence through the Commander-in-Chief, U. S. Pacific Fleet. Thereafter the Commander-in-Chief shall be informed of corrections of these deficiencies as they occur.

i. Task force commanders will employ, in subdividing their forces, the decimal system of numbering subdivisions.

j. In numbering the pages of the plans which form annexes of this Fleet Plan, lower case letters to correspond to the letters assigned in subparagraph c above will be used. Thus the first page of the plan of Commander Task Force One will be "a-1".

[8]

#### CHAPTER IV. MOBILIZATION

0401. At the date of issue of this plan, the U. S. Pacific Fleet has virtually mobilized, and is operating, with intensive security measures, from the Pearl Harbor base. It is expected, therefore, that the major portion of the Fleet can be ready for active service within four days of an order for general mobilization. To provide for the contingency of M-day being set prior to the date on which hostilities are to open, the day of execution of this Plan is designated throughout the Plan as W-day. The day that hostilities open with Japan will be designated J-day. This may or may not coincide with W-day.

[9]

#### PART I. TASK ORGANIZATION, ASSUMPTIONS, INFORMATION

##### CHAPTER I. TASK ORGANIZATION

1101. The forces available to the Pacific Fleet are listed in the current Appendix II of the Basic Plan. In addition, the Commanders of the Pacific Southern, Pacific Northern, and Hawaiian Naval Coastal Frontiers, and the Commandants

of the Naval Stations Guam and Samoa are considered to be officers of the U. S. Pacific Fleet, and, through them, the local defense and coastal forces are subject to the orders of the Commander-in-Chief.

1102. For planning purposes, tasks are assigned to the commanders of the current task forces in the Fleet and to certain other commanders who are to become task force commanders as indicated in paragraph 1107 below.

1103. As of July 1, 1941, the major task forces, their commanders, and their broad tasks for which they are training, are as follows:

*Task Force One.*—for covering operations—Commander Battle Force in command.

*Task Force Two.*—for reconnaissance in force and raiding operations—Commander Aircraft Battle Force in command.

*Task Force Three.*—for landing attack operations—Commander Scouting Force in command.

1104. The subdivision of the Fleet which is made in paragraph 1107 below is designed to provide a flexible overall task organization from which may be drawn the task forces to accomplish the operations which can be visualized at this time. It must be realized that, for most operations, certain units must be transferred between task forces, some will be absent in the navy yard or for other reasons, and, in some cases, two or more task forces will be merged under the command of the senior officer concerned. Also many of the tasks assigned to a task force in this plan do not require the employment of the whole task force. In such cases the task force commander will utilize such units of his force as are required to accomplish the assigned task.

[10]

#### CHAPTER I. TASK ORGANIZATION

1105. It is not expected that the Task Organization as shown below will be effective throughout the campaign. Rather it will be the basis for making up particular task organizations for the various operations that may be required. It will be the specific plans and orders in effect at any given time which will show the task organizations at that time.

1106. Units assigned to a task force or to a task group in the normal organization that are subsequently assigned to another task force or task group will thereafter continue as an integral part of the last organization to which assigned until released by the commander thereof. The commanders mentioned will release such units as promptly as the situation at the time permits when the period of assignment to their commands has terminated or when further reassignment is made by competent authority.

[11] 1107. The Normal Task Organization for this Plan is as follows:

##### 1. TASK FORCE ONE Commander Battle Force

|                                  |        |
|----------------------------------|--------|
| Batdivs 2, 4.....                | 6 BB   |
| SARATOGA.....                    | 1 CV   |
| Crudivs 3, 9.....                | 5 CL   |
| Desflot 1 less Desrons 5, 9..... | 4 OCL# |
|                                  | 2 DL   |
|                                  | 16 DD# |
|                                  | 2 AD   |

(Includes Southeast Pacific Force of 2 OCL and 4 DD.)

##### 2. TASK FORCE TWO Commander Aircraft Battle Force

|                                                |       |
|------------------------------------------------|-------|
| Batdiv 1.....                                  | 3 BB  |
| Cardiv 2 less YORKTOWN.....                    | 1 CV  |
| Crudiv 5.....                                  | 4 CA# |
| Desflot 2 less Desrons 4, 8 and Desdiv 50..... | 1 OCL |
|                                                | 8 DD  |
|                                                | 2 AD  |

(Includes Atlantic Reinforcement of 4 CA.)

##### 3. TASK FORCE THREE Commander Scouting Force

|                                      |       |
|--------------------------------------|-------|
| Crudivs 4, 6.....                    | 8 CA  |
| Cardiv 1 less SARATOGA.....          | 1 CV  |
| Desrons 4, 5.....                    | 2 DL  |
|                                      | 16 DD |
| Minron 3, less Mindivs 5, 6.....     | 5 DM  |
| Available Transports Base Force..... | — AP  |
|                                      | — APD |

2d Marine Div less Defense Batt.

2d Marine Air Group.

[12] 4. *TASK FORCE NINE (Patrol Plane Force)* Commander Aircraft Scouting Force

|                                           |        |
|-------------------------------------------|--------|
| All units of Aircraft Scouting Force..... | 107 VP |
|                                           | 2 AV   |
|                                           | 2 AVP  |
|                                           | 4 AVD  |
| Utility Squadron from Base Force.....     | 10 VJR |

5. *TASK FORCE SEVEN (Undersea Force)* Commander Submarines Scouting Force

|                                                              |       |
|--------------------------------------------------------------|-------|
| All units of Submarines Scouting Force except Sound School.. | 30 SS |
|                                                              | 2 OSS |
|                                                              | 1 SM  |
|                                                              | 1 ODD |
|                                                              | 3 AS  |
|                                                              | 2 ASR |
|                                                              | 1 AM  |

6. *TASK FORCE EIGHT (Mining Force)* Commander Minecraft Battle Force

|                                          |      |
|------------------------------------------|------|
| All units of Minecraft Battle Force..... | 1 CM |
|                                          | 8 DM |

7. *TASK FORCE SIX (Logistic & Control Force)* Commander Base Force

|                                                          |              |
|----------------------------------------------------------|--------------|
| All units of Base Force except AP, APD and Minron 3 less | 8 DMS        |
| Divs 5 and 6 and 10 VJ.                                  | 4 AF         |
|                                                          | 6 AT         |
|                                                          | 1 AH         |
|                                                          | 13 AO        |
|                                                          | 2 AR         |
|                                                          | 1 ARD        |
|                                                          | 2 AK         |
|                                                          | 2 AE         |
|                                                          | 1 AKS        |
|                                                          | 10 AM        |
|                                                          | 4 AG         |
|                                                          | Utility Wing |

[13] 8. *TASK FORCE FOUR (Hawaiian Naval Coastal Frontier)* Commandant, Fourteenth Naval District.

Local defense forces.

9. *TASK FORCE FIVE (Pacific Southern Naval Coastal Frontier)* Commandant, Twelfth Naval District.

Coastal and local defense forces.

10. *TASK FORCE TEN (Pacific Northern Naval Coastal Frontier)* Commandant, Thirteenth Naval District.

Local defense forces.

[14] 1108. The Southeast Pacific Force and the Atlantic Reenforcement, composed as indicated above, will operate under the Commander-in-Chief, U. S. Pacific Fleet until specifically detached by the Chief of Naval Operations. They will not, however, be sent to such distances from Pearl Harbor as would prevent their arrival in the Canal Zone twenty-one days after their transfer is ordered.

[15] CHAPTER II. ASSUMPTIONS

Section 1. General Assumptions

1211. The general assumptions on which this Plan is based are:

a. That the Associated Powers, comprising initially the United States, the British Commonwealth, (less Eire), the Netherlands East Indies, the Governments in Exile, China, and the "Free French" are at war against the Axis powers, comprising either:

1. Germany, Italy, Roumania, Hungary, Bulgaria, or

2. Germany, Italy, Japan, Roumania, Hungary, Bulgaria, and Thailand.

Note. As of 22 June war exists between the European Axis and Russia, and the latter may be tentatively considered as an ally against that part of the Axis but not necessarily against Japan.

b. That even if Japan and Thailand are not initially in the war, the possibility of their intervention must be taken into account.

c. That Latin American Republics will take measures to control subversive

elements, but will remain in a non-belligerent status unless subject to direct attack; in general, the territorial waters and land bases of these Republics will be available for use by United States forces for purposes of Hemisphere Defense.

d. That the principal military effort of the Associated Powers will be in the Atlantic and European Areas, and that operations in other areas will be so conducted as to facilitate that effort. Therefore, transfer of units from the Pacific Fleet to the Atlantic Fleet is provided for in the Navy Basic Plan, and additional transfers may become necessary.

e. That the Asiatic Fleet will not be reinforced by the Pacific Fleet, but that eventually, if Japan enters the war, heavy British reinforcements will be made in the Far East.

[16] *Section 2. Special Assumption*

1221. That the Pacific Fleet is virtually mobilized and is based at Pearl Harbor, but regular navy yard overhauls are in progress which would reduce forces immediately available by about one-fifth.

[17]

CHAPTER III. INFORMATION

*Section 1. General Information*

1311. a. The Pacific Area, which is under the command of the Commander-in-Chief, Pacific Fleet, is that part of the area of the Pacific Ocean:

1. North of Latitude 30° North and west of Longitude 140° East.
2. North of the equator and east of Longitude 140° East.
3. South of the equator and east of Longitude 180° to the South American Coast and Longitude 74° West.
4. Less waters in which Canada may assume strategic direction of military forces.

b. In addition, the United States will afford support to British Naval Forces in the regions south of the equator, as far west as Longitude 155° East.

c. The Southeast Pacific Sub-Area, when established, will be that part of the Pacific Area south of the Panama Naval Coastal Frontier and between the West Coast of South America and approximately Longitude 95° West.

d. The Pacific Southern Naval Coastal Frontier includes the coastal zone extending from the northern boundary of California to the southern boundary of Mexico.

e. The Pacific Northern Naval Coastal Frontier includes the coastal zone of the Northwestern United States north of the northern boundary of California, and, in addition, Alaska.

f. The Pacific sector of the Panama Naval Coastal Frontier includes the coastal zone defined to be within a broken line drawn from the Mexico-Guatemala boundary to a point in Latitude 5° South, Longitude 95° West and thence to the Peru-Ecuador border, and to include the sea routes near the southern and western borders of that zone.

[18] g. The Hawaiian Naval Coastal Frontier consists of Oahu, and all the land and sea areas required for the defense of Oahu. The coastal zone extends to a distance of 500 miles from all the Hawaiian Islands, including Johnston and Palmyra Islands and Kingman Reef.

h. The Far East Area is defined as the area from the coast of China in Latitude 30° North, east to Longitude 140° East, thence south to the equator, thence east to Longitude 141° East, thence south to the boundary of Dutch New Guinea on the south coast, thence westward to Latitude 11° South, Longitude 120° East, thence south to Latitude 13° South, thence west to Longitude 92° East, thence north to Latitude 20° North, thence to the boundary between India and Burma.

i. In the Far East Area, responsibility for the strategic direction of the naval forces of the Associated Powers, except of naval forces engaged in supporting the defense of the Philippines will be assumed by the British Naval Commander-in-Chief, China. The Commander-in-Chief, United States Asiatic Fleet, will be responsible for the direction of naval forces engaged in supporting the defense of the Philippines.

j. The Australia and New Zealand Area comprises the Australian and New Zealand British Naval Stations west of Longitude 180° and south of the equator. The British Naval Commander-in-Chief, China, is responsible for the strategic direction of the naval forces of the Associated Powers operating in this Area.

1312. The foregoing delineation of principal areas and the agreements as to cooperation between the United States and the British Commonwealth are contained in the Report of United States-British Staff Conversations (ABC-1).

Joint United States-Canada War Plan No. 2 (ABC-22) is now in the process of preparation. Similar agreements with the Netherlands East Indies are being made.

[19] 1313. The following principles of command will obtain:

a. As a general rule, the forces of the United States and those of the United Kingdom should operate under their own commanders in the areas of responsibility of their own Power.

b. The assignment of an area to one Power shall not be construed as restricting the forces of the other Power from temporarily extending appropriate operations into that area, as may be required by particular circumstances.

c. The forces of either Power which are employed normally under the strategic direction of an established commander of the other, will, with due regard to their type, be employed as task forces charged with the execution of specific strategic tasks. These task forces will operate under their own commanders and will not be distributed into small bodies attached to the forces of the other Power. Only exceptional military circumstances will justify the temporary suspension of the normal strategic tasks.

d. When units of both Powers cooperate tactically, command will be exercised by that officer of either Power who is the senior in rank, or if of equal rank, of time in grade.

e. United States naval aviation forces employed in British Areas will operate under United States Naval command, and will remain an integral part of United States Naval task forces. Arrangements will be made for coordination of their operations with those of the appropriate Coastal Command groups.

1314. The concept of the war in the Pacific, as set forth in ABC-1 is as follows:

Even if Japan were not initially to enter the war on the side of the Axis Powers, it would still be necessary for the Associated Powers to deploy their forces in a manner to guard against Japanese intervention. If Japan does enter the war, the military strategy in the Far East will be defensive. [20] The United States does not intend to add to its present military strength in the Far East but will employ the United States Pacific Fleet offensively in the manner best calculated to weaken Japanese economic power, and to support the defense of the Malay barrier by diverting Japanese strength away from Malaysia. The United States intends to so augment its forces in the Atlantic and Mediterranean areas that the British Commonwealth will be in a position to release the necessary forces for the Far East.

## *Section 2. Enemy Information*

1321. Information of the enemy will be disseminated prior to and on the execution of this Plan, by means of intelligence reports.

1322. Information which is of special interest with respect to a specific task is included with that task in Part III or in the Annexes.

## *[21] Section 3. Estimate of Enemy Action*

1331. It is believed that German and Italian action in the Pacific will be limited to commerce raiding with converted types, and possibly with an occasional pocket battleship or heavy cruiser.

1332. It is conceived that Japanese action will be as follows:

a. The principal offensive effort to be toward the eventual capture of Malaysia (including the Philippines) and Hong Kong.

b. The secondary offensive efforts to be toward the interruption of American and Allied sea communications in the Pacific, the Far East and the Indian Ocean, and to accomplish the capture of Guam and other outlying positions.

c. The offensive against China to be maintained on a reduced scale only.

d. The principal defensive efforts to be:

1. Destruction of threatening naval forces.

2. Holding positions for their own use and denying positions in the Central and Western Pacific and the Far East which may be suitable for advanced bases.

3. Protecting national and captured territory and approaches.

1333. To accomplish the foregoing it is believed that Japan's initial action will be toward:

a. Capture of Guam.

b. Establishment of control over the South China Sea, Philippine waters, and the waters between Borneo and New Guinea, by the establishment of advanced bases, and by the [22] destruction of United States and allied air and naval forces in these regions, followed by the capture of Luzon.

c. Capture of Northern Borneo.

d. Denial to the United States of the use of the Marshall-Caroline-Marianas area by the use of fixed defenses, and, by the operation of air forces and light naval forces to reduce the strength of the United States Fleet.

e. Reenforcement of the Mandate Islands by troops, aircraft and light naval forces.

f. Possibly raids or stronger attacks on Wake, Midway and other outlying United States positions.

1334. The initial Japanese deployment is therefore estimated to be as follows:

a. Troops and aircraft in the Homeland, Manchukuo, and China with strong concentrations in Formosa and Hainan, fairly strong defenses in the Carolines, and comparatively weak but constantly growing defenses in the Marshalls.

b. Main fleet concentration in the Inland Sea, shifting to a central position (possibly Pescadores) after the capture of Guam and the reenforcement of the Mandates.

c. A strong fleet detachment in the Mindanao-Celebes area (probable main base in Halmahera).

d. Sufficient units in the Japan Sea to counter moves of Russian Naval forces in that area.

e. Strong concentration of submarines and light surface patrol craft in the Mandates, with such air scouting and air attack units as can be supported there.

f. Raiding and observation forces widely distributed in the Pacific, and submarines in the Hawaiian Area.

[23] g. Obsolete and weaker units on patrol of coastal areas and focal areas of lines of communication.

h. Merchant ships in neutral ports or proceeding home via detours wide of usual routes.

[24]

## PART II. OUTLINE OF TASKS

### CHAPTER I. TASKS ASSIGNED BY NAVY BASIC PLAN—MISSION

2101. The Navy Basic War Plan (Rainbow Five) assigns the following tasks within the Pacific Area to the U. S. Pacific Fleet:

a. Support the forces of the associated powers in the Far East by diverting enemy strength away from the Malay Barrier, through the denial and capture of positions in the Marshalls, and through raids on enemy sea communications and positions;

b. Prepare to capture and establish control over the Caroline and Marshall Island area, and to establish an advanced fleet base in Truk;

c. Destroy axis sea communications by capturing or destroying vessels trading directly or indirectly with the enemy;

d. Support British naval forces in the area south of the equator as far west as longitude 155° east;

e. Defend Samoa in category "D";

f. Defend Guam in category "F";

g. Protect the sea communications of the associated powers by escorting, covering, and patrolling as required by circumstances, and by destroying enemy raiding forces;

h. Protect the territory of the associated powers in the Pacific area and prevent the extension of enemy military power into the Western Hemisphere by destroying hostile expeditions and by supporting land and air forces in denying the enemy the use of land positions in that hemisphere;

i. Cover the operations of the naval coastal frontier forces;

j. Establish fleet control zones, defining their limits from time to time as circumstances require;

k. Route shipping of associated powers within the fleet control zones.

[25]

### CHAPTER II. TASKS FORMULATED TO ACCOMPLISH THE ASSIGNED MISSIONS

2201. It will be noted that the tasks assigned in the previous chapter are based upon Assumption a2 of paragraph 1211 (Japan in the war). In formulating tasks the Commander-in-Chief has provided also for Assumption a1 and divides the tasks to be accomplished by the Pacific Fleet into phases, as follows:

a. PHASE I—Initial tasks—Japan not in the war.

b. PHASE IA—Initial tasks—Japan in the war.

c. PHASE II, etc.—Succeeding tasks.

2202. Phase I tasks are as follows:

a. Complete mobilization and prepare for distant operations; thereafter maintain all types in constant readiness for distant service.

b. Maintain fleet security at bases and anchorages and at sea.

- c. Transfer the Atlantic reenforcement, if ordered.
- d. Transfer the Southeast Pacific Force, if ordered.
- e. Assign twelve patrol planes and two small tenders to Pacific Southern and a similar force to Pacific Northern Naval Coastal Frontier, on M-day.
- f. Assign two submarines and one submarine rescue vessel to Pacific Northern Naval Coastal Frontier on M-day.
- g. Protect the communications and territory of the associated powers and prevent the extension of enemy military power into the Western Hemisphere by patrolling with light forces and patrol planes, and by the action of striking groups as necessary. In so doing support the British Naval Forces south of the equator as far west as Longitude 155° East.
- h. Establish defensive submarine patrols at Wake and Midway.
- [26] 2202. i. Observe, with submarines outside the three mile limit, the possible raider bases in the Japanese mandates, if authorized at the time by the Navy Department.
- j. Prosecute the establishment and defense of subsidiary bases at Midway, Johnston, Palmyra, Samoa, Guam and Wake, and at Canton if authorized.
- k. Continue training operations as practicable.
- l. Move the maximum practicable portion of second Marine Division to Hawaii for training in landing operations.
- m. Guard against surprise attack by Japan.

*Phase IA*

2203. Phase IA tasks are as follows:

- a. Continue tasks outlined in 2202 a, b, g, h, and k.
- b. Accomplish such of the tasks in 2202 c, d, e, f, and j as have not been completed.
- c. Make an initial sweep for Japanese merchantmen and enemy raiders and tenders in the northern Pacific.
- d. Continue the protection of the territory and communications of the associated powers, and of the naval coastal frontier forces, chiefly by covering operations.
- e. 1. Make reconnaissance and raid in force on the Marshall Islands.
- 2. If available cruisers and other circumstances permit, make cruiser raids against Japanese shipping in waters between Hansel Shoto and Nanpo Shoto.
- f. Establish and maintain maximum practicable submarine patrols against Japanese forces and communications near the Japanese homeland.
- g. Maintain air patrols against enemy forces in the approaches to Oahu and outlying bases.
- [27] 2203. h. Escort important shipping, including troop movements, between the Hawaiian reas and the West Coast.
- i. Route shipping in the fleet control zone when established.
- j. Augment the local defense forces of the Hawaiian Naval Coastal Frontier as necessary.
- k. Move from San Diego to Hawaii the remaining units and equipment of the Second Marine Division.
- l. Prepare to capture and establish control over the Marshall Island Area.

*Phase II and subsequent phases*

2204. Tasks of Phase II and Subsequent Phases which can be formulated at this time are:

- a. Capture and establish a protected fleet anchorage in the Marshall Island Area.
- b. Capture or deny other positions in the Marshall Island Area as necessary for further advance to the westward.
- c. Raid other Japanese land objectives and sea communications.
- d. Capture and establish an advanced fleet base at Truk.
- e. Continue uncompleted tasks of Phase IA.

[28]

## PART III. TASK ASSIGNMENT

## CHAPTER I. PHASE I

*Section 1. TASK FORCE ONE*

3111. *Task Force One* will perform tasks as required by the following paragraphs of this section.

3112. When directed release two small light cruisers and one destroyer division to become the Southeast Pacific Force as required by the navy basic plan.

3113. Perform the tasks assigned in the patrol and sweeping plan (Annex I).

[29] *Section 2. TASK FORCE TWO*

3121. *Task Force Two* will:

Perform the tasks assigned in the patrol and sweeping plan (Annex I).

[30] *Section 3. TASK FORCE THREE*

3131. *Task Force Three* will perform the tasks assigned in the following paragraphs of this section.

3132. Perform the tasks assigned in the Patrol and Sweeping Plan (Annex I).

3133. a. Move from San Diego to Hawaii the maximum practicable portion of the Second Marine Division, employing attached transports.

b. Make preparations and train for landing attacks on Japanese bases in the Marshalls for purposes of capture or demolition, with particular emphasis on plan for capture of Eniwetok.

c. 1. *Special Information.*

As of July 1, 1941, the Marine defenses in Hawaii and the outlying islands are as follows:

MIDWAY —34 officers  
750 men  
6 5"/51 caliber guns  
12 3"/50 caliber AA guns  
30 0.50 caliber machine guns  
30 0.30 caliber machine guns  
4 searchlights.

JOHNSTON—18 men  
2 5"/51 caliber guns  
4 0.30 caliber machine guns

PALMYRA —4 officers  
101 men  
4 5"/51 caliber guns  
4 3"/50 caliber AA guns  
4 0.50 caliber machine guns  
4 0.30 caliber machine guns

[31] OAHU —32 officers  
620 men  
4 5"/51 caliber guns  
8 3"/50 caliber AA guns  
20 0.50 caliber machine guns  
16 0.30 caliber machine guns

NOTE: The above personnel are defense battalion personnel only and are in addition to personnel employed in guard duty, barracks duty, etc.

WAKE —None.

2. *Task*

Furnish additional defenses for outlying bases as may be requested by the Commander Hawaiian Naval Coastal Frontier and approved by the Commander-in-Chief.

[32] *Section 4. TASK FORCE NINE (PATROL PLANE FORCE)*

3141. *Task Force Nine* will perform the tasks assigned in the following paragraphs of this section.

3142. On W-day transfer twelve patrol planes and two tenders to each of the Pacific Southern and Pacific Northern Naval Coastal Frontiers. Continue administration of these forces and rotate detail at discretion.

3143. Perform tasks assigned in the patrol and sweeping plan (Annex I).

[33] *Section 5. TASK FORCE SEVEN (UNDERSEA FORCE)*

3151. *Task Force Seven* will perform tasks as required by the following paragraphs of this section.

3152. a. *Special Information.*

1. There are indications that Axis raiders have been basing in the Marshall area.

2. The imminence of the entry of Japan into the war requires a deployment suitable for this eventuality.

3. NARWHAL and NAUTILUS are fitted to carry 13,500 gallons of aviation gasoline each for fueling patrol planes.

b. *Task.*

Maintain patrols required by the patrol and sweeping plan (Annex I).

c. *Special Logistics.*

Logistic replenishment at Pearl Harbor and to a limited degree at Midway.

3153. Assign one submarine division to Task Force Three as required for landing attack training.

3154. On W-day transfer two submarines and one submarine rescue vessel to Pacific Northern Naval Coastal Frontier to assist in defense of the Alaskan sector. Continue administration of these units and rotate detail at discretion.

[34] *Section 6. TASK FORCE EIGHT (MINING FORCE)*

3161. *Task Force Eight* will:

Continue operations and training under commanders *Task Forces One* and *Two*.

[35] *Section 7. TASK FORCE SIX (LOGISTIC & CONTROL FORCE)*

3171. *Task Force Six* will perform tasks as required by the following paragraphs.

3172. Provide logistic service to the fleet and cooperate with Commander Hawaiian Naval Coastal Frontier in providing logistic services to outlying bases.

3173. Perform tasks required by The Patrol and Sweeping Plan (Annex I).

3174. Maintain in the office of Commander Pacific Naval Coastal Frontier an officer to maintain liaison with respect to logistic requirements of the fleet, the loading of base force and NTS vessels, and the routing and protection of U. S. and Allied shipping. Maintain close liaison with Commander Hawaiian Naval Coastal Frontier for the same purposes.

3175. Transfer ten VJR to Commander *Task Force Nine*.

[36] *Section 8. NAVAL COASTAL FRONTIERS*

*Task Force Four (Hawaiian Naval Coastal Frontier)*

3181. *Special Information.*

The *Basic Plan* assigns the following tasks to the Commander, Hawaiian Naval Coastal Frontier:

a. Defend the Hawaiian Naval Coastal Frontier in Category "D". (Category "D"—May be subject to major attack). (N. B. The Commander-in-Chief, U. S. Pacific Fleet, does not consider Category "D" will apply during Phase I.)

b. Protect and route shipping within the Hawaiian Naval Coastal Frontier.

c. Support the U. S. Pacific Fleet.

d. Support the Army and Associated Forces within the Hawaiian Naval Coastal Frontier.

3182. By this *Fleet Plan*, *Task Force Four* is assigned the tasks below.

a. Assist in providing external security for units of the Fleet in the Hawaiian Naval Coastal Frontier, in cooperation with the Army and the units concerned. (As of the date of issue of this plan, the security plan of the Commander, Hawaiian Naval Coastal Frontier (as Commander, Base Defense) is already in effect).

b. Prosecute the establishment of subsidiary bases at Midway, Johnston, Palmyra, and Wake, and at Canton if authorized. Assist as practicable in the development of Samoa and Guam.

c. Make the facilities of outlying bases available for Fleet units operating in the vicinity; and directly and through own task group commanders cooperate with other task force and task group commanders in coordinating the military activities at these bases. (See Annex IV.)

**U. S. PACIFIC FLEET OPERATING PLAN—RAINBOW FIVE  
(NAVY PLAN O-1, RAINBOW FIVE)**

**PART III. TASK ASSIGNMENT**

**CHAPTER I. PHASE I.**

[37] 3182. d. Utilize units of the Fleet Marine Force, made available for the purpose, to defend Midway, Johnston, and Palmyra, and, when authorized, Wake and Canton.

*Task Force Five (Pacific Southern) and Task Force Ten (Pacific Northern  
Naval Coastal Frontier)*

3183. Commanders *Task Forces Five and Ten* perform tasks assigned by the Patrol and Sweeping Plan (Annex I).

[38] **Section 9. TASKS JOINTLY APPLICABLE**

3191. Until detached from the Fleet, all forces less those of Naval Coastal Frontiers will perform the following tasks:

a. Units in the Hawaiian Area complete mobilization at Pearl Harbor by the end of four W-day; units designated for early operations complete mobilization prior to the time designated for their operations to commence. Units on the Pacific Coast complete mobilization there as rapidly as possible.

b. Maintain vessels of all types in constant readiness for distant service.

c. Maintain internal and external security of forces at all times, cooperating with commanders of naval coastal frontiers while within the limits of those frontiers. Guard against surprise attack by Japanese forces.

d. Continue such training activities of the fleet as the commander-in-chief may direct.

e. Reinforce local defense and coastal forces as directed.

f. Protect the territory and communications of the associated powers, the operations of coastal forces, and troop movements by covering and other operations as directed by the commander-in-chief.

[39]

**CHAPTER II. PHASE IA**

**Section 1. TASK FORCE ONE**

3211. *Task Force One* will perform tasks as required by the following paragraphs of this section.

3212. Perform task assigned in the patrol and sweeping plan (Annex I).

3213. Reinforce and support operations of *Task Force Two* as required in the Marshall reconnaissance and raiding plan (Annex II).

[40] **Section 2. TASK FORCE TWO**

3221. *Task Force Two* will perform tasks as required by the following paragraph.

3222. Conduct reconnaissance and raid in force against the Marshalls as required in the Marshall reconnaissance and raiding plan (Annex II).

[41] **Section 3. TASK FORCE THREE**

3231. *Task Force Three* will perform tasks as required by the following paragraphs of this section.

3232. Conduct initial sweep against enemy commerce and raiders as required in The Patrol and Sweeping Plan (Annex I).

3233. Reinforce *Task Force Two* as required by the Marshall Reconnaissance and Raiding Plan (Annex II).

3234. Move from San Diego to Hawaii the remaining units and equipment of the Second Marine Division and continue training for landing exercises.

3235. Continue task assigned in subparagraph 3133 c, 2.

[42] **Section 4. TASK FORCE NINE (PATROL PLANE FORCE)**

3241. *Task Force Nine* will perform tasks as required in the following paragraphs of this section.

3242. a. *Special Information.*

1. Patrol plane operations from Midway, Wake, Johnston, Palmyra, and Canton are feasible, the extent of such operations being dependent upon the defenses, facilities and supplies available at the time operations commence.

Those defenses, facilities and supplies are being augmented. As of July 1, 1941, tenders cannot base at Wake or Canton, but Pan-American Airways' facilities may be used by special arrangement or by commandeering. A project for the improvement of Wake as a base is underway. No such project for Canton has been approved.

2. No aircraft are assigned at present to the Commander, Hawaiian Naval Coastal Frontier.

3. Our submarines will assist in the defense of Midway and Wake, and will habitually operate offensively in enemy waters.

4. Land defenses exist on outlying islands, as described in paragraph 3133c, 1. Commander *Task Force Four* (Hawaiian Naval Coastal Frontier), is charged with the defense of these outlying islands and will make them available for patrol plane operations.

5. It is believed that enemy action in the area subject to our patrol plane search will comprise:

(a) Submarine raids and observation off Oahu and outlying islands and along our lines of communication.

[43] (b) Surface raids on our lines of communications.

(c) Surface and air raids against Wake and possibly against Midway, Johnston, Palmyra and Canton.

(d) Possibly carrier raid against Oahu.

b. *Tasks.*

1. Perform patrols required by patrol and sweeping plan (Annex I).

2. Subject to the specific tasks prescribed elsewhere in this plan, operate patrol planes in the Hawaiian Area including outlying islands so as to gain the earliest possible information of advancing enemy forces. Use them offensively only when other types of our own are not within striking distance, and the risk of damage to the planes is small; or when the importance of inflicting damage on the objective appears to justify the risk of receiving the damage which may result.

3. Coordinate the service of information with the operations of other forces.

4. Perform tasks assigned in the Marshall reconnaissance and raiding plan (Annex II).

5. Coordinate operations of patrol planes with submarines operating in same general area.

6. Withdraw patrol planes from advance bases when necessary to avoid disproportionate losses.

[44] 3242. b. 7. Maintain not less than two squadrons (one may be VJ Squadron from base force) based on Oahu at all times. During the absence of major portions of the fleet from the vicinity of Oahu, such squadrons, at discretion, may be temporarily transferred to commander *Task Force Four* (Hawaiian Naval Coastal Frontier).

c. *Special Logistics.*

Logistic support at outlying bases will be supplied by own tenders, Hawaiian Naval Coastal Frontier, Base Force, and, if necessary, by Pan-American Airways facilities.

#### [45] Section 5. TASK FORCE SEVEN (UNDERSEA FORCE)

3251. *Task Force Seven* will perform tasks as required by the following paragraph.

3252a. 1. *Special Information.*

1. Surface units of the Fleet will initially conduct the operations required by the Patrol and Sweeping Plan (Annex I) and the Marshall Reconnaissance and Raiding Plan (Annex II). Thereafter operations will be conducted for the capture of the Marshalls and Carolines, with occasional sweeps toward the Marianas and the Japanese Homeland.

2. Our patrol planes will be operating from Midway, and possibly Wake and Johnston Islands.

3. Japan is developing extensively the defenses of the Mandated Islands. Land planes are known to be based at Saipan, Truk and Jaluit and have been reported at Marcus Island. Air fields are believed to exist at Wotje and Maloe-lap. Port Lloyd in the Bonins is a minor operating base and some aircraft usually base there and at Hachijo Jima. Aircraft may be present on Amami Oshima.

4. Considerable air strength is based on the Japanese Homeland but it is believed that, with many commitments elsewhere and a general lack of patrol planes, the air patrol surrounding the Homeland will not be particularly intensive.

5. The main units of the Japanese Fleet will probably be operating from the Inland Sea.

6. All important harbors will probably be mined and netted against submarines and are well fortified. A considerable number of small patrol craft must be expected.

[46] 3252. a. 7. The southwestern and western lines of communications from Japan may be considered vital needs and those toward the Mandates are very important.

8. It is expected that all Japanese Merchantmen will be armed or will be operating under naval control, and will therefore be subject to submarine attack. Specific instructions on this subject will be issued later.

9. Arrangements will be made with the Commander-in-Chief, Asiatic Fleet, to extend the Pacific Area sufficiently for submarines to pass through the Nansei Shoto as far south as Latitude 28°-30' N.

10. Mining Japanese waters outside the three mile limit may be planned. The specific authority for such mining will be issued later.

b. *Tasks*

1. Continue patrol of two submarines each at Wake and Midway.

2. Establish maximum practicable initial patrol off the Japanese homeland and thereafter maintain it at the maximum strength permitted by operating conditions, giving Stations the following priority.

YOKOHAMA  
BUNGO CHANNEL  
KII CHANNEL  
TSUSHIMA  
NAGASAKI  
SHIMONOSEKI  
TSUGARU

3. Inflict maximum damage on enemy forces including shipping, utilizing torpedoes and mines, and, if appropriate, gunfire.

[47] 3252. b. 4. Report important enemy movements by radio if success of attack mission is not thereby jeopardized.

c. *Special Logistics.*

Utilize facilities at Midway as necessary to increase endurance on patrol.

[48] *Section 6. TASK FORCE EIGHT (MINING FORCE)*

3261. *Task Force Eight* will:

Report to Commander Hawaiian Naval Coastal Frontier to augment the local defense forces during this phase.

[49] *Section 7. TASK FORCE SIX (LOGISTIC & CONTROL FORCE)*

3271. *Task Force Six* will:

Continue tasks assigned for Phase I and perform the tasks assigned in the patrol and sweeping plan (annex I) and the Marshall reconnaissance and raiding plan (annex II).

[50] *Section 8. NAVAL COASTAL FRONTIERS*

3281. *Task Force Five* (Pacific Northern) and *Task Force Ten* (Pacific Southern Naval Coastal Frontier) will:

Continue tasks assigned for phase I and perform the tasks assigned in the patrol and sweeping plan (annex I).

3282. *Task Force Four* (Hawaiian Naval Coastal Frontier) will:

Continue tasks assigned for phase I.

[51] *Section 9. TASKS JOINTLY APPLICABLE*

3291. *All task forces concerned:*

a. Continue tasks assigned in paragraph 3191.

b. Perform tasks assigned in the patrol and sweeping plan (annex I).

[52] CHAPTER III. PHASES SUCCEEDING PHASE IA

*Section 1. TASK FORCE ONE*

3311. *Task Force One* will:

Cover operations of other forces as prescribed in the Eniwetok plan (annex —), and other plans for the capture of the Marshalls and Carolines.

[52a] *Section 2. TASK FORCE TWO*

3321. *Task Force Two* will:

Reinforce Task Forces One and Three as required in Eniwetok and other plans and perform such reconnaissance and raiding as is directed.

[52b] *Section 3. TASK FORCE THREE*

3331. *Task Force Three* will:

- a. Continue training for landing attacks.
- b. Perform tasks assigned in Eniwetok plan (annex —) and other operations involving landing attacks.
- c. Patrol as directed in subsequent plans.
- d. Continue task assigned in subparagraph 3133 c, 2.

[52c] *Section 4. TASK FORCE NINE (PATROL PLANE FORCE)*

3341. *Task Force Nine* will:

- a. Continue tasks assigned in subparagraphs 3242 b, 2, 3, 5, 6, and 7.
- b. Perform tasks assigned in Eniwetok plan (annex —) and other plans for the capture of the Marshalls and Carolines.

[52d] *Section 5. TASK FORCE SEVEN (UNDERSEA FORCE)*

3351. *Task Force Seven* will:

- a. Continue tasks assigned in subparagraphs 3252 b, 1, 2, 3, and 4.
- b. Carry out tasks assigned in Eniwetok plan (annex —) and other plans for the capture of the Marshalls and Carolines.

*U. S. PACIFIC FLEET OPERATING PLAN—RAINBOW FIVE  
(NAVY PLAN O-1, RAINBOW FIVE)*

**PART III. TASK ASSIGNMENT**

**CHAPTER III. PHASES SUCCEEDING PHASE IA**

[52e] *Section 6. TASK FORCE EIGHT (MINING FORCE)*

3361. *Task Force Eight* will:

Perform such mining tasks as may be assigned in Eniwetok plan (annex —) and other operations and continue to augment local patrols as directed.

[52f] *Section 7. TASK FORCE SIX (LOGISTIC AND CONTROL FORCE)*

3371. *Task Force Six* will:

- a. Continue tasks prescribed in paragraphs 3172 to 3174.
- b. Prepare plans for the establishment of a fleet anchorage at Eniwetok and a fleet base at Truk after the positions have been captured.

[52g] *Section 8. NAVAL COASTAL FRONTIERS*

3381. *Task Forces Four, Five, and Ten* will:

Continue the tasks assigned in paragraphs 3182 and 3183.

[52h] *Section 9. TASKS JOINTLY APPLICABLE*

3391. *All task forces concerned:*

Continue tasks assigned in paragraph 3291.

[53] **CHAPTER IV. EXECUTION OF THE PLAN**

3401. The execution of this Plan may be in one or two steps depending on whether Japan does or does not become a belligerent on the first day of execution.

a. If action against European Axis Powers only is to be taken the despatch will be "EXECUTE NAVY PLAN OPTION DASH ONE RAINBOW FIVE PHASE ONE".

b. When action against JAPAN is to be taken the despatch for execution will be "EXECUTE NAVY PLAN OPTION DASH ONE RAINBOW FIVE PHASE ONE AFIRM".

3402. In the event of an overt act of war by a foreign power against the United States prior to the existence of a state of war, it is the duty of the senior commander on the spot to take such action in the defense of his command and the national interests as the situation may require, and report the action taken to superior authority at once.

[54] **CHAPTER V. INITIAL TRANSFER OF UNITS**

3501. The table below gives, for ready reference, a summary of the transfers to be made in going from the current peace time organization to the task organization as of W-Day and as of J-Day. Those transfers for W-Day will be made upon the placing into effect of Phase I of this Plan. Those for J-Day will be

made when the execution of Phase IA is ordered. Units concerned will report by despatch to the commanders of the task forces to which they are transferring.

| From                                  | To                                                                             | Unit transferred                                                                   | Transfer effected                                                      | Remarks                                                                                                                                                                                            |

[56]

## PART IV. LOGISTICS

## CHAPTER I. GENERAL

4101. Commander Task Force Six (Logistics and Control Force) is charged with the logistic supply of the Fleet and, in cooperation with Commander Task Force Four (Hawaiian Naval Coastal Frontier), with supplying the present outlying bases in the Mid Pacific. He will make requests for replacements as required by paragraph 4322 g of the Navy Basic Plan. He will maintain a liaison officer in the office of Commander Task Force Five (Pacific Southern Naval Coastal Frontier) and, through him, will control the quantities and times of delivery of material and personnel requirements to the Fleet. In so far as practicable, a reserve of consumable supplies will be established and maintained at Pearl Harbor. After capture of bases in the MARSHALLS and CAROLINES a reserve of supplies will be maintained at these places, as permitted by storage and transportation facilities available.

4102. The supply of units of the Second Marine Division after they have left the West Coast will be included with that of the Fleet.

4103. Special logistic instructions affecting particular tasks have been included in the task assignments in Part III and the Annexes of this Plan.

4104. For the benefit of Commander Task Force Six, Commanders of other task forces will include, in the plans which they prepare, their logistic requirements as far as they can be foreseen.

4105. The requirements of the U. S. Pacific Fleet are placed in the second highest priority classification by paragraph 4261 of the Navy Basic Plan.

[56a]

## CHAPTER II. TRANSPORTATION

4201. Commander Task Force Six (Logistics and Control Force), through his liaison officer in the office of Commander Task Force Five (Pacific Southern Naval Coastal Frontier), will coordinate the transportation of material and personnel by Fleet transportation facilities and the Naval Transportation Service.

4202. The Naval Transportation Service vessels assigned to assist in the supply of the Hawaiian and Alaskan areas will be shown in a revised Chapter IX, Appendix II, of the Navy Basic Plan. If practicable, they will not be employed for transportation farther westward than Hawaii.

4203. The employment of commercial vessels to assist in transportation from the West Coast to Hawaii is most desirable and is acceptable to the Commander-in-Chief, U. S. Pacific Fleet.

[56b]

CHAPTER III. HOSPITALIZATION AND EVACUATION

4301. The facilities of the Fleet including those of hospital ships, advanced base hospitals and mobile medical units will, as far as practicable, provide hospitalization for sick and wounded personnel.

4302. As necessary, such personnel will, under the coordinated supervision of the task force commanders responsible for the personnel and for the transportation facilities employed, be evacuated to the nearest shore establishment having hospital space available.

4303. The ships concerned will furnish hospitalization to embarked Army forces until ineffectives can be transferred ashore.

[56c]

CHAPTER IV. PRIZE CREWS

4401. The Navy Department will furnish prize crews as follows: U. S. Pacific Fleet—8; Southeast Pacific Force—8. If those for the Pacific Fleet are available they will be placed aboard ships assigned to make the search for enemy merchant ships in the Patrol and Sweeping Plan (Annex I).

[56d]

CHAPTER V. SALVAGE

4501. All units, particularly of Task Force Six (Logistic and Control Force) and suitable units of Task Force Seven (Underseas Force) will render salvage service, as practicable, to naval and other vessels in the Pacific Area outside of a zone lying 500 miles from the continental United States, Alaska, and Panama. Within the above mentioned zone, salvage service will be rendered by the shore establishment.

[57]

PART V. SPECIAL PROVISIONS

CHAPTER I. TIME TO BE USED

5101. GREENWICH Civil Time will be used in carrying out this Plan.

[58]

CHAPTER II. COMMUNICATIONS

5201. Communications will be in accordance with USF-70 as modified by Annex III to this Plan.

[59]

CHAPTER III. LOCATION OF COMMANDER-IN-CHIEF

5301. The Fleet will be kept informed of the location of the Commander-in-Chief.

[60]

CHAPTER IV. TENTATIVE OPERATION PLANS—PHASES I AND IA

5401. Tentative Operation Plans Nos. 1-R5 and 1A-R5 as formulated below are designed to facilitate the promulgation and execution of the tasks assigned for Phases I and IA of this U. S. Pacific Fleet Operating Plan (Rainbow Five). It is expected that they will be modified and executed by despatch when the corresponding Phase of this O-1 Plan is placed in effect as prescribed in paragraph 3401.

[61] *Section 1. Phase I*

United States Pacific Fleet  
U. S. S. PENNSYLVANIA, Flagship  
Place  
Date

Operation Plan No. 1-R5

*Initial Task Organization*

(See paragraph 1107 of this Plan for normal organization)

(a) *Task Force One*—Commander Battle Force.—Normal units this task force plus  $\frac{1}{2}$  mincraft less 1 cruiser in rotation to *Task Force Three* patrol pool.

(b) *Task Force Two*—Commander Aircraft, Battle Force.—Normal units this task force plus  $\frac{1}{2}$  mincraft less one cruiser in rotation to *Task Force Three* patrol pool.

(c) *Task Force Three*—Commander Scouting Force.—Normal units this task force plus 1 cruiser each from *Task Forces One* and *Two* for cruiser patrol pool plus 1 SS from *Task Force Seven*, 1 AO from Task Force Six, and (on request) 1 patron and tender from Task Force Seven for South Pacific operations.

(d) *Task Force Nine* (Patrol Plane Force) (S. O. P. Airscofor Hawaiian Area).—Normal units this task force less 24 VP and tenders transferred to Naval Coastal Frontiers, and (if requested by *Commander Task Force Three*) 1 patron and tender to Task Force Three.

[82] (e) *Task Force Seven* (Undersea Force)—Commander Submarines, Scouting Force.—Normal units this task force less 2 SS and 1 ASR to *Task Force Ten* and 1 SS to *Task Force Three*.

(f) *Task Force Eight* (Mining Force).—Non-operative as such; normal units thereof being divided between *Task Forces One* and *Two*.

(g) *Task Force Six* (Logistic and Control Force)—Commander Base Force.—Normal units this task force plus any units transferred from other forces for escort duty West Coast-Hawaii less 1 AO to *Task Force Three*.

(h) *Task Force Four* (Hawaiian Naval Coastal Frontier)—Commandant, Fourteenth Naval District.—Normal units this task force plus units from other fleet forces when and if the Commander-in-Chief directs transfer.

(i) *Task Force Five* (Pacific Southern Naval Coastal Frontier)—Commandant, Twelfth Naval District.—Normal units this task force plus 12 VP and tender from *Task Force Nine*.

(j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier)—Commandant, Thirteenth Naval District.—Normal units this task force plus 12 VP and tender from *Task Force Nine* plus 2 SS and 1 ASR from *Task Force Seven*.

[83] 1. Information, Assumptions, etc., as previously given in Parts I, II and III of Navy Plan O-1, Rainbow Five.

2. This Fleet will, in the Pacific Area, protect the territory and sea communications of the Associated Powers and will support British Naval Forces south of the equator as far west as Longitude 155° East, while continuing training and guarding against attack by Japan.

3. (a) *Task Force One*.—(1) When directed release two small light cruisers and one destroyer division to become the Southeast Pacific Force as required by the Navy Basic Plan.

(2) Perform the task assigned in the Patrol and Sweeping Plan (Annex I).

(b) *Task Force Two*.—(1) Perform the tasks assigned in the Patrol and Sweeping Plan (Annex I).

(c) *Task Force Three*.—(1) Maintain the patrols required by the Patrol and Sweeping Plan (Annex I).

(2) Move from San Diego to Hawaii the maximum practicable portion of the Second Marine Division, employing attached transports.

(3) Make preparations and train for landing attacks on Japanese bases in the Marshalls for purposes of capture or demolition, with particular emphasis on plan for capture of Eniwetok.

[84] (4) Furnish additional defenses for outlying bases as may be requested by Commander Hawaiian Naval Coastal Frontier and approved by the Commander-in-Chief.

(d) *Task Force Nine* (Patrol Plane Force).—(1) Transfer twelve patrol planes and two tenders to each of the Pacific Southern and Pacific Northern Naval Coastal Frontiers. Continue administration of these forces and rotate detail at discretion.

(2) Perform tasks assigned in the Patrol and Sweeping Plan (Annex I).

(e) *Task Force Seven* (Undersea Force).—(1) Maintain patrols required by the Patrol and Sweeping Plan (Annex I).

(2) Assign one submarine division to *Task Force Three* as required for landing attack training.

(3) Transfer two submarines and one submarine rescue vessel to Pacific Northern Naval Coastal Frontier to assist in defense of the Alaska sector. Continue administration of these units and rotate detail at discretion.

(f) *Task Force Eight*. (Mining Force).—(1) Continue training under Commander *Task Force One*.

(g) *Task Force Six* (Logistic and Control Force).—(1) Provide logistic services to the Fleet and cooperate with Commander Hawaiian Naval Coastal Frontier in providing logistic services to outlying bases.

[65] (2) Perform tasks required by the Patrol and Sweeping Plan (Annex I).

(3) Maintain in the Office of Commander Pacific Naval Coastal Frontier an officer to maintain liaison with respect to logistic requirements of the Fleet, the loading of Base Force and Naval Transportation Service vessels, and the routing and protection of United States and Allied shipping. Maintain close liaison with Commander Hawaiian Naval Coastal Frontier for the same purposes.

(h) *Task Force Four* (Hawaiian Naval Coastal Frontier).—(1) Assist in providing external security for units of the Fleet in the Hawaiian Naval Coastal Frontier, in cooperation with the Army and the units concerned.

(2) Prosecute the establishment of subsidiary bases at Midway, Johnston, Palmyra, and Wake, and at Canton is authorized. Assist as practicable in the development of Samoa and Guam.

(3) Make the facilities of the outlying bases available for Fleet units operating in the vicinity and cooperate with Commanders of Mobile Forces in coordinating the military activities at these bases. (See Annex IV).

(4) Utilize units of the Fleet Marine Force, made available for the purpose, to defend Midway, Johnston, and Palmyra, and, when authorized, Wake and Canton.

(i) *Task Force Five* (Pacific Southern Naval Coastal Frontier).—(1) Perform tasks assigned by the Patrol and Sweeping Plan (Annex I).

[66] (j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier).—(1) Perform tasks assigned by Patrol and Sweeping Plan (Annex I).

(x) (1) Units in the Hawaiian area complete mobilization at Pearl Harbor within four days of date of execution of this Plan; units designated for early operations complete mobilization prior to the time designated for their operations to commence. Units on the Pacific Coast complete mobilization there as rapidly as possible.

(2) Maintain vessels of all types in constant readiness for distant service.

(3) Maintain internal and external security of forces at all times, cooperating with the Commanders of Naval Coastal Frontiers while within the limits of those frontiers. Guard against surprise attack by Japanese Forces.

(4) Continue such training activities of the Fleet as the Commander-in-Chief may direct.

(5) Reenforce local defense and coastal forces as directed.

(6) Protect the territory and communications of the Associated Powers, the operations of coastal forces, and troop movements by covering and other operations as directed by the Commander-in-Chief.

4. Logistic replenishment at Pearl Harbor, on the West Coast, and as specially provided for in the Annexes.

5. (a) Communications in accordance with U. S. F. Seventy, as modified by Annex III.

(b) Use Greenwich Civil Time.

(c) The Commander-in-Chief will keep the Fleet advised of his location.

Admiral, U. S. Navy,  
Commander-in-Chief,  
United States Pacific Fleet.

[68] CHAPTER IV. TENTATIVE OPERATION PLANS—PHASES I AND IA

*Section 2. Phase IA*

*Tentative*

United States Pacific Fleet,  
U. S. S. PENNSYLVANIA, Flagship,  
Place  
Date.

*Operation Plan No. 1A-R5.*

*Initial task organization*

(See Basic Fleet Plan for normal organization.)

(a) *Task Force One.* Commander Battle Force.—Normal units this task force less any cruiser absent on patrol with *Task Force Three* less 1 CV and all other large CL's to *Task Force Two* for reconnaissance of MARSHALLS.

(b) *Task Force Two.* Commander Aircraft, Battle Force.—Normal units this task force plus 1 CV and available CL's (approximately 4) from *Task Force One*

plus 1 CV from *Task Force Three* less any cruiser absent on patrol with *Task Force Three*.

(c) *Task Force Three*. Commander Scouting Force.—Same as for Operation Plan 1-R5 less 1 CV to *Task Force Two* less 1 SS and 1 AO from SAMOA returned to their respective normal task forces plus 1 AO from *Task Force Six* for fueling at sea.

(d) *Task Force Nine* (Patrol Plane Force) Senior Officer Present, Aircraft, Scouting Force, HAWAIIAN AREA).—Same as for Operation Plan 1-R5.

[69]

#### PART V. SPECIAL PROVISIONS

##### CHAPTER IV. TENTATIVE OPERATIONS PLANS—PHASES I AND IA

##### Section 2. Phase IA

(e) *Task Force Seven* (Undersea Force) Commander Submarines, Scouting Force.

Same as for Operation Plan 1-R5  
plus 1 SS returned from *Task Force Three*.

(f) *Task Force Eight* (Mining Force)

Non-operative as such, normal units thereof being detached from *Task Forces One and Two* at end of Phase I and on commencement of Phase IA being transferred to *Task Force Four*.

(g) *Task Force Six* (Logistic and Control Force) Commander Base Force.

Same as for Operation Plan 1-R5,  
plus 1 AO returned from *Task Force Three*  
less 2 AO transferred to *Task Force Two*  
less 1 AO transferred to *Task Force Three*.

(h) *Task Force Four* (Hawaiian Naval Coastal Frontier) Commandant, Fourteenth Naval District.

Normal units this task force  
plus all units of Minecraft, Battle Force.

(i) *Task Force Five* (Pacific Southern Naval Coastal Frontier) Commandant, Twelfth Naval District.

Same as for Operation Plan 1-R5.

(j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier) Commandant, Thirteenth Naval District.

Same as for Operation Plan 1-R5.

1. Information, Assumptions as previously given in Parts I, II, and III of this Navy Plan O-1, Rainbow Five.

[70] 2. This Fleet, while protecting the sea communications and territory of the Associated Powers in the Pacific Area, and supporting the operations of the British Navy south of the equator as far west as Longitude one hundred fifty-five degrees East, will:

(a) Conduct an initial sweep with light forces and aircraft against enemy merchant ships and raiders.

(b) Raid Japanese communications to westward of NANPO SHOTO with cruisers.

(c) Patrol Japanese homeland with submarines.

(d) Conduct a reconnaissance and raid against the MARSHALLS, in order to divert Japanese forces away from MALAYSIA, and to prepare for the capture of the MARSHALL-CAROLINE area.

3. (a) *Task Force One*.

(1) Perform task assigned in the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

(2) Reenforce and support operations of *Task Force Two* as required in the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

(b) *Task Force Two*.

(1) Conduct Reconnaissance and Raid in force against the MARSHALLS as required in the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

[71] (c) *Task Force Three*.

(1) Conduct initial sweep against enemy commerce and raiders as required in the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

(2) Reenforce *Task Force Two* as required by the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

(3) Move from SAN DIEGO to HAWAII the remaining units and equipment of the Second Marine Division and continue training for landing exercises.

(4) Continue preparations and training for landing attacks on Japanese bases in the MARSHALLS with particular emphasis on plan for capture of ENIWETOK.

(5) Furnish additional defenses for outlying bases as may be requested by Commander *Task Force Four* (Hawaiian Naval Coastal Frontier) and approved by the Commander-in-Chief.

(d) *Task Force Nine* (Patrol Plane Force).

(1) Subject to the specific tasks prescribed below, operate patrol planes in the HAWAIIAN Area including outlying islands so as to gain the earliest possible information of advancing enemy forces. Use them offensively only when other types of our own are not within striking distance, and the risk of damage to the planes is small; or when the importance of inflicting damage on the objective appears to justify the risk of receiving the damage which may result.

[72] (2) Perform patrols required by the Patrol and Sweeping Plan Annex I to Navy Plan O-1, Rainbow Five).

(3) Coordinate the service of information with the operations of other forces.

(4) Perform tasks assigned in the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

(5) Withdraw patrol planes from advance bases when necessary to avoid disproportionate losses.

(6) Maintain not less than two squadrons (one may be VJ squadron from Base Force) based on OAHU at all times. During the absence of major portions of the Fleet from the vicinity of OAHU, such squadrons may, at discretion, be temporarily transferred to Commander *Task Force Four* (Hawaiian Naval Coastal Frontier).

(e) *Task Force Seven* (Undersea Force).

(1) Continue patrol of two submarines each at WAKE and MIDWAY.

(2) Establish maximum practicable initial patrol off the Japanese Homeland and thereafter maintain it at the maximum strength permitted by operating conditions, giving stations the following priority:

YOKOHAMA  
BUNGO CHANNEL  
KII CHANNEL  
TSUSHIMA  
NAGASAKI  
SHIMONOSEKI  
TSUGARU

[73] (The Commander-in-Chief will make arrangements for submarines to pass through that part of the Far Eastern Area in the NANSEI SHOTO as far south as Latitude twenty-eight degrees, thirty minutes North).

(3) Inflict maximum damage on enemy forces, including shipping, utilizing mines and torpedoes and, if appropriate, gunfire. Mining of Japanese waters outside the three mile limit may be planned. Specific authority for such mining will be issued later.

(4) Report important enemy movements by radio if success of attack mission is not thereby jeopardized.

(f) *Task Force Eight* (Mining Force).

(1) Report to Commander Hawaiian Naval Coastal Frontier to augment the local defense forces during this Phase.

(g) *Task Force Six* (Logistics and Control Force).

(1) Continue general logistic support of Fleet and assistance to outlying bases.

(2) Perform tasks assigned in the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five), and the MARSHALL Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1, Rainbow Five).

(h) *Task Force Four* (Hawaiian Naval Coastal Frontier).

(1) Continue tasks assigned in Operation Plan 1-R5, with regard for the probable increase in enemy activities.

[74] (i) *Task Force Five* (Pacific Southern Naval Coastal Frontier).

(j) *Task Force Ten* (Pacific Northern Naval Coastal Frontier).

(1) Continue tasks assigned in Operation Plan 1-R5 with regard for the probable increase in enemy activities.

(2) Perform the tasks assigned by the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

4. Logistic replenishment at PEARL HARBOR, on the West Coast, and as specially provided for in the Annexes.

5. (a) Communications in accordance with Annex III to Navy Plan O-1, Rainbow Five.

(b) Use GREENWICH Civil Time.

(c) The Commander-in-Chief will keep the Fleet advised of his location.

Admiral, U. S. Navy,  
Commander-in-Chief,  
U. S. Pacific Fleet.

[I-1]

#### ANNEX I

United States Pacific Fleet,  
U. S. S. PENNSYLVANIA, Flagship  
Place  
Date

#### *Patrol and Sweeping Plan*

No.

#### INITIAL TASK ORGANIZATION

- (a) Task Force One.
- (b) Task Force Two.
- (c) Task Force Three.
- (d) Task Force Nine (Patrol Plane Force).
- (e) Task Force Seven (Undersea Force).
- (f) Task Force Six (Logistic and Control Force).
- (g) Task Force Four (Hawaiian Naval Coastal Frontier).
- (h) Task Force Five (Pacific Southern Naval Coastal Frontier).
- (i) Task Force Ten (Pacific Northern Naval Coastal Frontier).

(Units of these task forces initially same as in Operation Plan 1-R5.)

1. Information and Assumptions as previously given in Parts I, II, and III of this Navy Plan O-1, Rainbow Five. Latest information of enemy dispositions, estimated intentions, and location of merchant shipping will be furnished by the Commander-in-Chief, U. S. Pacific Fleet, at time of execution.

2.

#### *Phase I*

This Fleet will, in the Pacific Area, protect the territory and sea communications of the Associated Powers by:

[I-2] (a) Patrolling against enemy forces, particularly in the vicinity of the Hawaiian Islands; and on shipping lanes (1) West Coast-Hawaii, (2) Trans-Pacific westward of Midway and (3) in South Seas in vicinity of Samoa.

- (b) Escorting as conditions require and forces available permit.
- (c) Covering.
- (d) Employing striking forces against enemy raids and expeditions.
- (e) Routing shipping.

#### *Phase IA*

*This Fleet will:* (a) continue the operations of Phase I, except as to patrols which will be modified or discontinued as necessary in order to carry out prescribed offensive operations;

(b) attack enemy communications by making initial sweep for enemy merchant ships and raiders, and by raiding Japanese sea communications westward of Nanpo Shoto;

(c) reconnoiter and raid the Marshall Islands.

#### Subsequent Phases

*This Fleet will:* (a) continue operations of Phase I except as to patrols, for which further directives will be issued later.

3. (a) *Task Force One.*

(1) Cover territory, forces and shipping of the Associated Powers as directed.

[I-3] (2) Furnish one cruiser (in rotation as practicable) to *Task Force Three* for cruiser patrol pool; and be prepared to furnish, on order, other patrols or a striking force, or both.

(3) While en route in accordance with Marshall Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1) conduct such sweep as information and circumstances at the time permit without interference with the primary task.

(b) *Task Force Two.*

(1) Furnish one cruiser (in rotation as practicable) to *Task Force Three* for cruiser patrol pool. (In case of detachment of Atlantic reenforcement this subparagraph is inapplicable).

(2) Be prepared to furnish, on order, other patrols or a striking force, or both.

(3) Develop contacts made by patrol planes from Oahu if vessels of *Task Force Three* are not within supporting distance of such contacts.

(4) While en route in accordance with Marshall Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1) conduct such sweep as information and circumstances at the time permit without interference with the primary task.

(c) *Task Force Three*, reenforced with one cruiser each from *Task Forces One and Two* (for cruiser patrol pool), *NARWHAL* or *NAUTILUS* from *Task Force Seven* (Undersea Force), and one oiler from *Task Force Six* (Logistic and Control Force), also further reenforced by one squadron of patrol planes and tenders from *Task Force Nine* (Patrol Plane Force) (by request on Commander *Task Force Nine*) when the situation in the South Pacific requires and facilities there permit:

(1) Patrol against enemy units that may attack own and allied communication lines, operating in general as follows:

[I-4] (a) Maintain two cruisers (one, if Atlantic Reenforcement is detached) on patrol between Hawaii and the Pacific Coast in areas more than five hundred miles from land. Reserve such ships either in Hawaii or on Pacific Coast.

(b) (i) Maintain two cruisers, two destroyers, one submarine and one oiler in the South Pacific based on Samoa, normally keeping one cruiser on patrol within one thousand miles of Samoa along routes to New Zealand.

(ii) When the situation in the South Pacific requires and facilitates there permit, request from Commander *Task Force Nine* (Patrol Plane Force) assignment of a patrol squadron and tenders; and advance it into that area for operations.

(iii) Coordinate activities of unit operating in the South Pacific with British naval forces as far west as longitude one hundred fifty-five degrees East as the situation at the time makes expedient; and in accordance with such directives as may from time to time be issued.

(c) Maintain one cruiser, based on Midway, on patrol to the northward of the Midway-Marianas line, in the vicinity of trans-Pacific trade routes.

(2) Upon commencement of Phase IA, dispatch two heavy cruisers in company to raid Japanese communications westward of the Nanpo Shoto, and return to base when fuel situation or other circumstances require. Arrange directly with Commander *Task Force Six* for fueling such cruisers at or near Midway on outward passage and on return as may be feasible. The Commander-in-Chief will make arrangements with the Commander-in-Chief, Asiatic Fleet, concerning the utilization of the portion of the Far Eastern Area involved.

[I-5] (3) Upon commencement of Phase IA, discontinue patrols required by paragraph 3 (c) (1) and sweep for enemy merchant ships, operating along the following general lines:

(a) Samoa based cruisers and destroyers sweep northward to latitude twenty thence to rendezvous designated by Task Force Commander for operations in conjunction with the Marshall Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1). Other Samoa based units rejoin their normal commands.

(b) Cruisers on patrol between West Coast and Hawaii sweep or search for specific enemy merchantmen, as Task Force Commander may require enroute to rendezvous designated by him for operations in conjunction with Marshall Raid.

(c) Other available units conduct maximum practicable sweep in general area bounded by Hawaiian Island chain, latitude forty-six North, and longitudes one hundred sixty-seven West and one hundred eighty; such sweep to occupy about six days, and to begin on or as soon after J-day as possible.

(d) Units operating in the foregoing northerly area originate radio traffic to indicate an advance toward Japan via a northern route.

(4) (a) Upon completion of sweep directed in subparagraph (3) (c) above, rendezvous with oiler supplied by *Task Force Six* (Logistics and Control Force) in latitude twenty-seven North, and one hundred seventy-eight West, or other rendezvous you may have designated. Fuel and proceed to join *Task Force Two* (Marshall Reconnaissance and Raiding Plan, Annex II to Navy Plan O-1) on twelve J-day at rendezvous Tare in latitude sixteen North, longitude one hundred seventy-seven East or other designated time and rendezvous.

(b) If any units will be delayed in joining *Task Force Two*, advise the commander thereof as to the extent of the delay.

[I-6] (c) If conflict of tasks exists, operations against inferior enemy forces within striking distance take precedence over joining *Task Force Two*.

(5) If Atlantic Reenforcement is detached, assign two heavy cruisers to *Task Force Two*. (In such event the assignment of one cruiser from *Task Force Two* to *Task Force Three*, hitherto mentioned will, of course, not be made).

(d) *Task Force Nine* (Patrol Plane Force).

(1) Having due regard for time required to overhaul and upkeep planes and for conservation of personnel, maintain maximum patrol plane search against enemy forces in the approaches to the Hawaiian area.

(2) Initially base and operate one patrol plane squadron from Midway. At discretion increase the number of planes operating from bases to westward of Pearl Harbor to two squadrons, utilizing Johnston and Wake as the facilities thereat and the situation at the time makes practicable.

(3) Be prepared, on request of Commander *Task Force Three*, to transfer one patrol squadron and tenders to that force for prompt operations in the South Pacific.

(4) Be particularly alert to detect disguised raiders.

(5) In transferring planes between bases, conduct wide sweep enroute.

(6) Planes engaged in training operations furnish such assistance to Naval Coastal Frontiers in which based as may be practicable.

(7) Effect closest cooperation practicable with surface forces engaged in sweeping during initial sweep of Phase IA.

[I-7] (8) Modify patrols as necessary in order to carry out tasks assigned in Marshall Raiding and Reconnaissance Plan (Annex II to Navy Plan O-1).

(9) Units operating from outlying bases cooperate, to the extent compatible with assigned tasks, with other forces thereat. Be guided by principles of command relationship set forth in Annex IV to Navy Plan O-1.

(e) *Task Force Seven* (Undersea Force).

(1) Maintain two submarines on patrol at Wake and two at Midway for gaining information and for attack on enemy units approaching those places.

(2) Be prepared, if Commander-in-Chief directs, during Phase I to conduct observations, by submerged submarines from outside the three-mile zone, of probable radar bases in the Japanese Mandates.

(3) At commencement of Phase IA, or earlier if so directed, establish patrols off the Japanese homeland as prescribed in the basic Fleet Plan.

(4) Route submarines advancing to westward for patrols so as to cover wide front. Coordinate such routing with other patrol and sweeping operations, including that prescribed for cruisers in the area westward of Nanpo Shoto, so as to avoid contact of submarines with own forces.

(5) Keep Commander-in-Chief and task force commanders concerned advised as to location and routes of own submarines.

(6) Transfer NAUTILUS or NARWHAL to *Task Force Three* for operations in South Pacific during Phase I.

(f) *Task Force Six* (Logistic and Control Force).

(1) Through liaison with Commanders of *Task Force Five* (Pacific Southern) and *Task Force Four* (Hawaiian [I-8] Naval Coastal Frontiers) ensure that routing of shipping is in accordance with general directives of the Commander-in-Chief and is coordinated with the protection offered by Fleet patrols and with the routing and protective measures of the British in the South Pacific.

(2) Escort important ships or convoys by using combatant vessels en route to or from the West Coast and Hawaii, which vessels are made available for that purpose. If escort is found necessary and suitable vessels will be not available by modifying schedules of escorts or convoys, make suitable representations to the Commander-in-Chief as far in advance as possible.

(3) During Phase I maintain one oiler at Samoa to operate under Commander *Task Force Three*.

(4) Provide oiler to fuel at sea units of *Task Force Three* on eight J-Day in latitude twenty-seven North, Longitude one hundred seventy-eight West, or at time and place designated by commander of that *Task Force*.

(5) See also oiler requirements under Marshall Reconnaissance and Raiding Plan (Annex II to Navy Plan O-1).

(g) *Task Force Four* (Hawaiian Naval Coastal Frontier).

(1) Coordinate, as practicable, patrol in coastal zone with patrols by other Fleet forces.

(2) Through liaison with Commander *Task Force Six* (Logistics and Coastal Force) and Commander *Task Force Five* (Pacific Southern Naval Coastal Frontier) coordinate routing and escort of shipping in the Hawaiian Naval Coastal Frontier with that in the Fleet Control Zone, when and if established, and in the general Pacific Area.

[I-9] (h) *Task Force Five* (Pacific Southern Naval Coastal Frontier).

(1) Coordinate routing of shipping with the protection afforded by Fleet forces and by British forces in accordance with current situation, and with general directives that may be issued by the Commander-in-Chief.

(2) Conduct such search and patrols in vicinity of own theater as practicable with available forces. Keep the Commander-in-Chief fully advised of information gained. Also, when circumstances warrant, communicate such information direct to any Fleet forces in the vicinity.

(3) In the initial stages of Phase IA, particularly, cooperate with any Fleet forces in the vicinity in locating enemy merchantmen within flying range of the West Coast, obtaining assistance and cooperation of Army units as is practicable.

(i) *Task Force Ten* (Pacific Northern Naval Coastal Frontier).

(1) Conduct such search and patrols in vicinity of own theater as practicable with available forces. Keep the Commander-in-Chief fully advised of information gained. Also, when circumstances warrant, communicate such information direct to any Fleet forces in the vicinity.

(2) In initial stages of Phase IA, particularly, cooperate with any Fleet forces in the vicinity in locating enemy merchantmen within flying range of the West Coast, obtaining assistance and cooperation of Army units as is practicable. It is especially desired to cover until eight J-Day UNIMAK PASS and the maximum area to the southward of Dutch Harbor that daily flights and available planes will permit.

(x) (1) This plan effective simultaneously with Navy Plan O-1, Rainbow Five.

[I-10] (2) All task forces make available to Commander *Task Force Six* (Logistics and Control Force) for escort duty, all ships enroute between Hawaii and West Coast.

(3) Destroy enemy combatant ships encountered.

(4) Capture or destroy enemy merchant ships encountered.

(5) Investigate neutral merchant ships encountered; send them to port for adjudication if investigation warrants; or if necessary and permissible under international law, destroy them. (See "Instructions for the Navy of the United States Governing Maritime Warfare").

(6) Seize any opportunity to inflict disproportionate damage on the enemy, modifying or discontinuing plans in operations if necessary in order to do so.

(7) Disseminate pertinent information to other Task Force Commanders as conditions of radio silence and other circumstances permit.

(8) Aircraft attempt, without taking undue risk, to force merchant ships to the vicinity of supporting surface vessels or to United States' ports.

(9) This plan effective with Navy Plan O-1.

(10) Be prepared to transfer units of Southeast Pacific Force and Atlantic Reinforcement on short notice. So employ such units that if transferred they can reach Canal Zone within twenty-one days. If transferred, such units proceed along routes and conduct such sweeps as the Commander-in-Chief may prescribe.

(11) Continue such training as these and other prescribed operations permit.

[I-11] 4. Logistics as in Navy Plan O-1, Rainbow Five.

5. Provisions of Part V Navy Plan O-1, Rainbow Five apply.

Admiral, U. S. Navy,  
Commander-in-Chief,  
United States Pacific Fleet.

[II-1]

ANNEX II

United States Pacific Fleet  
U. S. S. PENNSYLVANIA, Flagship  
Place  
Date

Marshall Reconnaissance and Raiding Plan No. ———

*Initial Task Organization.*

- (a). *Task Force One.*
- (b). *Task Force Two.*
- (c). *Task Force Three.*
- (d). *Task Force Nine* (Patrol Plane Force).
- (e). *Task Force Seven* (Undersea Force).
- (f). *Task Force Six* (Logistic and Control Force).

Units of these task forces initially same as in Operation Plan 1A-R5.

1. (a) *Information.*—(1) This plan covers the initial operations in the MARSHALLS for carrying out the basic task of diverting Japanese strength away from the MALAY BARRIER through the denial and capture of positions in the MARSHALLS.

2. This force will:

(a) Reconnoiter the MARSHALLS, particularly ENIWETOK, preparatory to a raid in force and to eventual capture, in order to develop the mobile and land defenses and material installations therein.

(b) Raid the MARSHALLS with ships and aircraft and small landing groups in order to destroy enemy mobile forces, fixed defenses and facilities.

[II-2] 3. (a) *Task Force One.*—(1) Transfer available large light cruisers and carrier to *Task Force Two* on J-Day.

(2) About Five J-Day, depart PEARL HARBOR with remainder of force and proceed to rendezvous with *Task Force Two* at Point Tare on Eleven J-Day. If delay in arriving at rendezvous is in prospect, advise Commander, *Task Force Two*, of the probable time of arrival. Transmit any such message prior to departing from the PEARL HARBOR area, if possible. Sweep as practicable along the route as required by Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five).

(3) If the Commander-in-Chief is not present upon making the rendezvous, Commander *Task Force One* assume general charge of all further operations in connection with this reconnaissance and raid, and direct Commander *Task Force Two* to commence the raid at a suitable time after he has reported ready.

(4) Upon making rendezvous, assume command of battleships of *Task Force Two*.

(5) Cover operations of *Task Force Two*, as reenforced, from the area to the northward of the MARSHALLS, furnishing such support to that force as developments require, and keeping its commander informed as to the location of *Task Force One*. Detail escorts for any damaged ships of *Task Force Two* which it may be necessary to return to base.

(6) Utilize security offered by operations of patrol planes at WAKE.

[II-3] (7) After *Task Force Two* has completed raids and rejoined, if the Commander-in-Chief is not present, Commander *Task Force One* carry out further operations of a similar nature or conduct the combined forces to PEARL HARBOR at discretion.

(b) *Task Force Two*, reenforced as provided in this plan, reconnoiter and raid the MARSHALLS, carrying out the following approximate procedure:

(1) On One J-Day, unless otherwise directed, depart PEARL HARBOR with reinforcements provided by this Plan and proceed toward TAONGI; battleships and destroyer screen at fifteen knots, remainder of force at twenty knots. Sweep along the route in accordance with Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five) and furnish security as practicable to *Task Force One*. Furnish destroyer escort to oilers as prescribed in paragraph 3 (f) (1).

(2) Five J-Day, fuel the advance group from oilers at Rendezvous Tare or other designated rendezvous.

(3) Six J-Day to Nine J-Day reconnoiter the MARSHALLS as follows:

(i) Reconnoiter by air such atolls as weather conditions, forces, time and developments permit, giving particular attention to ENIWETOK, BIKINI, RONGELAP, WOTJE, JALUIT, KWAJALEIN, MALOELAP and ARNO. Reconnoiter ENIWETOK particularly with a view to an early attack for its seizure.

[II-4] (ii) So conduct reconnaissance as to leave the enemy in doubt as to what further reconnaissance is about to be undertaken, or as to what particular places may be attacked.

(iii) Supplement air reconnaissance by reconnaissance from surface units and by landing patrols, and raid with forces immediately available if the situation and developments at the time indicate that such supplementary action is desirable and feasible.

(iv) Utilize both photographic and visual observations to determine as accurately as practicable the opposition that may be expected to raids and landing parties; and the targets suitable for air and surface bombardment. Of particular interest are:

- ships and aircraft;
- storage tanks;
- power plants and radio installations;
- docks;
- air fields;
- storehouses and other buildings;

guns and observation posts;  
mines;  
channel and beach obstructions;  
other defense installations;  
beaches suitable for landing operations;  
extent of anchorage area;  
hydrographic, topographic, and  
meteorological features.

(v) Retire on own battleships or *Task Force One* for assistance should circumstances require.

(vi) Operate battleship group to furnish support as necessary.

(vii) Unless persistent bad weather or other unforeseen developments prevent, adjust operations to complete reconnaissance in four days or less after making initial flights over enemy territory.

[II-5] (viii) Upon the completion of reconnaissance, withdraw to join *Task Forces One* and *Three*. Transfer battleships to *Task Force One*. *Task Force Three* will merge into *Task Force Two* at this time.

(ix) Study and analyze information gained in reconnaissance; determine upon the atolls to be raided and the specific objectives for attack. Complete final plans therefor, with due regard for subparagraph (4) below, and issue to those concerned. Via destroyer, furnish the Commander, *Task Force One* and the Commander-in-Chief, if present, with information and aerial photographs obtained, and copy of raiding plan.

(x) Report by visual (or by destroyer if out of signal distance) to the Commander-in-Chief, if he is within the general area, otherwise to the Commander, *Task Force One*, the time it is desired to place the raiding plan into effect.

(4) Beginning about Thirteen J-Day, when directed, carry out the raiding plan. In preparing and carrying out the raiding plan, be guided by the following:

(i) Make such additional air reconnaissance immediately prior to attack as best meets the existing situation.

(ii) Attack the selected objectives with air and surface forces, the scheme of attack being at the discretion of the Task Force Commander and designed to provide the best economy of force. Avoid directing enemy attention in advance to the objectives of attack.

[II-6] (iii) The priority of objectives is as follows:

combatant ships, tenders, and aircraft;  
other ships;  
fuel tanks;  
power and radio installations;  
troop concentrations;  
storehouses;  
other installations.

(iv) Except in unusual circumstances, no vessel expend more than twenty-five per cent of bombs or ammunition on *fixed* objectives.

(v) Where conditions appear favorable, land personnel to demolish installations and eliminate enemy personnel.

(vi) Do not enter lagoons with ships.

(vii) Make suitable arrangements for the protection of and withdrawal of damaged ships, requesting escorts from *Task Force One*.

(viii) If sufficient weakly held positions are developed to warrant further raids, carry them out, otherwise discontinue raids at discretion and join *Task Force One*.

(c) *Task Force Three*.—(1) If Atlantic Reinforcement has been detached, transfer two heavy cruisers at PEARL HARBOR to *Task Force Two*.

(2) If carrier is available, assign it to *Task Force Two* for this operation beginning J-Day.

[II-7] (3) While in the Northern Pacific carrying out the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five) employ radio to deceive enemy as to intentions in the MARSHALLS.

(4) If available, assign combat unit of about one hundred fifty marines to each cruiser which will eventually join *Task Force Two*.

(5) Upon completion of the task assigned in the Patrol and Sweeping Plan on about Ten J-Day, join *Task Force Two* with cruisers and destroyers at Point Tare or other designated rendezvous. Thereafter operate as part of *Task Force Two* until released upon completion of the raiding operation of this plan.

(d) *Task Force Nine* (Patrol Plane Force) coordinate operations of patrol planes with those of other forces as follows:

(1) Prior to Five J-Day advance maximum practicable patrol plane strength

to WAKE, MIDWAY, and JOHNSTON, leaving not less than two operating squadrons at OAHU.

(2) JOHNSTON-based planes, during passage of units of other forces to the westward, search along the route of advance from the vicinity of JOHNSTON to longitude one hundred seventy-eight degrees west.

(3) MIDWAY-based planes search sectors to the southwestward of MIDWAY to prevent surprise attack across that sector on units operating toward the MARSHALLS.

[II-8] (4) WAKE-based planes make preliminary air reconnaissance of TAONGI and BIKAR on Five J-Day, or as soon thereafter as practicable, and acquaint Commander *Task Force Two* with the results. Thereafter, conduct search, to the extent that available planes and supplies will permit, to prevent surprise attack from the westward by enemy surface forces on own units operating toward the MARSHALLS.

(5) On completion of the raiding operations of *Task Force Two* resume normal operations as required by paragraph 3242b. of the Fleet Operating Plan.

(e) *Task Force Seven* (Undersea Force).—No primary tasks in connection with this plan are assigned but:

(1) Submarines which may have been in the MARSHALLS in carrying out the Patrol and Sweeping Plan (Annex I to Navy Plan O-1, Rainbow Five) report enemy information obtained.

(2) While en route to patrol stations to the westward:

(i) Seize opportunities to damage important enemy units.

(ii) Avoid contacts with own forces.

(iii) Force Commander keep other forces advised of location and movements of submarines.

(f) *Task Force Six* (Logistic and Control Force). Despatch two oilers to carry out the following:

(1) Proceed on J-Day with destroyer escort provided by Commander *Task Force Two* to rendezvous with the advance group of *Task Force Two* on Five J-Day at Point Tare, or as directed by Commander *Task Force Two*.

[II-9] (2) Thereafter conduct fueling and proceed as directed by Commander *Task Force Two*.

(x) (1) Seize every opportunity to damage the enemy, but avoid engaging at a disadvantage.

(2) Be alert to detect and destroy enemy mobile forces, particularly raids or expeditions which may be directed at our outlying islands.

(3) Restrict the use of radio to a minimum.

(4) This plan effective simultaneously with the execution of Phase IIA of U. S. Pacific Fleet Operating Plan (Rainbow Five).

4. (a) Fuel from oiler as prescribed in paragraph 3 (f) above.

(b) Fuel destroyers from large ships at discretion of force and group commanders.

(c) Logistic support for submarines and patrol planes as in U. S. Pacific Fleet Operating Plan (Rainbow Five).

5. (a) Communications in accordance with Annex III to Navy Plan O-1, Rainbow Five.

(b) Use GREENWICH Civil Time.

(c) Rendezvous Tare: Latitude sixteen degrees North; Longitude one hundred seventy-seven degrees East.

(d) The Commander-in-Chief will keep the Fleet advised as to his location.

Admiral,  
Commander-in-Chief,  
United States Pacific Fleet.

[III-1]

#### ANNEX III

United States Pacific Fleet  
U. S. S. PENNSYLVANIA, Flagship  
Place  
Date

#### Communication Plan No. 1, Rainbow Five

USF-70 effective as modified herein. The numbered parts, sections, and paragraphs of USF-70 listed are effective in toto, or as indicated. Omitted numbered parts, sections, or paragraphs are not effective unless specifically made so by Task Force Commanders by supplementary communication plans.

1110. Effective.

1120. Effective. Unless otherwise directed this communication plan is effective coincident with the placing in effect of Navy Plan O-1 Rainbow Five.

1170 to 1178. Effective.

1179. Effective. The above procedure shall be used for Radar contact reports. No receiver not supplied by Bureau of Ships shall be used for this or any other purpose until it has been thoroughly tested to assure that it does not transmit a carrier from its oscillating circuit.

1180. Effective.

1190. Effective.

1212. Effective.

1220. Effective.

1530. Allied communications in Pacific Area are governed by SP 02376; in the Eastern Theater by current Andus publications.

[III-2] 2120. Condition 19 effective.

2131. Effective.

2200. The radio frequency plans are as set forth in Appendix B, USF-70, except that Naval Coastal Frontier Defense Communication Plans will be governed by Article 4005, 1(a) of WPDNC-46.

No transmission shall be made on 500 kcs. frequency without the authority of the O. T. C. of a Task Force.

When the O. T. C. of a Task Force or component at sea considers that the risk is justified by the importance of the traffic concerned he may transmit traffic to the nearest shore radio station that guards the Naval Calling Frequency (355 kc) or to Radio Washington or Honolulu on the 4235 kc series. He shall not, except in extreme emergency and when he is sure that the situation justifies the risk, answer calls or receive traffic on 355 kc, except by interception.

The various circuit guards required shall be so disposed as to permit the maximum number of ships to set watches on the radio direction finder, underwater listening equipment and other intelligence equipment as directed by Task Force Commanders.

The Senior Commander of Units from different task organizations operating in the same area shall arrange for rapid means of inter-communications, preferably by available shore stations. Task Organization Commander in a port or operating area shall establish an area radio frequency for use under circumstances when visual systems will not serve. In port radio shall not be used [III-3] \* for inter-communication or communication with shore when a visual link or landline exists or may be established.

Guard NPM Primary Fox regardless of geographical position.

2300. Effective.

2400. Effective.

2510. CSP-1161 effective with this communication plan and shall be used in lieu of CSP-776 for Task Organization command traffic.

2520. Use effective Confidential Radio Call Sign lists and ciphers for administrative traffic.

2540. Effective.

2720. Effective.

2740. Effective.

3000. Effective.

4120. Effective.

5000. Effective.

5230. Until receipt of satisfactory radio recognition device for aircraft the following approach and recognition procedure shall govern the approach of Naval aircraft to either units of the Fleet or Naval outlying island bases. Separate special procedure will be prescribed for major bases and areas.

Aircraft approach from outside of gun range in simple cruising formation (if more than one plane) on bearing 045° T. or 225° T. [III-4] on odd days (GCT), and 135° T. or 315° T. on even days (GCT), from center of formation or station at 1000 feet or under. (These bearings may be changed if necessary by local authorities.) They shall never approach from the bearing on the sun when the sun is low.

If station does not recognize plane as friendly it challenges by making "Zs" on searchlight; or by training searchlight with red filter on plane if available; otherwise at shore bases use a red smoke bomb during daylight and a red rocket at night.

On seeing challenge plane, or leading plane if there is a formation, replies as follows:

(a) *Daytime*.—On odd day of the month (GCT), leave formation, circle to the right and, when back on the approach course, dip right wing twice, on even days (GCT), leave formation, circle to the left and, when back on approach course,

dip left wing twice. This must be made distinctive, dipping the wing about 30 degrees to the prescribed side and returning to horizontal after each dip.

(b) *Nighttime*.—Turn on running lights and proceed as for daytime replies to challenge, except circling may be omitted; or make emergency identification pyrotechnic signal prescribed in effective CSP.

When approaching aircraft are recognized as friendly, the recognition station shall [III-5] train on the approaching aircraft a powerful searchlight, make "Fs" or show green colored light. Those signals indicate to planes that they are recognized as friendly and will not be fired on.

In a Fleet formation the recognition stations will be, unless otherwise designated, those ships on the outer circle closest to approach bearings 045° T. and 225° T. or 135° T. and 315° T. (depending on the day) from Fleet center.

0131. Effective.

6200. Effective.

6400. Effective.

6500. Effective.

6610. Effective.

7000 (less 7100). Effective.

[IV-1]

#### ANNEX IV

##### *Command relationships and coordination of activities at outlying bases*

1. Forces operating from outlying stations or bases, under this Plan, may consist, broadly, of the following:

(a) Local Defense Forces, consisting of the local garrison and the local defense forces (which may include submarines and aircraft especially designated for this purpose), operating under the direct control of the base or station commander, and with the primary mission of defending the base or station against hostile attack.

(b) Fleet forces consisting of submarines, airplanes and possibly surface ships or detachments, operating under a fleet task force commander or commanders, whose missions, while contributing indirectly to local defense, are primarily dictated by broader strategical and tactical considerations in connection with other operations.

2. Command relationships, under these conditions, will be governed by the following:

(a) The base or station commander will, normally, command and direct the operations of local defense forces, in accordance with the directive of the Commander Hawaiian Naval Coastal Frontier (Commandant, Fourteenth Naval District). This base commander, a task group commander under the Commander Hawaiian Naval Coastal Frontier, who is himself a task force commander under the Commander-in-Chief, may, on occasion, also have functions of command in connection with Fleet units in the vicinity.

(b) Fleet forces will, normally, be operated in accordance with directives of their respective Fleet task organization commanders. In entrance and egress, use of facilities, arrangements for berthing and services, etc., they will conform to and be guided by the local regulations.

(c) In the event of contact with enemy forces which may threaten the base, or the forces operating [IV-2] therefrom or in connection therewith, the senior officer present in the base area will assume command of all forces and activities in the vicinity as necessary to take appropriate action against the threatening enemy. As it is entirely possible that such procedure may temporarily divert Fleet forces from some broader task contemplated by their task force commanders of the Commander-in-Chief, local commanders must bear this in mind and reduce such diversion to a minimum. They must also, within the limits of the information available to them, and as permitted by the urgent local situation, so direct any action taken by Fleet units under their temporary command, as to further the broad operating plan in effect.

(d) To obviate to a maximum the difficulties which are inherent in the command and communication relationships at such bases, it will be necessary to insure that all interested commanders, including the commanders of bases concerned, are made information addressees of all appropriate plans, orders, and reports of enemy forces. Commanders of all forces within the area will ensure that the base or station commander, as well as the Senior Officer Present, is familiar with the general nature of their orders and with their general operations (unless specifically directed otherwise).

(e) In general, the question of command in such circumstances is covered by articles 801 and 1486, U. S. Navy Regulations.

(f) The shifting of vessels, squadrons, or other units within an area may result in consequent changes in seniority among those actually present.

3. (a) A Base Defense Plan and a supporting Communication Plan will be prepared under the direction of the Commander Hawaiian Naval Coastal Frontier. They must provide for the Fleet units present participating in the defense, and for adequate communications among the various fixed and mobile forces, both local and Fleet. Commander Hawaiian Naval Coastal Frontier will furnish copies of such plans to appropriate fleet force commanders. [IV-2] The latter will, whenever practicable, supply copies to units of their command prior to departure for operations at the outlying base. A unit commander arriving in the area without receiving the plans in advance, however, will obtain them as soon as possible after arrival.

(b) The Base Defense Plan should be analogous to the one currently in effect for the Pearl Harbor area. The Senior Officer Present, in exercising his function of command (paragraph 2 (c) of this Annex) should normally conform to the Base plans.

(c) The Communication Plan should include provisions for:

(1) Inter-communication between units of the local defense forces, and between such forces and the local defense commander.

(2) Communication between local defense commanders and fleet task organization commanders.

(3) An area radio frequency which may be used within that area for both (1) and (2) above and for inter-communication between the fleet task organization commanders present.

PEARL HARBOR, T. H., July 25, 1941.

CinC File No.  
A16/WPPac-46(16)  
Serial 064W  
*Secret*

From: Commander-in-Chief, U. S. Pacific Fleet.  
To: The Chief of Naval Operations.  
Subject: U. S. Pacific Fleet Operating Plan—Rainbow Five (WPPac-46).  
Reference: (a) WPL-46.

Enclosure: (A) Six (6) copies of WPPac-46, registered numbers 1 to 6 inclusive.

1. As required by reference (a), the subject Plan is submitted herewith for approval.

2. In order that the task force commanders of the U. S. Pacific Fleet might have a basis for planning, and for action in case of an early outbreak of war, this Plan has been distributed prior to its approval by the Chief of Naval Operations.

3. The Plan required by paragraph 3215 a.2 of reference (a) will be submitted when completed.

4. Plans for other operations are under investigation and will be submitted as they are developed.

5. This 0-1 Plan is the best that this command has been able to evolve for carrying out the tasks assigned in the Basic Plan. Every investigation of prospective operations among the Japanese Mandated Islands shows that risk of serious damage from enemy submarines and shore-based aircraft must be incurred. The Commander-in-Chief, U. S. Pacific Fleet finds himself severely handicapped for any such operations, because of the limited forces made available to him, particularly by the small number of destroyers and other anti-submarine

vessels, and the lack of transports and a properly trained and equipped marine force.

6. If this Plan is put into effect in whole or in part the actual conduct of any particular operation must be adjusted to accord with the situation actually existing and the forces actually available.

H. E. Kimmel

## HEWITT EXHIBIT No. 38

(This exhibit consists of two parts, viz, Exhibit Nos. 38A and 38B.)

HEWITT INQUIRY EXHIBIT No. 38A

INTERCEPTS, JAPANESE CONSUL-GENERAL, HONOLULU, 10/1/41-12/2/41

SECRET

1-466

WEDNESDAY, 1 OCTOBER 1941

0900 o MURAOKA to TSUSHIMA.—Out.—Have him call.  
 0912 i NJ to OG for birth date. NI.  
 1108 i Man to MURAOKA re sports.  
 1115 i MIKAMI to SAKAI. NI.  
 1255 o MURAOKA asks Tamako /female name/ to come to see them next week.  
 /This has all the earmarks of straight social talk./  
 1257 o SAKAI tells wife /?/ that they won't need the car this Sunday.  
 1305 o Man asks HBD for thick drawing paper and a fountain pen. NI.  
 1310 i XX to MIKAMI ordering a car for 2.15.  
 1320 o SEKI to NAKAMURA of HBD re paper and maps. /No localities indicated./  
 1324 o To HBD for supplies.

End

1-467

THURSDAY, 2 OCTOBER 1941

0900 o To NISHIKAWA.—Out.—Have him call.  
 1028 i Universal Motors says the parts are ready at any time.  
 1042 i MURAOKA to NISHIKAWA /commercial; NI/.  
 1055 i Man to SAKAI re XP. Routine info.  
 1115 o To MIKAMI asking him to call XX.  
 1121 o To RCA for messenger.  
 1121 i For closing hours.  
 1134 i TAKAGISHI to XX inviting him for next Monday, the 6th, at about 2:00.  
 T. also thanks XX and apologizes for keeping him up late. T. remarks that XX was "high" at the /wedding/ party /of Sumida's son/ and yelled a lot and XX says he remembers having a good time, but doesn't remember yelling. T. will call for him.  
 1140 o XX to Mrs. ? saying he has just learned from Mr. TAKAGISHI that he was pretty bad the other night. He apologizes for his behavior and seems to be sincerely remorseful. She says that the incident T. referred to was quite late when XX entered the maid's room and got tangled with the maid. He says he learned about it from T. She giggles and is amused at his contrite heart. He asks what time the Incident /not War/ took place.—About 1:30. /It seems that MIKAMI failed to show up when he was supposed to and XX got beyond his depth in *sake*. He forgot somethink there that night, and Mrs. ? /Sumida/? asks when she may return it to him. They both laugh unroariously at the "missing link" of his evening's adventure. She asks whether he is at home and learns that he is at the office. She refers to it as "that", which leads to more merriment, and says she will send "that" up this afternoon.  
 1145 o NI.  
 1330 o O. G. to Rev. IKEZAKI re girl that lives at Koloa, born 7 Feb. 1916.

1-468

FRIDAY, 3 OCTOBER 1941

0900 i NAKATSUKA to XX.—Not in.  
 0905 i NAKATSUKA to XX re the Advertiser spread about Senator Gillette's remarks on the subversive activities of X. N. asks XX whether the accusations are just.—No, they are only rumors.—Do you have any idea how the rumor started?—No. I don't know at all what activities are referred to as leading to the X in Hawaii.—Have you heard anyone from the American Government asking you questions? According to Senator Gillette, the FBI and Army and Navy Intelligence services desire such an inquiry. He gives the idea that they are more or less following the activities of X. /They both agree that very foolish state-

ments often get into the papers./ . . . Have you heard anything about the Japanese on the Pacific Coast?—No, I don't think so.—You feel they are just as loyal as the Js. in Hawaii, then?—Yes, I think so.—They, of course, you deny all what he says.—Yes, I deny it.—Categorically deny it?—Oh, yes.—He mentions here that some organizations send funds to Japan or help distribute propaganda films in the U. S. Do you feel that these allegations are true or not?—No, I've never heard about the Army /apparently misunderstood N. to say the Army was sending them/ sending films here.—You deny that X is taking part in any subversive activity, of course?—Yes. /N. will let XX look over whatever he writes on this matter./

- 0911 i KAWAMOTO of NJ to SAKAI re data on man named NITTA. NI.  
 0938 i NAKATSUKA to XX reading his story re Senator Gillette's allegations of "unconsular" activities on the part of X. XX then asks N. to wait a moment.—What for?—I am preparing a statement for you.—You mean you are translating your J. statement into English?—Yes.—Are you writing a long statement?—No. /N. then continues reading his story. XX asks for his phone number and says he will call him back./
- 0949 o SEKI TO NAKAMURA of HBD for paper.  
 0959 o XX to NAKATSUKA saying he put the matter in very simple Japanese, but believes N.'s story covers it very well. XX adds that he has heard for the first time of the Japanese military league in the U. S. which is accused of subversive activities on the West Coast. XX requests N. to look at his paper of 4 and 5 January. VX called XX's attention to the fact that Gillette made a statement on the 4th and the following day a S-B editorial referred to him. XX approves N.'s story including XX's denial that the J. War Office distributed films in America.
- 1008 o SAKAI to KAWAMOTO at NJ.—Out at a meeting.—Have him call.  
 1053 i /FPM/ Man tells OG he has received a letter which indicates that the Federal Govt. is going to treat all dual citizens as aliens beginning 1 October. Can X do anything about it?—No.—Thanks.
- 1139 i KONISHI to SAKAI. Routine request for data.  
 1355 i NAWATANI to YUGE. /A very cryptic brief conversation in which great surprise was expressed at some telegram or wireless message received. No details given./

1-470

#### SATURDAY, 4 OCTOBER 1941

- 0952 i KATSUNUMA asks OG re Nakazo FUJII. He has died in Hilo and his friends have phoned to find out what *ken* he is from. They are all embarrassed about the funeral /i.e., they don't know which *kenjin-kai* will take charge/. Call 98310.
- 1037 o OG to KATSUNUMA saying he is not listed, but his younger brother, Nobuta, is given. Yamaguchi.
- 1045 i NAKATSUKA to XX. XX approves N.'s story re Gillette's accusations. N. asks whether XX has had any communication re the two NYK ships coming here.—No; none; I have read about them in the paper. I wonder where they got the information. I haven't received any letters from Japan since July. I haven't received any information at all about this.
- 1050 i KONISHI to MURAOKA re XP of a Korean.—That's impossible. The Koreans are in the same position as the British or Germans with regard to dual citizenship.—This is a student at the University who has been told he must XP before he can be eligible for an exchange scholarship.—After a check, I find that it is impossible for a Korean to XP.
- End

1-471

#### SUNDAY, 5 OCTOBER 1941

Not Covered

1-472

#### MONDAY, 6 OCTOBER 1941

- 0945 i NAKATSUKA asks XX about ships. They agree that the rumors are persistent, but no official confirmation has been received.

- 0957 i NOMURA /f/ to MURAOKA re passport issued in 1889 (28 Nov.) to Sanzuchi IWASAKI. Proof of arrival and date of marriage of parents lacking.
- 1012 o KOTOSHIRODO /?/ to man. /Very brief, indistinct./
- 1047 o SAKAI to MIHO.—He's at National Mortgage; call 6221.—Have him call. He sent a check to cover some fees. We asked him to send cash.—Alright. /A sign of the times. Fees paid in in cash are not subject to control or are easily kept out of reach of the controllers. X refuses all checks now./
- 1053 o No answer. NR.
- 1102 o NOMURA to MURAOKA again.—We find we have the record. He came in 1887 on the 11th of December on the Wakaura Maru, ship No. 4.
- 1120 i Man /possibly Dr. \_\_\_\_\_ of Maui/ to LG arranging to see her /at X?/ this afternoon.
- 1127 o XX to cook saying he will not require lunch. /He also went to hear Bowles at PPU./
- 1137 o /NR/ No answer.
- 1205 o SAHARA to Mr. BEERLY /?/.—He's busy.
- 1207 i Woman to MURAOKA re picnic.
- 1300 o SEKI to NAKAMURA.—Out.—When will he be back?—He's gone to McCully.—I'll call again.—Shall I have him call?—No, I'd rather call myself for it may be evening before I call.
- 1303 o OG to friend re picnic this Saturday. NC.
- 1316 o ? to KOGO.—Out.—When will he be back?—Probably about 4:30.—I'll call.

1-473

- 1359 o SAKAI for ?—He's left.
- 1404 o OI to his OG for ?'s number.—6361, local 105.
- 1405 o OI to Mr. AUSTIN /?/ at 6361, local 105. OI says the secretary of X returned here in 1940 on a diplomatic passport. Is he a blocked national?—I think he probably would be.—You do?—Sure, no doubt . . . What's his name?—Mr. YUGE. He has over \$1,000 in one of those three banks.
- 1410 o YUGE to SUZUKI at YSB saying he made deposits the 14th June and 26th July of this year. YUGE's balance at beginning of business 26th July was \$7.51; on 14th June, \$562.87.
- 1420 o MURAOKA to woman saying the letter is ready. This evening MURAO-KA will be out till about 7:30 this evening.—I'll see you tomorrow.

End

1-474

TUESDAY, 7 OCTOBER 1941

- 0932 i YSB To TSUKIKAWA re balance. On 1 June of last year your balance was \$642.44. On 14 May of this year it was \$730.02. On 26 July it was zero.
- 0936 o TSUKIKAWA to OI giving the data of the preceding.—If you have no balance, it can't be frozen.
- 1026 i Man asks for date of his XP.
- 1031 o NI.
- 1203 o SAKAI to his wife. NI.

End

1-475

Wednesday, 8 October 1941

- 1147 i NAKATSUKA to XX re simplified XP procedure. N. asks whether "Stimson's bill" seems to XX to be a good one. XX has a stock answer to any and every question: I don't know.—N.: Do you think that will eliminate a lot of trouble?—I don't know.—Do you think it will help us eliminate the dual citizenship problem?—I don't know what the attitude of the J. Govt. will be.—What is your personal opinion then?—"I can't have my personal opinion if I do not know the attitude of our Government."—Don't you know for yourself whether it would help or not?—No, I can't say.—I think it would be a good thing for both sides to know

876 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

which side of the fence the dual citizens are going to be on.—Anyway, I will wait and see whether our Government has "an attitude to this law or not".—Do you have any word on J. ships' being scheduled?—None, except in the newspapers.

1315 ? NI.

1355 i /FPM/. Too brief.

1400 i /FPM/. Girl to SAKAI re XP applied for around New Year's. Yoshito HIROTA. NC.

1406 i /Cont. of 1400 conversation./ SAKAI: Your XP arrived 3 July, #433.—I had heard nothing about it.—The details aren't here yet, but I will look them up by tomorrow.

End

1-476

Thursday, 9 October 1941

0918 o XX to woman at NATSUNOYA TEA HOUSE, saying he forgot to bring home the *syohin* /could be 'trophy, prize'; 'stolen goods'; 'commodity, merchandise'./ last night. Please put the smaller package of photographs in an envelope. I am sending some one to pick them up.—Alright.

1028 i Man at NATSUNOYA /?/ to SAKAI saying that he will send his KT to X by mail.

1040 i Man re deferment of J. military service. He asks OG whether the request must be sent to the village office in Japan.—Yes.—But if the P. O. here should "open" these requests for deferment, wouldn't there be a lot of trouble?—Why don't you come up to the office with it? /It developed later that was for advice only. The forms must be sent in by the individual direct to the village office and should reach that office as soon after 1 December as practicable, especially in view of the uncertainty of mail connections with Japan./

1130 i Brief. NI.

1140 o MURAOKA to GOTO re arrival of XP permits for several members of the Goto family. Please come up for them and we will take the final step in XP procedure.

1253 i Re XP; NC; NI.

1322 o To MIKAMI requesting him to come to X.

1325 o ? to NAKAMURA of HBD asking him to come to X this afternoon. /A thing that never fails to impress me is the fact that N. is not only "familiar" with higher members of X staff, but he tells them he will not come up when they ask him to or picks his own hour. No one else is so discourtuous, to X, as N. is./—I can't make it today.

1328 i Woman asks OG whether she can get money through to Japan.—We don't know. /Later switched to SAKAI./—Is it hard for people born here who do not hold J. citizenship but who are now studying in Japan to be naturalized Japanese?—They will have to follow the regular procedure and apply to the Minister of the Interior. Sometimes it takes 2 months, sometimes it takes longer.—You see, I have children in school there and they won't pay money out to them because they are American citizens. Aren't they Japanese?—No, they are foreigners. They will not release funds to them.—Can they acquire J. citizenship here?—No, they must be in Japan to be eligible for naturalization.—Where can I take steps to have them naturalized?—Do all this in Japan. It cannot be done here.

1435 o SEKI to NYK.—We have word that a ship is coming here about the 20th.—Is it bound for Mexico?—I suppose so.—Are you free Saturday?—Yes.—Then let's have a game. /Golf./

End

1-478

FRIDAY, 10 OCTOBER 1941

1305 o OG to woman. NI.

1400 i Man to VX.—Call 5243.

1457 i Re XP of KONO. SAKAI had to send the \$3.00 check back and request cash. Caller wondered why he wasn't trusted. S. explained that it was the "freeze" that made the new plan necessary.

End

1-479

SATURDAY, 11 OCTOBER 1941

- 0930 i NAKATSUKA to XX, saying the J. short-wave broadcast this morning /6:30-?/ reported that some ships were definitely going to be sent to America to bring passengers from Japan and to pick up some to take back.
- 0932 o SEKI to restaurant reserving places for lunch for four: TSUKIKAWA, YUGE, SEKI, and one other. About 1 o'clock.
- 0933 o NI.
- 0934 o SEKI to ISHIZAKA arranging to meet in front /of X-?/ at a little before 1:00. They are going to lunch together and plan to play /golf/ about 2:30. ISHIZAKA then tells SEKI that both AP and UP news indicates that on the 15th the Tatuta Maru will sail, on the 22nd the Taiyo Maru will sail for Honolulu from Kobe. From San Francisco the Tatuta Maru will sail direct for Japan while the Taiyo Maru will come to Honolulu and return. The Nitta Maru will proceed to Seattle. Today is Sunday in Japan and I have had no wire from the head office.
- 0939 i NI.
- 0955 i NI.
- 0957 i /FPM/ To OG. Very brief.
- 1000 o /FPM/ Re picnic. NC; NI.
- 1012 i Girl to OG, arranging picnic. NC; NI.

End

1-480

SUNDAY, 12 OCTOBER 1941

No activity

1-481

MONDAY, 13 OCTOBER 1941

- 0900 o MURAOKA to TSUSHIMA.—Out.—Have him call.
- 0930 i Woman says she wants to send parcels on the ship that is coming to Honolulu, but supposes that is not permitted.—We can't say about that.
- 0932 o SEKI to MIKAMI re football and tennis tickets /apparently the police game/.
- 1045 i NAKATSUKA to XX. The first edition of the H. S.—B. Saturday reflected that X had had no word re the ships, but this was changed in the second edition after receipt of official news from Tokyo. No news since Saturday.
- 1049 i Woman re request for deferment of J. military service which she wishes to send on the steamer leaving here the 15th. He suggests that she send it registered. Rest NI. If she sends it through X, however, he requests her not to send it before December, for the dates are 1 December to 31 January of the following year. /Time and again I have observed that 9 out of 10 calls connected with deferment are from women. Apparently they look after this detail of keeping their husbands or sons out of the J. Army./
- 1135 o MURAOKA to Mrs. FUKUMOTO, a language school principal, re a questionnaire which he will send her by mail since he hasn't time to bring it down. It may be that he had a child at her school, /Makiki J. L. S./?, but no real clues are given.
- 1144 o MURAOKA to Mrs. KIRIHARA asking her to telephone X tomorrow morning after 9:00.
- 1320 o OG orders tickets in Japanese for VX as a private individual, not as VX /to what?/.
- 1433 i KANEKO to YUGE asking whether it is alright to give the wording of the cable from the F. O. to X to the press as received.—Yes, I think so. /YUGE starts to ask a question put as K. hangs up on him./

—END—

878 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1-482

TUESDAY, 14 OCTOBER 1941

- 0910 1 For? — Still at home.  
 0940 1 KIRIHARA to MURAOKA. Mostly about arranging a social affair early enough in the day to permit children to attend. Later M. tells K. that Saturday is a holiday because of the great ceremony at the Yasukuni Shrine /enshrinement of war dead/. They will get together then.  
 1003 1 NAKATSUKA to XX saying there are 800 J. residents who are going to leave the Pacific Coast. Have you heard how many are leaving here? — The NYK is making all arrangements and I can't say what the whole number is. — Do J. nationals have to clear any papers with you first before leaving for Japan? — No.  
 1026 1 HBD to NAKAMURA of HBD. — He's left here.  
 1307 1 Castle & Cooke re pensioners. — Person in question not here yet.  
 1330 o SEKI re some printing jobs.  
 1343 o Re camphor and formallin.  
 1420 1 "Have NAKASUJI call 91043 if he comes in."  
 1430 o /FPM/ Man calls re passport. Matanosuke MURAKAMI. Routine check if arrival.  
 1443 1 MacNaughton /?/ of Castle & Cooke asks SAKAI for addresses of these persons who are C&C pensioners now living in Japan. Under General License No. 32, C&C are permitted to make these monthly remittances to them, but the Bank of Hawaii has no J. funds available. Should we approach the YSB or Sumitomo direct? — The secretary in charge will call you back tomorrow. He has left for today.

End

1-483

WEDNESDAY, 15 OCTOBER 1941

- 0913 1 Kiichi KUWAHARA applied for XP in August. He is expecting a new KT on the next ship. Shall he bring it in?—Yes.  
 0925 1 DATE to SAHARA, reporting death of SHINJIRO SHINO. He wonders whether it has been reported.  
 0927 o SAHARA to DATE. Yes, it was reported on the day he died.  
 1152 1 Re application for deferment of J. military service. Routine.  
 1206 1 /FPM/ Sports talk. They will play Saturday afternoon. /One of the junior members of the staff and a friend./

End

1-484

THURSDAY, 16 OCTOBER 1941

- 0853 o Sakai to ISHIHARA.—Out.  
 0858 o Sakai to OHIRA at NJ.—Out.—Have him call.  
 /Ichimatsu OHIRA is NJ collector./  
 0902 1 Nakatsuka to XX.—Not in; call back.  
 0913 1 NAKATSUKA to XX, saying he will be up in 15 or 20 minutes to see XX.  
 0915 1 KUWATA to Sakai re application for deferment. Routine.  
 0918 1 Woman asks whether she can get her /son's or husband's?/ application for deferment off on the Taiyo Maru. OG thinks so. The woman is worried for fear the J. Govt. will not grant deferment. OG thinks everything will be alright.  
 0928 1 /FPM/ Man to X, saying something is at 5 o'clock today, or something at 9 o'clock.  
 1000 1 Calling in to ask about the draft deferment request.—He should send it in.  
 1024 1 NAKATSUKA to XX, reading to him in English interview for S-B 10/16 re his ideas for the consular probe suggested by Senator Gillette.—"How do I say about the Hawaii-born Japanese?"—No. I make little reference to the Hawaiian born Japanese. The talk is all more or less all pertaining to the when I say the Japanese people of Hawaii, I take it for granted that that's the older people.—Yes.—Because otherwise I

I would say Americans of Japanese ancestry.—Yes. And you remember, one place I said: 'The elder Japanese also gladly send their American born sons into the Army'.—"Oh, yes, yes" /rapidly expressing understanding/.—That gives the impression that all along I've been talking about the older Japanese.—Yes, that's alright.—Because the younger Japanese, well, everybody would take it for granted that they are loyal. /Hearty laughter by XX in which N. soon joins. XX breaks in with:/ "Yes, yes; quite natural." /More laughter by XX, of a polite sort./—N: Do you want to mention anything about your X here? I have omitted it because I knew it is very delicate.—I think it alright just as you say now. Thank you. Goodbye.

1039 o To HBD for supplies. NI.

1-485

1043 o To a pharmacy for a substitute for medicine formerly gotten from Japan.—Will send up ½ lb.—If OK, may get more.

1045 i Dr. \_\_\_\_\_ to XX, inviting him to dinner on the 19th at YMCA /?/ at 6:30.

1053 i To Sakai re request for deferment.

1055 i NC; NI.

1135 o OG to Mackay Radio /FPM/. OG: ..... message received this morning.—What number is it?—HC 169 SN /?/—169, one moment . . yes, here it is.—It's the third word.—Third word? OG: The first.—The first?—First.—1 uhh 00 930.—Yes.—Do you want that word checked?—I want this tenth word checked.—Tenth?—Yes.—That's J U U G.—The next one.—The next one, G O N A N I G O N I T E?—Yes. I wish to have you check if it is G O N A N A.—It should be G O N A N A. OG: So we'd like to check on that.—Yes. I'll check that up.—And who is calling?—The Japanese Consulate /no particular person/.

1209 i From Mackay Radio: This morning you got a message from Toko by Mackay Radio and you wanted a confirmation of the next to the last word. That's G O N A N A N I G O N I T E.—I see /repeating it/.

1310 i To Sakai about the draft deferment, whether he needs to report. NI.

1320 i NI.

1434 o NI.

1440 o Lee for taxi right away to go up to X.

End

1-486

FRIDAY, 17 OCTOBER 1941

0900 i YAMASHIRO no other name given, but X understands/ to X. Y. sent off a letter concerning the deferment for Tomimatsu SHIGETOSHI. Received under date of August 5 from Japanese city or town hall a nolsy or vigorous letter, saying he was to return to take his physical exam for conscription. What is the best way to reply? Native village is Takaoka Prefecture, Hikujo Country, Kurotsuchi Village. He was born August 8, 1920. X will see. Please wait. X tells him to send off something as soon as possible and then wait until January anyhow.

0905 i Girl in English: "Ah wanta inquire where to have where the Japanese go to see about th' expatriation papers. Can you tell me?" /Apparently someone who wants to have her maid expatriated. Accent mainland American, probably Southern. Calls in long distance./—At this office.

0925 i Inquiry whether OK to forward draft deferment by mail.—OK, but tomorrow is a holiday, so if you get stuck don't come in then.

0987 i NI.

1000 i NAKATSUKA to XX, reporting the latest news just in "that U. S. merchant ships have been ordered from the Chinese and Japanese waters. Of course, this isn't straight from the Navy Department, but it's what some people . . . . . Have you received any word to that effect?" /No answer. Perhaps XX doesn't quite understand./ N: We have some word even in Honolulu that ships down here have been ordered to stay away from the Asiatic waters . . . . The only reason is that the Navy considers the situation in the Pacific quite serious. I think that's the only interpretation.—XX replies that he hasn't heard anything about it.

# 880 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

... wants to know when it came in /as he didn't quite get it the first time, when conversation was in English/.

- 1017 i To Muraoka /private; NI/.
- 1027 o Muraoka to someone in connection with private plans. NI.
- 1047 i Evidently a mistake.
- 1203 i NI.

1-487

- 0846 o Muraoka /?/ to Suzuki. re: tennis. NI
- 0847 o Muraoka /?/ to /?/ who is out.
- 0848 o Muraoka to Fujikawa. Are you coming to the party? NI
- 0855 o Muraoka to Sasaki. NI.
- 0856 i NI
- 0857 o Muraoka to another Muraoka. FPM
- 0859 o To Mr. YOKOTA of Occidental Life. Not in yet. Have him call 2243, Mr. MURAOKA.
- 0859 i To VX. Not in yet, but soon.
- 0904 i OI calling re: a conscription deferment for someone.
- 0908 i To MURAOKA. NI /about the party and getting gelshas/
- 0956 o To RCA for messenger.
- 1003 i Man asks how soon he must hand in his application for deferment.
- 1028 o MURAOKA to NISHIMOTO inviting him to a party at the Natsunoya the 26th.
- 1030 o MURAOKA to TOMIKO (?) inviting him to dinner Sunday. Apparently not private invitation for the price of \$2.00 is mentioned.
- 1031 o NC; NI
- 1035 i . . . . Call 5243 (Line #2)
- 1100 i Woman to Muraoka. NI.
- 1120 i YSB to TSUKIKAWA saying a draft has come for him.
- 1126 i KURISHIMA to Muraoka re tennis and other sporting events. Later there was mention of 5 cases of liquor for the big event. There will be exhibition game.
- 1-489
- 1136 o MURAOKA to Mrs. HIROKOTO (?) re tennis next Sunday. NI
- 1147 i NI
- 1248 i re office hours.
- 1249 i Re XP. The man XP'ed a number of years ago and then later had his J. citizenship restored. His father or an elder man wants to get his status with regard to (J. ?) military service cleared up. SAIKI asks him to come to the office to talk it over. (It seems that the boy is now trying to dodge J. military service after becoming a Japanese citizen. "Restoration" of J. citizenship should automatically XP from American nationality, because "restoration" requires an act on the part of the individual and is not on a par with the accidental citizenship acquired by birth. This dual citizen lost his J. citizenship when he XP'ed and then lost (or should have) his American citizenship when he had the J. citizenship restored.)
- 1305 o An outsider calls out for information re a form he is filling out. NI.
- 1325 o KUNIYOSHI of K. store in Mollili to old man. He had asked for his KT in connection with XP. Call 8323 and ask for Takazu.
- 1328 o KUNIYOSHI to ? complaining that his XP has not come yet.

1334 o KUNIYOSHI to 4221 re his BC (Birth Certificate). There is a discrepancy in the birthdate. K. is much perturbed but J. girl at 4221 tells him not to worry. The old man was probably late in registering K's birth with X and didn't wish a scolding or fine for late registration, so gave a later date. The Board of Health date is here taken as the correct one.

1448 ? (FPM) NI

End

1-490

TUESDAY, OCTOBER 21, 1941

0910 o NI (Muraoka about beer for the party!)

0915 o MURAOKA to NISHIMURA. Not in. NI.

0917 o MURAOKA to NISHIMURA. Not in. NI.

0918 o MURAOKA to NISHIMURA. In! NI. /More about the beer. 4 or 5 cases?/

0926 o MURAOKA to YOKOTA. NI. /a geisha—to arrange for THE party/

1003 o MURAOKA to FUJIKAMA. NI.

1004 o MURAOKA /?/ to SAKATA Bon Ton. Out.

1016 i NISHI of NYK to YUGE reporting that they have received a definite telegram that the ship will be off port 10 a. m. day after tomorrow /i. e. Thursday/

1019 i NAKATSUKA to XX—has he had any word as to the exact arrival time of the Tatsuta. Yes. It will arrive on the 23rd and not on the 24th. But he doesn't know the exact time of its arrival (!). Can't think of anything else.

1045 o MURAOKA to Sec of Hawaii re SHIOMATSU (or CHIYOMATSU or CHINOMATSU). Secretary's man wants "everything on the card."

"His birth September 5, 1873.

"Arrival November 2, 1906."

"Is that the only arrival?"

"I see several times he went back to Japan."

He will have to check and find out just when he first came. Continues re wife Hina, now dead.

Also re one SUZUKI.

1059 o Muraoka to pal. NI.

1103 o Muraoka to ----- NI.

1121 o Muraoka to Mr. Medeiros re Yamashiro' CHIYOMATSU (Chiyomatsu YAMASHIRO?) when he came etc.

1-491

1145 i KANEKO to VX saying the prospective repatriates are very numerous and the accounts connected therewith are most troublesome. Many of them are trying to get permission from Washington to get money from New York and so on etc. we are having an awful time with them.

VX—How about sending them up here to pay their fare?

K—That's all right, but there are immigration problems too.

VX—Let's take the whole matter up with Mr. Strench.

K—You mena with Coleman?

VX—Yes. With Coleman.

K—What about white passengers?

VX—White passengers?

K—Yes. The head office has arranged for some haole musicians to sail with us. A Mr. Si—— Si——

VX—Mr. SIROTA?

K—Yes. Mr. and Mrs. There is a group going first class to Shanghai. They are Americans.

VX—People going to Shanghai must take a transport. There is no other way.

K—These people are "foreign correspondents" of some "news service". They must be newspapermen.

VX—The name is not NEWMAN, is it?

K—No.

882 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1-492

WEDNESDAY, OCTOBER 22, 1941

Out of commission

1-493

THURSDAY, OCTOBER 23, 1941

- 1400 o Muraoka to — tai (female). M.—“The person is not a passenger.”  
 “He didn’t come back then.” “No. He didn’t.”  
 1413 i Inquiring “one information about my girl friend.” NI  
 1414 i Inquiry. Hard to hear. NI.  
 1427 o To RCA for messenger.  
 1434 i fragment. NI.  
 1554 i F.P.M. NI  
 1603 i KATO to KANEKO. “How late will you be open?”  
 Planning details, beds etc. NI.  
 1618 i Dialogue between KANEKO and XX re: who is to issue the tickets and  
 how they will be paid for. Apparently the rates are much lower for  
 this trip than the usual ones. Kaneko is worried because many of the  
 passengers have paid in yen and the company keeps its books in dollars.  
 Kaneko says taking into account the discount they will get only about  
 \$69.75 for \$85.00 and suggests that the “simplify” the system perhaps  
 keep receipts in dollars or yen/ and cable to the main office for authority  
 to do so.  
 1816 i Seki to KOTOSHIRODO asking him to come over. He will.  
 2032 o N.R. Man (not VX) asks for taxi.

End

1-494

FRIDAY 24 OCTOBER 1941

- 0900 ? (FPM) Re sailing of TATUTA.  
 0912 o  
 0934 i Re deferment. Routine.  
 0943 o Re deferment.  
 0947 i NI  
 1010 i Man to MURAOKA re meeting at NATSUNOYA (Tea House) Sunday  
 morning early, which they wish to postpone a week.  
 1020 o Seki to MIKAMI asking him to come to take XX to ship in very few  
 minutes. He wants to be there before 1100.  
 1048 i Redeferment. NI  
 1112 i Re BC; NC; NI.  
 1105 o Seki to SAKAMOTO re cameras. Have your cameras all gone up  
 15%?—No, only 10%—One of my friends wants to buy but they had  
 sold all—we’re out of those foreign made ones too. No new ones come  
 in, and everyone bought before the price rise on 1 Oct. We have  
 super DX and super-6 with meter—How much are the Super-6’s?—  
 \$176—Is that the best one you have?—No we also have some for \$219—  
 Does that include the case?—No.—I may be in soon to look them over.  
 1110 i FUJITA of YSB to X saying he would like passage on the TAIYO.  
 A letter has come from the Yokohama office ordering me home. X prom-  
 ises to arrange passage.  
 1130 o To NAKAMURA. Out.  
 1138 i Very noisy. NI.  
 1153 i Re deferment. NI.  
 1255 i Some sort of query. Very faint/ NI.  
 1-495  
 1345 i For xx. Mr. NEWMAN calling. N. arrived yesterday on the Tatsuta.  
 Mr. MAEDA said he would speak to XX re NEWMAN’s going back on  
 the Taiyo. XX saw Maeda—but hedges when asked if anything had  
 been arranged. He hasn’t “approached” the NYK yet, but he will “have  
 a talk” with them. N. dropped around to see XX but got to his office a  
 little too late today, so missed him. N. is busy this afternoon having  
 eyes examined—is getting new glasses made here before he goes back.  
 N. won’t be able to make it before XX goes home at 3. Could he (N.)  
 see him early tomorrow morning. He has a letter from Mr. KISHI of  
 of the Joho Kyoku. “He has a few things that he wants you to get for  
 him so I can take them back. Also N. has to get a reentry visa to

Tokyo. He spoke to Mr. Kishi, and also to Mr. Yokoyama and also to some of the people in the foreign office and they said the best thing would be first to start it thru here and the application has to be made and it will have to go thru the regular channels but they may facilitate it from the other side. XX thinks that in that case they will have to refer the matter to the Foreign Office. Says that in fact "about anybody that came thru now we have to refer it back." Laughter by XX/ Does XX think tomorrow would be all right to do that? He does. N. says they know all about him over there and thinks approval will be just a routine matter. He will drop around tomorrow morning ok.

- 1312 o To KANEKO NYK from SEKI of X who will come to the point at once re a long cable which KIMURA came and sent on the 8th of August to the tune of \$45.82. The cable was sent to Tokyo to NYK main office. X would like payment please. OK.
- 1315 o To XX HAKUBUNDO from X to order some small swords (or small trees) for some of the people sailing on the boat today. OK. Apparently left addresses during earlier personal call.
- 1330 i Some inquiry re Japanese made products or Japanese nationality ?/. X doesn't know either. NI/

End

1-496

SATURDAY, 25 OCTOBER, 1941

- 0925 i Man discusses entering his son in a J. school. The boy is without J. citizenship and the authorities in Japan will not admit him. Caller wonders whether X cannot write a letter to the authorities that will explain the situation in Hawaii and facilitate the boy's admission. S. says the boy must go thru the regular procedure of having his J. citizenship restored. He must apply to the foreign minister for naturalization. As a person of J. descent, the procedure applied is different and simpler. It is called the "restoration of citizenship" instead of "naturalization" even in cases such as this one where the boy never was a J. citizen because he was not registered at X (born subsequent to 1 December, 1924). XP procedure must be instituted here, while citizenship restoration proceedings must be instituted in Japan.
- 0929 i KAWAMOTO of NJ to Sakai saying the FBI is investigating the consular agents and also the members of the NJ branch office (for Kauai). They are accused of being Army or Navy officers. K. suggests the giving the NJ men identification cards to prove they are members of Domei News Agency.
- 0955 o SEKI to MIKAMI asking him to come to X.
- 1013 o Sakai to Mr. Creighton at S-B. Creighton sent the money yesterday with Mr. Newman. The amount was \$20. N. has an appointment with Mr. Kishi (error for Kita?) this morning. The secretary must have the money before he can send the wire (for permission for Creighton and Newman to travel on the Taiyo). S. can't send the wire without the money, and it has been mislaid somewhere. C. promises to get it into X's hands by noon.

End

1-497

- 1427 o Yuge to IKEZAWA at YSB. /This line got deep in the rain. Very hard to catch/. What the main trend of the conversation is I don't know, tho the conversation sounds important. Something is "funny—strange." Whether a man / one of the three getting off the Harrison?/ is from Tokyo or Yokohama. Also mention of the "situation being bad." Some mention of the Pensecola Hotel having something. The following sequence cannot be vouched for, but the words *sounded* like the following:  
 "You're not returning."  
 "No."  
 "Keep pistol, eh." /This line in English?/  
 "Yes I have, because the situation is so bad." /The last sentence in a very grave voice, and clear./

End

# 884 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1-498

SUNDAY 26 OCTOBER 1941

NO ACTIVITY

MONDAY, OCTOBER 27, 1941

- 0855 i NI. Wrong number.
- 0900 i MURATA of Waialae to inquire about the notification of arrival at military age. Is referred to book stores or newspapers, advised to mail it on the Taiyo.
- 0915 o MURAOKA to YOKOTA retennis. NI
- 0926 i Inquiry about method of forwarding military age attainment forms. Either thru X or personally is ok.
- 0943 i Inquiry about expatriation procedure. Is advised to visit X for help
- 1026 i Inquiry regarding first steps in expatriation procedure. Is informed takes about 3 months.
- 1030 i Pan Pacific Union callion. NC. Not able to come to lunch today.
- 1117 o To Hakubundo from Muraoka re engraving on trophy cup. NI.
- 1130 o NC/ Ran out of blank cylinders at this point until 1420.
- 1135 o To RCA. (NR) On 25th of this month 33 word telegram in code was sent. How much is cost of telegram? \$4.79.
- 1424 o Seki to OI discussing some sort of "applicants" /for passage on the Taiyo/? until the 31st. Apparently the X doesn't want to handle them.
- 1437 o To RCA. "Will you send a messenger boy?"
- 1443 o XX to RCA. Your message #154 /poss. 164?/ which we received today has two pages. We received one page. She will send the other right over. Now XX says they have received three pages already! It's all right!
- 1450 i To OG. Very brief.
- 1458 o NI.

End

1-500

TUESDAY, OCTOBER 28, 1941

- 0820 o NI
- 0828 i To Sakai/?/ Not in.
- 0907 o Conversation with YANE wanted to write it, but hasn't a pen or anything, so can't /a country woman/. NI.
- 0921 i NAKATSUKA to SAKAI ?Also asks if Kita is there. No./ Asking about IIZUKA, his dates etc. SAKAI was working there but "doesn't keep track of the dates."
- 0928 i NAKATSUKA for XX—Not in. "What's happened to him this morning?" Gets phone #4416.
- 0929 i For Muraoka. Inquiry from KONISHI re FUKUDA, Michizo of Yamaguchi prefecture, Oshima county, Okika village. M. will phone him after he has looked it up.
- 0940 o To KANEKO from SEKI at X. Is K. returning? He is. Then he must be busy, but S. will trouble him with a little business re: the forthcoming Taiyo call. S. has received a cable that the Taiyo will be here on the 1st instead of the 31st. Also a cable that there is on board a man Taro TOKUNAGA who was on the Asama Maru / and of course had to go back/ who wants to get off here and take an American boat to S. F. Doesn't know whether he is a man of wealth or influence or not. They aren't clear if there are two of them or only one. If S. finds out he will call.
- 0956 o SEKO to KANEKO/?/ regarding 2 passengers on the Taiyo, one from San Juan, the other from Philadelphia. American(s?) and honorary consul(s?) Pardin is a high personage who was returned to port on order of the government as he is going to the mainland on the Taiyo. They have orders from the Foreign Ministry?/ to put them off and take care of them. Doesn't know how old. They/?/ are Roman Catholics. Then the problem arises about the money the said passengers will need. Will arrange about it later.
- 1000 o To Rosecrans for Taxi.
- 1004 i FPM. Very brief.
- 1008 o To Secy. of Hawaii. Line is busy.

1012 i KONISHI TO MURAOKA request for information on RIKIZO and his wife—how long have they been on Kauai.

1-501

They came September 9, 1898. Re: OYAMA. M. doesn't know. Re: SAITO, Kuishi and Fukuishi: get their dates also.

1020 i SHIMOKURI re: filing of report on conscription attainment of military age. Will they receive it? They will. He'll bring it.

1022 o To NAKAMURA at /YSB:/ inquiry about yesterdays rates. N. says they are changing all the remittances for Japan into dollars, and they are paid in Yokohama. The price is about \$24—24 points. /This?/ is to pay for a telegram so what will \$5.93 be in yen? N. says the rate is about \$24 for ¥100 / then giggles and opines that \$24 is quite a bit to pay tho that is the rate they give their guests!/  
 1058 i NAKATSUKA reads long rebuttal by Kita denying acquaintance with Tadaake IIZUKA /see papers for 10-28-41/ N. at one point says he wants "to clear (Kita) from this case" by pointing out that IIZUKA was here in 1935, long before Kita.

1110 o TUGE to OI. NI.

1131 i Family talk. NI.

1140 o To RCA for messenger.

1141 o For time.

1150 ? (FPM) NI.

1152 i NISHI to Sakai. NI.

1200 o No answer.

1201 o MURAOKA to HIGA (girl) asking for her father. He invites him to come to the office this afternoon about 3,30.

1415 o (FPM) The ship will be in on the 31st.

1420 o Sakai to ITAGAKI re one cloisonne vase belonging to to the honorary J. consul at San Juan, probably an American, but whose name we do not know. Things could be handled infinitely better if we knew the other man's (recipients?) name. (It is from the present or the previous Foreign Minister to the honorary consul at San Juan. There is no price indicated.) Itagaki: I think we had better wait till it arrives and then see how to handle it.

1-502

1432 o Sahara to YOKOYAMA /?/ Out. Have him call if he gets back by 3 o'clock.

1434 o Seki to SATO. Out. (To MIYAMOTO) Seki wishes to talk over with SATO the question of 4 yards of some kind of cloth.

1440 i Re various children of a man who died on Kauai.

1441 i Re office hours. Up to three. Caller then asks whether a child born two months ago, but of whose birth the family had just learned, cannot be registered immediately with X and thereby acquire Japanese citizenship—No. It is absolutely impossible.—Isn't there any way it can be done?—No. None whatever—(as a matter of fact there is a way called "restoration" of J. citizenship, but the child would have to be in Japan in order to have his previously non existing J. citizenship "restored".)

1445 i An eldest son wishes to return to Japan and asks what steps he must take as an eldest son who has an eldest son born here who was not registered at X within the prescribed period. He wants the child to be a J. citizen—After two weeks it is impossible to give the child J. citizenship if not registered at X.—Isn't there any way?—If you return to Japan with the child "restoration" proceedings may be inaugurated—You can't restore J. citizenship here?—No. there is absolutely no way of doing it here. After two weeks have elapsed the child is an American and nothing else.—Even if my ignorance of the child's birth until today prevented registration at X?—That has nothing to do with it. If the child's birth was registered with the Board of Health, take documentary proof along with you and the whole thing can be arranged in Japan.

1447 o —to UEDA. Out. Have him call tomorrow morning for a correction.

1448 o Sahara to KAWAMOTO re mistake in data. Please bring for correction.

1450 o To RCA for messenger.

1451 i Woman to OG re XP procedure. Routine.

1450 i Same woman for further details. She asks whether she has to have her parent's consent. They are opposed; she is 19—You will have to have their consent if you are under 20, for you will have to have them sign

886 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

the petition (Caller is under considerable strain. Her parents want her to return to Japan and want her to keep her J. citizenship but she wants to cut loose from it entirely.).

End

1-504

WEDNESDAY, 29 OCTOBER, 1941

- 0905 1 (FPM) Woman asks whether it is true that all baggage must be on the docks early—Yes (She then asks about deferment of military service.).
- 0945 1 Inquiry as to the meaning of "Maru".
- 0946 1 /can't hear it because of noise in record—something about a chokusen—straight line/.
- 0947 1 NISHIMURA, Mataso, asking something about enlistment.
- 1021 1 To SAKAI re: Conscription levies. Routine.
- 1022 o to NYK. YUGE calling for "Take" YOSHIOKA giving information re CHRICHTON, Colvil M. directing him to issue a ticket for him. He is on the Taiyo. Also re: a NEWMAN /to take care of him?/.
- 1034 1 Fragment.
- 1035 o To S. B. to Mr. CHRICHTON—will he come up and fill in the application for a visa. They hear he is trying to go to Japan and /they?/ have received a wire from Japan. C. will come in this afternoon.
- 1103 1 Inquiry whether there is time to get an exemption claim back for the conscription summons. This boat will be okay.
- 1105 1 To MURAOKA. NC. Somebody too busy to play today.
- 1111 o For Mrs. SMYTHE of the Senate chamber. Call 59471.
- 1111 o To 59471. Mrs. Smythe speaking. Would like a copy of the M-day bill. Doesn't know if they have any more. Will check and mail one.
- 1302 1 Inquiry as to hours of business.
- 1318 1 Inquiry about conscription. deferment.
- 1326 1 Inquiry about conscription deferment.
- 1333 1 Inquiry about conscription deferment. X will receive them.
- 1341 1 Inquiry about sending money to Japan. Country person. NI.

1-505

- 1540 o to RCA. Will you send a M. B.
- 1712 1 No answer

1-505

THURSDAY, 30 OCTOBER 1941

- 0645 o Staff member to sister (or sister-in-law) about groceries. NI.
- 0901 1 Man to Sakai. NI.
- 0926 1 to MURAOKA re something he wishes to send to Japan by Parcel Post/ Will there be duty levied on it?—We can't say. A great deal depends on the man inspecting the particular parcel in question. Old or new, one or many—all these considerations enter in.
- 0927 o to Mr. Hallett ABEND at RH Hotel. (Connection with Abend not made.)
- 0935 o OG to Nakatsuka for address of ABEND, who is supposed to be living at the RH Hotel. OG reports he wasn't there this morning/ N. suggests she try the Moana. (Then to XX) SB wants a list of the Taiyo Maru's departing passengers. We haven't a complete list yet. There may be further applications. We have turned the matter over to NYK. Would you permit us to publish the list Monday?—I think it is all right.
- 0944 1 A haole at our place wants to send some chocolate candy to Japan. Is that permitted?—I imagine so but I don't know.
- 0945 o OG to Moana for ABEND—Not in. Have him call 2243.
- 1002 1 FPM. Man re deferment. Routine.
- 1020 o XX to ABEND at Moana. Not in. Shall I page him? Tell XX called. —I left that message for him. He will call you when he comes in.—When do you think he will come in?—I don't have the information when he will come back. The message is in his box and under his door and he will receive it as soon as he comes into the hotel. I have not any urgent need (XX interrupts for a long laugh) but I am one of his old friends and would like to hear his voice.
- 1030 o KAWAMOTO of NJ re deadline for applications for passage. Saturday noon.
- 1033 1 SATO to Seki. NI.

1-506

1100 i Man asks whether he can send 5# sugar and 2 or 3# nails to his parents. Yes, but there may be duty to pay. NC; NI.

1105 o Seki to merchant re bill. NI.

1107 o NI

1108 o Seki to MIKAMI. Out. Have him call.

1114 i Dr. Wickerson at Moana Hotel to XX. OG says XX is out and she can't make out Wickerson's name. W. insists he found a message requesting him to call XX. (Could Dr. Wickerson be Hallet Abend's nom d'exile? Or was the note to Abend put in the wrong box?) Call 4416.

1116 i MIKAMI to Seki asking him to come over.

1120 i Elderly man to Sakai re XP ed deferment.

? i Dr. Wickerson to XX. XX wanted ABEND, not W.

1205 i Komatsuya Hotel to YUGE re the allotment (of space on the Taiyo) according to *ken*. Is there any distinction made with regard to citizenship status?—All circumstances are taken into consideration. The fundamental division is into *kens*.

1210 i Girl to X. He's left. Re XP.

1252 i Re application for passage on the Taiyo. The usual system. (What is the usual system? Via NYK).

1255 KANEKO to VX. Out. Have him call 6198.

1315 i To MURAOKA re number of declarations of applications. Quite a number left.

1340 i Miss IMAMURA to Muraoka. NI.

1355 i Girl asks for YAGI, ABE, AND HORI. None of them there. (The three lads who transferred from the Harrison to the Taiyo here last week.)

1413 i FPM. TOGASHI mentioned, but this conversation was interrupted by the next one. NC.

1500 o NI

1-507

1502 o NI

End

1-508

FRIDAY, 31 OCTOBER, 1941

0848 o Muraoka to ? saying the tennis matches will start at 10 o'clock Sunday.  
0849 ABEND to XX. Out. When will he be in? In a few minutes—When I got in yesterday your office was closed. I am going out this morning, but I will call him later in the day.

0851 o Muraoka. NI.

0855 i Woman to Muraoka re deferment. Routine except that M. tells her X will be closed Monday, a holiday.

0902 i Re deferment. Routine.

0913 o Seki to OI of JCC. Out; I'll have him call.

0923 o To Glabe wireless for ISHII. Out.

0934 i Re deferment.

0935 i Re deferment.

0940 o Seki to HARADA. He left a few minutes ago. Then to Mrs. H. asking about a cool room for a (Mr?) TAKEMURA arriving the next day or so (presumably on the Taiyo) who will be here a week before proceeding to the states. She has already had word from XX to this effect and is going to give him a cool room being vacated very shortly.

0945 i Re deferment. Question by woman as usual.

0946 i SHINAGAWA to Seki re deferment (First re office supplies). Seki mentions ABE and his prices. (ABE appliance Co.?) NI/

0950 o Muraoka to INADA ordering groceries.

1108 o XX to KIMURA re necessary supplies. Replenishment of the oil is the main thing. (Long discussion but nothing of interest. K. seems very cooperative. He is trying to make arrangements for cleaning a place for the customs searches. He expects the ship to dock about 0800. He expects to be down at the dock at 0730. Both are in good spirits.)

1116 o Yuge to MIKAMI asking him to come to X.

1123 o NI

1-509

1127 i SAKAMOTO requests information as to data of his family.

- 1145 i Query re an application for XP.  
 1148 o Muraoka to friend.  
 1152 o Muraoka to Toshio (first name). Sports. NI.  
 1154 o Muraoka NI.  
 1155 o Muraoka NI.  
 1155 i Seki to Yuge re some financial matters and how to treat the public funds collected /for the Taiyo/.  
 1238 i Query re conscription.  
 1239 i for SEKI. Out /?/.  
 1244 i Inquiry for someone—Not in.  
 1305 o Muraoka to NAKAMURA. Sports. NI.  
 1306 o Muraoka. NI.  
 1308 i Inquiring re afternoon hours.  
 1308 o Muraoka to KIMURA. Out. Left message. NI.  
 1315 o KITA to someone re Monday being a holiday. v. brief.  
 1320 i OTANI (woman) to SAKAI. Something about a copy of the census register. She wants to take it home and he'll get it that evening or something. She has to make the proper moves it seems to re-register the fishing boats previously confiscated. He is explaining to her the difference between having the boat owned by one's own son who is a citizen and having it owned by a stranger or mere acquaintance who acts as a dummy. /But they agree that it amounts to the same thing./ He asks her to be sure to return the papers he is lending her and she promises to—she probably won't work at it after 9 PM this evening.  
 1341 o YUGE for SEKI. His superior over there /in Japan/ says that /it/ is good. IWANAGA is /on?/ the boat. Yes, probably. So there is only TOKUNAGA. Something about loading /chocolate?/ onto the boat. The words hachi hachi are mentioned toward the end of the talk. One says hachi hachi /literally eight eight/ and the other says "I understand." /The recorder doesn't!/. This expression is used for a game of cards. Also for a squadron of 8 battleships or 8 cruisers.  
 1407 o X to Mr. NEWMAN. Can he come tomorrow or Tuesday since Monday is a Japanese holiday. He'll try to come tomorrow.  
 1448 o to NYK for Mrs. Nishi? Asks where KANEKO is. He is phoning. Here he comes. K. is so distorted I can't understand him at all.

End

1-511

SATURDAY, 1 NOVEMBER 1941

- 1038 o NI.  
 1110 o To Yamashiro Hotel for a children's room, (for whom?)  
 1128 i Man asks for correct spelling (in Japanese) of new premier's name.  
 1140 i NI.  
 1149 i to Seki. FPM. Caller went down to the ship to see if he could locate the cosignee thru the purser's office, but no such message had been left there at all. As a matter of fact? did come—I made enquiry thinking one of the passengers might have brought it in his baggage, but again the quest was unsuccessful.—Is that so?—The Embassy (probably J. embassy in Washington) intervened with the treasury to facilitate entry. I don't think there would have been any trouble—Is it a big thing?—Yes. Rather. (In the part recorded no name was mentioned, no article was specified. I have no clue as to the nature of the article.)  
 1241 o NR.  
 1306 o Seki to Kyorakkan (hotel) asking for one room up to the departure of the Taiyo on the 4th. She tells him to wait. (Cut off in the rush, but gist elsewhere in log as monitored direct.  
 1300 i NR.  
 1309 ? FPM Re mail on Taiyo.  
 1310 i Kyorakkan (a hotel) (a call-back) to Seki asking how many guests there are.—One.—When?—Right away.—What food? Probably occidental.—(K. will take him. Not sure who it is, but probably one of the diplomats or other leading man from the ship.)  
 1315 i Man wants to send a package on the Taiyo but has heard that she will take no mail. He wonders whether this was a J. govt. decision.—No. It was the American Govt's decision.—I heard that the P. O. was turning down and returning packages already mailed. There are mobs

of Japanese at the P. O. who want to mail letters and parcels.—They can't get anything very definite out of the P. O. The P. O. apparently doesn't know itself what it can accept and what reject.

1-512

1317 o Seki to Mrs. Harada asking her how the matter of the room was finally decided this morning. When they came back from the ship this morning Mr. IWANAGA alone (of the diplomats?) came here. A little later Mr. TOKUNAGA called in about a room and I had to report that matters were a little hard to manage just then. FUJITA is leaving shortly and his room will be free then. Mr. TOKUNAGA said he has a *futon* of his own and would be glad to sleep in the closet or anywhere if space could be spared. Food can be arranged for them, but the main thing is a place to sleep—I discussed this with Mrs. Yuge and she thought they could stay at XX's house—But it would be not quite proper for a married couple to stay there (Does Seki think XX would neglect to observe the canons of diplomatic immunity as he did the night of the Sumida wedding when he got drunk and chased the Sumida maid round and round, the bedpost?)—Fujita's room would be free on the 4th and the Tokunagas could take it then. How long would they want a room?—Till Friday—If they could stay somewhere till Tuesday we could take care of them—If they were an older couple they could stay at XX's without hesitation, but they are a newly married (or young married) couple which complicates matters. (They both laugh knowingly). In full realization of the risks involved in a young woman's staying at XX's. Mrs. H. agrees to ask Mr. HASIYA to move to a small room for two nights to make way for the TOKUNAGAS if no other suitable place can be found.

1325 o Seki to Kyorakkan re the young couple. Seki tries to be sure a married couple will be welcome there. (The hotel is often used by people less interested in the enduring bonds of life.) She says it will.

1452 o NA. Fragment while caller was waiting for XX.

1545 o to ? for messenger boy.

1547 o NI.

1605 o To Pensicola Hotel. NR; NA.

16-? 1 re; Age for draft /American/.

1-512-A

(Addition entries missed on first log)

0907 i Inquiring re passenger on Taiyo. Haven't got list yet.

? ? To 6907. The awful nes breaks. The Taiyo will not take any mail! The P. O. says so. Washington has sent a cable to the postmaster.

0945 o To Mackay radio for messenger.

0950 i What time did Taiyo get in?

1000 i Personal call for Sakai?

1007 i Fro Sakai in good english from Alice YONENAKA. Could I come and see you this morning. Wants to bring her copy of certified census registra rather her mothers. /Probably getting expatriated/. He tells her to bring her sheet and he'll look it over.

1047 i Wrong number.

1050 i FPM/ Inquiry re; report of residence abroad for deferment of J. military conscription.

1108 i NI

1135 o for HIROKAWA of registry department of P. O./different Hirokama no doubt/ to check on the mail situation. H. only knows what he heard and picked up. Refers X to P. M.

1137 o To P. M. Not in. Asst. P. M. will be in about 1230.

1159 ? Fragment re XP.

1202 o To NYK. Message from Minister of Communications via XX which is referred to TAKASAMA at 2772 /?/. Gives his own number as 4416.

1213 o XX to KUSUNOBU /?/ his cook /?/. Wants lunch for four people at his residence. /Probably KIMURA is one.

1215 o XX to /maid at home?/ In about 10 minutes 4 guests will be coming. But no one is there and cook is out!

1217 o XX to /another kitchen?/ Today is a *wedding day*. Therefore SO SORRY! /Poor Kimura?/

1218 o He tries again. Hooray! Success. Orders a simple meal not party style since he planned to have them at his home originally, he says.

# 890 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1-512-B

0956 1 OI calling about "educational films" /?/. Afterward talking about a Kwanto style doll /?/ /Wasn't there some question whether one could be carried as an "award" to some American commission or something? Apparently the verdict was negative from the tone of the voices.

—End—

1-513

SUNDAY, Nov. 2, 1941

1510 1 Rang a long time; finally answered but callee not there.

End

1-514

MONDAY, 3 NOVEMBER, 1941

0909 1 from SOGA. Recently Mr. TOKUNAGA has come from the Foreign Office and Japan. Am inviting him for dinner, also Dr. Motokazu MORI and VX/& others?/6 P. M. tonight. Some possibility of another farewell at the boat. Invitee will have to excuse himself from that if he can. At the first part of the conversation SOGA explains, I think, that he knows, or knows of TOKUNAGA thru Mr. Ken HARADA, his son's wife's brother, who is in the Foreign Office, tho born in Hawaii. Not very sure of this tho.

0934 1 From OMI Shoten. When will the Hikama get to Yokohama?

0955 1 NI

1004 1 Conscription. Routine.

1024 1 NI

1028 1 NI

1221 o Routine. NI.

1224 o to HARADA /?/. If he comes in have him call X.

1355 1 HARADA asking about Taiyo mail situation as concerns the notification of attainment of conscription age reports which have to arrive by Nov. 31 in order to comply with Japanese law. Is asked to call tomorrow since today is a Japanese holiday. They say that since the Taiyo is out, another boat will probably be all right.

1400 1 NEWMAN to XX. Would like to come up for a few minutes right away.

1508 1 Inquiry. Woman with no passport is worried /lest the boat return to Hawaii?/. She introduces herself as an ordinary woman. Probably interesting but not urgent just now.

1611 1 NI.

1-515

#2 log

0820 1 NR. Star Bulletin calling. Call after 9:00.

0839 1 NI

1046 1 NI. Re deferment.

1047 o OI of JCO to Chamber of Commerce (Hamilton) asking whether there has been word on mail situation. No word from Sam King either. The postal inspectors expect word this afternoon.

End

1-516

TUESDAY, 4 NOVEMBER, 1941

0918 1 Man to Muraoka re 3 games (tennis?) tomorrow.

0927 1 FPM. NAKATSUKA to XX. XX has no news from Washington re mail situation. XX wanted the Taiyo Maru to take mail to Japan. (See the S-B.) XX "Mr. King knows (the character of) Mr. Haan." This in answer to N's remark about the "fight" between the two.

0936 1 /VX and YOSHIOKA/ YOSHIOKA seems *furious* at something. Sounds as tho he thinks he is being cheated. Perfectly *enraged*. Something about /the authorities?/ not thinking it worth while to telegraph on the advice /or request or for the sake of/ a nikkel\* or a whole boat load of them. (\*nikkel American citizen of J. ancestry.). YOSHIOKA cites the discrimination shown towards the nikkel—the numerous personal questions asked etc. etc. compared with the treatment accorded other Americans and VX /?/ replies that it is discrimination, isn't it? Perhaps

he is talking about the questions asked of the incoming Taiyo passengers. Anyhow he is still furious and very indignant. Also something about the mail being held up. Towards the end of this long harrangue Y. suggests that VX intercede—just how is not clear—possibly thru the Federal courts, for the nordsai bansho is mentioned. Probably the effects of red tape plus extra work, worry and anxiety have added fuel to Yoshioka's rage. He is very disturbed to say the least. They cool down enough to laugh a bit toward the end.

- 1028 i TAKAYANAGI. NI.
- 1002 i Re deferment.
- 1003 i Re deferment.
- 1045 i From a fellow returning to Japan regarding military service there. Is advised to explain to Japanese authorities his real address (in Japan) and they will understand.
- 1053 i KANEKO to VX re baggage. Inspected yesterday at 7 and today again—they have been trying to get cigarettes. Will VX help as they can't get enough? He will. Discuss sailing time etc.
- 1126 o SEKI to TOKUNAGA /?/ to say that DOI is waiting for him at X. /A little other talk—can't get it easily./

1-517

- 1142 i VX to XX—He's busy with someone in "that room" (the lowered-to-inaudibility voice indicated that it was a conference which she had instructions not to interrupt). Tell him when he finishes to please wait on the matter of the (NYK?) company's telegrams.
- 1144 o /to RCA?/ "Your messenger just came in here and and took 3 messages back. We'd like you to hold them, return them, if you will please. O. K.
- 1203 i To SEKI to inquire as to a reasonable price for stockings, eh! Bought 1 dozen.
- 1327 i FPM. For TAKAGISHI. Out. Gone to Ala Wai.
- 1345 i To SEKI from TOKUNAGA. /very blurred, but something about a car, probably asking SEKI to have him driven somewhere either by taxi or by X car.
- 1350 o To Hiberly. XX would like to come down. Make date for 2:10.
- 1405 o to KYORAKKAN asking if TOKUNAGA has gone out yet. No—not yet. Well, the car is "dry", so please have him wait a little please.
- 1407 i for SAKAI. He's out till 3.
- 1407 i Wrong number for Easy Appliances.
- 1435 i Fragment
- 1450 o XX Will you send a messenger boy.

End

1-518

WEDNESDAY, 5 NOVEMBER, 1941

- 0917 ? NC; NI
- 1002 i Re deferment.
- 1005 i WEST of UH wants name of XX.
- 1007 i JARAKI of Mitsukoshi to VX.
- 1023 i NI; NC
- 1038 i Re expatriation; NI
- 1058 i Inquiry re mail
- 1005 i HARADA to IWANAGA; wanted to invite him to dinner tonight, but since it is an hour earlier than usual will invite him for lunch. Did. Something about HACHIYA and Nov. 24th. Can't get last part at all.
- 1113 i For /VX?/ from YOSHI at NYK.
- 1115 o NI.
- 1343 o For messenger boy.
- 1449 i NAKATSUKA to XX re KURUSO. Is XX planning any reception? Hasn't yet decided. XX has received a message. It will take about 5 days from Hong Kong. Foreign Office message said he would arrive by clipper, but didn't say when he would arrive here. XX doesn't know much about KURNSO. Wife is real Caucasian. Oh! Oh! Oh! Ah! Ah; "She's quite a Japanese lady. She eats Japanese food and is very polite and looking very nice.
- 1457 i NC; NI.
- 1459 o NI.

## 892 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- 1636 o to (4)? YUGE to Mrs. NISHI. She asks him to call and gives him the number 67182 /that of the boat/.  
 1640 i KANEKO to YUGE arranging about working and the tickets etc. tomorrow morning. /A lot of accounting still to do. Long discussion./  
 1711 i About sailing.  
 1-519

THURSDAY, 6 NOVEMBER, 1941

- 1000 i NI.  
 1020 Seki to Nakamura of HBD. NI.  
 1035 i NAKAMURA to Seki. NI.  
 1045 o Routine data call. Very lengthy.  
 1055 o Sakai to George SAKAMOTO re deferment.

End

1-520

FRIDAY, SATURDAY, SUNDAY, NOVEMBER 7 TO 9

Out of Commission.

1-521

MONDAY, 10 NOVEMBER, 1941

- 0905 o Sakai to PAA asking about arrival of clipper. About 1700 tomorrow.  
 0910 i NAKATSUKA to XX re delay in arrival of KURUSU—VX and I will go out to meet him—The N. J. says he is going to stay at the B. H. Hotel—That's right.—Are you going to have a lunch for him?—No. I'm not organizing any parties—Will there be a private party at X?—Yes. I think so.—When is he leaving?—He will stay overnight.  
 0915 i Komatsuya Hotel to Sakai re XP. NI  
 0918 i Girl for VX re KURUSU. Not in yet. Please have him call to let us know when the Ambassador is arriving.  
 0918 o Muraoka to friend re cup (athletic trophy). NI Very lengthy. Sports chatter.  
 0925 o Muraoka to friend re sport. NI.  
 0927 i Nakatsuka to XX asking whether KURUSU will call on governor and army and navy leaders here—I don't know. No word yet.—Are any of the leaders of the J. community going with you to meet him?—SATO [pres. of JCC and UJS] may go. On Saturday morning he was sure whether he would be allowed to go to the landing at Pearl City. He will check with the authorities today.—Who is going to be at the dinner?—Not decided yet; we are still discussing the matter—There will be about 10 guests. XX—Any haoles?—No. A strictly Japanese gathering.—What time will it start?—About 6.30.  
 0930 i ITAGAKI to Seki re the possibility of sending parcels to the Embassy re American Railway Express.  
 0938 i For XX; busy; for VX; "You'll have to call him" "Oh shux. What's the number." "5243".  
 0943 o To tell—?—that tho tomorrow is a holiday the stores will probably be open. Will he make preparations to get in touch with them and have them stay closed.  
 0951 o To ONOH to Sumitomo Bank. Tell him that party is postponed till tomorrow at 6.30 because of delay of clipper etc. Will be at official residence.  
 1030 i To XX from Pan Pacific telling him about Education week and that Mr. Long is speaking. She is hoping XX and VX could come. Sorry—today they both have to attend to "my friend's luncheon."—Yes. VX too. Too bad.

End

1-522

TUESDAY, 11 NOVEMBER, 1941

Holiday; closed.

- 1207 o Seki to Morimura saying KURUSU has been delayed a day and as a result XX's kitchen help has been driven crazy. Seki then asks M. to come over with KIKAWA /?/ this evening about 1800 for dinner with XX [to help eat up the excess food prepared.]  
 1208 i Seki to ? announcing delay and inviting him to XX's house.

1-523

WEDNESDAY, NOVEMBER 12, 1941

- 0839 o For MASASHIMA. Shall she have him call? He's out, will be back about 10. He's at the corner of Kukui and Hall where /he/ just sent a blacksmith. Something about No. 2 /house beyond a Chinese family's?/ She finally has X call at 10.
- 0845 i Wrong No.
- 0855 o Yuge /?/ calling Bob. Not in.
- 0915 i FPM Routine inquiry
- 0930 i For XX from Mr. FORE /?/ of the Airlines. Wants to come up this morning. OG says OK. /Probably going to explain what happened to the plane!/  
 0933 o To SASAKI at YSB. Muraoka re sports.  
 0935 o Muraoka re sports.  
 0937 o For cigarettes. NI  
 0939 i Re Illumination for the party. NI.  
 0954 i To Seki. The party is off. Much laughter about something.  
 0958 o To "Jimmy" from NAKATA. "You tell one of my boys come get me at the Japanese Consul right away." NI.  
 1000 i Routine re J. conscription.  
 1015 o to ? No come down yet. NI  
 1035 o From MORIOKA. NI  
 1048 o to KUSANOBU /?/ re seating arrangements. 15 persons can't be divided well. How about 16? Also about times etc.  
 1130 i Lt. Riddick to XX reporting clipper left Midway at 7.30 this morning.  
 1133 o To S/B/ to NAKATSUKA. Not in.  
 1145 i Inquiry on KURUSU. OG doesn't exactly know. Inquisitor gets hot at such ignorance. 5:10 she says.  
 1150 o To HBD for NAKAMURA from Seki to ask how the photographs turned out. Be careful of them.

1-524

- 1325 o To Royal Hawaiian Hotel. SEKI went down yesterday to make a reservation and asked XX to tell hotel that plane is coming in this afternoon.  
 1345 o Inquiry re China Clipper. 5:15

End

1-525

THURSDAY, NOVEMBER 13, 1941

- 0925 o To P.A.A. from X. What time is the China Clipper leaving for the coast?" . . . "Three o'clock." X thought it was 1 or 5. Mr. KURUSU must be there at 2.  
 0935 o NI. XX asking when plane is leaving for S. F.  
 0942 i NAKATSUKA of S. B. to OG. XX did give KURUSU a private party last night (according to OG).  
 1001 o to II airways re China Clipper.  
 1025 o Wrong no.  
 1030 i KAWAZOE to VX. He's phoning. Call on other phone.  
 1045 i KAWAZOE to SSKI tho he really wants VX.  
 1147 o NI  
 1155 i From a man from Royal Hawaiian who has called SEKI's home and can't make himself understood there. "The ambassador is putting up a real fight to pay his own bill. He's not to pay it, eh?" "Yes (!) Mr. YOUKI is to get the bill and he will pay.

End

1-526

FRIDAY, NOVEMBER 14, 1941

- 1045 o For someone who is out.  
 1048 o For TSUSHIMA—out. For FUJIKAWA. Morioka calling.  
 1050 i For MORIOKA from TSUSHIMA. The cup is finished. NI.  
 1103 o To HBD. Fragment.  
 1302 o MURAOKA. NI.

End

894 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1-527

SATURDAY, NOVEMBER 15, 1941

- 0930 o Official at X wants someone to call him.  
 0948 o To Mackay radio. "Will you send a messenger boy?" XX.  
 1058 i To SAKAI from CLAUDUS /?/ who will come tonight to his house about 8. One asks the other if he has seen the new Shimpo /weekly/. There is a discussion of the necessity /of having or of not having/ bonds. Asks whether he has studied the problem in relation to the freeze. They are worried about the future possibility of war and especially something that ABEND has lately written /probably Shimpo has quoted from the last "Life"/, also worried about the future of commerce.  
 0915 o To Mackay Radio. XX has received message #238, but has received only page 1, not page 2. M. says last night they sent two pages at about 7 o'clock. Then, at 7.25, he sent corrected copy of page 1. Seattle made a mistake, so they sent a corrected copy of page one. Page 2 is all right.  
 1115 i To XX. Busy. Nakatsuka.

End

1-528

SUNDAY, NOVEMBER 16, 1941

No activity

1-529

MONDAY, NOVEMBER 17, 1941

- 0946 i Inquiry re expatriation.  
 1005 o to — KANE from SEKI. This morning they are paying bills.  
 1045 i TAKAHASHI /woman/ re: the fate of a 25 year old U. of H. graduate of dual citizenship who has become a public school teacher. He has never been registered as a Japanese citizen. First step is to get registered etc.  
 1316 i From KOMATSIYA about "yesterday's case" / The hotel is apparently handling the deferment petitions of KOICHI and FUJIKAWA. NI.  
 1340 o SEKI to OI. Something about paying /?/ for registration. Instructions have come by cable from the minister. There is some other problem to it tho. They were advised, after conversations with the American government, that there might not be any necessity of registering /the money?/. So SEKI thinks it is ok. /Some diggerel about somebody from X marrying a fatty /?/ Seems to be between a Miss DO and KIMURA of the bank.

End

1-530

TUESDAY, NOVEMBER 18, 1941

- 0905 i FPM. Muraoka on tennis.  
 0910 o To HBD. MORIOKA to NAKAMURA whom he asks for FUJIMURA with whom he discusses tennis at length.  
 0915 o MURAOKA—tennis  
 0917 i from a man who wants to speak to the "one who uses cables." Caller is Eigo CHIROMA—a senior at U. H. who is making a sociological study of the Okinawas in Hawaii. Would like to get statistical material about their occupation status, distribution, numbers, how many have left for Okinawa etc. X doesn't have those facts. C. says the Jiji Annual has some information—he thought they had got it from X. X says they don't keep record of how many come and go, and especially this was a long time ago—They keep "just if they come and report—but don't keep track of the numbers. C. asks how he'd get the materials. X says to ask the Okinawa people "they have some sort of club you know,"—but he doesn't think they have such records. But X thinks he can get the general idea. Refers him to immigration.  
 0928 i To SAKAI re hospital bill.  
 0954 o To SATO Music Store saying the radio at the official residence of XX last evening and for some time past has been so when you listen there is freekune /?/ —something the matter with it anyway. Asks him to come up and look at it.  
 1007 o For Mr. /UE?/ MASE. Out. Call 2634.  
 1008 o To OYAMA. Out. Try 6311 /?/.  
 1120 i From Mrs. NISHI to say goodbye.

End

1-531

WEDNESDAY, NOVEMBER 19, 1941

- 1009 o Fragment
- 1028 o MURAOKA to girl. Someone is to bring "bron paper" (birth certificate) in within two weeks.
- 1127 i to MORIMURA /?/ frag.
- 1415 o YUGE to N. Y. K.'s TAKEI. NI
- 1437 i From ONODA of Sumitomo who supplies or is supplied some data on addresses and names in Japan.

End

1-532

THURSDAY, NOVEMBER 20, 1941

No activity—Holiday

Friday, November 21, 1941

- 0934 i Routine. NI
- 0955 o Asking YAMAMOTO about a souvenir for a deceased friend. /Has he/ received it? Yes.
- 1011 o URAOKA to YAMAGUCHI. Wants to get some information re him or his mother. Y. apologizes—he has received the letter from X but has been too busy to answer. Will answer in 2 or 3 days. M. says Saturday till noon, other days till three /for him to come in?/
- 1022 o Something is at 6 tonight. gurōbu?
- 1027 i to MURAOKA re club affairs.
- 1033 i From OAHU JUNK CO. re matter called about previously. the YAMAMOTOT business. No one is around now. This evening /we?/ will inform /him?/ and tomorrow a. m. he will let you know how much it is.
- 1347 i to SAKAI from MACHIDA. The pictures are finished. Shall she bring them? No. He'll pick them up.
- 1420 i to SAKAI from KOMATSUYA with a new ——? Paketto HIROSHIMA on August 23. "I don't remember attaching and due /paper?/ on it." Probably NI.

1-533

MONDAY, NOVEMBER 24, 1941

- 0050 o X for U. S. Coast Guard for Mr. Anthony. (Someone speaking for Mr. VX.) re letter rec'd from CG. CG is preparing new passes for everyone who has legitimate business on the waterfront and has requested list of such people from X.

End

TUESDAY, NOVEMBER 25, 1941

- 1008 o FPM re the evening KURUSU was here—asks for the bill for photographs of the occasion. \$27.50.
- 1128 i NAKATSUKA to XX telling him about a Frederick Kuh U. P. report from London of a provisional agreement between J. and U. S. in Washington. XX:—"Is it from London?/!/ It is! N. also reports that the new dual citizenship bill has been approved by the House sub-committee. Provides for compulsory renunciation of foreign citizenship by persons in U. S. Gov't. or armed forces, and voluntary renunciation of foreign citizenship by all others holding dual citizenship. XX heard on the Tokyo radio about the Tatsuta, but hasn't received any official word—he says. He doesn't know if there will be a ship to Hawaii.
- 1157 i From applicant for XP. "For a person in the government service it is very inconvenient to be a Japanese citizen." Wants to hurry.
- 1402 o To Mackay for messenger.
- 1410 o To HBD. Muraoka for either NAKAMURA or FUJIWARA. Gets F. re tennis.

End

896 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

1-535

WEDNESDAY, NOVEMBER 26, 1941

- 0931 o From SAHARA /?/ Something about Saturday. NI. Not regular X call.
- 1025 i For SEKI from SATO SHOTEN about a bill.
- 1102 i To SAKAI from YAMAMOTO. Something about an order for 2,000 cases of something Friday, and about the price, and about a wire in connection with them.
- 1131 o To AKAYAMA (girl) from MURAOKA. NI
- 1140 o to MACKAY. X for messenger.
- 1258 o for ? Out. If he returns have him call SAKAI
- 1317 o re Sa to Kinjiro and Saito Karoku /to a girl/ The place isn't written in. Please drop in and sign them.
- 1357 o To Mackay for messenger.

End

1-536

THURSDAY, NOVEMBER 27, 1941

- 0924 i to SAKAI from /Selichi/ HAYAMA /Pharmacist of Honolulu Pharmacy Co./ Your photographs are finished. OK. I'll get them tomorrow or the next day.
- 1014 i girl /INAGE/?/ asking for a census registration person. She was registered /in Japan/ 24 years ago, but the receipt has been lost. What to do? Girl explains she is calling for a girl whose /parents/?/ have died and because of her job it has become inconvenient not to have it /XP/ Finally some satisfactory arrangement is made.
- 1041 o MURAOKA to girl, ISHIURA giving an address and family information in Japan. Also re some relative in Pahoa. NI
- 1045 i Fro SEKI from YSB re some "usual bills". YSB wants to write a letter about it.
- 1342 i To SEKI from MIYAMOTO of YSB. It is \$14.00. They have finished the investigation of cash on hand; will bring it up.
- 1343 i NAKATSUKA to XX. N asks him to answer Sen. GILLETTE'S charges. XX says he has heard from the Japanese radio that the Tatuta is coming to L. A. and Balboa. "I received no information at all from Tokyo. I was very sorry."
- 1502 o to NAKASHIMA or ? MOKIOKA? for a date. She puts him off till Tues. of next week.

End

1-537

FRIDAY, NOVEMBER 28, 1941

- 0900 i NAKATSUKA to XX asking for a reaction to Sen Gilette. Asks XX if he knows that Jack Wakayama has said that the Hawaiian Japanese Civic Association would welcome an investigation. XX asks if he is here in Honolulu! /XX is well uninformed on most subjects!/ XX says he has repeated that same statement many times already and thinks that is enough. He feels that if there were an investigation things would be more than 100 percent OK. N. says if they do find some un-American activity going on, the sooner the better so they /the U. S./ can get rid of them. /Friendly agreement and polite laughter Curtaln/.
- 0922 i About date for some dinner in past. NI
- 0950 o Private call by someone from Star Bulletin. Everybody /at X?/ is out. What to do? They'll be there in a few minutes.
- 0952 o Man to girl. NI
- 1005 i for SAKAI from man. Lunch date.
- 1030 i FPM Routine inquiry re nationality
- 1038 o Short conversation but can't get it. Something about "three o'clock."
- 1052 i From ONO of Osaka Shoten re attainment of military age form.
- 1100 o to RCA re message received this morning. No. 1070 want to check. "On first page, second line, 8th word : CCFGR; 10th word, ITLJS; on page two, line 2, 9th word: P(B?) MEDZ; last line, first word, IRWPB and third word ZZGRO, and the ninth, FPOEN.
- 1125 i Is SAKAI there? This afternoon at 1.30 I'm coming to your /house/.

- 1328 i FPM about something /someone has left?/ in a drawer.  
 1338 o SAKAI asking about films. They (the store?) called about them this morning whether to send them or not. They agree that someone is to bring them over.

1-538

- 1442 i to MURAOKA from MIKAMI re deferment of conscription blanks. If born in August 6, 1905 you don't need to fill out the blank do you. No, you don't. Or if born in 1925 you do not need to, do you. No. Thank you.

End

1-539

SATURDAY, NOVEMBER 29, 1941

- 0905 o SAKAI to ? about doing something on a commission basis. Also wants him to take some pictures of the graduation /or a member of the graduates?/ Wants 2 pictures. /Personal NI  
 0925 i Pro VX. "Will you call his other phone?"  
 0936 o FPM from VX. Sounds important, but very hard to get because of faulty recording./ Mention of a /black?/ smith's shop of Fort St, and a few isolated words, but no other clue.  
 0950 i For SAKAI from HAYASHI /can't get this message but tone sounds legitimate and innocent./  
 1015 o to OKUMURA /having something to do with/ children. His "card" in the X is incomplete. Will he come in and finish filling it out? He will.  
 1025 o for NAKASHIMA. Out. Have him call 2243. Caller not or VX. Man.  
 1150 o For Yoshino, a girl /from MURAOKA/ This is the same girl that put him off before. Sample talk:  
     Yoshino?  
     Yes.  
     How about it?  
     I don't know what you're talking about.  
     Don't say that!  
     Have you some matter to talk about?  
     Of course.  
     What is it?  
     etc. NI  
 1200 o XX /home?/ wants to eat right away.

End

1-540

SUNDAY, NOVEMBER 30

No activity

MONDAY, DECEMBER 1, 1941

- 1000 o to RCA, for messenger  
 1045 o to NYK TAKEI from SEKI who says he received a telegraph /to be sent thru X?/ some time ago and wants now to settle accounts. \$45.82. They are bringing the money up today. T. asks about the situation but SEKI doesn't tell him anything startling. TAKEI is worried for not being able to get home, but admits he doesn't know what the situation is. (Doubt is S does either!)  
 1115 i Inc. to XX, NAKATSUKA quoting an AP dispatch based on Asahi despatch from Washington that the closing of J. consulate is imminent. First public reference. "Have you had any information?" XX has not had any information from TOKYO to prepare for possible closing (he says). He saw "a few lines," in this morning's Advertiser. XX thinks the Tatuta will leave tomorrow, but on all else he is his usual blank self.  
 1150 o to HBD for NAKAMURA. Tsukikawa calling re day before yesterday. This morning /It was set?/ at 9.30, -- no 10. At X? Yes. /This conversation pretty fast. Translation a little unsure./  
 1305 i For someone who's not there yet. Girl calling.

**898 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK**

1326 o YOSHIOKA to MATSU/DA?/ Won't you come out in front of the office.  
/Possible taxi, because he emphasizes the words "in front of."/  
1330 o for NAKASHIMA. Date with her.  
1352 o to a girl. NI  
1405 o to HBD for NAKAMURA. Out. When back? 3 or 4. Well then please  
/have him call me? First part was missing/.

End

1-541

TUESDAY, DECEMBER 2, 1941

1429 o to TANAKA. Has he sent the things. Yes. The price will be about \$30  
since prices are going up. Too bad. NI  
1429 i MURAKAMI to SAKAI re Fujino. "Is it all right or do we have to  
send a letter first? The latter M. will come over. XP. NI.

Discontinued

0925 o /To #4./ VX tells wife that he will have lunch at the Pan-Pacific.  
/Gilbert Bowles, Sr., spoke./

End

2-253

TUESDAY, 7 OCTOBER 1941

- 0913 1 Woman to VX.—Out. /Woman speaks in English at first and then later in Japanese. It was probably MORIMURA who answered./—When will he be back, do you know?—Very shortly. And what is your name, please?—/She falters a little in her embarrassment and says:/ I just wanted to talk to him personally.—I see.—I suppose that's all right, isn't it? /M. hangs up without answering or giving her a chance to finish./
- 1000 1 /FPM/ /Verbatim, woman speaking:/ It is the second street toward the sea from King. It's just in front of this Castle Church. You probably know it, don't you? The Makiki Church that looks like *o-shiro* /Japanese for "castle"/. It's just the other side of McKinley High.—Oh, is that so? I think I can find it quite easily.—Between Pensacola and Piliol.—Oh, I see.—Most anybody knows it, because it's just this side. There are several apartments around a court. The entrance to the court is just across the street from the entrance to Makiki Church, this *o-shiro* church.—I see.—So I think you will find it easily. 1116-A Elm Street.—Is there any indication at the gate of the house or . . .?—Well, the number is out on the . . . /Indistinct/.—You see, 1116-A faces Palm /?/ Street and 1116-A is inside the court.—Alright, quite right.—I'll look for your tomorrow, then. Thank you very much.—Shall I take Mr. XX?—Ah ha, please.—And my wife?—Please. Thank you very much.—Not at all.—Goodbye.
- 1121 1 /From #4/. /Due to technical difficulties I couldn't understand anything. Neither could the principals./

End

2-254

WEDNESDAY, 8 OCTOBER 1941

- 1405 o VX to MIKAMI /?/ to send a car to X. Do you know Elm Street?—No, but I'll check it.—The number is 1116-A Elm Street.

End

SUNDAY, 12 OCTOBER 1941

No Activity

2-259

MONDAY, 13 OCTOBER 1941

- 0925 1 /FPM/ ? to VX re nature of the ships being sent. The word *hikiage* /evacuation/ is to be avoided, and "temporary relief" used in connection with these ships.
- 0940 o VX to Kamura.—Out.—Have him call.

900 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

0947 o VX to KUCHIBA.—Not in.

0950 ? /FPM/ ? and VX. A few remarks about mail just received after a long delay.

End

2-260

TUESDAY, 14 OCTOBER 1941

0952 o VX to KAWAMURA of HH. The Nitta Maru is being replaced by the Hikawa. /K. thinks this is "very interesting."/

1000 o OG to "Trouble".

1000 o OG to Repair Service, wondering why 5243 cannot be connected with 6091.—Try again, and dial slowly.

1005 o VX to KAWAZOE, saying the Nitta Maru has been replaced by the Hikawa Maru. /Probably this *Kawazoe* is at NJ./

1010 o /To #4:/ VX to wife saying a cable has come for him. He has talked the matter over with the NYK. /No clue given here as to the nature of the discussion, but it may be that VX and family will return to Japan on the "evacuation ship"./

1020 i Mrs. HAMAMOTO to VX, who can hardly understand her at all. She is one of the fastest chatterers ever heard here./ At 5 o'clock Saturday she invites herself up to see him.—How about 7 Thursday evening?—If business should make it impossible for me to see you, how may I reach you by phone?—8428. /She jumbles it so in pidgin English that neither VX nor I could understand her. After long shots wide of the mark, he finally asks her to give it in plain Japanese. It turned out to be 8429./

1040 o VX tells ? that the Nitta Maru has been replaced by the Hikawa Maru.

1203 i Castle & Cooke to VX re three pensioners of the Wai'alua Ag. Co.—The person in charge of these matters has just gone home. Will you call 2243 after 1:00?

1430 i KANEKO to VX notifying him of the arrival of a cable re the ships being sent. Passengers and mail; no cargo. There are to be 1000 persons on the Tatuta Maru and 500 or 600 on the others. There are no reductions from the full rate. Third class is \$165. There are so many uncertainties that the rest of the conversation was conjecture of little interest.

End

2-261

WEDNESDAY, 15 OCTOBER 1941

No activity

2-262

THURSDAY, 16 OCTOBER 1941

0943 i ~~xxxxxxx~~ VX to /Mikami/? re the October 6th issue of *Life*; buy 5 copies. /Note: issue contains two articles of possible interest./

1130 o To OI re the Women's Club /Fujin Kai/ something-or other wants to find out if it is today or tomorrow.—It is today. /He finds this out after a pause in which he apparently asks someone./

1148 i KANEKO to VX to speak of what they discussed before; quotes rates: 1st Class, \$205; 2nd Class, \$105; 3rd Class, \$58; Children ?/?, \$49. Says if they lowered "compartments" to \$165 they would be losing about \$40 per person; also, the rates are set; says he'd like to have an order to do that.—VX says not X's business to decide. The practical details are up to the Company; also, the money allotted to X is Govt. money and the Govt. /Japanese/ is responsible for spending it. All that will have to be decided in Japan. /Apparently K. has hinted that X might make up the difference. K. then brings up the practical problem of provisioning the ship /with fuel?/. They have already applied for it, I hear. There are about 800 /feet?/ of pier. They go on talking about problems apparently connected with the ship.—K: Well, it (*Taiyo Maru*) will get in on the 31st, won't it? One week before that /... / Something about leaving the matter until the 22nd—about a week before the ship comes in, I think./

End

2-263

FRIDAY, 17 OCTOBER 1941

- 0921 i Mrs. GADDIS to VX. Finds out that it *is* the same TOJO they knew. /This was former War Minister in Japan/. Mrs. G: "Didn't he have something to do with aviation once, sometime ago?"—VX: Well /laughing a little/ I don't know about that. /Then VX confirms that Elchi TOJO and Hideki TOJO are one and the same person./
- 1101 o VX to KAWAZOE of NJ, dictating newspaper release. See NJ.
- 1105 o Ditto to other KAWAZOE, of HH. /After dictation, K, asks if VX has heard anything special about the Tatuta or the Taiyo. VX has not, so they agree that everything probably is alright./
- 1126 o VX to Sumitomo Bank for Ono-san /manager/ to ask about *Hadte no ken* /?/. Ono says will tomorrow a little before 8:00 be alright. It is.
- 1348 i From HARADA to make a date for a conference about 1:20 tomorrow.

End

2-264

SATURDAY, 18 OCTOBER 1941

No Activity

(Japanese Holiday)

SUNDAY, 19 OCTOBER 1941

Out of Commission

2-266

MONDAY, 20 OCTOBER, 1941

- 1018 i KANEKO to VX. VX explains that it is not true that X is deprived of all funds. X is permitted to draw out money to provide necessary food and shelter for the staff. VX explains to K the difference between a diplomat and a consul. K implies that some of his staff may be transferred to China, especially Nanking.
- 1031 i KANEKO to VX asking whether he thinks the Taiyo and Tatsuta Maru will get here. VX thinks so. Then K. mentions that there is someone who wants to pay for his passage here, but VX says it cannot be sent out of the U. S. if paid here. (The inference is that fares should be paid at the other end to avoid the freeze.)
- 1035 i TAKEO of NYK to VX. T. says the accounts (connected with the special trips of J. vessels) will be handled at X. T. will handle all the details as usual except that all expenditures and receipts from whatever source must be entered in a separate set of books. T. will go up this afternoon to talk it over with XX, VX, and company.
- 1112 o /Technical disturbances/. VX to TAKEI (?) re difficulties in making the arrangements.
- 1520 o VX to KIMURA re a dinner for the crew. XX thinks it may be possible in the case of the Taiyo, but there will be no time in the case of the Tatuta. XX thinks it may be all right to have the purser, the (merchant marine) captain, and the Engineering officer to dinner. We could even limit it to the (merchant) captain and the engineering officer if the others are busy.
- 1525 o VX to KANEKO, apparently a call back. K asks what the word "permit" means (on the ticket issued by X). "This transportation ticket is issued for The Imperial Japanese Government." Is *for* correct? — Yes. — It seems to me it should be *by* or *through*. — No. This is for the Customs (U. S. or Japanese?) K. continues to find fault with the ticket, but VX defends it legally. Finally VX comes around to K's view that it should have been *by*, not *for*. No sooner does he make this admission than he reverts to his old position that *for* stands for "in the interest of", "for the benefit of," "on behalf of."

End

902 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

2-266 A

1550 1 F.F.W.M. Probably NYK.  
 NYK "This passage ticket is issued for and on behalf of the Imperial Japanese Government."  
 VX—"O. K. I think."  
 NYK—"Consul General for Japan . . . . no Japanese consulate general at Honolulu—is that wrong."  
 VX—"All right I think /repeats/.  
 NYK—"Then the X will do the Japanese part?"  
 VX—"Yes."  
 / Apparently the N.Y.K. is printing special tickets for the 3 forthcoming trips to make clear that the government is in charge./

2-267

TUESDAY, 21 OCTOBER 1941

0956 1 Request in pidgin about deferment. VX refers her to 2243. /W. N. ?/  
 0956 1 Above caller. Girl at X explains that since this is a case of re-deferment she has from Dec. 1 till Jan. 31. If it were for the first time it ought to be gotten in quickly, this month.  
 1020 o VX to —. Saw — (?) yesterday re the bond procedure. The money will be released from the X funds in the Y. Specie Bank and the treasury department has OKed this.  
 1031 o VX to YSB. Miyamoto—tells him the treasury in Washington has OKed the money proposition the release of funds. /But I'm not clear who got the message in the first place/.  
 1142 o VX to Matsuda. He's out. This is Miyamoto. Have Matsuda call when he comes in please.  
 1155 o VX to Mrs. UYETAR for Mrs. MATSUDA, wife of YSB's MATSUDA. Not here. I'll call her later then.

End

MONDAY, 27 OCTOBER, 1941

2-273

0916 i To VX from KANEKO /?/, Discussion of the various details of the forthcoming Taiyo visit; licenses, the issuance of tickets; the collection of fares; about someone who is a nikkel—a woman, and that there is time to settle the thing /about her/ because there is still four days / the Taiyo comes four days after this conversation/; how /to send/? something that is quite heavy; about a further "conference". They agree to take in money from the 27th on, and think they can collect it under the special license.

1025 i FPM/ From NYK? Still talking about special licenses, etc.

1108 i Very brief.

1420 i Mrs. VX to VX / recording extremely bad/

XXXXXXXXXX

End

2-274

TUESDAY, 28 OCTOBER, 1941

0945 o VX /?/ to NIO /? phon./ wants to consult with him about —— Re. the X's ambition to hold an examination this month (until the 31st of Oct.). The Minister without Portfolio, then the Minister of Education is conferring an award of honor to the Commissioner(s?) for Japanese Affairs/? not positive that this is right/.

0952 o to 4. NC. NI.

1005 i YOSHIOKA to VX, No reply yet to telegram sent to —— Inchikau /?/ in Washington on 22nd. Y. has heard nothing of the extent of understanding reached by the negotiations there, and has heard that they have broken down. VX says that there has been a reply by cable re certain frozen funds. The Foreign office has received a reply from the State Department which amounted to (question about the following) "Get them (the particular funds in question?) out of the country." Y—Is there anything especially interesting about this contract situation? VX—/Interrupting hurriedly/ "Wait . . . that is . . . that is . . . that is . . . wait a moment . . . that is right."

Y—Something has come here, hasn't it?

VX—I think so. XX has (unable to make out.)

1355 i FPM YOSHIOKA of NYK to ? re a matter that had been taken up with the collector of Customs. The matter concerns the X clerk, MORIMURA. (Switched to VX). Y. to VX re license for oil for the Taiyo. When she gets in her tank will inspected and checked against the log. That's all right.

End

2-275

WEDNESDAY, 29 OCTOBER, 1941

1055 o VX to TOYAMA /Edt. of Jitsugyo No Hawaii/. He has just stepped out to the barber's. VX asks about a serial text of the M-day law being published in the English section. VX wants 5 or 6 copies since X hasn't received and from the legislature yet.

1105 i FPM. Information wanted re /Joe Gin Gee/ phone clerk in a store they say. Allen D. Smythe, Chief Clerk Territorial Senate.

End

2-276

THURSDAY, 30 OCTOBER, 1941

0927 i KANEKO to VX re the method of counting passengers. Are children to be counted as half or as full passengers?—As adults if unaccompanied—A lot of these are dual citizens—Many of them have no passports at all and may have trouble when they reach Japan. Then, since they have no reentry permits they will have trouble when they attempt to come

back here later. (This is the very problem that Mrs. NISHI scolded her husband of spilling to Sumitomo bank employees the other day). To facilitate the landing of these passengers in Japan each child should have an excerpt from his KT as proof of at least his parent's Japanese citizenship. They should also have BCs along. The passengers will be classified on the passenger list as Japanese and as American citizens.

0956 o VX to TAKEI. KANEKO answers saying T. is out. T. is sick and took yesterday afternoon off.

1050 ? VX to KANEKO. They will meet at official residence at 6.30. K—Goro TAKAYANAGI (Manager of Honolulu Fire Insurance Co., whom VX does not know), TAKAGISHI, TAKAHASHI, IMAZAWA, Hiroshi(?) KODAMA, SHIRAKAWA, and somebody's wife (whose name I could not catch) were all going to Japan together on the Taiyo.

1146 o VX to wife. She hasn't got back yet.

1332 i Mrs. VX tells VX that KANEKO called him.

1414 o VX to KANEKO re the plans for the search etc. Both seem perfectly satisfied. Taiyo will sail at 5PM Tuesday. VX says the alien registration blanks have to be filled out if not previously registered. (NC due to shortage of blanks.)

End

2-277

FRIDAY, 31 OCTOBER 1941

1135 i KANEKO to VX. They discuss putting the names of arrivals in the newspapers. They think customs inspections will take quite a long time and that many will read in the papers of their relatives and friends before they are able to debark.

1425 o VX says it's a civil case and he doesn't know much about it. About something that is in the newspapers.

End

2-278

SATURDAY, Nov. 1, 1941

1140 o VX to KAWAZOE saying he has heard that the Taiyo is taking no mail. Is that true?—Yes. It is.—Is there to be an inspection of the mail?—Yes.—Who ordered it?—The postmaster—Has word to this effect come from J. Embassy?—No.

End

2-279

SUNDAY, 2 NOVEMBER 1941

1048 o Seki to ? re: something that has come from Washington.

End

2-280

MONDAY, NOVEMBER 3, 1941

0859 i NAKATSUKA wants a complete list of passengers, Come down in person.

1044 i Routine re NYK. Something from Washington. XX is out.

1045 i VX to someone re mail situation.

1146 o VX asks for MIKAMI—out.

1218 o VX asks where HIROSHI is. Calce says didn't he go somewhere with XX. Isn't he at X now? VX seems perplexed. Does calce know SAKAI /name uncertain/ of X? He does. Does he know his house? Yes. Then please come up to X now.

1226 i /from taxi? VX asks to take him to dock at 2PM. He wants to see 1. the immigration station. 2. The harbor master. 3. Hibberly. VX also him to go to the P. Hotel at 1.30 / A moment later he changes this, since apparently the P. hotel is considered too hot—and says he is to take VX to the three places previously planned.

1655 o To NYK. VX calling to get Hibberly's number.

1658 o To Hibberly home, but H. is down at boat. She advises him to call the customs inspector. VX—"Thank you for my troubling you!" Mrs. H. "Bye bye."

End

2-281

TUESDAY, 4 NOVEMBER, 1941

- 1052 o to Hiberly's office /from XX?/. Call 2458.  
 1054 i From (4). Re: Conscription notification. Routine. X says such notices will probably go on an American boat since the P. O. is receiving mail.  
 1106 i From (4). KANEKO to VX re overtime of customs. K. wanted them to work to ten, but Hiberly thought they should work shorter hours.  
 Rest NI.  
 1110 o VX to wife. NI.  
 1112 i Wife to VX. NI.  
 1138 i From Nippu Jiji (which calls us first and keeps them waiting) to X.X. /Not SOGA—sound like KABO but isn't/ re: the Washington tie-up of the mail. Says Star-Bull reports that X has phoned the J. ambassador about it and asks what their (X's) expectation is re the outcome of the protest. XX rather thinks the outcome will be favorable. XX says it was the Ambassador (muko wa) that called him to ask about it. /More details but stopping here./  
 1534 o For girl's older brother. Not in. From VX.

End

THURSDAY, 6 NOVEMBER, 1941

No activity

FRIDAY TO SUNDAY, NOVEMBER 7 TO 9

Out of commission

2-284

MONDAY, NOVEMBER 10, 1941

- 0936 i To VX from OI of JCC. re the welcome for Ambassador KURUSU. The plane will come tomorrow. He has his wife with him. They talk about getting in to the field and the situation in reference to greeting the ambassador. OI says he will inform SATO and ———? The ambassador will stop overnight. X is going to put out a party for him.  
 0944 FPM VX (probably) to someone re picture taking in connection with the arrival tomorrow. Decide to have none because of the "big news" that it would be. Re the party. VX wants it to be a formal affair. /Possibly to newspaper editor or reporter?/  
 0950 o to /KOMO?/ telling him that clipper is down at Midway with motor trouble and will be 22 hours late. He is very tired so the party will be formal. Wants also to /neglect?/ the newspaper reporters interview. Also talk about taking a picture.  
 0952 FPM "Value \$70 for 2 cases freight prepaid."—substance of telegram being explained to someone. Looks like someone is sending freight to the J. Embassy in Washington. They will go to get them Wednesday. If it is, a thousand and ten kin /or 1000 ten-kins?/. The charge is \$3. Of course they will get it; then take it over there to weight it. "Please erase the address and substitute J. Embassy, Washington."  
 ? ? Re the party being simple.  
 1002 o VX to KAWADA /?/ asking the president of the company or someone in his place to come to the "pahtee" tomorrow night at X at 6.30. Callee will tell him.  
 1005 o VX inviting SOGA of NJ to the "pahtee". There will be 14 or 15 guests in all.

906 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- 1010 o VX gets girl, asks for father MORI whom he invites to the simple "pahtee". MORI is willin. Asks if KURUSU is going to stay at the R. Hawaiian.  
1015 o VX to TSUDA /?/ asking him to "pahtee".  
1041 i VX from ? whom he has left word to call him. "Pahtee".

End

2-285

TUESDAY, NOVEMBER 11, 1941

Holiday; closed

2-286

THURSDAY, NOVEMBER 12, 1941

- 0940 i To FUKUYA /?/ from MIYA/TO?/ of the YSB re payment of telegraph charges. X will pay tomorrow.  
0942 i XX telling NAKATSUKA that he hasn't heard from KURUSU for 2 days so doesn't know. Thinks he is coming at 4 p. m. XX wants to know "if the plane left Midway this morning." N. doesn't know—suggests Pan American can tell. XX says no social events because XX has wired that he is tired.  
0945 i from a bank? No statement has come etc.  
0947 o To NJ to KAWAZOE from VX. A telegram has just come from KURUSU. He will arrive this afternoon. Left Midway 7:25. According to K's wish a news reporter is not to meet him—only a representative.  
1045 o To OI from VX. KURUSU is coming at 5:10 today. The seating order is SATO, SUGIMOTO, MORIFUJI, SUMITA, MORI, MATSUDA, KIMURA, ONOH, SOGA, MAKINO.  
1105 i Inquiry re J. census registration. Reporting a death.  
1320 i About the plane's arrival /to a guest/.

End

2-287

THURSDAY, NOVEMBER 13, 1941

- 1015 i KAWAZOE to VX inquiring re KURUSU's movements. Wants to know the Navy's representative. Knows already the army's. X boy has forgotten the Navy's. Wants to know about all other movements of KURUSU.  
1030 i NAKATSUKA to VX. NI (See S. B. 11/13/41)  
1045 i Is someone there? Girl. NI.  
1445 i Hung up.

End

HEWITT INQUIRY EXHIBIT No. 39

69512—IC

- (J) Hello, is this Mori?
- (H) Hello, this is Mori.
- (J) I am sorry to have troubled you. Thank you very much.
- (H) Not at all.
- (J) I received your telegram and was able to grasp the essential points. I would like to have your impressions on the conditions you are observing at present. Are airplanes flying daily?
- [Handwritten in margin:] Prompted. Reluctant hesitation.
- (H) Yes, lots of them fly around.
- (J) Are they large planes?
- (H) Yes, they are quite big.
- (J) Are they flying from morning till night?
- (H) Well, not to that extent, but last week they were quite active in the air.
- (J) I hear there are many sailors there, is that right?
- (H) There aren't so many now. There were more in the beginning part of this year and the ending part of last year.
- (J) Is that so?
- [2] (H) I do not know why this is so, but it appears that there are very few sailors here at present.
- (J) Are any Japanese people there holding meeting to discuss US-Japanese negotiations being conducted presently?

(H) No, not particularly. The minds of the Japa- here appear calmer than expected. They are getting along harmoniously.

(J) Don't the American community look with suspicion on the Japanese?

(H) Well, we hardly notice any of them looking on us with suspicion. This fact is rather unexpected. We are not hated or despised. The soldiers here and we get along very well. All races are living in harmony. It appears that the people who come here change to feel like the rest of the people here. There are some who say odd things, but these are limited to newcomers from the mainland, and after staying here from three to six months, they too begin to think and feel like the rest of the people in the islands.

(J) That's fine.

(H) Yes, it's fine, but we feel a bit amazed.

(J) Has there been any increase in . . . ? . . . of late? That is, as a result of the current tense situation.

[3] (H) There is nothing which stands out, but the city is enjoying a war building boom.

(J) What do you mean by enjoying a war building boom?

(H) Well, a boom in many fields. Although there is no munitions industry here engaged in by the army, civilian workers are building houses for the army personnel. Most of the work here is directed towards building houses of various sorts. There are not enough carpenters, electricians and plumbers. Students at the High School and University have quit school and are working on these jobs, regardless of the fact that they are unskilled in this work.

(J) Are there many big factories there?

(H) No, there are no factories, but a lot of small buildings of various kinds are being constructed.

(J) Is that so?

[Handwritten in margin:] Great surprise at J. end?

(H) It is said that the population of Honolulu has doubled that of last year.

(J) How large is the population?

(H) The population increase is due to the present influx of Army and Navy personnel and workers from the mainland.

(J) What is the population?

(H) About 200,000 to 240,000. Formerly there were about 150,000 people.

(J) What about night time?

(H) There seem to be precautionary measures taken.

(J) What about searchlights?

(H) Well, not much to talk about. Strikes attention.

[4] (J) Do they put searchlights on when planes fly about at night?

(H) No.

(J) What about the Honolulu newspapers?

(H) The comments by the papers are very bad. They are opposite to the atmosphere pervading the city. I don't know whether the newspaper is supposed to lead the community or not, but they carry headlines pertaining to Japan daily. The main articles concern the Japanese conferences.

[Handwritten in the margin:] Then they discuss the Southern advance [of Japanese into French Indo-China] every day.

(J) What kind of impression did Mr. Kurusu make in Hawaii?

(H) A very good one. Mr. Kurusu understands the American mind, and he was very adept at answering queries of the press.

(J) Are there any Japanese people there who are planning to evacuate Hawaii?

(H) There are almost none wishing to do that.

(J) What is the climate there now?

[Handwritten in the margin:] Seemed not to understand the question about climate.

(H) These last few days have been very cold with occasional rainfall, a phenomena very rare in Hawaii. Today, the wind is blowing very strongly, a very unusual climate recently.

[Handwritten in the margin:] Long delay.

(J) Is that so?

(H) Here is something interesting. Litvinoff, the Russian ambassador to the United States, arrived here yesterday. I believe he enplaned for the mainland today. He made no statements on any problems.

(J) Did he make any statements concerning the US-Japan question?

[5] (H) No. Not only did he not say anything regarding the US-Japan question, he also did not mention anything pertaining to the Russo-German war.

It appears he was ordered by his government not to make any statement.

(J) Well, that means he was very different from Mr. Kurusu.

(H) Yes.

(J) What kind of impression did Litvinoff make?

(H) A very good one here. He impressed the people as being very quiet and a gentleman.

(J) Did he stop at the same hotel as Mr. Kurusu?

(H) Yes, at the Royal Hawaiian Hotel overnight. He has already enplaned for the mainland.

(J) Do you know anything about the United States fleet?

[Handwritten in margin:] M[ori] tries never to hear about the fleet.

(H) No, I don't know anything about the fleet. Since we try to avoid talking about such matters, we do not know much about the fleet. At any rate, the fleet here seems small. I don't [know whether] all of the fleet has done this, but it seems that the fleet has left here.

(J) Is that so? What kind of flowers are in bloom in Hawaii at present?

(H) Presently, the flowers in bloom are fewest out of the whole year. However, the hibiscus and the poinsettia are in bloom now.

[Handwritten in margin:] Red Christmas flower with long stems [explanation of poinsettia omitted in translation].

\*(J) Does not seem to know about poinsettias. He admits he doesn't know.

(J) Do you feel any inconvenience there due to the suspension of importation of Japanese goods?

[6] (H) Yes, we feel the inconvenience very much. There are no Japanese soy, and many other foodstuffs which come from Japan. Although there are enough foodstuffs (Japanese) left in stock to last until February of next year, at any rate it is a big inconvenience.

(J) What do you lack most?

(H) I believe the soy is what everyone is worried about most. Since the freeze order is in force, the merchants who have been dealing in Japanese goods are having a hard time.

[Handwritten in margin:] (J) has a hard time understanding sake (repeats 4 times).

(J) Thanks very much.

(H) By the way, here is something interesting about Hawaii. Liquor sells very fast due to the boom here. The United States, which twenty years ago went under prohibition, is today flooded by liquor. British and French liquors are also being sold. The Japanese merchants, whose business came to a standstill due to the suspension of importation of Japanese goods, engage in liquor manufacture. The rice from the United States is used in brewing Japanese sake here, and the sake is exported back to the mainland.

[Handwritten in margin:] (J) is surprised that British liquor came in.

[Handwritten in margin:] Taishō jijūsho Takagishi (understood as Takaguchi) repeated 5 or 6 times. Sake is in style here, but there is no kazu-no-ko. Last year there was everything.

(H) explains that the Japanese sake brewed in Honolulu is called "Takara-Masamune"; that a person named Takagishi was the technical expert in charge of the brewing; that said Takagishi is a son-in-law of Grand Chamberlain Hyakutake, being married to the latter's daughter; and that said Takagishi returned recently to Japan on the Taiye Maru. He adds that Japanese here and the Americans also drink sake. He informs (J) that Japanese chrysanthemums are in full bloom here, and that there are no herring-roes for this year's New Year celebration.

[Handwritten in margin:] Who is this "he"—Ogawa? Presumably it is.

(J) How many first generation Japanese are there in Hawaii according to last surveys made?

[7] (H) About fifty thousand.

(J) How about the second generation Japanese?

(H) About 120,000 or 130,000.

(J) How many out of this number of second generation Japanese are in the United States Army?

(H) There aren't so many up to the present. About 1,500 have entered the army, and the majority of those who have been drafted into the army are Japanese.

(J) Any first generation Japanese in the army?

(H) No. They do not draft any first generation Japanese.

(J) Is that right, that there are 1,500 in the army?

(H) Yes, that is true up to the present, but may increase since more will be inducted in January.

(J) Thank you very much.

(H) Not at all. I'm sorry I couldn't be of much use.

(J) Oh no, that was fine. Best regards to your wife.

(H) Wait a moment please?

(J) Thank you.

(J) Off phone.

[Handwritten in margin:] Tried to raise Tōkyō again.

HEWITT INQUIRY EXHIBIT No. 40

TWO REPORTS, SUBJECT JAPANESE CONSULATE, HONOLULU—  
ESPIONAGE ACTIVITIES.

UNITED STATES NAVAL INTELLIGENCE SERVICE

INVESTIGATION REPORT

*Confidential*

Subject: JAPANESE CONSULATE, HONOLULU—Espionage Activities

Report made at: Honolulu, T. H., 14th Naval District Date: 9 Feb., 1942

Report made by: Lt. George P. Kimball, USNR, and Lt. (jg) W. B. Stephenson,  
USNR

Period covered: 5 Dec., 1941—9 Feb., 1942. Status of Case: Pending in 14ND.

Origin of Case: Receipt by DIO-14ND of various encrypted messages sent by Japanese Consul General, Honolulu, to Foreign Office, Tokyo, and Japanese Ambassador, Washington.

Character of Investigation: Espionage.

Enclosures: (See first page of details)

References:

Copy to: ONI (5) 14ND (3)  
CinCPac (1)  
Com14 (1)  
FBI-Hon (2)  
MID-HD (2)

Source File No.: 14ND #54A ONI File No.:

*Synopsis.*—On 3 December, 1941, the Japanese Consul General, Honolulu, transmitted by encrypted despatch to Tokyo a system of signalling by lights, cloths, fires, and radio (presumably to communicate with Japanese ships at sea, near the Hawaiian Islands), which signals would be used to announce the departure of U. S. Naval units from Pearl Harbor. The system was conceived, and submitted to the Consulate, by Otto KUEHN, a German subject and ex-officer of the Germany Navy. Evidence indicates all observation and reporting of ship dispositions and movements at Pearl Harbor was done by Consulate attaches or contacts (including, in at least one instance, KUEHN).

Other than suspicious lights (not conforming to the signal system) seen at night on the island of Maui, subsequent to 7 December, 1941, no evidence has been found that KUEHN's signal system ever was employed.

The decoded body of the despatch of 3 December gave the sender's name as FUJII and the addressee as Chief of Third Section, Naval General Staff. Efforts to identify FUJII have so far been unavailing.

KUEHN, who has been in custodial detention since 8 December, 1941, will be charged with espionage and be tried by the Military Commission.

DEDUCTIONS: Japanese naval espionage in Honolulu prior to 7 December, 1941, was carried on by Consulate attaches and contacts, among whom was Otto KUEHN, a German subject.

Approved.

I. H. MAYFIELD  
Captain, U. S. Navy  
District Intelligence Officer.

- (A) Table Showing Numbers of Battleships, Heavy Cruisers, Light Cruisers, Aircraft Carriers, Submarines, Destroyers, and Destroyer-Type Vessels in Pearl Harbor, at 0800 and 1800 22-30 November, 1941.
- (B) Table of Number and Movement of Ships in Pearl Harbor, by Types, at Various Times between 0600 and 1800, 28 November, 1941.

1. On the morning of 5 December, 1941, a thoroughly reliable confidential informant furnished the District Intelligence Officer with copies of certain commercial communications sent and received by Japanese Consul General Nagao KITA, of Honolulu, during the period, 1-4 December, 1941. These messages were despatch traffic between Tokyo and Honolulu and Washington and Honolulu, that is, between Consul General KITA and Ambassador Kichisaburo NOMURA, in Washington, and Foreign Minister Shigenori TOGO, in Tokyo.

2. Preliminary evaluation of the importance of the messages was impossible to make, inasmuch as they were in code or cipher. They were, however, the first of such messages ever made available to this office, and for that reason deemed very important.

[2] 3. Efforts to determine the meaning of such messages were commenced immediately, but this task was not completed until the morning of 11 December. When the meaning of the messages was determined, the District Intelligence Officer, acting upon orders from Rear Admiral C. C. Bloch, USN, Commandant, Fourteenth Naval District, immediately conferred with Lieutenant Colonel George W. Bicknell, assistant chief of staff for G-2, Hawaiian Department, in charge of the Army Contact Office, Honolulu, and Mr. Robert L. Shivers, special agent in charge, Honolulu field office, Federal Bureau of Investigation, with regard thereto. (Meanwhile, arrangements to secure copies of other commercial radiograms and cablegrams to and from the Japanese Consulate, Honolulu, were effected.)

4. The following message, despatched by Consul General KITA to Foreign Minister TOGO, on 3 December, 1941, was the basis of subsequent extensive investigation by the three intelligence agencies:

From: Kita

To: Foreign Minister, Tokyo

(Secret military message No. — by Chief of Consulate's Code)

To: Chief of Third Section, Naval General Staff.

From: Fujii

Re signals I wish to simplify communications as follows:

(1) Code (following 3 section 8 line table) battle force, including scouting force, are about to put to sea—

- 1. Several aircraft carriers plan to put to sea.
- 2. All battle force has sailed first to third dates inclusive.
- 3. Several aircraft carriers have sailed first to third.
- 4. All aircraft carriers have sailed first to third.
- 5. All battle force has sailed fourth to sixth dates inclusive.
- 6. Several aircraft carriers have sailed fourth to sixth.
- 7. All aircraft carriers have sailed fourth to sixth.
- 8.

(2) Signal

1. Light in Lanikai beach house at night—One light from 8 pm to 9 pm indicates "1", from 9 pm to 10 pm indicates "2". The below signals until midnight, in order, indicate "3" and "4". Two lights, according to the time, indicate "5", "6", "7", "8".

—When not in accordance with (lights) above one full automobile headlight and one half light indicate "1", "2", "3", "4". Two full lights indicate "5", "6", "7", "8".

2. On the Lanikai coast during daytime from 8 am until noon every hour one piece linen cloth (sheet) indicates "1", "2", "3", "4". Two pieces linen cloth indicate "5", "6", "7", "8".

3. In Lanikai bay during daytime in front of harbor (offing) a star boat with one star on sail indicates "1", "2", "3", "4", a star and "III" indicates "5", "6", "7", "8".

4. Light in dormer window of Kalama house from 7 pm to 1 am every hour indicates "3", "4", "5", "6", "7", "8".

5. "KGMB want ads" advertisements 9:45 am—

(a) A Chinese rug, etc., for sale—apply P. O. Box 1476, indicates "3" or "6".

(b) A complete chicken farm, etc., apply as above, indicates "4" or "7".

(c) Beauty operator wanted—same—indicates "5" or "8".

In the event that in accordance with one of three items written above from Oahu a signal or radio message is impossible or Maui Island at a point located between the lower road six miles north of Kula sanitarium and Haleakala road which can be watch from the sea to the southwest and southeast of Maui, until the receipt of the signal "Exex" this (the following) will be repeated for several days: A small fire on the high peak—7 pm to 8 pm indicates "3" or "6"; 8 pm to 9 pm indicates "4" or "7"; 9 pm to 10 pm indicates "5" or "8".

[4] 5. At the aforementioned conference of representatives of the three intelligence agencies, the following preliminary evaluation of the message of 3 December was made:

1. That no one named FUJII, was connected with the Japanese Consulate, Honolulu; but, that FUJII might be a code name or word employed by the Consulate or by some member of its staff, or by some person reporting to the Japanese Navy Ministry through the Consulate.

2. That the "Lanikai beach house" referred to was not readily identifiable, there being many beach houses at Lanikai, Oahu.

3. That the "dormer window of Kalama house" probably referred to a window of this type in the home of Otto KUEHN, a Class "A" German suspect, of Kalama, Oahu, who was put in custodial detention on 8 December, 1941.

4. That the method of signalling set up in the above despatch may have been used prior to the Japanese attack on Oahu, 7 December, and thereafter still might be used, to indicate the movements of United States fleet units from Pearl Harbor.

In an attempt to determine whether the signals referred to in the despatch of 3 December were used prior to the attack, and to detect any further use of such signals, the three intelligence agencies assumed the following tasks:

1. The Federal Bureau of Investigation, Honolulu, was to send two or more agents to Kalama, Oahu, to stay there and gather all possible pertinent information regarding signalling from "dormer window of Kalama house". (The Federal Bureau of Investigation at that time had a pending investigation on Otto KUEHN and members of this family.)

2. The Military Intelligence Division was to maintain a watch at Kalama and Lanikai for a display of lights, display of cloths, or star boats with the indicated markings.

[5] 3. The District Intelligence Office was to send two or more agents to Lanikai, Oahu, to stay there and gather all pertinent information regarding signalling from a "Lanikai beach house"; and, in addition, to conduct an appropriate investigation in the vicinity of Kula Sanitarium and Haleakala, island of Maui.

6. In execution of part of its agreed task, this office sent Agents Joseph P. McCarthy, Fred H. Paoa, and Albert K. Kai to Lanikai on the afternoon of 11 December. On the following morning, an officer messenger flew to Wailuku, Maui, with full instructions for Lieutenant (jg) Morris Adelson, USNR, Branch Intelligence Officer, Zone III, Fourteenth Naval District, to investigate the case there.

7. At Lanikai, the agents of this office early determined that of the more than seventy houses and cottages fronting on the ocean, only two had clothes lines on the premises that could be used for displaying the arranged signals, and that one of the two houses having a clothes line so usable was owned by Otto KUEHN, whose Kalama home with the dormer window already has been mentioned. Under a pretext, Agents McCarthy, Paoa, and Kai interviewed all available residents of the Lanikai area who lived on lots adjacent to the beach. It was determined that Otto KUEHN had no connection with the residents of the Lanikai beach house he owns, other than as their landlord. All star boats in the Lanikai area were found beached, and it was determined that none of them answered the description of the sailboat mentioned in the despatch of 3 December.

8. Upon the return of the agents of this office from Lanikai on 19 December, the following memorandum was submitted to the District Intelligence Officer by Agent McCarthy:

"In compliance with instructions, Agents Paoa, Kai and the writer proceeded to Lanikai on December 11, 1941, and remained until the evening of December 19.

"Over this period of time a complete and thorough canvass was made of all residences on the beach at Lanikai and all others adjacent thereto that might possibly been used by anyone sending the type [6] of signals reported. It was immediately learned that Otto KUEHN owns a house on the beach at Lanikai, this being the fifth house from the junction of Lanikai and Kailua. It was determined that this house is occupied by Lieutenants Chapman and Stuppy and their wives. Lieutenants Chapman and Stuppy are attached to Schofield Hospital.

"Mrs. Stuppy, when interviewed, advised that they had occupied "Kuehn's house for a month and left there to take another house in Lanikai on December 15. Mrs. Stuppy stated that during her residence there she did not have any communication with Kuehn's family nor did any members of this family put in their appearance at Lanikai to her knowledge.

"All of the people interviewed during the course of this investigation reported that they observed no signals nor any activity that appeared to be suspicious or could be interpreted as signaling. This statement is made with the exception of the information received from Mrs. R. C. Waldron whose house is the second house from the Kailua junction, who reported that at 6:45 A. M. on the morning of December 7, 1941, a Japanese, carrying a fishing pole, was observed running on the beach towards Kailua. Shortly after he left, a red flare was seen to have been sent from the vicinity of the beach near the Waldron residence. Mr. and Mrs. Waldron were unable to describe the Japanese referred to or to furnish any additional information concerning his identity.

"The inquiries made generally among the people residing in Lanikai, over the period of this investigation, were confined primarily to suspicious activity on the part of anyone for the period from December 1 to 7, 1941. The inquiries related generally to the possible signaling with flares or lights at night time and the presence of sail boats off the beach during the day time. Over this period, and for the three weeks preceding December 1, the waters off Lanikai were too rough for sailing and it was generally stated by the persons interviewed, most of whom are boat enthusiasts, that no star boats or other types of sailing vessels were seen near this beach over this period. [7] It was pointed out by many of the residents that, had a sail boat of any description appeared in this rough weather, these residents, being interested in sailing vessels, would have remarked upon the presence of a boat off shore in this type of weather and would have remembered the presence of this boat and probably could have recalled the name of the owner.

"Because of the nature of the other signals reported that could have been used in daylight hours questions, it was felt, could not be particularly asked concerning these signals without endangering the source of the information. However, in travelling about the vicinity of Lanikai, over this period, all residences were examined carefully for the purpose of attempting to determine from what residence the other day time signals might have been given. The Kuehn residence could have been used for all signals described except for the signalling with automobile headlights. A residence owned and occupied since Thanksgiving by Judson Roblee, which is back from the beach about 300 yards on a hillside, could have been used as a location from which to give all of the signals described. Mr. Roblee is the manager of the Edward R. Bacon Company. Inquiry generally concerning the Roblees resulted in the information that they

are a very reputable family and should be held above suspicion in this case. Mr. Roblee is well known to Lieutenant (Jg) G. P. Kimball of this office.

"During the course of this investigation, the agents had access to, and the use of, the home of Mr. Arthur Powlison. This house is set on a cliff extending over the Lanikai road and from which can be had a view of all of Lanikai.

"During the period of time consumed by this investigation, a watch was kept for signals and for other suspicious activity from this vantage point without results. During the interviews, generally, those persons interviewed, who were found to be reputable, were advised to be on the alert for suspicious activity in this vicinity and requested to report any information considered worthy of further attention to this office."

[8] 9. In a general report of activities on the island of Maui, dated 9 December, 1941 (which report, due to poor mail service following the outbreak of war, did not reach this office until 13 December), Lieutenant Adelson told of the following incident:

"Only one incident of a number of reports received, indicated suspected espionage activities. The following is a resume of the reported incident.

"Mr. Earl Kraft reported that on 8 December, 1941, at about 2045, while he was spending the night at the Kula Sanitorium, visiting Dr. Sanders, he was telephoned from the hospital to investigate the cause of frequent flashing of a light in the vicinity of the water tank, while a total blackout was in progress. Mr. Kraft proceeded to the vicinity of the water tank, and upon his arrival the person flashing this light disappeared in the bushes. At the approximate time this took place a report was also received that flashes of light were coming from a room in the hospital in the Kula Sanitorium occupied by Shigeo FURUKAWA, who is subject of a recent confidential investigation by the DIO and this office. It will be noted that HAMADA and MATSUDA, who visited FURUKAWA recently at Kulu (DIO-Z/3-#3), have already been picked up here as enemy aliens. Colonel Lyman and Major Cruckshank, of Maui Headquarters, have been advised of the incident and have also been given all information available here, in regard to FURUKAWA. This matter was referred to them for appropriate action. Following our report to Army authorities this day, FURUKAWA subsequently has made an attempt to commit suicide by drinking an excess amount of Listerine. While FURUKAWA is in the isolation ward, because of his attempted suicide, no military orders have been issued to place him in custody, as an enemy alien."

This report was considered very significant because of the fact that an investigation of Shigeo FURUKAWA was begun by this office shortly before the outbreak of war because of the latter's possible connection with Lieutenant Commander Sadatomo OKADA, IJN, among whose effects was found, in the summer of [9] 1941, FURUKAWA's name. (References (d) and (f).)

10. On 20 December, by officer messenger, the District Intelligence Officer received from Lieutenant Adelson the following report, dated 19 December, regarding investigation of the Haleakala and Kula Sanitarium region:

"Every night since 12 December, 1941, this area has been under surveillance from nightfall to past midnight—actual observation of the area being conducted personally with the assistance of Lt. Hansen, H. E. Anderson (Fish and Game Warden), a member of Fleet Reserve, and Police Officers Albert Wong, Louis Fernandez and Chas. Ledward.

"In addition the VJ3 Squadron and the Maui Range is keeping the designated point and its area under surveillance from their tower stations and are keeping this office advised.

"On the night of 14 December, 1941, the reporting officer in company with Mr. Anderson from their observation post noted the following lights and fire which were interpreted as signals:

"At 8:25 p. m. a strong blue light was seen on and off every few seconds in the PUUNENE area. In answer, a strong blue light was seen on and off in the MALAAEA BAY vicinity. Both lights went off and a definite fire signal was observed on the Island of Kahoolawe. This fire lasted 3 minutes. At 8:40 p. m. the light at Puunene came on again and in response the light at Malaaea Bay came on again. Both then went out.

"Police Officers Wong and Ledward also observed the above but placed the fire in the channel between Kahoolawe and Lanai instead of on Kahoolawe.

"Col. Lyman has been kept advised and particular stress laid on the Kahoolawe fire signal seen.

"Kahoolawe as far as is known is uninhabited. On an average of once a week a sampan—"Maisie C", owned by one of the Baldwins and captained by an [10] alien Japanese (Y. Yamauchi) has made a trip to the island—

where Baldwin keeps some horses. Since hostilities with Japan, Mr. Baldwin has requested Col. Lyman's permission to send the "Maisie C" to Kahoolawe. Col. Lyman advised Mr. Baldwin that he would permit the trip to be made under armed guard. In view of the fire signal angle, Col. Lyman will notify this office if and when the "Maisie C" is ready to go and we will make a search of the boat and also arrange for a thorough search of the island.

"Numerous reports on lights and signals from various points on the island have been received by Police, Provisional Police, Army, and Navy. This has added to confusion as many of these reports when checked were found to have been carelessly put on or to be made by patrol cars.

"However, there is one such report of interest: On the night of 11 December, 1941, (one day prior to receipt of reference (a) /referring to the District Intelligence Officer's letter of 11 December directing Lieutenant Adelson to investigate this case on Maui/, Provisional Police patrolling the Kula area investigated a report of light signals coming from a point almost the same as the one we have the information on. Upon investigation by Provisional Police, the person signalling was scared away and heard to scurry through the shrubbery. On 10 December, 1941, Provisional Police had received a similar report but could not locate anyone at the point. There is a strong possibility that this incident may have been connected with the information we have, and if such is the case, our suspect has been scared away or else using another point."

11. On 18 January, 1942, the District Intelligence Officer received a further report regarding FURUKAWA, from Lieutenant Adelson, which is quoted, in part:

"... Miss Marie Dupont, a ward girl, who observed the light was interviewed.

[11] "Miss Dupont stated that at about 2130 on the night of 8 December 1941, she saw flashes of light in the subject's room, 401-B. The subject was sole occupant of the room. At about the same time she also observed a strong light flashing in the vicinity of the water tank on the Kula Sanatorium grounds. Subject's room faces the mountain and is in line of vision with the water tank. A check was made of the subject's room and matches were found. Subject was questioned by Miss Dupont about the matches and he stated that he had lit them to see what the time was. Subject does not smoke. Miss Dupont did not actually see subject light any matches."

12. Meanwhile, Lieutenant Adelson was instructed to investigate fully the activities of Shigeo FURUKAWA since the latter's hospitalization at Kula Sanatorium. Lieutenant Adelson's findings will be set forth in a separate report being prepared on FURUKAWA.

13. On 30 December, this office received information that Morima MARUYAMA, who lives at Kailua, Oahu, T. H. (in an area between Kalama and Lanikai, but very proximate to the latter), was of doubtful loyalty and lived in a house high on a hill from where signalling to a ship at sea might be facilitated. After advising the other investigative agencies, the District Intelligence Officer, on 30 December, sent Agent Kai to Kailua with instructions to investigate MARUYAMA to determine whether signals had been seen emanating from his house, and also to investigate the portion of Kailua immediately contiguous to Lanikai.

14. On 2 January, 1942, Agent Kai returned from Kailua and reported, as to MARUYAMA, that "while this Subject's home is strategically situated and could have been used as a location from which to send signals, or as an observation point, no evidence has been secured to indicate any subversive activity on the part of Subject or to indicate that he would engage in such activities." Agent Kai also reported that no evidence was found to indicate that any other person in the area covered (about twenty houses) had engaged in any signalling to ships at sea.

15. It was learned from a highly confidential source that the full name of the sender of the Consulate's aforementioned message of 3 December probably is Ichio FUJII.

[12] 16. Confidential Informant J-1, who has been familiar with most of the contacts of the Consulate over a period of several years past, advised that the only FUJII known by him to have been close to the Consulate was Junichi FUJII, a prominent merchant. (It should be noted that the latter sailed from Honolulu for Japan aboard the TAIYO MARU on 5 November, 1941.) Former clerks of the Consulate who were interviewed by representatives of the three intelligence agencies confirmed this fact.

17. The records of the Bureau of Immigration and Naturalization, at Honolulu, were checked and reveal that on 6 June, 1925, one Ichio FUJII arrived at Honolulu, from Japan, board the TAIYO MARU. At a hearing of a special

board of inquiry held at Honolulu, 12 June, 1925, it was found that FUJII was born at Mollili, Honolulu, T. H., on 1 May, 1908. FUJII stated that he was taken to Japan at the age of seven by his parents, who remained there. FUJII stated that he was a farm laborer. No further record of this Ichio FUJII was found in the immigration records, nor has any clue to his present whereabouts been discovered.

18. Appropriate examination of available indexes and directories with reference to the surname FUJII (or HUZII) and possible variants, FUJIE and FUJI, was made; with negative results. However, investigation of this phase of the case is continuing.

19. On 1 January, 1942, interrogation of certain of the clerks formerly employed at the Japanese Consulate was commenced by representatives of the three investigative agencies: Special Agent F. G. Tillman, Federal Bureau of Investigation; Captain Frank O. Blake, Military Intelligence Division; and, Lieutenant George P. Kimball, District Intelligence Office.

20. These Consulate clerks, who are American citizens of Japanese ancestry, all informed the agents that they considered themselves separated from employment at the Consulate on 7 December, 1941, and did not report for work on Monday, 8 December, 1941. However, none of them had submitted a letter of resignation or otherwise given notice to the Consulate.

[13] 21. The names of the clerks interrogated are as follows:

Miss Kimie DOUE  
Takaichi SAKAI  
Katsukichi MURAOKA  
Richard Masayuki KOTOSHIRODO  
Kanaye SAHARA  
Hiyoshi SHIGEFUJI

22. Miss DOUE, formerly employed as receptionist and typist at the Consulate, was the first clerical employee interrogated. Details concerning her personal history are set forth in reference (i) and will not be repeated herein. In her position as receptionist, Miss DOUE had a better opportunity to observe visitors to the Consulate than any of the other clerical employees. She appeared to be slightly above the average in intelligence for a Japanese girl of her class, and impressed the agents as being entirely frank and cooperative in answering questions.

23. It was developed in the course of the interrogation of Miss DOUE that Tadasi MORIMURA, one of the secretaries of the Consulate, who had arrived from Japan on 27 March, 1941, for the ostensible purpose of taking charge of the expatriation work at the Consulate, did little or nothing in connection with that work after the first few days following his arrival in Honolulu. Instead, MORIMURA was assigned a desk in the same office with Vice Consul Otojiro OKUDA, where the nature of his work was unknown to Miss DOUE. The expatriation work was done in a different office of the Consulate, and was under the supervision of Kyonosuke YUGE, another secretary. Most of the clerical details of this work were handled by Takaichi SAKAI, one of the clerks above mentioned.

24. Miss DOUE stated that MORIMURA often came to work at about 1100, two hours after the opening of the Consulate, and seldom was at his desk in the afternoon. There was a week in October or November, 1941, when he did not come to work at all. Miss DOUE often saw MORIMURA leave the Consulate in a taxi during office hours between 1000 and 1100 and would not see him again the same day. The staff of the Consulate usually called the proprietor of the Royal Taxi Stand, located at 6 South Vineyard Street, Honolulu (telephone 3299), and it was this stand that MORIMURA customarily called. On other occasions, Miss DOUE saw MORIMURA leave the Consulate during [14] business hours with Richard Masayuki KOTOSHIRODO, one of the aforementioned clerks. Sometimes they would drive away in KOTOSHIRODO's car, and at other times they would use the above mentioned taxi. On several occasions, neither of them came back for the rest of the day.

25. According to Miss DOUE, MORIMURA had a large map of Oahu which he used to spread out on his desk and work on from time to time. Miss DOUE stated that she had seen Japanese characters written in pencil on the map. She had no dealings with MORIMURA other than to deliver mail to his desk.

26. Takaichi SAKAI, whose personal history is set forth in reference (g), also was interrogated on 1 January, 1942. He corroborated what Miss DOUE said about MORIMURA's lack of connection with expatriation matters and his frequent departures from the Consulate during business hours.

27. It was learned from Kanaye SAHARA, whose personal history is set forth in reference (h), that MORIMURA had one finger, either the middle or third, cut off at the first joint. However, SAHARA could not remember which hand it was. SAHARA also corroborated what Miss DOUE had said concerning MORIMURA's departures from the Consulate during business hours, accompanied by KOTOSHIRODO, who often wore an aloha (sport) shirt. On these occasions, they would be gone for the rest of the day. SAHARA stated that he suspected that they went to "important places", and upon being asked what he meant by that, said, "military places". On being asked why he thought they were going to such places, SAHARA said that it was because of the strained relations between the United States and Japan, and also because MORIMURA and KOTOSHIRODO would not make any mention around the Consulate as to where they had been on their trips. SAHARA stated that KOTOSHIRODO had a 1937 Ford sedan which he and MORIMURA often used.

28. SAHARA further stated that he did not know much about MORIMURA's background because he was not listed in the Japanese Foreign Office publication containing the names and biographical data of diplomatic and consular officials. He stated that MORIMURA is 27 or 28 years of age, and if he is a regular member of the consular service, he would have been listed, as he could not have just recently been graduated from college. SAHARA believed that the other three secretaries of the Consulate, Kyonosuke YUGE, Samon TSUKIKAWA, and Kokichi SEKI, were listed in this publication.

[15] 29. SAHARA also informed the agents that MORIMURA and KOTOSHIRODO were on good terms, as SAHARA sometimes saw them joking together as they came into, or left, the office. Asked if he thought this was not strange, in view of the recognized social distinction between secretaries and clerks at the Consulate, SAHARA attempted to explain it by the fact that both were about the same age and seemed to enjoy each other's company.

30. KOTOSHIRODO was interrogated on 3 and 4 January, 1942, and on 9 January, 1942. His personal history is set forth in reference (j), while details of his activities with MORIMURA will be discussed in a subsequent report. In substance, this information is that MORIMURA, often accompanied by KOTOSHIRODO, sometimes in a taxi driven by John Yoshie MIKAMI, subject of reference (k), proprietor of the Royal Taxi Stand, and sometimes in KOTOSHIRODO's car, made frequent trips for the purpose of making observations of military installations and operations. In addition to the trips made with MORIMURA, KOTOSHIRODO made a number of trips for the same purpose, by himself and with MIKAMI, at the direction of MORIMURA. The names and addresses of certain Japanese contacted by MORIMURA were obtained from KOTOSHIRODO, and the joint investigation of these leads also will be covered by a separate report. Signed statements concerning his activities were obtained from KOTOSHIRODO on 4 and 9 January, 1942.

31. From all the clerks interviewed an effort was made to obtain the names of frequent visitors to the Consulate, particularly those who saw the Consul General and the Vice Consul in private. Seven or eight prominent Japanese business and professional men, who have been in custodial detention since 7 December, 1941, were named, including the local managers of the Yokohama Specie and Sumitomo Banks and the Nippon Yusen Kaisha (N. Y. K. Line). According to Miss DOUE, these men would go directly into the office of the Consul General, who often would summon the Vice Consul for a conference. None of the clerks had any idea of the nature of the conversations between these men and the consular officials.

32. Asked if any persons, other than the prominent Japanese referred to above, visited the Consulate on what appeared to be other than routine business, Miss DOUE stated that a man whose nationality she did not know, came and went several times from the Consulate during November, 1941. This man she described as a "haole" (Hawaiian for "white person") [16] and looked somewhat Jewish. Miss DOUE did not know his name. Sometimes this man, the Consul General, and the Vice Consul were locked in the Consul General's private office. The last visit of this man remembered by Miss DOUE was about the end of November, 1941. The man referred to usually came in the morning and sometimes Miss DOUE would see him only when he left the Consulate.

33. On 31 December, 1941, the day before the investigation of the former consular clerks was commenced, Otto KUEHN was brought from detention quarters at the U. S. Immigration Station, Honolulu, to the headquarters of the Federal Bureau of Investigation for questioning by Special Agents J. Sterling Adams and George E. Allen. The interrogation of KUEHN, not having been completed on

31 December, was resumed the following day. While Miss DOUE was being questioned as described above, KUEHN also was under interrogation in a nearby room.

34. When Miss DOUE gave the information mentioned above concerning the unidentified white man who had visited the Consulate during the month of November, Special Agent in Charge R. L. Shivers of the Federal Bureau of Investigation was advised. On the theory that this person might have been KUEHN, Miss DOUE was told by Mr. Shivers that he wanted her to observe a certain person and state afterwards if she had ever seen this person before. Miss DOUE was taken to a stenographer's room and placed at a desk. KUEHN was brought to the door of this room and was engaged in conversation. Miss DOUE immediately recognized KUEHN and placed a sheet of carbon paper over her face so that she could not be recognized by him.

35. After KUEHN was taken back to the room where he was being questioned, Miss DOUE was brought back to the room where her interrogation was being conducted. She was thereupon asked whether she had ever seen the person who had just been shown to her. She answered immediately and with assurance that this was the "haole" she had previously mentioned as having come to the Consulate several times during November. Asked how she knew it was the same man, she stated that she knew by the shape of his head and by his Jewish appearance. Miss DOUE stated that she had seen this man leave the Consulate but had never seen him get into any automobile. However, she stated that on days when he came to the Consulate a tan-colored roadster was seen parked in front of the building. Miss DOUE stated that she thought his visits were peculiar and that she thought he was a "spy".

[17] 36. A short biographical sketch of KUEHN, based upon written statements obtained from him on 1 and 3 January, 1942, by Special Agents Adams and Allen, is submitted for information:

37. KUEHN was born in Berlin, Germany, on 25 December, 1895. In April, 1913, he enlisted as a cadet in the German Navy, serving as a midshipman until captured by the British in January, 1915, and remaining a prisoner of war until December, 1918. In 1920, he married his present wife. From the close of the World War until 1927, KUEHN was employed in various occupations. In 1927, he entered the coffee business and continued in it until 1935, when he came to the United States. However, during the period 1928-1930, he was in the secret police of the German Navy. In 1930, he and his stepson Leopold KUEHN, who was born 6 July, 1911, joined the National Socialist (Nazi) party, but KUEHN claims not to have been active in the party until 1932, when he was considered for a position high in the Gestapo under Heinrich HIMMLER, but which position was given to Reinhold HEYDRICH. Thereafter, KUEHN was twice jailed in Germany, but was released, he says, through the efforts of his wife.

38. In 1935, KUEHN decided to go to Japan to study the Japanese language, and passed through the mainland United States and Honolulu enroute to Japan. In 1936 KUEHN and his family returned to Honolulu where they established permanent residence and subsequently KUEHN returned to Japan for three months' further language study. Upon his return to Honolulu in September, 1936, KUEHN continued the study of the Japanese language. In Honolulu, he engaged in the steel furniture manufacturing business. Friedel KUEHN operated a beauty shop at Kailua and the KUEHNs have owned two homes at Kalama and one at Lanikai. KUEHN's furniture business failed in 1938, his wife's beauty shop brought in only about \$80.00 a month, and they were forced to sell the Kalama home and mortgage the other two residences, one of which usually was rented.

39. From time to time, KUEHN has received considerable sums of money from European sources. He claimed that this money came from the estate of his father and from the liquidation of the coffee business which he had owned. Friedel KUEHN also received money from inherited property in Germany. According to KUEHN, great difficulties were encountered in getting this money out of Germany. Certain of the transfers were said to have been made through a friend in Japan, a Doctor HOMBERG, who is connected with a German steel firm, ROESCHLING STEEL WORKS in Tokyo, who assertedly purchased the [18] German holdings of Friedel KUEHN for \$40,000.00. Part of this consideration was transported in cash by Mrs. KUEHN from Japan to Honolulu in 1940. KUEHN said the amount so received was \$6,000.00, but his wife, who was questioned later, said it was \$9,000.00. In September, 1940, a payment of \$10,000.00 was received from Dr. HOMBERG and was delivered by one KAI, purser of the SS KAMAKURA MARU, an N. Y. K. liner.

40. The following additional information was obtained from KUEHN and is contained in his written statements made on 1 and 3 January, 1942:

41. In July, 1941, after the "freeze order", KUEHN contacted Vice Consul OKUDA at the Japanese Consulate and requested him to send a message to Dr. HOMBERG through a Baron KYOGOKU in Japan, whom KUEHN claims previously to have met on a trip to Japan. According to KUEHN, the message to HOMBERG was in a prearranged private code and the substance of it was a request to send the balance of the \$40,000.00 due Mrs. KUEHN as soon as possible. When OKUDA was hesitant about sending the message, KUEHN informed him that he was acting for the Japanese Government and had an important message for KYOGOKU, a Government official in Tokyo. KUEHN told OKUDA that it was imperative that he receive the money before 29 October, 1941, because of the Treasury Department's foreign funds regulations, and he intentionally gave OKUDA the impression that the money was to come from KYOGOKU as compensation for services rendered the Japanese Government. OKUDA finally agreed to send the message.

42. In his statement of 1 January, 1942, KUEHN had said that he first contacted the Consulate early in November, 1941, to request assistance in sending money to his stepson, Leopold, in Germany, and was informed that the Vice Consul would take the matter up with the Yokohama Specie Bank. However, in his statement of 3 January, 1942, he gave the version above set forth about the message to Dr. HOMBERG in Japan. But, in both versions, KUEHN admitted having made several visits to the Japanese Consulate in November, 1941, and stated that he called in the mornings.

43. It was developed that on his second or third visit, either KUEHN or Consul General KITA suggested that KUEHN could be of assistance in obtaining information concerning United States fleet movements. KUEHN agreed to do what he could, and on or about 28 November, 1941, he drove to the vicinity of Pearl Harbor, where he said he saw very few [19] ships in the harbor. Later, according to KUEHN, he informed the Consulate that there were seven battleships, six cruisers, two aircraft carriers, twenty destroyers and twenty-seven submarines, "or some similar figure in Hawaiian waters." The information which KUEHN stated he furnished the Consulate, as set forth above, can be compared with the figures set forth in enclosures (A) and (B), which were prepared by this office (for the Federal Bureau of Investigation) from data furnished by the Captain of the Yard, Navy Yard, Pearl Harbor. As to the figures admittedly reported by KUEHN, he said "those figures were purely fictitious, as far as I knew."

44. Subsequent to the visit during which information relative to fleet movements was first discussed, the following occurred, as described in KUEHN's statement of 1 January, 1942:

"At that time I made suggestions to them stating that I had a short-wave transmitter and could send messages for them if they so desired and I also outlined a system of signaling that could be used in order to furnish information relative to the types of ships in Pearl Harbor and those that had left. This system of signalling contained fifteen sets of signals. These signals were to have been given by a light in my home at Lanikai or Kalama which could have been seen out at sea by a submarine, as follows: One light between 6 and 7 meant battle fleet in harbor; one light between 7 and 8 meant scouting force in harbor; one light between 8 and 9 meant aircraft carriers in harbor; one light between 9 and 10 meant battle fleet prepared to leave; one light between 10 and 11 meant scouting force prepared to leave; one light between 11 and 12 meant aircraft carriers prepared to leave; one light between 12 and 1 meant battle fleet left between one and two days ago; one light between 1 and 2 meant scouting force left one to two days ago; two lights between 6 and 7 p. m. meant aircraft carriers left one to two days ago; two lights between 7 and 8 p. m. meant battle fleet left three to four days ago; two lights between 8 and 9 p. m. meant scouting force left three to four days ago; two lights between 9 and 10 p. m. meant aircraft carriers left three to four days ago; two lights between 10 and 11 p. m. meant fleet left five to six days ago; two lights between 11 and 12 midnight meant scouting force left five to six days ago; two lights between 12 midnight and 1 a. m. meant aircraft carriers left five to six days ago.

[20] "This same set of signals could have been sent by means of linen on the clothes line at my Lanikai home, one sheet between 6 and 7 a. m. in daylight meaning battle fleet in harbor; one sheet between 7 and 8 a. m. meaning scouting force in harbor; one sheet between 8 and 9 a. m. meaning aircraft carriers in

harbor; one sheet between 9 and 10 a. m. meaning battle fleet prepared to leave; one sheet between 10 and 11 a. m. meaning scouting force prepared to leave; one sheet between 11 a. m. and 12 noon meaning aircraft carriers prepared to leave; one sheet between 12 noon and 1 p. m. meaning battle fleet left one to two days ago; one sheet between 1 p. m. and 2 p. m. meaning scouting force left one to two days ago; two sheets on line between 6 a. m. and 7 a. m. meaning aircraft carriers left one to two days ago; two sheets on line between 7 a. m. and 8 a. m. meaning battle fleet left three to four days ago; two sheets on line between 8 a. m. and 9 a. m. meaning scouting force left three to four days ago; two sheets on line between 9 a. m. and 10 a. m. meaning aircraft carriers left three to four days ago; two sheets on line between 10 a. m. and 11 a. m. meaning battle fleet left five to six days ago; two sheets on line between 11 a. m. and 12 noon meaning scouting force left five to six days ago; two sheets on line between 12 noon and 1 p. m. meaning aircraft carriers left five to six days ago.

"They told me at the time that this system of communication was too complicated and it would be necessary for me to simplify it. I went home. One or two days prior to the time I submitted this first set of signals I had ridden by Pearl Harbor and there were very few boats in the harbor at that time. About three days later I went back to the Consulate with a simplified system of signalling, on what I think was December 2, 1941. This set of signals contained only eight combinations, as follows: No. 1 meaning battle fleet prepared to leave; No. 2 meaning scouting force prepared to leave; No. 3 meaning battle fleet left one to three days ago; No. 4 meaning scouting force left one to three days ago; No. 5 [21] meaning aircraft carriers left one to three days ago; No. 6 meaning battle fleet left four to six days ago; No. 7 meaning scouting force left four to six days ago; No. 8 meaning aircraft carriers left four to six days ago. These signals were to be given as follows from my Lanikai home: One light between 7 and 8 p. m. meaning No. 1; one light between 8 and 9 meaning No. 2; one light between 9 and 10 p. m. meaning No. 3; one light between 10 and 11 p. m. meaning No. 4; two lights between 7 and 8 p. m. meaning No. 5; two lights between 8 and 9 p. m. meaning No. 6, etc. These lights were to have been from a window or automobile lights. The same system could have been used with one piece of linen hung on the line at Lanikai between 8 and 9 a. m., meaning No. 1, one between 9 and 10 a. m. meaning No. 2; one between 10 and 11 a. m. meaning No. 3; one between 11 a. m. and 12 noon meaning No. 4; two pieces between 8 and 9 a. m. meaning No. 5; two pieces between 9 and 10 a. m. meaning No. 6, and so forth. It was also arranged that a light in the skylight at my Kalama home between 7 and 8 p. m. would mean No. 1; one between 8 and 9 p. m. would mean No. 2; one between 9 and 10 p. m. would mean No. 3 and 6; one between 10 and 11 p. m. would mean No. 4 and 7; one between 11 and 12 p. m. (midnight) would mean Nos. 5 and 8.

"It was also arranged that this same system of signalling could have been used with a star boat just off the mouth of Lanikai Beach between certain hours, a star on the sail or a star and a number on the sail meaning corresponding signals as those previously given, according to the time the boat was in that position. I do not recall the exact combinations that were to have been used to indicate each signal.

"It was also arranged that on the KGMB Want-Ads program in the morning the signal could be effected to indicate numbers 3 and 6 if a Chinese rug was advertised for sale, Nos. 4 and 7 if a beauty parlor operator was advertised for; and a third type of advertisement which I do not recall would indicate numbers 5 and 8. It was also arranged that if it was impossible to give this system of signals, [22] a garbage fire on Maui in a certain locality between certain hours would indicate the above number signals, such as a fire between the hours of 9 and 10 p. m. would mean signals 3 and 6, and so forth. In mentioning this latter plan I had in mind a locality previously described to me by a friend, CARL BASLER, where a number of vacant lots are located. I determined the exact locality of this area by reference to a map of Maui which showed the names of the two roads which border that locality and which names were mentioned in my recommended plan as bordering the area wherein the fire signals were to be effected.

"It was also arranged that this same set of signals could be given by short wave radio and arrangements were made that if the Consulate desired to contact me they could do so by sending me a postcard signed "JIMMIE", to my Box No. 1476 at Honolulu.

"This simplified set of signals was taken to the Consulate in an envelope by me about 8:30 in the morning. At the time I went to the Consulate I was

accompanied by my wife, FRIEDEL, and while she remained in the car I went to the door and handed the envelope containing this set of signals and another envelope containing \$500.00, which was to be sent to my son LEOPOLD in Germany, to the Vice Consul whose name I do not recall. I had no conversation with him at this time but went back to my car and drove on into Honolulu.

"I might point out that the plan outlined by me above and that submitted to the Japanese Consulate are probably not identical in every detail with those actually submitted, although the plans outlined above are basically the same as those submitted. Differences will probably appear in connection with the hours stated for the signals to be given.

"Following the submission of these latter plans to the Consulate I have had no further contact with any representatives of the Consulate to date, neither have I received any correspondence or telephone messages from such representatives. Apparently [23] no effort was made by the Consulate to carry either of the proposed plans into effect through me.

"I have never been to the Island of Maui nor have I ever seen the island nor purchased any property there. I never had a short-wave transmitter, and my Lanikai Beach house is rented to Army people. I might state that CARL BASLER had no knowledge of my plans submitted to the Japanese Consulate. As a matter of fact I have not seen him or his wife since they departed from Honolulu about September 1941. Further, I have had no correspondence with them except for one letter received from Mrs. BASLER about October, 1941. I rented my Lanikai residence on November 1, 1941, to two couples, one an Army doctor, age about 30, and the other an employee with the Engineers, about the same age, both of whom had been transferred from Schofield Barracks to Kaneohe. I cannot recall the names of these individuals at the present time."

45. In the same statement, KUEHN said that following the arrival of the TATUTA MARU in Honolulu in October, 1941, a Japanese attached to that vessel called at his residence and delivered a package enclosed in cardboard containing \$14,000.00 in \$100.00 bills. The person who made this delivery stated to KUEHN that the package came from Dr. HOMBERG in Japan. But, in his statement of 3 January, 1942, KUEHN described the receipt of the money as follows:

"I did not contact the Consulate again nor did I receive any post card until one afternoon in the very end of October, just after the first Japanese boat came to Honolulu, a young Japanese man came to my home in Kalama and he told my son that he wanted to see me. I was in the back working in my garden. My son came and advised me he was there and I went around. He very brusquely asked me if I was OTTO KUEHN and I said "Yes," and he said, "I have something for you from Dr. HOMBERG," so I took him back to my little garden house where he gave me a package and a letter and I asked him if he had any other information for me and he said no. I opened the letter first and in the letter was a sheet of paper written in English asking if I had a short-wave transmitter and if I would be willing [24] to make a test at a certain stated time which was on a night several nights later, on a certain wave length. This letter was typewritten and had no name on it. He gave me a sheet of paper and an envelope and I wrote on the sheet of paper that I was unable to make the test. I was quite nervous and put it in the envelope and gave it to him. I asked him if he knew what was in the package and he said no. I asked him if he wanted a receipt for the package and he said no, and he then left and I opened the package and counted the money. There were \$14,000.00 in the package, mostly in new \$100.00 bills, some \$20.00 bills. I think that this was a contact KYOGOKU was trying to make with me through this letter. As soon as he left I tore up the sheet of paper asking me to make this radio test and burned it up."

46. It was learned from KOTOSHIRODO that some time in October, 1941, he had been requested by Vice Consul OKUDA to drive MORIMURA and himself to Kailua. At the corner of Kuulei Road and Malunlu Avenue, Kailua, KOTOSHIRODO said that OKUDA directed him to stop the car, which he did, and there MORIMURA got out of the car and commenced walking along Malunlu Avenue in a northwesterly direction. OKUDA directed KOTOSHIRODO to drive several blocks along Kuulei Road and to stop at the corner of Kuulei Road and Kalaheo Avenue. They waited there thirty or forty minutes before MORIMURA reappeared, walking along Kalaheo Avenue from

the direction in which he had disappeared. (It is noted that the places where MORIMURA alighted and later rejoined OKUDA and KOTOSHIRODO are approximately one-half mile from the Kalama residence of Otto KUEHN.) On 4 January, 1942, KOTOSHIRODO directed Special Agent Tillman and Lieutenant Kimball to the places above mentioned, and identified the places.

47. Eberhard KUEHN, age 15, stepson of Otto KUEHN, was interviewed by Special Agents Adams and Allen, and stated to them that an unidentified Japanese had come to see his father between 1600 and 1630 on a Saturday afternoon, on either 18 October or 25 October, 1941. The description he gave of this person is substantially similar to that of MORIMURA. Later, a photograph of MORIMURA was shown to Eberhard KUEHN, who stated that it was very similar to the Japanese who called to see his father in October, and that he believed that it was very likely the same person, but he could not say positively. The same [25] photograph also was shown to Otto KUEHN, who stated that it was quite similar to the Japanese who had delivered the money to him; that he is positive he has seen the person represented in the photograph before, and believed it probably was on the occasion when the money was delivered. However, KUEHN still contended that he was of the belief that the man who had come to see him had been sent by Dr. HOMBERG, and that a Japanese steamer was in port in Honolulu on the day in question. (It should be noted here that the only Japanese liner in port around the time in question was the TATUTA MARU, which arrived in Honolulu from the Orient on 23 October, 1941, and departed for San Francisco the following day.)

48. At no time has KUEHN implicated anyone outside the Consulate, other than himself and the Japanese who delivered the \$14,000.00 to him, in any of the activities above described. Thus far, no evidence has been developed that anyone, other than persons connected with the Consulate, have acted in conjunction with KUEHN.

49. In the plan of the system of signals submitted by KUEHN to the Consulate, as described in KUEHN's statement of 1 January, 1942, and set forth in the despatch sent by Consul General KITA to Foreign Minister TOGO on 3 December, 1941, part of the signals consisted of "KGMB want ads". KGMB are the call letters of the broadcasting station in Honolulu owned and operated by the Hawaiian Broadcasting Company, Limited. The despatch designated the advertisements to be: (a) for the sale of a Chinese rug; (b) for the sale of a complete chicken farm; and, (c) for a beauty operator wanted. Investigation by the Federal Bureau of Investigation has failed to disclose any record of radio advertisements on any KGMB program of the type described, between 24 November and 8 December, 1941. However, it was found that Post Office Box 1476, referred to in the message of 3 December, referred to KUEHN's box at the Honolulu postoffice.

50. Of the original \$14,000.00 cash received by KUEHN, \$5,000.00 in new \$100.00 Federal Reserve Bank of New York notes was found on the person of Mrs. KUEHN, after she was taken into custody on 8 December, 1941. It also was discovered that Mrs. KUEHN had given \$2,000.00, in similar denominations, to her daughter, Mrs. J. Carson MOORE (nee Ruth KUEHN). This money also was recovered by special agents of the Federal Bureau of Investigation. These funds are being traced from their source, the Federal Reserve Bank of New York, to determine [26] the persons or agencies through whom they were transmitted to Honolulu. It has been established by the Federal Bureau of Investigation that these notes were not obtained from, nor cleared through, Honolulu banks.

51. Otto KUEHN and his wife are the subjects of reference (a), being named therein as "Mr. and Mrs. KOEHN". Reference (b) states that KUEHN and his wife had (before 21 April, 1939) been under observation by the District Intelligence Office for a number of months, and that KUEHN was strongly suspected of being an espionage agent for either Japan or Germany, or both.

52. Otto KUEHN was carried on the Fourteenth Naval District records (July, 1940) as a class "A" Nazi suspect. See reference (c). The following information appeared on the suspect card:

"KUEHN, Otto Kailua, Oahu (Occupation) None at present

Formerly (1918) officer in German Navy; cultivates acquaintances among officers in U. S. Navy; at one time received considerable sums of money from European source; frequent trips to Japan; Mrs. KUEHN recently (May, 1940) returned from Japan and reportedly brought back a considerable sum of money with her; has failed in business but owns considerable real estate."

53. The name of Mrs. KUEHN was added to the Fourteenth Naval District Nazi list, as a class "A" suspect, on 31 May, 1941, as shown by reference (e), the pertinent portion of which reads as follows:

"KUEHN, Friedel—Kailua, Oahu. Wife of Otto KUEHN, suspected of being a German agent. Friedel KUEHN is known to be pro-Nazi. Mr. and Mrs. KUEHN are suspected of being 'Mr. and Mrs. Friedel' who are reported as contacts of the local Japanese consulate."

54. The names of "Mr. and Mrs. Friedel" were furnished to the District Intelligence Officer in July, 1940, by a reliable confidential informant who stated that the Friedels had approached the Honolulu Japanese Consulate with the request that certain information of theirs be transmitted to the Japanese Navy. The same confidential informant reported [27] that the consul-general requested the Foreign Office to advise concerning the reliability of the Friedels, and that the Foreign Office replied stating that the Friedels could not be placed, but that any information they furnished should be received and forwarded with an indication that it came from the Friedels. The message further advised that the Japanese Navy was prepared to compensate the Friedels for any information they furnished according to its value.

55. All of the information received from this confidential informant concerning "Mr. and Mrs. Friedel" was transmitted to the Honolulu Field Office of the Federal Bureau of Investigation. An investigation conducted by that agency failed to disclose any "Mr. and Mrs. Friedel" who in any way fitted the meager description furnished by the informant. It was concluded, however, that Otto and Friedel KUEHN might be "Mr. and Mrs. Friedel", but no evidence was obtained prior to the present investigation, indicating that either of the KUEHNS had contacted the Japanese Consulate.

56. The evidence obtained in the investigation, which is set forth in substance in this report, has been given by the Federal Bureau of Investigation to Angus M. Taylor, Jr., United States Attorney for the District of Hawaii, who has prepared charges and specifications charging Otto KUEHN with violation of Sections 34, 31, and 32 of Title 50, U. S. Code. These charges and specifications will be preferred by Captain Eugene V. Slattery, Assistant Judge Advocate General, Hawaiian Department, who will act as trial judge advocate in the prosecution of the case before the Military Commission.

57. Charge No. 1 is based on Section 34 of Title 50, and avers that KUEHN conspired with Consul General KITA and Vice Consul OKUDA on or about 20 November, 1941, to unlawfully communicate, in violation of Section 31, information to the Japanese Government concerning the movements and positions of the United States Fleet, by means of a system of signals prepared by KUEHN, and that in the furtherance of the conspiracy, certain overt acts were committed by KUEHN. These acts include obtaining by visual observation on or about 28 November, 1941, figures as to the number of naval vessels in Pearl Harbor and furnishing the same to the consular officials; and preparing and submitting to the same officials on or about 2 December, 1941, the plan for the system of signals previously described, which plan was transmitted by Consul General KITA to the Japanese Government on or about 3 December, 1941.

[28] 58. Charge No. 2 is based on an alleged violation of Section 31, Title 50, and specifies that KUEHN, on or about 28 November, 1941, for the purpose of obtaining information respecting the national defense, and with intent and reason to believe that the information to be obtained was to be used to the injury of the United States or to the advantage of a foreign nation, namely, Japan, unlawfully obtained information concerning the disposition of United States naval vessels in Pearl Harbor.

59. Charge No. 3 is based on an alleged violation of Section 32 of Title 50, and specifies that on or about 2 December, 1941, KUEHN unlawfully transmitted the information he had obtained concerning naval vessels to the Japanese Government, through the Consulate.

60. No evidence has thus far been discovered by any of the three investigative agencies which have handled the various phases of this case which would establish as a fact that any attempt was made, either before or after 7 December, 1941, to put into actual operation the system of signals prepared by KUEHN for the Consul General and submitted by the latter to Tokyo. However, efforts still are being made to obtain such evidence, if it exists, and to determine what other person or persons, if any, may have been implicated in such activities.

61. (Other messages despatched by the Consul General, both in the period, 1-4 December, 1941, and at other times, as the same have been received by this

office and have been resolved into plain language, will be discussed in a report supplementary to this one, and bearing the same subject title.)

Pending—14ND.

6 February, 1942

ENCLOSURE (A): Table showing numbers of battleships, heavy cruisers, light cruisers, aircraft carriers, submarines, destroyers, and destroyer-type vessels in Pearl Harbor, at 0800 and 1800, 22-30 November 1941

## UNITED STATES NAVAL INTELLIGENCE SERVICE

### INVESTIGATION REPORT

#### Confidential

Subject: JAPANESE CONSULATE, HONOLULU—Espionage Activities.

Report made at: Honolulu, T. H., 14th Naval District. Date: 14 Feb. 1942.

Report made by: Lieutenant (jg) W. B. Stephenson, USNR.

Period covered: 5 Dec., 1941 to 14 Feb., 1942. Status of Case: Pending.

Origin of Case: Receipt by DIO-14ND of various encrypted messages sent by Japanese Consul General, Honolulu, to Foreign Office, Tokyo, and Japanese Ambassador, Washington.

Character of Investigation: Espionage.

Enclosures: (A) Copies of miscellaneous despatches from Japanese Consul General, Honolulu, to Tokyo and to other Consuls, concerning military and naval subjects. Copy to: ONI (5) 14ND (3)  
CinCPac (1)  
Com 14 (1)  
FBI-Hon (2)  
MID-HD (2)

Source File No.: 14 ND #54A. ONI File No.:

Synopsis: During the period 3-6 December, 1941, the Japanese Consul General, Honolulu, reported to Tokyo, by despatch, the entry and departure of Naval vessels at Pearl Harbor. There is no evidence at hand to show reporting of such

facts by despatch prior to 3 December, nor has any message been found which ordered the Consulate so to report starting on 3 December.

Messages further reported in detail as to the numbers of Naval vessels in Pearl Harbor on 5 and 6 December, 1941. Reports were accurate as to the number of battleships and aircraft carriers, not so accurate as to cruisers, and very inaccurate as to destroyers.

Percentage of error in reporting indicates reports probably were based on data gathered by untrained observers stationed at some distance outside the Navy Yard. There is no evidence to indicate that anyone inside the Navy Yard was engaged in this espionage activity.

The despatch of 1248, 6 December, indicated knowledge that anti-torpedo nets were not being used to protect battleships moored in Pearl Harbor.

Deductions: Despatches of 3-6 December, 1941, while relatively inaccurate in many details, apprised Japan of the number of battleships in Pearl Harbor, absence of aircraft carriers therefrom, and the non-use of anti-torpedo nets to protect battleships in the harbor.

Approved: I. H. MAYFIELD,  
Captain, U. S. Navy,  
District Intelligence Officer.

(b) 14ND Investigation Report, Subject RICHARD MASAYUKI KOTO-SHIRODO, 2-8-42.

(c) 14ND Investigation Report, Subject JOHN YOSHIE MIKAMI, 2-6-42.

1. This report is a continuation of, and an enlargement upon, reference (a). It is concerned chiefly with (a) the substance of certain naval intelligence transmitted by despatch from the Japanese Consul General, Honolulu, to Tokyo, and (b) the accuracy of the data transmitted.

2. Copies of some, but not all, of the encrypted despatches of the Japanese Consulate, Honolulu, dating back to March, 1941, were made available to the District Intelligence Office and to the Honolulu field office of the Federal Bureau of Investigation by reliable confidential informants. Only such of those communications that refer to military or naval subjects will be discussed in this report. As stated in reference (a), copies of the despatches hereinafter discussed were received by the District Intelligence Officer, from a highly confidential source, on 5 December, 1941, but were in code or cipher and could not be evaluated immediately. The plain meaning of the despatches was not learned until 11 December, 1941.

3. For the sake of clarity, it is stated at the outset that evidence gathered to date indicates that intelligence concerning United States vessels in Pearl Harbor, and their entry and departure therefrom, was gained by the simple expedient of observing ships in the harbor from points of vantage outside the Navy Yard. From reference (a), it appears that such fact-gathering was directed either by Vice Consul Otojiro OKUDA or Tadasi MORIMURA, a secretary at the Consulate; that MORIMURA personally made many trips to the vicinity of Pearl Harbor, with Richard Masayuki KOTOSHIRODO, a Consulate clerk, subject of reference (b), and with John Yoshie MIKAMI, a trusted taxi driver, subject of reference (c), who is at present in custodial detention; that MORIMURA personally did most of the known observing of Pearl Harbor, and contacting observers who lived in that vicinity; and, that Otto KUEHN, prominently mentioned in reference (a), who admitted making up a signal system for the Consulate to use to convey information (presumably to Japanese ships off the shores of the Hawaiian Islands), at least once visited the Pearl Harbor [2] area for the purpose of determining the number of ships there and reporting his findings to the Consulate. The *modus operandi* of MORIMURA and other Consulate observers and contacts will be set forth in detail in a report to follow.

4. On 3 December, 1941, Consul General Nagao KITA sent the following despatch to the Foreign Office, Tokyo:

Wyoming and two seaplane tenders departed third.

(It should be noted that the messages consistently refer to the WYOMING, where obviously the UTAH was intended.) An examination of copies of the Navy Yard, Pearl Harbor, entry and departure log for 22 November to 7 December, 1941 (hereinafter referred to as "operational data"), shows the above

despatch to have been wholly in error. The UTAH cleared Pearl Harbor on 1 December, at 1208, and did not return until 1555, 5 December. The seaplane tenders CURTISS and THORNTON also left Pearl Harbor on 1 December, clearing at 1628 and 1712, respectively, and also returned to the harbor on 5 December, entering at 1408 and 1410, respectively. The operational data further reveals that no battleships cleared the harbor on 3 December (so there was no departure of a vessel that might reasonably have been mistaken for the UTAH), and that no seaplane tenders left Pearl Harbor that day.

5. On 4 December, at 1657, the following despatch was sent to Foreign Minister TOGO by the local Consulate:

USS Honolulu arrived 1300/4th

From the operational data aforementioned, it was determined that the USS HONOLULU entered Pearl Harbor at 1131, and secured at berth B-21 at 1300, on 28 November, 1941. She did not move from that berth before the Japanese attack of 7 December. Furthermore, no cruisers of the HONOLULU type either entered or cleared the harbor on 4 December. The only cruiser movements at Pearl Harbor during the period 1-6 December, 1941, were the departure of the CHICAGO, PORTLAND, ASTORIA, INDIANAPOLIS, and MINNEAPOLIS, between 0718, 5 December, and the arrival of the DETROIT, at 0947, 5 December.

6. Obviously in response to a request from Tokyo for the same (which request has not yet been found in the traffic to the Consulate), the following message was sent by [3] Consul General KITA at 1804 on 5 December:

The three battleships mentioned in your X239 of Friday morning, the fifth, entered port. They expect to depart port on the eighth. On the same day the Lexington and five heavy cruisers departed. The following warships were anchored on the afternoon of the fifth: 8 battleships; 3 light cruisers; 16 destroyers. Coming in were 4 cruisers of the Honolulu type and 2 destroyers.

The first sentence of the message evidently refers to Battleship Division One (ARIZONA, NEVADA, and OKLAHOMA), which entered Pearl Harbor between 0856 and 0931, 5 December. The District Intelligence Officer has been informed by the Fleet Intelligence Officer that Battleship Division One was NOT scheduled to sail on 8 December, 1941, as reported in the second sentence of the despatch to Tokyo.

7. The foregoing message, in its third sentence, correctly set forth the facts. The LEXINGTON cleared Pearl Harbor at 0810, 5 December, in company with the five heavy cruisers before mentioned, which cleared between 0718 and 0735, the same morning.

8. After the arrival of Battleship Division One on the morning of 5 December, and up until the time of the Japanese air attack on 7 December, there were eight battleships moored in Pearl Harbor: PENNSYLVANIA, CALIFORNIA, MARYLAND, TENNESSEE, WEST VIRGINIA, ARIZONA, NEVADA, and OKLAHOMA. The information reported to Tokyo on 5 December in this regard was, therefore, correct.

9. The statement in the foregoing message, that there were (only) three light cruisers in the harbor on the afternoon of 5 December reported only half of the vessels of that type in Pearl Harbor, which were the HONOLULU, HELENA, ST. LOUIS, PHOENIX, RALEIGH, and DETROIT. In addition to light cruisers, the heavy cruisers NEW ORLEANS and SAN FRANCISCO were in the harbor all that afternoon, but were not reported in the despatch.

10. As shown by the operational data, at 0800 on 5 December, 1941, there were twenty-one destroyers in Pearl Harbor. Six more arrived, and none departed, before 1200 the same day, making a total of twenty-seven moored (or underway in the harbor, proceeding to moorings) at noon. [4] One destroyer cleared the harbor at 1539, but re-entered at 1612. Therefore, at all times on the afternoon of 5 December, there were at least twenty-six destroyers in Pearl Harbor.

11. Assuming that the Consulate's observer or observers might not have been able to distinguish between destroyers (including DLs) and ex-destroyers now used as minelayers, mine sweepers, or seaplane tenders, the following facts as to all destroyer-type ships are presented: At 0800, on 5 December, 1941, there were twenty-eight destroyers and destroyer-type vessels moored in Pearl Harbor. Between 0800 and 1200, the same day, six DDs, four DMs, and two DMSs entered, and there were no departures of those types, bringing to forty the total of destroyers and ex-destroyers in the harbor at 1200. Subsequent departures, between 1200 and 1800, varied the number of such vessels in the harbor between a minimum of forty and a maximum of forty-three.

12. The last sentence of the above message of 5 December, to the effect that four cruisers of the HONOLULU class and two destroyers were coming in that afternoon, is not supported by the facts. On the afternoon of 5 December, the four HONOLULU class cruisers already named were in the harbor, and had been there since 28 November, 1941. No cruisers of that class did come in, or were coming in, on the afternoon mentioned. Furthermore, after the arrival of the DETROIT on the morning of 5 December, there were no further arrivals of cruisers of any class until after the Japanese attack. As to destroyers, four destroyer-type vessels entered the harbor on 5 December, at 1310, 1408, 1431, and at 1612.

13. On 6 December, 1941, Consul General KITA received the following despatch from Foreign Minister TOGO, which is inserted here merely as a matter of interest:

Please inform us immediately of any rumors of the movements of warships after the fourth.

There has not yet been found in the Consulate traffic any indication as to when the Consulate received orders to report by despatch on United States fleet movements. It is noted from the data at hand that such reporting by despatch was not indulged in prior to 3 December, 1941.

14. At 1801 on 6 December, 1941, the Consulate [5] placed the following message for transmission to Tokyo and Washington:

On the evening of the fifth the battleship WYOMING and one sweeper entered port. Ships moored on the sixth are as follows: 9 battleships; 3 light cruisers; 17 destroyers; 3 mine sweepers. Ships in dock: 4 light cruisers; 2 destroyers. (CA and CV ALL —) PS—CV cannot be found in the fleet.

The first sentence of the foregoing message is supported by the following facts: The UTAH (again mistakenly referred to as the WYOMING) entered Pearl Harbor at 1555 on 5 December, preceded by the SUNNADIN at 1530.

15. As to the number of battleships in Pearl Harbor on 6 December, the following are the true facts: If the UTAH be counted as a battleship (as it should be in this situation, where the Consul consistently referred to it as the WYOMING), there were nine battleships in the harbor, as reported.

16. Cruisers in the harbor at that time were two heavy cruisers, the NEW ORLEANS and SAN FRANCISCO, and six light cruisers, the HONOLULU, HELENA, ST. LOUIS, PHOENIX, RALEIGH, and DETROIT.

17. In this message, as in that of 5 December regarding the number of vessels in Pearl Harbor, there is a considerable variance between the number of destroyers reported to be in the harbor, and the number actually there. As of 0800, 6 December, there were twenty-seven destroyers moored in Pearl Harbor. Two more destroyers entered at 1115 and 1132, respectively, one cleared at 1300, and there were no further destroyer movements that day. Therefore, a total of twenty-nine destroyers were in Pearl Harbor from and after 1300 on 6 December, as compared with a total of nineteen reported in the despatch quoted above. In addition, there were other destroyer-type craft present in the harbor that day—four high-speed mine sweepers (DMSs), eight minelayers (DMs), and three seaplane tenders (AVDs)—which to the untrained observer might have appeared also to be destroyers.

18. As noted in the preceding paragraph, there were four mine sweepers in Pearl Harbor all day on 6 December. In addition, the BOGGS (DMS) entered at 0830, cleared at 0920. [6] entered again at 1540, and cleared again at 1625. This is to be compared with the reported three mine sweepers in the harbor.

19. It is believed that the report to Tokyo of 6 December, where the terms "moored" and "in dock" were used, meant to differentiate between ships at moorings and those berthed at docks (and not to distinguish between ships in drydock and those not in drydock). From Navy Yard operational data, it was determined that only eight battleships (counting the UTAH as such) were at moorings on that afternoon. The ninth battleship, the PENNSYLVANIA, was in Drydock #1. As to cruisers, it is noted that three light cruisers were moored, as reported in the despatch, while three other light cruisers and the two heavy cruisers were at docks. The approximate data as to destroyers was: nineteen at moorings, five at docks, and three in drydocks.

20. The postscript to the above despatch is thought to mean not that there were no aircraft carriers in the fleet, but that there were none in the portion of the fleet at Pearl Harbor at the time of last observation. Such was the fact, the last carrier, the LEXINGTON, having sailed on 5 December.

21. Another despatch of 6 December, delivered for transmission to Tokyo at 1248, was called for by a previous message from Tokyo (which also has not yet been found in the Consulate traffic) :

Referring to last paragraph of your No. 123 :

1. The Army ordered several hundred balloons for training at Camp Davis, N. C., on the American mainland. They considered (at that time) the practicability of their employment in the defense of Hawaii and Panama. Investigation of the vicinity of Pearl Harbor reveals no locations selected for their use or any preparations for construction moorings. No evidence of training or personnel preparations were seen. It is concluded that their installation would be difficult. Even if they were actually provided they would interfere with operations at nearby Hickam Field, Ewa Field, and Ford Island. The whole matter seems to have been dropped.

2. Am continuing in detail the investigation of the non-use of nets for torpedo defense of battleships and will report further.

[7] Information as to the accuracy of the first paragraph of the above despatch is not readily available to this office and, because that portion of the message is not relevant to the general subject-matter of this report, no further comment thereon is offered.

22. The second paragraph of the message above suggests the following facts which, however, it has been impossible so far to verify: (a) That the local Consulate (and through it, Tokyo) knew that anti-torpedo nets were not being used to protect battleships in Pearl Harbor; and (b) that a prior report on the subject had been made by the Consul General to Tokyo, or that the above despatch was called for by a request from Tokyo (which, however, has not yet been found in the Consulate traffic), or both.

23. That the Japanese Consulate was interested in reporting not only the movements of United States Naval vessels, but also those of American merchantmen and British men o'war, is shown by the two despatches immediately following.

24. At 1718, 3 December, 1941, Consul General KITA despatched the following message to Tokyo, information copy to Japanese Consul, San Francisco:

Urgent report. Military naval transport (name unknown) departed for the mainland on second. Lurline arrived from San Francisco on third.

The part of the message relating to the arrival of the Matson liner Lurline is correct. However, there is no record of any military or naval transport having left either Honolulu harbor or Pearl Harbor on 2 December, 1941.

25. The Japanese Consulate on the evening of 4 December, 1941, placed the following message for transmission to Tokyo:

On the afternoon of the third a British man of war entered Honolulu and departed early on the fourth. About 110 tons; one stack; and had a four-inch gun fore and aft. Immediately after entering port the crew went ashore and were receiving mail at the British consulate.

[8] Reference was made to the PRINCE ROBERT, a converted Canadian merchantman, which arrived at Honolulu harbor on 3 December, at 1240, and departed at 1220 on 4 December. The registered gross tonnage of the PRINCE ROBERT, as a merchantman, was 6,892. Mr. Harry L. DAWSON, Vice Consul for Great Britain, advised that the PRINCE ROBERT has two stacks, but could give no figures as to her offensive armament. There is nothing of record in the Fourteenth Naval District regarding the vessel's armament or number of stacks. That part of the despatch reporting that the PRINCE ROBERT's crew went ashore and received mail at the British Consulate is correct.

26. The quality of reporting done by the Consulate to Tokyo on 3-6 December, 1941, is considered to have been poor, noticeably in the following particulars:

A. Complete inaccuracy of the despatch of 3 December regarding departure of the WYOMING and two seaplane tenders. (See paragraph 4, above.)

B. Erroneous reference to the UTAH as the WYOMING. (Paragraphs 4, 14.)

C. Complete inaccuracy of the message regarding arrival of the HONOLULU. (Paragraph 5.)

D. Failure entirely to report heavy cruisers (Paragraphs 6, 14), and reporting only half the light cruisers (Paragraphs 6, 9.)

E. Reporting that four cruisers of the HONOLULU class were coming in on 5 December, whereas none arrived. (Paragraph 6.)

F. Large percentage of error in reporting number of destroyers. (Paragraphs 6, 10, 11, 14, 17.)

G. Failure to report that the PENNSYLVANIA was in drydock and not at moorings. (Paragraph 14.)

27. Upon the basis of the foregoing, including references (a), (b), and (c), it is concluded that:

A. There definitely were several observers who reported Pearl Harbor ship movements to the Consulate. This is proved by the admissions of KOTOSHIRODO and MIKAMI, in references (b) and (c), respectively, and by other evidence to be discussed more fully in the next report.

B. The observers were relatively untrained, with the possible exception of MORIMURA, who may be a naval officer. (To date, the evidence fails [9] to show which observers made the accurate reports, and which made the erroneous reports.)

C. Observing was done from a considerable distance. This is concluded chiefly from the fact that the demilitarized UTAH was mistaken for the WYOMING (whereas the latest issue of Jane's *Fighting Ships*, readily available in Honolulu, clearly shows the WYOMING to have guns in her turrets and the UTAH not to have them), and from the fact that all battle-ships were reported on 6 December to have been at moorings, whereas the PENNSYLVANIA was in drydock.

D. Confidential data as to Naval operations was not compromised. This is concluded from the fact that, in general, the data transmitted to Tokyo was surprisingly inaccurate.

28. Other than the despatches above reported, none of a seasonable nature have been found which bear directly on fleet movements. Certain messages, reporting (from newspaper sources, in most instances) such facts as the arrival of an American "goodwill squadron" in Australia and New Zealand, Admiral H. E. Kimmel's trip to and return from Washington, and the passage through Honolulu of personnel and supplies destined for the Burma Road have been collected and are appended hereto in enclosure (A).

Pending.

[1] ENCLOSURE (A): *Copies of miscellaneous despatches from Japanese consul general, Honolulu, to Tokyo and to other consuls, concerning military and naval subjects.*

21 MARCH 1941.

(To Tokyo; by code mail to Washington)

According to despatches from Auckland and Sydney the light cruisers Brooklyn and Savannah, the destroyers Case, Shaw, Cummings, Tucker arrived at Auckland on the 17th; and the heavy cruisers Chicago, Portland, and the destroyers Clark, Cassin, Conyngham, Downs, Reid arrived at Sydney—both groups on a friendly visit. The first group departed from Auckland on the 20th and may return to Pearl Harbor. It is reported that the second group will also go to Brisbane. Today's newspapers report that the above fleet sailed under sealed orders and that although they entered Pago Pago on the 9th and departed there on the 11th, that the final destination was not known by "outsiders" until they arrived. The maintenance of secrecy on this trip was a great success, it was reported.

29 APRIL, 1941

(To Tokyo)

The American Army transport Washington with 2,500 troops and 24,300 tons of military supplies departed New York the 11th and arrived here early the morning of the 26th [2] via Panama and San Francisco. After unloading 2,000 troops, 12 student pilots, and military stores, 500 troops were embarked and she departed the 27th. It is believed this ship will be employed in transporting troops and evacuating Americans from the Far East.

14 MAY, 1941

(To Tokyo)

With respect to message No. 10 of January 8th for the purpose of reenforcing the local airforce 21 B-17 bombers, under command of Lieutenant General Emmons departed San Francisco at 1559 the 13th flying in formation and arrived Hickam Field at 0558 the 14th.

932 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

7 JUNE, 1941

(To Tokyo; by code mail to San Francisco, Los Angeles, Seattle)

1. On the fourth received word from Washington that Admiral Kimmel started conversations with the Secretary of the Navy. No extraordinary significance seems to attach to his visit.

2. According to an announcement by Navy Department officials Admiral Kimmel brought plans for sending units [3] of the Fleet back to the mainland for recreation of personnel for short periods. The periods and names of vessels to return were not announced.

13 JUNE 1941

(To Tokyo; by code mail to San Francisco and Manila)

Reference San Francisco MSG #92:

SS President Pierce with about 900 Army men embarked (includes some hundreds of aviation personnel and junior officers) arrived the 11th and sailed the 12th.

26 JUNE 1941

(To Tokyo)

Admiral Kimmel and Captain McMorris returned by Clipper the 25th.

27 JUNE 1941

(To Tokyo)

Chungking—Burma Road—Trucks

28 JUNE 1941

(To Tokyo and Consul, Hongkong)

Daniel Arnstein, Harold Davis, Manco Hellman, transportation [4] managers of prominent eastern U. S. trucking companies will leave on the 28th via clipper for Hong Kong. Their aim will be to inspect the Burma Road from the standpoint of speeding help (to China).

8 JULY, 1941

(To Tokyo and Washington)

A report regarding the Washington report of the Latin Pact of May that American pilots are joining the China air force: The local Chinese Consul General on 10 June enrolled 100 men at his consulate (largely from local air groups). Newspapers reports indicate that the Chinese military attache in Washington (makes arrangements?) furthermore according to English (language) newspapers of the 5th, 200 men have already (Toppa Senn) gone (?). The Chinese Consul General avoids a statement regarding his orders.

15 JULY 1941

(To Tokyo, San Francisco, Washington)

On the evening of the 14th a local broadcasting station broadcast to the effect that at present more than twenty Soviet ships are concentrating on the west coast and [5] loading for Vladivostok with machinery, parts, shoes, high test gasoline, etc., which had previously been released for export to Russia.

26 JULY 1941

(To Washington and Tokyo)

Assistant Secretary of the Navy Forrestal accompanied by Rear Admiral Towers, Chief of the Bureau of Aeronautics, and his aide will leave Alameda in a Navy plane on the 26th and arrive at Pearl Harbor for the purpose of inspect-

ing the U. S. Fleet and naval and military installations. In the same plane, six officials connected with the Treasury Department will arrive for the purpose of handling affairs concerning the freezing of Japanese and Chinese assets here.

2 SEPTEMBER 1941

(To Washington and Tokyo )

On the 2nd an English language paper reported that on the 1st a foreign ship (called a sister ship of the Egyptian ship Zamzam which was recently attacked by German planes, but the name and nationality was not [6] announced) entered port here enroute to the Orient carrying about 50 American aviators and mechanics. Although the group declined to reveal their destination, they are an advance party already assigned to patrol the Burma border and the Burma road, and they have obtained permission to resign from their military duties.

23 SEPTEMBER, 1941

(To Tokyo)

Magruder to Chungking via Manila.

18 NOVEMBER 1941

## FOURTEENTH NAVAL DISTRICT

## DISTRICT INTELLIGENCE OFFICE

Sixth Floor, Young Hotel, Honolulu, Hawaii

WBS/wbs

Memo for: The File.

Subject: JAPANESE CONSULATE GENERAL, Honolulu.

Ref: (a) FBI-Hon. Inv. Rpt., dated 26 Dec. 1941, subject: Japanese Activities Honolulu, T. H.

1. Capt. I. H. Mayfield, USN, former DIO-14ND, was interviewed regarding reference (a) on 17 March 1944, in the presence of Capt. Peyton Harrison, USNR, present DIO-14ND, and the undersigned. Upon reading reference (a) in full, Capt. Mayfield made the following observations, in substance:

(a) Ref. (a), p. 2, 2nd full par.—Statement that the material was not inventoried is correct.

(b) Ref. (a), p. 4, 3rd full par.—I did receive some of the enciphered Consulate traffic from RCA after 1 Dec. 1941 and before 7 Dec. 1941. All was delivered immediately by officer messenger to Comdr. J. J. Rochefort, USN, O-in-C of the combat intelligence "unit" at NYPH. Insofar as Comdr. Rochefort provided me with "clear" versions of portions of that traffic, I furnished FBI-Honolulu with copies thereof.

(c) Ref. (a), p. 6, 1st full indented par.—Meeting of Mr. Shivers, Lt. Col. Bicknell, and myself took place in the DIO office about 1100, 11 Dec. 1941, after the Commandant directed me to get in touch with Mr. Shivers and work on the matter immediately.

(d) Ref. (a), p. 7, top line—To my knowledge, it was never established that anyone ever used the signaling system to communicate with the enemy.

(e) Ref. (a), last page, 2nd and 3rd lines from top—The action taken by me was to notify the appropriate District and Fleet staff officers with whom I had been maintaining liaison on such matters—Comdr. Rochefort, and Lt. Comdr. E. T. Layton, USN, Fleet Intelligence Officer.

W. B. Stephenson,  
W. B. STEPHENSON,  
Lieutenant, USNR.

23 January, 1942.

Copies of the within messages given to FBI and MID today by Lt. Kimball.

## [1] HAWAIIAN DEPARTMENT AND FOURTEENTH NAVAL DISTRICT

1939

28 March 1941

ANNEX NO. VII SECTION VI JOINT AGREEMENTS. JOINT SECURITY MEASURES,  
PROTECTION OF FLEET AND PEARL HARBOR BASE.

## I. GENERAL

1. In order to coordinate joint defensive measures for the security of the fleet and for the Pearl Harbor Naval Base for defense against hostile raids or air attacks delivered prior to a declaration of war and before a general mobilization for war, the following agreements, supplementary to the provisions of the HCF-39, (14ND-JCD-13) are adopted. These agreements are to take effect at once and will remain effective until notice in writing by either party of their renouncement in whole or in part. Frequent revision of these agreements to incorporate lessons determined from joint exercises will probably be both desirable and necessary.

## II. JOINT AIR OPERATIONS

2. When the Commanding General of the Hawaiian Department and the Naval Base Defense Officer, (the Commandant of the 14th Naval District), agree that the threat of a hostile raid or attack is sufficiently imminent to warrant such action, each commander will take such preliminary steps as are necessary to make available without delay to the other commander such proportion of the air forces at his disposal as the circumstances warrant in order that joint operations may be conducted in accordance with the following plans.

a. Joint air attacks upon hostile surface vessels will be executed under the tactical command of the Navy. The Department Commander will determine the Army bombardment strength to participate in each mission. With due consideration to the tactical situation existing, the number of bombardment airplanes released to Navy control will be the maximum practicable. This force will remain available to the Navy, for repeated attacks, if required, until completion of the mission, when it will revert to Army control.

[2] b. Defensive air operations over and in the immediate vicinity of Oahu will be executed under the tactical command of the Army. The Naval Base Defense Officer will determine the Navy fighter strength to participate in these missions. With due consideration to the tactical situation existing, the number of fighter aircraft released to Army control will be the maximum practicable. This force will remain available to the Army for repeated patrols or combat or for maintenance of the required alert status until, due to a change in the tactical situation; it is withdrawn by the Naval Base Defense Officer (Commandant 14th Naval District), and reverts to Navy control.

c. When naval forces are insufficient for long distance patrol and search operations, and Army aircraft are made available, these aircraft will be under the tactical control of the naval commander directing the search operations.

d. In the special instance in which Army pursuit protection is requested for the protection ~~xxxxxxxxxxxx~~ of friendly surface ships, the force assigned for this mission will pass to the tactical control of the Navy until completion of the mission.

## III. JOINT COMMUNICATIONS

3. To facilitate the prompt interchange of information relating to friendly and hostile aircraft, and to provide for the transmission of orders when units of one service are placed under the tactical control of the other service, Army and Navy communications personnel will provide for the installation and operation, within the limitations of equipment on hand or which may be procured, of the following means of joint communication.

a. Joint Air-Antiaircraft page printer teletype circuit with the following stations:

## ARMY

Hawaiian Air Force  
18th Bombardment Wing  
14th Pursuit Wing  
Hq. Prov. AA Brigade

## NAVY

Naval Air Station, Pearl Harbor  
Naval Air Station, Kaneohe  
Ewa Landing Field  
Waialeale Radio Station

**b. Joint radio circuit on 219 kilocycles with the following stations:**

**ARMY**

**NAVY**

|                                     |                                 |
|-------------------------------------|---------------------------------|
| *Headquarters, Hawaiian Department. | Wailupe Radio Station           |
| Headquarters, HSCA Brigade          | Senior Officer Present Afloat   |
| Hq. Prov. AA Brigade                | Naval Air Station, Pearl Harbor |
| Hq. Hawaiian Air Force              | Naval Air Station, Kaneohe      |
| 18th Bombardment Wing               | Marine Air Group, Ewa           |
| 14th Pursuit Wing                   |                                 |

**[3] c. Direct local battery telephone lines as follows:**

**ARMY**

**NAVY**

|                                 |                     |
|---------------------------------|---------------------|
| Hq. Haw. Dept. (G-3 Office)     | 14th Naval District |
| CP, H. S. C. A. B.              | 14th Naval District |
| CP, Pearl Harbor Gpmt (Ft. Kam) | 14th Naval District |

**d. Radio frequencies to be employed during joint air operations both during combat and joint exercises, for communication between airplanes in flight will be as agreed upon by the Commanding General, Hawaiian Air Force, and the Commander, Base Defense Air Force.**

**4. To facilitate the prompt interchange of information relating to the movements of friendly and hostile naval ships and of commercial shipping, Army and Navy communications personnel will provide for the installation and operation, within the limitations of equipment on hand, or which may be procured, of the following means of joint communication:**

**a. Joint page printer teletype circuit connecting the Harbor Control Post with the Hawaiian Separate Coast Artillery Brigade loop.**

**b. Joint radio circuit on 2550 kilocycles with the following stations:**

**ARMY**

**NAVY**

|                                                            |                  |
|------------------------------------------------------------|------------------|
| CP, PH Gpmt, Ft. Kamehameha                                | Wailupe          |
| CP, Hon. Gpmt, Ft. Ruger                                   | Destroyer Patrol |
| Additional stations that may be determined to be necessary | Mine Sweepers    |

**c. Telephone circuits as provided in par. 3 c. above.**

**5. Pending the establishment of the Aircraft Warning Service, the Army will operate an Antiaircraft Intelligence Service which, using wire and radio broadcasts, will disseminate information pertaining to the movements of friendly and hostile aircraft. It should be understood that the limitations of the AAAIS are such that the interval between receipt of a warning and the air attack will in most cases be very short. Radio broadcasts from the AAAIS will be transmitted on 900 kilocycles. All information of the presence or movements of hostile aircraft off-shore from Oahu which is secured through Navy channels will be transmitted promptly to the Command Post of the Provisional Antiaircraft Brigade.**

**6. Upon establishment of the Aircraft Warning Service, provision will be made for transmission of information on the location of distant hostile and friendly aircraft. Special wire or radio circuits will be made available for the use of Navy liaison officers, so that they may make their own evaluation of [4].**

**7. The several joint communications systems listed in paragraphs 3 and 4 above, the Antiaircraft Intelligence Service, and the Aircraft Warning Service (after establishment) will be manned and operated during combat, alert periods, joint exercises which involve these communications systems, and at such periods as may be agreed upon by the Commanding General Hawaiian Department and the Naval Base Defense Officer. The temporary loan of surplus communication equipment by one service to the other service to fill shortages in joint communication nets is encouraged where practicable. Prompt steps will be taken by the service receiving the borrowed equipment to obtain replacements for the borrowed articles through their own supply channels.**

\*Net Control Station.

## IV. JOINT ANTI-AIRCRAFT MEASURES

8. *Arrival and departure procedure, aircraft.*—During joint exercises, alert periods, and combat, and at such other times as the Commanding General Hawaiian Department and the Naval Base Defense Officer (Commandant, Fourteenth Naval District) may agree upon, all Army and Navy aircraft approaching Oahu or leaving airfields or air bases thereon will conform to the Arrival and Departure Procedure prescribed in Inslosure A. This procedure will not be modified except when a departure therefrom is essential due to combat (real or simulated during exercises) or due to an emergency.

9. *Balloon barrages.*—Reports from abroad indicate the successful development and use of balloon barrages by European belligerents both British and German. Although detailed information is not available, the possibilities of balloon barrages in the Oahu area are recognized. Further investigation and study is necessary both locally and by the War and Navy Departments in order to determine the practicability of this phase of local defense.

10. *Marine Corps anti-aircraft artillery.*—When made available by the Naval Base Defense Officer, (Commandant, 14th Naval District), Marine Corps units manning anti-aircraft artillery present on Oahu will be placed under the tactical control of the Commanding General, Hawaiian Separate Coast Artillery Brigade.

11. *Aircraft Warning Service.*—The Army will expedite the installation and placing in operation of an Aircraft Warning Service. During the period prior to the completion of the AWS installation, the Navy, through use of RADAR and other appropriate means, will endeavor to give such warning of hostile attacks as may be practicable.

[5]

## V. MUNITIONS, JOINT USE OF

12. Army and Navy Officers charged with the storage and issue of ammunition and bombs will exchange information concerning the types, quantities, and locations of these munitions which are suitable for use by the other service. Studies will be instituted and plans prepared for the prompt transfer of ammunition from one service to the other. No such transfer of munitions will be made without specific authority granted by the commander concerned for each transfer.

## VI. SMOKE SCREENS

13. Smoke screens will not be employed for screening the Pearl Harbor-Hickam Field area from air attacks.

## VII. HARBOR CONTROL POST

14. A joint harbor control post, as described in Inclosure B, will be established without delay. This system will be actively manned during joint exercises, alert periods, and combat and for such other periods as may be agreed upon by the Commanding General Hawaiian Department and the Naval Base Defense Officer (Commandant, 14th Naval District).

Approved: 2 April 1941.

(Signed) C. C. Bloch  
C. C. BLOCH,  
Rear Admiral, U. S. Navy,  
Commandant,  
Fourteenth Naval District.

(Signed) Walter C. Short  
WALTER C. SHORT,

ANNEX BAKER TO COMMANDER NAVAL BASE DEFENSE FORCE OPERATION PLAN NO. 1-41  
DATED FEBRUARY 27, 1941

*Naval Base Defense Air Force Operation Plan No. A-1-41.—Task Organization*

(a) *Search and Attack Group* (Commander Naval Base Defense Air Force (Commander Patrol Wing TWO)). The following units in accordance with current conditions of readiness:

- Patrol Squadrons.
- Shore-based VO—VS units.
- Shore-based carrier VB and VT squadrons.
- Shore-based carrier VS planes not assigned to the air combat group.
- Shore-based Marine VS and VB squadrons.
- Army bombardment squadrons.
- Army reconnaissance squadrons.
- Navy Utility squadrons.

(b) *Air Combat Group* (Senior VF Squadron Commander. The following units in accordance with current conditions of readiness:

- Shore-based carrier VF squadrons.
- Shore-based Marine VF squadrons.
- One division of shore-based carrier type VS planes.

1. *Information:* This plan is made in accordance with: The Joint Air Operations agreement approved and promulgated on 21 March 1941; Joint Estimate covering joint Army and Navy air action, addendum I to this plan; and Pacific fleet confidential letter No. 2CL-41 dated 15 February 1941. An air combat group under the direction of the Commander Hawaiian Air Force will: Intercept and destroy hostile aircraft; Identify and report type of attacking aircraft; Trail attacking carrier type planes to carrier and report location to commander search and attack group; and as a secondary mission support search and attack group upon request.

[2] *Assumptions:* As in Addendum I of this plan. Antiaircraft gun control in the PEARL HARBOR area will be coordinated with operations under this plan. Air traffic lanes and recognition signals will be prescribed as found necessary.

2. This force will locate and destroy hostile forces raiding against OAHU or Fleet Units in the Operating Areas.

3. (a) *Search and Attack Group.* (a) Locate, report, and track all hostile surface units in position to take or threaten hostile action. Destroy hostile ships by air attack. Priority of targets: (1) carriers (2) large supporting ships. If choice of location is presented priority should be given to: (1) carrier involved in attack (2) vessels beyond reach of our surface vessel interception.

(b) *Air Combat Group.* (b) Operate as directed by the Commanding General Hawaiian Air Force.

(x) This plan is effective upon receipt. It is operative without signal in the event of a surprise attack on OAHU. It might be made operative by despatch. In the meanwhile condition of readiness prescribed in Addendum II will be taken as directed by the Commanding General Hawaiian Department for Army units and by the Naval Base Defense Officer (Commandant Fourteenth Naval District) for Navy units. This plan supersedes and replaces Annex Baker of Naval Base Defense Force Operation Plan No. 1-41 of 27 February 1941. Units assigned to task groups of this plan shall make readiness reports in accordance with Addendum II of this plan.

4. The senior carrier commander based ashore at Fleet Air Detachment, PEARL HARBOR, shall at all times see that one division of VS planes is detailed to the Air Combat Group. When all carrier planes are to embark the Group Commander shall so inform the Commander Second Marine Aircraft Group who will make the detail required by this paragraph.

5. Communications in accordance with Annex Easy to Naval [3] Base Defense Force Operation Plan No. 1-40 of 27 February 1941. Use zone plus

ten and one half time. Operation orders for the search and attack group will be separately distributed.

Addendum I—Joint Estimate.

Addendum II—Aircraft Readiness.

P. N. L. BELLINGER,  
Rear Admiral, U. S. Navy,  
Commander Naval Base Defense Air Force,  
(Commander Patrol Wing TWO).

COMMANDER PATROL WING TWO,  
Naval Air Station, Pearl Harbor, T. H.  
HAWAIIAN AIR FORCE,  
Fort Shafter, T. H.

*Addendum I to naval base defense Air Force operation plan No. A-1-41*

Joint estimate covering Joint Army and Navy air action in the event of sudden hostile action against OAHU or Fleet Units in the Hawaiian area.

*I. Summary of the Situation.*

(a) Relations between the United States and Orange are strained, uncertain, and varying.

(b) In the past Orange has never preceded hostile actions by a declaration of war.

(c) A successful, sudden raid, against our ships and Naval installations on OAHU might prevent effective offensive action by our forces in the Western Pacific for a long period.

(d) A strong part of our fleet is now constantly at sea in the operating areas organized to take prompt offensive action against any surface or submarine force which initiates hostile action.

(e) It appears possible that Orange submarines and/or an Orange fast raiding force might arrive in Hawaiian waters with no prior warning from our intelligence service.

*II. Survey of Opposing Strengths.*

(a) Orange might send into this area one or more submarines and/or one or more fast raiding forces composed of carriers supported by fast cruisers. For such action she is known to have eight carriers, seven of which are reported to be capable of 25 knots or over and four of which are rated at 30 knots or better. Two of the carriers are converted capital ships, armored and armed with 10-8" guns each and reported to have heavy AA batteries. Two others are small (7000 treaty tons) and limited to 25 knots. Exact information on numbers and characteristics of the aircraft carried by these ships is not available. However the best estimate at present available is that the small carriers can accommodate from 20 to 30 planes and the large ones [2] about 60. Probably the best assumption is that carrier complements are normally about equally divided between fighter and bomber types. Lacking any information as to range and armament of planes we must assume that they are at least the equal of our similar types. There probably exist at least 12 eight inch guns and least 12 six inch gun fast modern cruisers which would be suitable supports. Jane's Fighting Ships (1939) shows over forty submarines which are easily capable of projection into this area. An Orange surface raiding force would be far removed from their base and would almost surely be inferior in gun power to our surface forces operating at sea in the Hawaiian area.

(b) The most difficult situation for us to meet would be when several of the above elements were present and closely coordinated their actions. The shore-based air force available to us is a constantly varying quantity which is being periodically augmented by reinforcements from the mainland and which also varies as fleet units are shifted. Under existing conditions about one-half of the planes present can be maintained in a condition of material readiness for flight. The aircraft at present available in Hawaii are inadequate to maintain, for any extended period, from bases on OAHU, a patrol extensive enough to insure that an air attack from an Orange carrier cannot arrive over OAHU as a com-

plete surprise. The projected outlying bases are not yet in condition to support sustained operations. Patrol planes are of particular value for long range scouting at sea and are the type now available in this area best suited for this work. If present plans are used to bomb well defended ship objectives, the number available for future use will probably be seriously depleted. In view of the continuing need for long range overseas scouting in this area the missions of those planes for operations as contemplated in this estimate should be scouting. Certain aircraft of the Utility Wing, although not designed for combatant work, can be used to advantage in augmenting the scouting of patrol planes. Other types of aircraft, in [3] general, can perform functions that accord with their type.

### III. Possible Enemy Action.

(a) A declaration of war might be preceded by:

1. A surprise submarine attack on ships in the operating area.

2. A surprise attack on OAHU including ships and installations in Pearl Harbor.

3. A combination of these two.

(b) It appears that the most likely and dangerous form of attack on OAHU would be an air attack. It is believed that at present such an attack would most likely be launched from one or more carriers which would probably approach inside of three hundred miles.

(c) A single attack might or might not indicate the presence of more submarines or more planes awaiting to attack after defending aircraft have been drawn away by the original thrust.

(d) A single submarine attack might indicate the presence of a considerable undiscovered surface force probably composed of fast ships accompanied by a carrier.

(e) In a dawn air attack there is a high probability that it could be delivered as a complete surprise in spite of any patrols we might be using and that it might find us in a condition of readiness under which pursuit would be slow to start, also it might be successful as a diversion to draw attention away from a second attacking force. The major disadvantage would be that we could have all day to find and attack the carrier. A dusk attack would have the advantage that the carrier could use the night for escape and might not be located the next day near enough for us to make a successful air attack. The disadvantage would be that it would spend the day of the attack approaching the islands and might be observed. Under the existing conditions this might not be a serious disadvantage for until an overt act has been committed we probably will take no offensive action and the only thing that would be lost would be complete surprise. Midday attacks have all the disadvantages and none of the advantages of the above. After hostilities have commenced, a night attack would offer certain advantages but as an initial crippling blow a dawn or dusk attack would probably be no more hazardous and would have a better chance for accomplishing a large success. Submarine attacks could be coordinated with any air attack.

### IV. Action open to us:

(a) Run daily patrols as far as possible to seaward through 360 degrees to reduce the probabilities of surface or air surprise. This would be desirable but can only be effectively maintained with present personnel and material for a very short period and as a practicable measure cannot, therefore, be undertaken unless other intelligence indicates that a surface raid is probable within rather narrow time limits.

(b) In the event of any form of surprise attack either on ships in the operating areas or on the islands:

1. Immediate search of all sea areas within reach to determine the location of hostile surface craft and whether or not more than one group is present.

2. Immediate arming and preparation of the maximum possible bombing force and its despatch for attack when information is available.

(c) In the event of an air attack on OAHU, in addition to (b) above:

1. The immediate despatch of all aircraft suitable for aerial combat to intercept the attackers.

2. The prompt identification of the attackers as either carrier or long range shore based aircraft.

3. The prompt dispatch of fast aircraft to follow carrier type raiders back to their carrier.

[5] IV. (d) In the event of a submarine attack on ships in the operating area in addition to (b) above:

1. Hold pursuit and fighter aircraft in condition of immediate readiness to counter a possible air raid until search proves that none is imminent.

2. Despatch armed shore based fleet aircraft to relieve planes in the air over the attack area.

3. Establish a station patrol by patrol planes two hundred twenty mile radius from scene of attack at one hour before daylight of next succeeding daylight period.

(e) None of the above actions can be initiated by our forces until an attack is known to be imminent or has occurred. On the other hand, when an attack develops time will probably be vital and our actions must start with a minimum of delay. It therefore appears that task forces should be organized now, missions assigned, conditions of readiness defined and detailed plans prepared so that coordinated immediate action can be taken promptly by all elements when one of the visualized emergencies arises. To provide most effectively for the necessary immediate action, the following joint task units will be required:

1. Search Unit.
2. Attack Unit.
3. Air Combat Unit.

Carrier scouts, army reconnaissance and patrol planes can be employed with very widely varying effectiveness, either for search or attack. Under varying conditions some shifts of units between the search and attack groups may be desirable. Also, the accomplishment of these two tasks must be closely coordinated and therefore these two groups should be controlled by the same task group commander.

#### V. Decisions:

1. This force will locate and attack forces initiating hostile actions against OAHU or fleet units in order to prevent or minimize damage to our forces from a surprise attack and to obtain information upon which to base coordinated retaliatory measures.

2. [6] *Subsidiary decisions.* In order to be in all respects prepared to promptly execute the above decision:

(a) Establish a task organization as follows by the issue of a joint air operation plan:

1. *Search and Attack Group (Commander Naval Base Defense Air Force (Commander Patrol Wing TWO)).* The following units in accordance with current conditions of readiness:

- Patrol squadrons.
- Shore-based VO-VS units.
- Shore-based carrier VB and VT squadrons.
- Shore-based carrier VS planes not assigned to the air combat group.
- Shore-based Marine VS and VB squadrons.
- Army bombardment squadrons.
- Army reconnaissance squadrons.
- Navy Utility squadrons.

2. *Air Combat Group (Commander Hawaiian Air Force).* The following units in accordance with current conditions of readiness:

- Army pursuit squadrons.
- Shore-based carrier VF squadrons.
- Shore-based Marine VF squadrons.
- One division of shore-based carrier VS planes. (Primarily for trailing aircraft)

(b) Assign missions to the above groups as follows:

1. *Search and Attack Group.* Locate, report and track all hostile surface units in position to take or threaten hostile action. Destroy hostile ships by air attack. Priority of targets: (1) carriers (2) large supporting ships. If choice of location is presented priority should be given to: (1) carrier involved in attack (2) vessels beyond reach of out surface vessel interception.

2. *Air Combat Group.* Intercept and destroy hostile aircraft. Identify and report type of attacking aircraft. Trail [7] attacking carrier type planes to carrier and report location to commander search and attack group. As a secondary mission support search and attack group upon request.

(c) Provide a means for quickly starting all required action under this plan when:

- (a) An air attack occurs on OAHU.

(b) Information is received from any source that indicates an attack is probable.

(c) Information is received that an attack has been made on fleet units.

(d) Define conditions of readiness for use with this plan as follows: Conditions of readiness shall be prescribed by a combination of a letter and number from the tables below. The letter indicating the part of a unit in a condition of material readiness for its assigned task and the number indicating the degree of readiness prescribed for that part.

*Material readiness*

A. All assigned operating aircraft available and ready for a task.

B. One-half of all aircraft of each functional type available and ready for a task.

C. Approximately one-quarter of all aircraft of each functional type available and ready for a task.

D. Approximately one-eighth of all aircraft of each functional type available and ready for a task.

E. All aircraft conducting routine operations, none ready for the purposes of this plan.

*Degree of readiness*

1. For pursuit and VF types—four minutes.

Types other than fighters—fifteen minutes.

2. All types—30 minutes.

3. All types—One hour.

4. All types—two hours.

5. All types—four hours.

The armament and fuel load for each type under the [8] above conditions of readiness are dependent upon the tasks assigned in contributory planes and orders and will be prescribed therein.

(e) Establish a procedure whereby the conditions of readiness to be maintained by each unit is at all times prescribed by the Senior Officers Present of the Army and Navy as a result of all information currently available to them. In using the above conditions it should be noted that: CONDITION A-1 requires a preparation period of reduced operations and can be maintained for only a short time as it is an all hands condition. CONDITIONS B-1 and B-2 require watch and watch for all personnel and personnel fitness for air action will decrease rapidly if they are maintained too long. Any Condition 1, 2, or 3 will curtail essential expansion training work. CONDITIONS C, or D, 4 or 5 can be maintained without unduly curtailing normal training work.

(f) In order to perfect fundamental communications by use and to insure that prospective Task Group Commanders at all times know the forces immediately available to them for use, under the plan above, in case of a sudden emergency, provide, for daily dispatch readiness reports as of the end of normal daily flying from all units to their prospective task force commander. These reports to state:

(a) Number of planes in the unit by functional types such as bomber, fighter, etc.

(b) Number of each type in commission for flight and their degree of readiness as defined above.

(g) After the joint air operations plan under subsidiary decision (a) above has been issued, the task group commanders designated therein will prepare detailed contributory plans for their groups to cover the various probable situations requiring quick action in order that the desired immediate action in an emergency can be initiated with no further written orders. To assist in this work the following temporary details will be made:

[9] (a) By commander Naval Base Defense Air Force (Commander Patrol Wing TWO): an officer experienced in VF and VS operations and planning to assist the Commander of Air Combat Group.

(b) By the Commander Hawaiian Air Force: an officer experienced in Army bombardment and reconnaissance operations and planning to assist the Commander of the Search and Attack Group.

P. N. L. BELLINGER, *Rear Admiral, U. S. Navy,*  
*Commander Naval Base Defense Air Force,*  
*(Commanding Patrol Wing TWO)*

BASE DEFENSE AIR FORCE, PATROL WING TWO,  
 FLEET AIR DETACHMENT, NAVAL AIR STATION,  
 Pearl Harbor, T. H., April 9, 1941.

*Addendum II to Naval Base Defense Air Force Operation Plan*  
 No. A-1-41

*Conditions of readiness and readiness reports*

1. Conditions of readiness will be prescribed by a combination of a letter and a number from the tables below. The letter indicating the part of a unit in a condition of material readiness for its assigned task and the number indicating the degree of operational readiness prescribed for that part.

*Material Readiness*

- A. All assigned operating aircraft available and ready for a task.
- B. One-half of all aircraft of each functional type available and ready for a task.
- C. Approximately one-quarter of all aircraft of each functional type available and ready for a task.
- D. Approximately one-eighth of all aircraft of each functional type available and ready for a task.
- E. All aircraft conducting routine operations, none ready for the purposes of this plan.

*Degree of operational readiness*

All times listed in this table are the maximums allowed for the first plane of a unit to be in the air armed and proceeding with the assigned task.

- 1. For pursuit and VF types—four minutes. Types other than fighters, fifteen minutes.
- 2. All types—30 minutes.
- 3. All types—one hour.
- 4. All types—two hours.
- 5. All types—four hours.

2. The armament and fuel load for each type under the above conditions of readiness are dependent upon the task assigned in contributory plans and orders and will be prescribed in these.

[2] 3. *Readiness Reports:*

(a) A despatch readiness report, as of 1500 each day shall be made by each unit assigned to a task group by this plan as follows:

(1) Units of "Search and Attack Group" to the Commander Naval Base Defense Air Force (Commanding Patrol Wing TWO).

(2) Units of the "Air Combat Group" to the Commanding General of the Hawaiian Air Force via Commander Naval Base Defense Air Force.

(b) These reports shall state:

(1) The number of operating planes in the unit by functional types as bomber, fighter, etc.

(2) The number of each type in material readiness for flight and their degree of operational readiness as defined above.

(c) The officer detailing VS planes to the Air Combat Unit (paragraph 4 of N. B. D. A. F. plan No. A-1-41) shall inform the Commander Naval Base Defense Air Force and Commanding General Hawaiian Air Force by despatch of the detail and any changes therein.

HEWITT INQUIRY EXHIBIT No. 50

PATROL WING TWO,  
U. S. NAVAL AIR STATION,  
Pearl Harbor, T. H., 20 December 1941.

PW2/A16-3/0850

*Confidential*

From: The Commander Task Force NINE (Commander Patrol Wing TWO).

To: The Commander in Chief, United States Pacific Fleet.

Subject: Operations on December 7, 1941.

1. On Sunday morning, December 7, 1941, forces under my command were disposed as follows: Patrol Squadron TWENTY-ONE at Midway, Patrol Squadrons ELEVEN, TWELVE, FOURTEEN at Kaneohe, TWENTY-ONE, TWENTY-THREE AND TWENTY-FOUR at Pearl Harbor, all tenders except WRIGHT at Pearl Harbor; WRIGHT enroute to Pearl Harbor from Midway.

2. The condition of readiness in force was Baker 5 (50% of assigned aircraft on 4 hours notice) with machine guns and ammunition in all planes not undergoing maintenance work. In addition to the above, three squadrons (VP-21 at Midway, VP-23 at Pearl, and VP-11 at Kaneohe) were in condition Afirm 5 (100% of assigned aircraft on 4 hours notice). This was augmented by specific duty assignments on December 7 which required six planes from Patrol Squadrons FOURTEEN, TWENTY-FOUR and TWELVE to be ready for flight on 30 minutes notice.

The general orders listed above were modified by circumstances and planes actually ready for flight were as follows:

VP-21 7 planes—in the air conducting search 120° to 170° to 450 miles from Midway.

4 planes—on the surface at Midway armed each with 2 five hundred pound bombs and on 10 minutes notice.

VP-11 12 planes—ready for flight on 4 hours notice.

VP-12 6 planes ready for flight on 30 minutes notice.

5 planes ready for flight on 4 hours notice.

VP-14 3 planes in the air on morning security patrol armed with depth charges.

3 planes ready for flight on 30 minutes notice.

4 planes ready for flight on 4 hours notice.

VP-22 12 planes ready for flight on 4 hours notice.

VP-23 11 planes ready for flight on 4 hours notice.

VP-24 4 planes in the air conducting inter-type tactics with submarines.

1 plane ready for flight on 30 minutes notice.

Total 72 in the air or ready for flight in 4 hours or less.

In this connection it may be stated that the 4 hours notice was primarily set to permit rest and recreation of personnel and was in no wise, a criterion of material readiness. For example, one plane of VP-23, theoretically on 4 hours notice, was actually in the air 45 minutes after the first bomb dropped.

To summarize the foregoing, at the moment the first bomb dropped, aircraft of this command were in the following condition:

14—in the air (7 on a search from Midway).

58—on the surface ready for flight in four hours or less.

9—undergoing repairs.

81—Total.

Illustrative of the efforts made by personnel, one of the nine planes undergoing repairs took off for a search at 1335, local time, loaded with 4 one thousand pound bombs.

3. A narrative of events of the day follows:

Time (LCT)

0700 14-P-1 sank enemy submarine one mile off Pearl Harbor entrance.

0715 Message coded and transmitted to base.

0735 Message decoded and information received by Staff Duty Officer.

0737 Message relayed to Operations Officer.

0740 Relayed by telephone to Staff Duty Officer of Commander in Chief.

0750 Search plan drafted by Operations Officer.

0757 First bomb dropped near VP-22 hangar.

0758 Message ordered broadcasted to all ships present quote "AIR RAID PEARL HARBOR X THIS IS NO DRILL" unquote (An identical message was sent by Cincpac).

0800 Search plan transmitted by radio and telephone (Received by some of the planes in the air at 0805).

From this time on an accurate chronological account is impracticable.

The Commander Patrol Wing TWO arrived at the Operations Office during the first attack and approved the orders that had been issued. Telephonic communication with the various squadrons at Pearl Harbor was established in order to supplement and possibly accelerate the radio transmissions. As was usually the case, it was difficult to communicate with Kaneohe. The page printer had gone out of commission and it was quite difficult to obtain a telephonic connection. Immediately upon termination of the first attack, an endeavor was made to determine the sectors of the search actually being covered. It was determined, with some difficulty that, of all planes at the bases of Kaneohe and Pearl Harbor, only 3 were still in commission. These were dispatched to fill holidays in what appeared to be the most promising sectors for search. In addition, available planes from the Utility Wing were ordered out. The 2 planes still available for duty at Kaneohe were ordered by telephone to cover the sector between 280 and 300 degrees. The one plane still available at Pearl Harbor had some difficulty in being launched due to the wreckage and fires of other planes in the way. About this time the second attack came in. Fire was opened by tenders of this command and from machine guns mounted in planes on the ground or removed from the planes to extemporized mountings with greater arcs of fire. As a result of this second attack, all communications, radio, telephone and page printer were knocked out of commission. Immediate steps to restore communications were taken while the second attack was still underway and communications personnel, who unfortunately have not yet been identified, proceeded to repair the radio antenna during the height of the attack. Before the end of the second attack, radio communications were established by utilizing all the facilities available, including some of that uninjured on the tenders of this command. Shortly thereafter, telephonic communication was reestablished and information was received that the 2 planes at Kaneohe previously reported as ready for service had been destroyed. Accordingly, orders were issued for the 1 plane at Pearl Harbor, which had somehow escaped uninjured during the second attack, to cover the sector from 280 to 300 degrees. The Commander Patrol Wing ONE at Kaneohe felt that the orders to cover the sector 280 to 300, which had been transmitted to him by telephone for the 2 planes on the ground, required his taking action and he accordingly diverted 14-P-1 and 14-P-3 from the sectors that they had been searching. Information of this action was not received by me.

The Fleet Aviation Officer, Captain A. C. Davis, U. S. N., kept in constant touch by telephone and made many valuable suggestions. Various members of my staff maintained communications with Army information centers and requested that attempts be made to track the retiring Japanese planes by RADAR. Unfortunately, the CURTISS RADAR was placed out of commission by the damage sustained by that vessel. During the mid-afternoon, 14-P-2 reported being attacked by enemy planes and was thereafter not heard from for 2 or 3 hours. As it was felt that this plane had been shot down and a hole thus left in what appeared to be the most promising sector of the search, every effort was made, as additional planes from whatever source became available, to plug the gap.

All hands exerted their utmost efforts to get more planes ready for flight and to arm them for offensive action. Three more patrol planes were reported ready at Pearl Harbor and dispatched, each carrying 4 one thousand pound bombs. Thirteen SED planes, loaded with 500 pound bombs, came in from LEXINGTON and were pressed into service. Nine were dispatched to search a sector to the north, while the remaining 4 were ordered to attack 4 Japanese troop ships reported off Barbers Point. This report proved to be unfounded.

The accompanying charts indicate the search as actually conducted. The urgent necessity for conducting daily searches since December 7 and for putting all planes possible back in commission, together with urgency for immediate operations, have precluded an exhaustive analysis of the events of the day. Certain highlights however may be of interest:

All planes in commission had guns on board together with full allowances of service ammunition. During the first attack, fire was opened from the guns as mounted in the planes, and when it was discovered that these were not effective for fire from the ground due to structural interference, many personnel removed these guns from the planes and set them up on benches in vases and opened up an effective fire against the second attack. As nearly as can be determined, a total of 4 Japanese planes were shot down by personnel of patrol plane squadrons by this method.

Two planes of Utility Squadron One conducted an extensive search although these planes being of a noncombatant type were not equipped with machine guns. Despite the lack of defense against attacks by hostile aircraft, the pilots of these planes persisted in their search until the threatened exhaustion of their fuel forced their return to Pearl Harbor. The devotion to duty of these pilots will be made the subject of a special report.

These and numerous other instances of distinguished conduct occurred which Commander Task Force NINE has not yet had time to investigate.

4. Attention is invited to the following dispatches and mailgrams indicating the extensive searches conducted by units of this command during the period 30 November to 7 December 1941, from Wake and Midway:

AIRCRAFT SCOUTING FORCE

FLEET AIR DETACHMENT,  
U. S. NAVAL AIR STATION,  
*Pearl Harbor, T. H., October 23, 1941.*

*Secret*

*First endorsement to Compatwing TWO SECRET*

Letter PW2/A16-3/0026 dated October 22, 1941.

From: The Commander Aircraft, Scouting Force.

To: The Commander-in-Chief, United States Pacific Fleet.

Via: The Commander Scouting Force.

Subject: Types of Combatant Aircraft for a Pacific Campaign.

1. Forwarded, concurring in the recommendations of the Commander Patrol Wing TWO. This concurrence is emphatic with respect to the employment of carriers of present design.

2. The recommendation for change in Naval Policy to permit inclusion within the Naval Aeronautical Organization of Air Striking Groups of high performance landplane bombers and landplane interceptor fighters, for the protection of advanced Fleet Air Bases, meets with the hearty endorsement of the Commander Aircraft, Scouting Force. Landplane bombers and fighters with the characteristics as described are definitely tools that Naval Aviation requires today in its varied missions. Upon enlargement of the scope of Navy Policy, the corresponding procurement and training programs should be prosecuted.

3. The inherent delays in accomplishing the change of policy with its attendant modifications in training and procurement plans, seriously influence the factor of time, which is now not one of our superiorities to be exploited. Accordingly as a stop-gap measure, if not already provided for, the Commander Aircraft, Scouting Force, considers that the westward movement of the Pacific Fleet must be accorded the full support of an Army Air Striking Force in joint effort under the unified command of the Commander-in-Chief, United States Pacific Fleet.

J. S. McCain.

Secret

From: The Commander Patrol Wing TWO.

To: The Commander-in-Chief, UNITED STATES PACIFIC FLEET.

Via: (1) The Commander Aircraft, SCOUTING FORCE.

(2) The Commander Scouting Force.

Subject: Types of Combatant Aircraft for a Pacific Campaign.

1. In examining the types of aircraft that are listed in the scheme of procurement of the 15,000 plane program, it is noted that, except for those planes based on carriers, there are no types that are considered really valuable as combatant units capable of carrying out offensive action against enemy units afloat, or ashore in the face of efficient enemy opposition. The strategical background of the Pacific indicates that in a war in the Pacific there will be many occasions where Fleet aircraft will have to take offensive action against objectives at islands which are strongly defended by anti-aircraft batteries and by shore-based aircraft. The utilization of carrier aircraft for this purpose involves placing the carriers within range of hostile shore-based aircraft. Carriers of present design are very vulnerable to bomb hits and the value and chances of success of their employment against bases defended by shore-based aircraft must be weighed against the chances and consequences of failure. Patrol Planes, which have the requisite range, are relatively slow and vulnerable to fighter and anti-aircraft opposition. It is respectfully submitted that the Fleet is not adequately prepared for a campaign in the Pacific until, in addition to present types of aircraft, it is provided with an air striking force of high-speed long-range landplane bombers, at least equal in performance to the B-17-E. It is my opinion that such bombers should be available in sufficient numbers to permit continuous effective bombing attacks to be made against shore objectives from Wake, and from such other suitable island bases as are available. In addition, for the protection of bases from which this air striking force would operate, there are needed high performance interceptor fighters in adequate numbers to provide for interception, under RADAR direction, of approaching hostile air attacks.

2. If we are provided with a suitable Air Striking Force of long-range shore-based landplane bombers, it is possible that carriers need not approach within range of hostile shore-based aircraft until hostile air bases have been destroyed or, by sustained attacks, have been made untenable. By such means, and it is believed, only by such means, can a rapid successful Pacific campaign be accomplished without *disproportionate losses to our own forces*. It is undoubtedly the intention of ORANGE initially to fight a war of attrition, utilizing shore-based aircraft, shore batteries, mines, and submarines to inflict maximum damage to our surface forces, while his own fleet is maintained intact in the hope of attaining equality or superiority to our fleet. It is my considered opinion that *our present plan of action gives him a fair chance of succeeding in the attainment of this objective*. He will undoubtedly throw his most modern aircraft into the campaign, sending them to the theatre of operations from the homeland via the chain of island airports in existence, in a steady flow of fresh replacements. It is therefore essential that the fields in the immediate theatre of operations be made untenable at the outbreak of war, and also, successively, his most advanced airports as the campaign progresses.

3. The following courses of action are strongly recommended for accomplishment under unexcelled priority as of the most vital importance to national security:

(a) Obtain the immediate initial assignment of an Army Air Corps Air Striking Force to the Commander-in-Chief, United States Pacific Fleet. It is believed that the composition of this force should be approximately as follows:

(1) Three groups, each of sixty (60) long-range high-speed landplane bombers equal or superior to the B-17-E.

(2) Three groups, each of sixty (60) interceptor fighters of the best performance available.

(b) Develop Wake and Midway air fields under highest priority so that each may accommodate not less than one-third of the bombers and fighters simultaneously.

(c) Expedite and expand the RADAR installations at Midway and Wake.

(d) Expedite and expand anti-aircraft defenses at Wake.

(e) As soon as possible, station one group of interceptor fighters at Wake, and one group at Midway. Provide Johnston and Palmyra with smaller detachments of interceptor fighters. Station one group of bombers At Midway. Station two bomber groups and remainder of interceptor fighters in reserve in the Hawaiian Area. This disposition will provide for defense of Wake and Midway, while the bombers at Midway are beyond range of attack from hostile shore-based aircraft, but are in position to proceed immediately to Wake to start offensive operations.

(f) Initiate action to modify Naval Policy to augment the mission of the Navy Aeronautical Organization to provide Air Striking Forces of long-range high-speed landplane bombers to the Fleets, and landplane interceptor fighters for protection of advanced air bases used by Fleet Aircraft.

(g) Initiate action to include in the Navy aircraft procurement program the requisite quantities of long-range high-speed landplane bombers and interceptor fighters.

4. It is hereby certified that the originator considers it to be impracticable to phrase this document in such a manner as will permit a classification *other than SECRET*.

P. N. L. BELLINGER.

HEWITT INQUIRY EXHIBIT No. 52

[1]  
PW2/A16-3/(022)

Je.

PATROL WING TWO,  
January 16, 1941.

*Confidential*

From: The Commander Patrol Wing TWO.

To: The Chief of Naval Operations.

Via: (1) The Commander Scouting Force. (2) The Commander in Chief, U. S. FLEET.

Subject: Patrol Wing TWO—Readiness of.

References: (a) OpNav Conf. serial 095323 to the Commander in Chief, U. S. Fleet—"Protection of Fleet Aircraft".

1. I arrived here on October 30, 1940, with the point of view that the International situation was critical, especially in the Pacific, and I was impressed with the need of being ready today rather than tomorrow for any eventuality that might arise. After taking over command of Patrol Wing TWO and looking over the situation, I was surprised to find that here in the Hawaiian Islands, an important naval advanced outpost, we were operating on a shoestring and the more I looked the thinner the shoestring appeared to be.

2. (a) War readiness of Patrol Plane Squadrons is dependent not only on the planes and equipment that comprise these squadrons, but also on many operating needs and requirements at Air Stations and outlying bases over which the Patrol Wing Commander has no direct control. Needs and requirements for War Readiness include: spare planes, spare engines, hangar and beach equipment, squadron equipment, spare parts, stores, material, bombs, ammunition, base operating facilities, overhaul and repair facilities, qualified personnel to man all base facilities and shops, all in sufficient adequacy to insure continuous operating readiness. These cannot be provided overnight. The isolation of this locality from the source of supply, the distance, and time involved, make careful and comprehensive long distance planning mandatory. I am informed that in the past, the average interval between the normal request and receipt of material has been nine months.

(b) Reference (a) reads, in part, as follows: "In about one year practically all fleet aircraft except Patrol Wing TWO will have armor and fuel protection". As there are no plans to modernize the present patrol planes comprising Patrol Wing TWO, this evidently means that there is no intention to replace the present obsolescent type of patrol planes in Patrol Wing TWO prior to one year and that Patrol Wing TWO will practically be the last Wing to be furnished new planes. This, together with the many existing deficiencies, indicates to me that the Navy Department as a whole does not view the situation in the Pacific with alarm or else is not taking steps in keeping with their view.

3. (a) Presumably, the offices and bureaus concerned are familiar with the situation in the Hawaiian Area over which they have particular cognizance; certainly enough correspondence has already been written concerning patrol plane needs to enable bureaus and offices to take the necessary steps to provide and to anticipate such needs.

[2] (b) If war should break in the Pacific, there is much work cut out for patrol planes and undoubtedly much will be expected of them. Considerably more attention will have to be paid to anticipating their needs and action taken to provide deficiencies by all the bureaus and offices concerned if patrol planes are to perform according to expectations.

4. It is therefor urgently recommended that those concerned with War Plans and those in the Planning and Procurement Divisions of all bureaus and offices view the patrol plane situation in the Hawaiian Area in the light of the International situation in the Pacific; that each bureau and office check and recheck their planning and procurement lists for present requirements and future needs and that immediate steps be taken to furnish the personnel, material, facilities and equipment required and under their cognizance, to meet the present emergency and probable eventualities. The tremendous and all consuming work of those in the Navy Department is fully appreciated and there is no intent to criticize or to shift responsibility. This letter is written merely in an effort to insure that we may not be "too late".

5. The following are some of the deficiencies and requirements referred to above:

(a) For Patrol Wing TWO.

1. Replace present obsolescent type patrol planes with high performance modern types having latest approved armor and armament features and in such numbers as the readiness of base operating facilities will permit.

2. Provide squadron spares and squadron equipment in excess so as to have available a sufficiency to provide for shift of operations to outlying bases.

3. Provide bomb handling equipment of latest design in sufficient amounts as to reduce to minimum the time element involved in rearming both at normal base and outlying bases.

4. Provide ordnance material to fill and maintain full squadron allowances.

5. Provide increased number of aircraft torpedoes when additional storage is available. Twenty-four aircraft torpedoes are now stored at the Submarine Base, Pearl Harbor, T. H.

[3] 6. Expedite completion and assignment of patrol plane tenders. At present the tenders for Patrol Wing TWO consists of the USS WRIGHT and the USS SWAN. The WRIGHT now is not available due to Navy Yard overhaul until March 17, 1941.

(b) For Naval Air Station, Pearl Harbor, T. H.

1. Increase capacity for overhaul and repair of patrol planes, engines, instruments, radio and ordnance material, and provide manufacture and stowage of breathing oxygen, to anticipate operating needs both now and as estimated for the future, through addition of shop space, additional shops, additional personnel, additional equipment, additional supply of spare parts and stock.

2. Increase and improve bomb stowage and ammunition storage through enlargement and preparation of present storage and installation of bomb handling equipment.

3. Construction of squadron's ready ammunition storage.

4. Additional bombs in Hawaiian Area.

5. Additional ferries or other suitable means for transporting bombs from ammunition depot across water surrounding Ford Island to Naval Air Station, Pearl Harbor, T. H.

6. Increase supply facilities through additional stowage, additional supply personnel (Officer and enlisted, additional facilities for handling supplies, assistance in obtaining and increasing the amount of spares and supplies on hand, and simplification of requisitioning spare parts and supplies.

7. Increase machine gun and rifle range facilities in Pearl Harbor Area to provide for more effective ground training for personnel of Patrol squadrons based on Naval Air Station, Pearl Harbor, T. H.

[4] 8. Provide for torpedo war head stowage at some suitable location readily accessible to the Naval Air Station, Pearl Harbor, T. H.

9. Increase barrack space to provide for increased personnel at Naval Air Station and for personnel of additional patrol squadrons as may be assigned.

(c) For Naval Air Station, Kaneohe.

1. Expedite completion; providing the operating facilities necessary to permit basing and efficiently operating the number of patrol squadrons intended to base thereon, including dredging the patrol plane operating area to the extent recommended, dredging ship channel, housing of the necessary

- personnel, supplying necessary boats and supplying adequate station personnel. Anticipate engine and plane overhaul facilities to meet War Requirements.
- (d) For Keehi Lagoon.
    1. Take necessary steps to expedite the development of Keehi Lagoon for a patrol plane base.
  - (e) For Outlying Bases; Wake, Johnston, Palmyra.
    1. Expedite completion of operating facilities with particular regard to dredging ship channels; dredging landing and take-off areas; providing gasoline and oil reserves and issue facilities; bomb and ammunition supply and stowage; concrete ramps and parking area.
  - (f) For Midway.
    1. Expedite completion and establishment of Midway as an outlying operating base with the assignment of necessary personnel and with facilities and equipment to provide for the basing thereon of two patrol plane squadrons.
  - (g) General.
    1. Stop the normal shifting and rotating between sea and shore and between other activities of personnel, officer and enlisted, in Patrol Wing TWO, Naval Air Station, Pearl Harbor and Naval Air Station, Kaneohe, until all personnel complements have been brought up to the requirements necessary for war-time operations.
    2. Provide two sets additional beaching gear and two boats fitted with gasoline bowser tanks for use at each of the following outlying bases: Wake, Midway, Johnston, Palmyra, Guam and Canton.

After taking over command of Patrol Wing TWO and looking over the situation, I was surprised to find that here in the Hawaiian Islands, an important naval advanced outpost, we were operating on a shoestring and the more I looked the thinner the shoestring appeared to be.

2. (a) War readiness of Patrol Plane Squadrons is dependent not only on the planes and equipment that comprise these squadrons, but also on many operating needs and requirements at Air Stations and outlying bases over which the Patrol Wing Commander has no direct control. Needs and requirements for War Readiness include: spare planes, spare engines, hangar and beach equipment, squadron equipment, spare parts, stores, material, bombs, ammunition, base operating facilities, overhaul and repair facilities, qualified personnel to man all base facilities and shops, all in sufficient adequacy to insure continuous operating readiness. These cannot be provided overnight. The isolation of this locality from the source of supply, the distance, and time involved, make careful and comprehensive long distance planning mandatory. I am informed that in the past, the average interval between the normal request and receipt of material has been nine months.

(b) Reference (a) reads, in part, as follows: "In about one year practically all fleet aircraft except Patrol Wing TWO will have armor and fuel protection". As there are no plans to modernize the present patrol planes comprising Patrol Wing TWO, this evidently means that there is no intention to replace the present obsolescent type of patrol planes in Patrol Wing TWO prior to one year and that Patrol Wing TWO will practically be the last Wing to be furnished new planes.

This, together with the many existing deficiencies, indicates to me that the Navy Department as a whole does not view the situation in the Pacific with alarm or else is not taking steps in keeping with their view.

3. (a) Presumably, the offices and bureaus concerned are familiar with the situation in the Hawaiian Area over which they have particular cognizance; certainly enough correspondence has already been written concerning patrol plane needs to enable bureaus and offices to take the necessary steps to provide and to anticipate such needs.

[2] (b) If war should break in the Pacific, there is much work cut out for patrol planes and undoubtedly much will be expected of them. Considerably more attention will have to be paid to anticipating their needs and action taken to provide deficiencies by all the bureaus and offices concerned if patrol planes are to perform according to expectations.

4. It is therefore urgently recommended that those concerned with War Plans and those in the Planning and Procurement Divisions of all bureaus and offices view the patrol plane situation in the Hawaiian Area in the light of the International situation in the Pacific; that each bureau and office check and recheck their planning and procurement lists for present requirements and future needs and that immediate steps be taken to furnish the personnel, material, facilities and equipment required and under their cognizance, to meet the present emergency and probable eventualities. The tremendous and all consuming work of those in the Navy Department is fully appreciated and there is no intent to criticize or to shift responsibility. This letter is written merely in an effort to insure that we may not be "too late".

5. The following are some of the deficiencies and requirements referred to above:

(a) For Patrol Wing TWO

1. Replace present obsolescent type patrol planes with high performance modern types having latest approved armor and armament features and in such numbers as the readiness of base operating facilities will permit.

2. Provide squadron spares and squadron equipment in excess so as to have available a sufficiency to provide for shift of operations to outlying bases.

3. Provide bomb handling equipment of latest design in sufficient amounts as to reduce to minimum the time element involved in rearming both at normal base and outlying bases.

4. Provide ordnance material to fill and maintain full squadron allowances.

5. Provide increased number of aircraft torpedoes when additional storage is available. Twenty-four aircraft torpedoes are now stored at the Submarine Base, Pearl Harbor, T. H.

[3] 6. Expedite completion and assignment of patrol plane tenders. At present the tenders for Patrol Wing TWO consists of the USS WRIGHT and the USS SWAN. The WRIGHT now is not available due to Navy Yard overhaul until March 17, 1941.

(b) For Naval Air Station, Pearl Harbor, T. H.

1. Increase capacity for overhaul and repair of patrol planes, engines, instruments, radio and ordnance material, and provide manufacture and stowage of breathing oxygen, to anticipate operating needs both now and as estimated for the future, through addition to shop space, additional shops, additional personnel, additional equipment, additional supply of spare parts and stock.

2. Increase and improve bomb stowage and ammunition storage through enlargement and preparation of present storage and installation of bomb handling equipment.

3. Construction of squadron's ready ammunition storage.

4. Additional bombs in Hawaiian Area.

5. Additional ferries or other suitable means for transporting bombs from ammunition depot across water surrounding Ford Island to Naval Air Station, Pearl Harbor, T. H.

6. Increase supply facilities through additional stowage, additional supply personnel (Officer and enlisted), additional facilities for handling supplies, assistance in obtaining and increasing the amount of spares and supplies on hand, and simplification of requisitioning spare parts and supplies.

7. Increase machine gun and rifle range facilities in Pearl Harbor Area to provide for more effective ground training for personnel of Patrol squadrons based on Naval Air Station, Pearl Harbor, T. H.

[4] 8. Provide for torpedo war head stowage at some suitable location readily accessible to the Naval Air Station, Pearl Harbor, T. H.

9. Increase barrack space to provide for increased personnel at Naval Air Station and for personnel of additional patrol squadrons as may be assigned.

(c) For Naval Air Station, Kaneohe.

1. Expedite completion; providing the operating facilities necessary to permit basing and efficiently operating the number of patrol squadrons intended to base thereon, including dredging the patrol plane operating area to the extent recommended, dredging ship channel, housing of the necessary personnel, supplying necessary boats and supplying adequate station personnel. Anticipate engine and plane overhaul facilities to meet War Requirements.

(d) For Keehi Lagoon.

1. Take necessary steps to expedite the development of Keehi Lagoon for a patrol plane base.

(e) For Outlying Bases; Wake, Johnston, Palmyra.

1. Expedite completion of operating facilities with particular regard to dredging ship channels; dredging landing and take-off areas; providing gasoline and oil reserves and issue facilities; bomb and ammunition supply and stowage; concrete ramps and parking area.

(f) For Midway.

1. Expedite completion and establishment of Midway as an outlying operating base with the assignment of necessary personnel and with facilities and equipment to provide for the basing thereon of two patrol plane squadrons.

(g) General.

[5] 1. Stop the normal shifting and rotating between sea and shore and between other activities of personnel, officer and enlisted, in Patrol Wing TWO, Naval Air Station, Pearl Harbor and Naval Air Station, Kaneohe, until all personnel complements have been brought up to the requirements necessary for war-time operations.

2. Provide two sets additional beaching gear and two boats fitted with gasoline bowser tanks for use at each of the following outlying bases: Wake, Midway, Johnston, Palmyra, Guam and Canton.

PATROL WING TWO,  
U. S. NAVAL AIR STATION,  
Pearl Harbor, T. H., December 11, 1940.

*Confidential*

From: The Commander Patrol Wing TWO.  
To: The Chief of Naval Operations.  
Via: (1) The Commander Aircraft, SCOUTING FORCE.  
(2) The Commander SCOUTING FORCE.  
(3) The Commander-in-Chief, U. S. Fleet.

Subject: Readiness for War Deficiencies, Patrol Wing TWO.

1. On November 15, 1940, Commander Patrol Wing TWO ordered a Bomb Loading and Arming Exercise for the five squadrons of this Wing. The Naval Air Station, Pearl Harbor, was made cognizant of this Exercise in advance and a detailed plan prepared to arm the planes with the service bombs and ammunition now stored at the Naval Air Station.

2. Utilizing all of the available facilities and using the Naval Air Station, Pearl Harbor, as a source of supply for the bombs used in this Exercise, the time element was revealed to be excessively high. Below is a summary of the times involved in delivering and arming with forty-eight each of the 1000 and 500 pound type bombs:

| <i>Event</i>                                                                            | <i>Time required</i> |
|-----------------------------------------------------------------------------------------|----------------------|
| First bomb delivered to squadrons.....                                                  | 50 minutes           |
| Last bomb delivered to squadrons.....                                                   | 2 hours              |
| Fuses delivered to squadrons.....                                                       | 1 hour 05 minutes    |
| Tail vanes delivered to squadrons.....                                                  | 1 hour 40 minutes    |
| Time required to arm a twelve plane squadron with four bombs on each plane.....         | 6 to 7 hours         |
| Time required to belt a complete machine gun ammunition allowance in each squadron..... | 4 to 6 hours         |

3. As a result of this exercise, numerous glaring deficiencies were apparent which adversely affect the condition of readiness for War of this Wing. Such corrective action that is within the capabilities of this Wing, to remedy these deficiencies and to decrease the time element involved, has been taken. However, some of these deficiencies are beyond the control of the wing to correct and should be remedied immediately. These items are discussed in details as follows:

(a) The supply of service bombs of the 1000 pound and 500 pound type available in this area is considered entirely inadequate. The current transfer of one hundred 1000 pound, two hundred 500 pound, and two hundred 100 pound bombs to the Asiatic Station from the ammunition depot, Oahu, in connection with the transfer of the Wm. B. PRESTON and Patrol Squadron TWENTY-SIX, leaves available at the Naval Air Station, Pearl Harbor, Lualualei ammunition depot, and on board the U.S.S. WRIGHT a total number of the heavier type bombs sufficient for just 10.2 complete bomb loads for the four squadrons now comprising this Wing. These are distributed as follows and represents all naval bombs within the Hawaiian Area:

|              | NAS PH | Lualualei | Wright | Totals |
|--------------|--------|-----------|--------|--------|
| 1000 lb..... | 48     | 573       | 61     | 682    |
| 500 lb.....  | 48     | 1151      | 81     | 1280   |
| 100 lb.....  | 48     | 2446      | 314    | 2808   |

The above quantities of bombs are not considered sufficient for use in the Pearl Harbor Area alone, and certainly they are woefully inadequate as a source of supply when considering the wide separations of outlying bases from which squadrons now assigned, or scheduled for assignment to this Wing will be required to operate from, and the fact that an adequate supply of bombs should be available at each such base.

(b) The present bomb stowage at the Naval Air Station, Pearl Harbor, is inadequate both as to capacity and handling facilities. At present it is necessary to handle the bombs within the magazine entirely by hand. It is urgently recommended that a suitable bomb stowage be provided on the Naval Air Station, Pearl Harbor, to accommodate enough bombs of each type to provide at least one complete bomb load for the number of the squadrons to be based thereon.

In view of the fact that the Naval Air Station, Pearl Harbor is located on an island (Ford Island) any bombs required by Patrol Wing TWO from the ammunition depot at Lualualei must be transported at some stage of the transportation by water.

Trucks via ferry seems to be far the most practical method of transportation. At present there is only one ferry available for such use. This is not considered sufficient. A total of three ferries is considered desirable in order to make sure that two will be continuously available.

(c) Stowage for ready service machine gun ammunition and pyrotechnics should be provided each squadron such stowage to be constructed in the immediate vicinity of the squadron and with a capacity sufficient to store at least one complete load of belted ammunition for each plane of the squadron and a complete allowance of pyrotechnics.

(d) The Naval Air Station, Pearl Harbor, has insufficient bomb handling equipment, the following being urgently required: (1) Two electric finger lift cranes (2) additional traveling cranes, preferable of gasoline type, to expedite the unloading of bombs from trucks at the point of delivery. Two such traveling cranes for each squadron is considered a minimum. The above has not been requested by the Naval Air Station. The necessary funds and authorization to purchase these items should be given high priority.

(e) There is a marked shortage of MK IIX Bomb Hoists in this Wing. It is recommended that the supply of Bomb Hoists be immediately increased and that the allowance of Hoists be increased to twenty-eight per twelve plane squadron. At least two additional squadron allowances should be provided for each Wing to provide equipment for use when operating from widely separated bases.

(f) The number of Bomb Skids allowed each squadron is considered inadequate. It is recommended that each squadron be supplied with twelve of the MK X Mod. I Bomb Skids. It is also recommended that each Patrol Squadron equipped for carrying torpedoes be supplied with twelve MK XXXI Torpedo Skids.

(g) The present allowance and supply of machine gun ammunition belting machines is inadequate. It is recommended that this allowance be increased to twelve each of the .30 and .50 calibre type for each squadron and each tender.

(h) It is recommended that the hoisting bands be installed on all service 500 pound bombs are now on hand and that in the future all such bombs be designed with a lifting lug as an integral part of the bomb. It is further recommended that the specification for all bomb crates, tail vane crates, and ordnance equipment, specify standard size AN belts and threads.

4. All of the above mentioned items are considered of the utmost importance as regards Patrol Wing TWO readiness for War and it is urgently recommended that their correction be given the highest degree of priority.

5. It is hereby certified that the originator considers it to be impracticable to phrase this document in such a manner as will permit a classification other than SECRET.

First endorsement to

PW-2 Secret ltr. A16-2/

(0003) of 11 Dec., 1940.

From: The Commander Aircraft Scouting Force.

To: The Chief of Naval Operations.

Via: (1) Commander Scouting Force.

(2) Commander in Chief, U. S. Fleet.

Subject: Readiness for War Deficiencies, Patrol Wing TWO.

1. Forwarded.

2. With reference to paragraph 3 (b), present plans call for the expeditious development of the Naval Air Station, Kaneohe, into a primary base for operating and arming patrol planes. Maximum effort should be made to equip that base with every possible facility for large scale arming operations. The supply of ammunition at Ford Island should be limited to one allowance of "ready" ammunition per plane, to be used only when it is impracticable to arm at other bases, or to augment facilities at Kaneohe in an emergency. It should be possible to maintain this comparatively small supply by utilizing only one ferry or in the event of casualty to it, by using small boat or barge transportation. Adequate stowage and handling facilities for the above mentioned ready supply of bombs at Ford Island must be provided.

3. With reference to paragraph 3 (d), it is recommended that all air stations basing patrol planes be adequately equipped to handle ammunition in and at the magazines, to transport it to the operating lines, and to handle it there. When practicable, this equipment should be standardized in order to economize on time

and cost of procurement. The Commanding Officer of the Naval Air Station, San Diego, after extensive study of the problem, has recommended to the Chief of the Bureau of Ordnance for use at that station, special rolling equipment consisting of units made up of three, low, six-ton trailers pulled by a small tractor, to transport ammunition from the magazines to the operating lines. This type of equipment should be highly satisfactory for use at air stations, including Ford Island, where roads are surfaced and hauling distances are not great. For transportation over longer distances such as from the ammunition depot at Lualualei to Kaneohe, heavy, high-powered trucks are recommended. Recommendations from commanding officers of air stations basing patrol planes, as to the type of equipment required to meet special local conditions should be given careful consideration.

4. Referring to paragraph 3 (e), it is requested that the regular allowance of Mk. III bomb hoists be supplied without delay. An increase in allowance to two per plane with adequate spares is also recommended in order to permit simultaneous loading on both wings.

5. Subject to the remarks in the preceding paragraphs of this endorsement, Commander Aircraft, Scouting Force, concurs in the comment and recommendations contained in the basic letter. The inadequacy of facilities at air stations basing patrol planes for the stowage, handling, transport and delivery to squadrons of bombs, torpedoes, machine gun ammunition, fuses and pyrotechnics necessary to equip patrol planes for service operations is a matter of grave concern. The need for remedial action by responsible activities is considered to be of the utmost importance.

6. It is hereby certified that the originator of this endorsement considers it to be impracticable to phrase this document in such a manner as will permit a classification other than SECRET.

A. L. BRISTOL.

Third Endorsement to  
CPW-2 Secret Ltr. A16-3  
(0003) of 11 Dec. 1940.

From: Commander-in-Chief, United States Fleet.  
To: The Chief of Naval Operations.  
Subject: Readiness for War Deficiencies, Patrol Wing TWO.  
Reference:

(a) Cincus Secret 2nd end. to Compatwing TWO Secret ltr. PW2/A5/F41  
(0002) of Oct. 22, 1940.

(b) Cincus Conf. 2nd end. to CPW-2 conf. ltr. PW2/A16-3/(022) of  
1/16/41.

1. Forwarded, requesting that rectification of conditions set forth in the basic correspondence be undertaken as a matter of utmost urgency.

2. Attention is particularly invited to reference (a) in which the Commander-in-Chief stressed the necessity for decided augmentation of the bomb supply in the Hawaiian Area, and to reference (b) in which he strongly recommended increased ready storage for bombs and torpedoes at Naval Air Station Pearl Harbor, together with adequate handling and loading equipment.

3. It is absolutely essential that the aircraft of Patrol Wing TWO and one-shore-based carrier group, operating from Naval Air Station Pearl Harbor, be able to meet the purpose for which they have been built. The arming and re-arming conditions described in the basic letter are wholly unacceptable. There should be utmost effectiveness of aviation in this area as a vital feature of Fleet readiness. This is alarmingly far from the case now. The situation demands immediate and direct action.

4. The comments of Commander Aircraft Scouting Force in the first endorsement are, in general, sound and are recommended for consideration in connection with the general problem of provision for arming and re-arming at various places.

It is definitely recommended, however, that nothing therein be permitted to minimize or delay the needed action at *Naval Air Station Pearl Harbor*, on the recommendations of the basic letter and of the second endorsement by Commander Scouting Force, with which the Commander-in-Chief fully concurs.

5. Prospective developments at Naval Air Station, Kaneohe should be permitted to have no weight toward postponement or reduction of requirements that exist *now* at Naval Air Station Pearl Harbor. As has been pointed out frequently in previous correspondence, no development within reason will be in eventual excess in view of the planned great expansion of naval aviation in this area.

6. Earliest practicable information as to Departmental action is requested.

7. By copy of this endorsement, Commander Patrol Wing TWO and Commander Aircraft Battle Force are directed to take immediate steps to develop the best arming and re-arming procedure for Patrol Wing TWO and one aircraft carrier group at Naval Air Station Pearl Harbor that can be improvised with facilities and conditions as they now exist, and prior to the full corrective action requested herein. The Commandant Fourteenth Naval District is requested to cooperate in this directive.

8. The urgency of delivery of this document is such that it will not reach the addressee in time by the next available officer courier. The originator, therefore, authorizes the transmission of this document by registered mail within the continental limits of the United States.

H. E. KIMMEL.

Subject: Readiness for War Deficiencies, Patrol Wing TWO.

1. On November 15, 1940, Commander Patrol Wing TWO ordered a Bomb Loading and Arming Exercise for the five squadrons of this Wing. The Naval Air Station, Pearl Harbor, was made cognizant of this Exercise in advance and a detailed plan prepared to arm the planes with the service bombs and ammunition now stored at the Naval Air Station.

2. Utilizing all of the available facilities and using the Naval Air Station, Pearl Harbor, as a source of supply for the bombs used in this Exercise, the time element was revealed to be excessively high. Below is a summary of the times involved in delivering and arming with forty-eight each of the 1000 and 500 pound type bombs:

| Event                                                                                      | Time Required     |
|--------------------------------------------------------------------------------------------|-------------------|
| First bomb delivered to squadrons-----                                                     | 50 minutes        |
| Last bomb delivered to squadrons-----                                                      | 2 hours           |
| Fuses delivered to squadrons-----                                                          | 1 hour 05 minutes |
| Tail vanes delivered to squadrons-----                                                     | 1 hour 40 minutes |
| Time required to arm a twelve plane squadron<br>with four bombs on each plane-----         | 6 to 7 hours      |
| Time required to belt a complete machine gun<br>ammunition allowance in each squadron----- | 4 to 6 hours      |

3. As a result of this exercise, numerous glaring deficiencies were apparent which adversely affect the condition of readiness for War of this Wing. Such corrective action that is within the capabilities of this Wing, to remedy these deficiencies and to decrease the time element involved, has been taken. However, some of these deficiencies are beyond the control of the wing to correct and should be remedied immediately. These items are discussed in details as follows:

[2] (a) The supply of service bombs of the 1000 pound and 500 pound type available in this area is considered entirely inadequate. The current transfer of one hundred 1000 pound, two hundred 500 pound, and two hundred 100 pound bombs to the Asiatic Station from the ammunition depot, Oahu, in connection with the transfer of the Wm. B. PRESTON and Patrol Squadron TWTNTY-SIX, leaves available at the Naval Air Station, Pearl Harbor, Lualualei ammunition depot, and on board the U. S. S. WRIGHT a total number of the heavier type bombs sufficient for just 10.2 complete bomb loads for the four squadrons now comprising this Wing. These are distributed as follows and represents all naval bombs within the Hawaiian Area:

|               | NAS PH | Lualualei | Wright | Totals |
|---------------|--------|-----------|--------|--------|
| 1,000 lb..... | 48     | 573       | 61     | 682    |
| 500 lb.....   | 48     | 1,151     | 81     | 1,280  |
| 100 lb.....   | 48     | 2,446     | 314    | 2,808  |

The above quantities of bombs are not considered sufficient for use in the Pearl Harbor Area alone, and certainly they are woefully inadequate as a source of supply when considering the wide separations of outlying bases from which squadrons now assigned, or scheduled for assignment to this Wing will be required to operate from, and the fact that an adequate supply of bombs should be available at each such base.

(b) The present bomb stowage at the Naval Air Station, Pearl Harbor, is inadequate both as to capacity and handling facilities. At present it is necessary to handle the bombs within the magazine entirely by hand. It is urgently recommended that a suitable bomb stowage be provided on the Naval Air Station, Pearl Harbor, to accommodate enough bombs of each type to provide at least one complete bomb load for the number of the squadrons to be based thereon.

In view of the fact that the Naval Air Station, Pearl Harbor is located on an island (Ford Island) any bombs required by Patrol Wing TWO from the ammunition depot at Lualualei must be transported at some stage of the transportation by water.

[3] Trucks via ferry seems to be by far the most practical method of transportation. At present there is only one ferry available for such use. This is not considered sufficient. A total of three ferries is considered desirable in order to make sure that two will be continuously available.

(c) Stowage for ready service machine gun ammunition and pyrotechnics should be provided each squadron such stowage to be constructed in the immediate vicinity of the squadron and with a capacity sufficient to store at least one complete load of belted ammunition for each plane of the squadron and a complete allowance of pyrotechnics.

(d) The Naval Air Station, Pearl Harbor, has insufficient bomb handling equipment, the following being urgently required: (1) Two electric finger lift cranes (2) additional traveling cranes, preferable of gasoline type, to expedite the unloading of bombs from trucks at the point of delivery. Two such traveling cranes for each squadron is considered a minimum. The above has not been requested by the Naval Air Station. The necessary funds and authorization to purchase these items should be given high priority.

(e) There is a marked shortage of MK IIX Bomb Hoists in this Wing. It is recommended that the supply of Bomb Hoists be immediately increased and that the allowance of Hoists be increased to twenty-eight per twelve plane squadron. At least two additional squadron allowances should be provided for each Wing to provide equipment for use when operating from widely separated bases.

(f) The number of Bomb Skids allowed each squadron is considered inadequate. It is recommended that each squadron be supplied with twelve

of the MK X Mod. I Bomb Skids. It is also recommended that each Patrol Squadron equipped for carrying torpedoes be supplied with twelve MK XXXI Torpedo Skids.

(g) The present allowance and supply of machine gun ammunition belting machines is inadequate. It is recommended that this allowance be increased to twelve each of the .30 and .50 calibre type for each squadron and each tender.

(h) It is recommended that the hoisting bands be installed on all service 500 pound bombs are now on hand and that in the future all such bombs be designed with a lifting lug as an integral part of the bomb. It is further recommended that the specification for all bomb crates, tall vane crates, and ordnance equipment, specify standard size AN belts and threads.

4. All of the above mentioned items are considered of the utmost importance as regards Patrol Wing TWO readiness for War and it is urgently recommended that their correction be given the highest degree of priority.

5. It is hereby certified that the originator considers it to be impracticable to phrase this document in such a manner as will permit a classification other than SECRET.

This type of equipment should be highly satisfactory for use at air stations, including Ford Island, where roads are surfaced and hauling distances are not great. For transportation over longer distances such as from the ammunition depot at Lualualei

## 972 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

to Kaneohe, heavy, high-powered trucks are recommended. Recommendations from commanding officers of air stations basing patrol planes, as to the type of equipment required to meet special local conditions should be given careful consideration.

4. Referring to paragraph 3 (e), it is requested that the regular allowance of Mk. III bomb hoists be supplied without delay. An increase in allowance to two per plane with adequate spares is also recommended in order to permit simultaneous loading on both wings.

5. Subject to the remarks in the preceding paragraphs of this endorsement, Commander Aircraft, Scouting Force, concurs in the comment and recommendations contained in the basic letter. The inadequacy of facilities at air stations basing patrol planes for the stowage, handling, transport and delivery to squadrons of bombs, torpedoes, machine gun ammunition, fuses and pyrotechnics necessary to equip patrol planes for service operations is a matter of grave concern. The need for remedial action by responsible activities is considered to be of the utmost importance.

6. It is hereby certified that the originator of this endorsement considers it to be impracticable to phrase this document in such a manner as will permit a classification other than SECRET.

A. L. BRISTOL.

Pearl Harbor, T. H.,  
Feb. 5, 1941.

Third Endorsement to  
CPW-2 Secret Ltr. A16-3  
(0003) of 11 Dec. 1940.

From: Commander-in-Chief, United States Fleet.  
To: The Chief of Naval Operations.  
Subject: Readiness for War Deficiencies, Patrol Wing TWO.  
Reference:

- (a) Cincus Secret 2nd end. to Compatwing TWO Secret ltr. PW2/A5/F41 (0002) of Oct. 22, 1940.
- (b) Cincus Conf. 2nd end. to CPW-2 conf. ltr. PW2/A16-3/(022) of 1/16/41.

1. Forwarded, requesting that rectification of conditions set forth in the basic correspondence be undertaken as a matter of utmost urgency.

2. Attention is particularly invited to reference (a) in which the Commander-in-Chief stressed the necessity for decided augmentation of the bomb supply in the Hawaiian Area, and to reference (b) in which he strongly recommended increased ready storage for bombs and torpedoes at Naval Air Station Pearl Harbor, together with adequate handling and loading equipment.

3. It is absolutely essential that the aircraft of Patrol Wing TWO and one-shore-based carrier group, operating from Naval Air Station Pearl Harbor, be able to meet the purpose for which they have been built. The arming and re-arming conditions described in the basic letter are wholly unacceptable. There should be utmost effectiveness of aviation in this area as a vital feature of Fleet readiness. This is alarmingly far from the case now. The situation demands immediate and direct action.

4. The comments of Commander Aircraft Scouting Force in the first endorsement are, in general, sound and are recommended for consideration in connection with the general problem of provision for arming and re-arming at various places. It is definitely recommended, however, that nothing therein be permitted to minimize or delay the needed action at Naval Air Station Pearl Harbor, on the recommendations of the basic letter and of the second endorsement by Commander Scouting Force, with which the Commander-in-Chief fully concurs.

5. Prospective developments at Naval Air Station, Kaneohe should be permitted to have no weight toward postponement or reduction of requirements that exist now at Naval Air Station Pearl Harbor. As has been pointed out

frequently in previous correspondence, no development within reason will be in eventual excess in view of the planned great expansion of naval aviation in this area.

6. Earliest practicable information as to Departmental action is requested.

7. By copy of this endorsement, Commander Patrol Wing TWO and Commander Aircraft Battle Force are directed to take immediate steps to develop the best arming and re-arming procedure for Patrol Wing TWO and one aircraft carrier group at Naval Air Station Pearl Harbor that can be improvised with facilities and conditions as they now exist, and prior to the full corrective action requested herein. The Commandant Fourteenth Naval District is requested to cooperate in this directive.

8. The urgency of delivery of this document is such that it will not reach the addressee in time by the next available officer courier. The originator, therefore, authorizes the transmission of this document by registered mail within the continental limits of the United States.

H. E. KIMMEL.

(At this point in Exhibit No. 54 there appear two schedules of Patrol Wing Two, U. S. Naval Air Station, Pearl Harbor, being "Aircraft Gunnery Area Assignment Distribution" and "Fleet Air Detachment Night Flying Schedule Distribution." These schedules will be found reproduced as Items Nos. 147 and 148, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

### HEWITT INQUIRY EXHIBIT No. 55

All maps checked in "Blue" pencil are in "PA-K2" transposition system and were taken out, read and translated.

All maps checked in "Red" were thought to be in more complex systems (probably machine) as there were no indicators by which they could be readily identified. No machines held at Honolulu.

Copies of all messages were forwarded to Washington.

(Exhibit No. 55 is a statement of RCA Communications, Inc., Honolulu, T. H. listing certain Japanese cable messages from Honolulu in November and December, 1941. This statement will be found reproduced as Items Nos. 149, 150, 151 and 152, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

### HEWITT INQUIRY EXHIBIT No. 56

(A copy of a coded message, appearing at this point in the Exhibit, from Togo to the Japanese Consul at Honolulu, dated 4 December 1941, will be found reproduced as Item No. 153, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

Dec. 4, 1941.

Togo.

The following has been authorized as the annual year-end bonus for employee  
typist of your office. It is desired that you stay within the allowances. For  
key personnel ten percent is considered the top amount. You may pay a suitable  
amount at your own discretion after deducting indebtedness.

Sahara, \$80. \$93.

Muraoka, \$83.

Jidaidō, \$44.

All above chargeable to government expenses.

#125 "LA" System. 4 Dec. 1941.

From: Jap. Foreign Minister—Togo.

To: Jap. Consul, Honolulu, T. H.

[Rec'd on 5 Dec. '41, trans—before 7th]

(A copy of a coded message, appearing at this point in the Exhibit,  
from the Japanese Consul at San Francisco, to the Consul at Hono-  
lulu, dated 3 December 1941; and a coded message, with translation,  
from the Japanese Consul at Honolulu to the Foreign Minister, Tokyo,  
and the Consul at San Francisco, dated 3 December 1941, will be found  
reproduced as Items Nos. 154 and 155, respectively, EXHIBITS-  
ILLUSTRATIONS, Hewitt Inquiry.)

3 DEC. 1941.

Urgent #321 "LA" System

From: Japanese Consul Muto, San Francisco, Calif.

To: Japanese Consul, Honolulu, T. H.

Sen si tsu no wa ri a te tsu gō a ru nitsuki ta tu ta ma ru jō sen ki bō  
no kan in ka zo ku jū sha sū kaku to be tsu ni shi kyū go kai den kō.

MUTO.

Due to the necessity of arranging accommodations, desire you report by dis-  
patch the number of members of the families of officials, by rank, desiring  
accommodations on the TATSUTA MARU.

(Two coded messages, with translations, dated 3 December 1941,  
from Tokyo to the Japanese Consul at Honolulu, bearing Nos. 852  
and 1240, appear at this point in the Exhibit. They will be found  
reproduced as Items Nos. 156 and 157, respectively, EXHIBITS-  
ILLUSTRATIONS, Hewitt Inquiry.)

Rec'd these on afternoon of 5 Dec. '41 along with a few plain language and  
some misgs in less secret systems.

Read plain and less secret systems and was nothing but junk.

Immediately set to work making tests against all systems on hand, working  
backwards from current system in use.

Nothing coming to light so it was decided to reverse the process of deciphering,  
allowing for the encoding party to have either purposely encrypted the msgs in  
this manner or possibly to have made an error in using the system employed due  
to confusion. This netted results. Ref. Exhibit # 57.

(At this point in the Exhibit the following coded messages appear:

1. No. 2451 from Japanese Consul in Honolulu to Tokyo, dated 3 December 1941.
2. *Ibid*, showing handwritten decipherment, page 1.
3. *Ibid*, showing handwritten decipherment, page 2.
4. No. 2452 from Japanese Consul in Honolulu to Tokyo, dated 3 December 1941.
5. *Ibid*, showing handwritten decipherment, page 3.
6. *Ibid*, showing handwritten decipherment, page 4.

The foregoing material will be found reproduced as Items Nos. 158 through 163, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

(Military secret).

From: Honolulu (Kita).

To: Tokyo.

3 December 1941

(PA-K2)

#245 (In 2 parts, complete)

From Ichiro Fujii to the Chief of #3 Section of Military Staff Headquarters.

1. I wish to change my method of communicating by signals to the following:

I. Arrange the eight signals in three columns as follows:

|                                                         | Meaning                                   | Signal |
|---------------------------------------------------------|-------------------------------------------|--------|
| Battleship divisions including scouts and screen units. | Preparing to sortie.....                  | 1      |
| A number of carriers.....                               | Preparing to sortie.....                  | 2      |
| Battleship divisions.....                               | All departed between 1st and 3rd.....     | 3      |
| Carriers.....                                           | Several departed between 1st and 3rd..... | 4      |
| Carriers.....                                           | All departed between 1st and 3rd.....     | 5      |
| Battleship divisions.....                               | All departed between 4th and 6th.....     | 6      |
| Carriers.....                                           | Several departed between 4th and 6th..... | 7      |
| Carriers.....                                           | All departed between 4th and 6th.....     | 8      |

## 2. Signals.

### I

Lanikai<sup>1</sup> Beach. House will show lights during the night as follows:

|                                       | Signal |
|---------------------------------------|--------|
| One light between 8 and 9 p. m.....   | 1      |
| One light between 9 and 10 p. m.....  | 2      |
| One light between 10 and 11 p. m..... | 3      |
| One light between 11 and 12 p. m..... | 4      |

### II

|                                       |   |
|---------------------------------------|---|
| Two lights between 12 and 1 a. m..... | 5 |
| Two lights between 1 and 2 a. m.....  | 6 |
| Two lights between 2 and 3 a. m.....  | 7 |
| Two lights between 3 and 4 a. m.....  | 8 |

### III

Lanikai<sup>1</sup> Bay, during daylight:

If there is a "star" on the head of the sail of the Star Boat it indicates signals 1, 2, 3, or 4.

If there is a "star" and a Roman numeral III it indicates signal 5, 6, 7, or 8.

<sup>1</sup> Between Waimanalo and Kallua Beaches on east coast of Oahu.

## IV

Lights in the attic window of Kalama House<sup>1</sup> will indicate the following:

| <i>Times</i>   | <i>Signal</i> |
|----------------|---------------|
| 1900-2000----- | 3             |
| 2000-2100----- | 4             |
| 2100-2200----- | 5             |
| 2200-2300----- | 6             |
| 2300-2400----- | 7             |
| 0000-0100----- | 8             |

## V

K. G. M. B.<sup>2</sup> Want Ads.

- A. Chinese rug etc. for sale, apply P. O. box 1476 indicates signal 3 or 6.
- B. CHIC. CO farm etc. apply P. O. box 1476 indicates signal 4 or 7.
- C. Beauty operator wanted etc. apply P. O. box 1476 indicates signal 5 or 8.

3. If the above listed signals and wireless messages cannot be made from Oahu, then on Maui Island, 6 miles to the northward of Kula Sanatorium<sup>4</sup> at a point halfway between Lower Kula Road and Haleakala Road (latitude 20°40' N., longitude 156°19' W., visible from seaward to the southeast and southwest of Maui Island) the following signal bonfire will be made daily until your EXEX signal is received:

| <i>Time</i>    | <i>Signal</i> |
|----------------|---------------|
| From 7-8 ----- | 3 or 6        |
| From 8-9 ----- | 4 or 7        |
| From 9-10----- | 5 or 8        |

(At this point in the Exhibit the following coded radiograms on forms of RCA appear:

1. No. 246 from Kita, Japanese Consul in Honolulu, to Tokyo, dated 3 December 1941, with handwritten notations.
2. Another copy of No. 246 without handwritten notations.
3. *Ibid*, being the message sent the San Francisco Consul.
4. *Ibid*, being the message sent the Washington Embassy.
5. No. 247 from Kita in Honolulu to Tokyo dated 3 December 1941.
6. *Ibid*, being the message sent the San Francisco Consul.

The foregoing material will be found reproduced as Items Nos. 164 through 169, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

From: Honolulu (Kita).

To: Tokyo.

3 December 1941 (PA-K2).

#247

Ship report.

2nd. Military transport (Name unknown) sailed out toward mainland.

3rd. RARIN came into port from San Francisco.

(A copy of the coded radiogram from Kita to Tokyo, No. 248, on form of RCA, dated 3 December 1941, will be found reproduced as Item No. 170, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

02480 3rd [WA I OO MIN GU] Paragraph SU I ZYOO KI BO KAN 2 SE KI SYUTU KOO. SONO TA I.

<sup>1</sup> A beach village on east coast of Oahu, 1 mile northwest of Lanikai.

<sup>2</sup> A radio broadcast station in Honolulu.

<sup>4</sup> At latitude 20-42-45 N., longitude 156-20-20 W.

986 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

From: Honolulu (Kita).  
To: Tokyo.  
3 December 1941 (PA-K2).  
#248

(At this point in the Exhibit there appear copies of the following coded messages:

1. No. 384, Part 1, dated 27 November 1941, from Nomura in Washington to the Japanese Consul in Honolulu.
2. No. 384, Part 2, dated 27 November 1941, from Nomura in Washington to the Japanese Consul in Honolulu.

Parts 1 and 2 of this message will be found reproduced as Items Nos. 188 and 189, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

**#384**

27 November 1941.

From: Ambassador Nomura, Washington, D. C.

To: Japanese Consul, Honolulu.

Detailed regulations re the proclamation mentioned in my #1042 and 1124 to Tokyo were announced by the State Department on the 19th. They are roughly as follows:

1. The procedure for requesting a permit to depart the country must be at least within 30 days of the day of departing. Exceptions to the above are as follows:

(a) Regular embassy personnel: Consular personnel, other officials and families and their servants, and important personages may get an "exit visa" by going to the State Department.

(b) Persons who can show proof that they are a part of the crew of foreign men of war.

(c) No permit will be required of a wife or child under 4 accompanying the spouse & father.

[2] 2. In the following categories, permits will not be issued for any person, whose departure the U. S. considers would be harmful:

(a) Any person possessing secret information regarding national defense plans, preparations, equipment, or organization.

(b) Any person who might directly or indirectly communicate the information concerning the above to a foreign power.

(c) Any persons who have been engaged in obstructing national plans of the U. S. for the benefit of defense of any third power or U. S. KEIBO.

(d) Any person who has been attempting to interfere with or delay the defense plans or military of any nation of the Western Hemisphere working for the defense of the Hemisphere.

(e) Any persons who have been attempting to incite revolution, [3] bring about a war, or who has been attempting to interfere with U. S. defense plans, or plans for the defense of any third power.

3. Inspecting officials may revoke the departure permit of any person who refuses to permit an examination.

4. In regard to permits for entering the country, the Secretary of State may grant such after inquiring of the Army, Navy, Police, and Immigration authorities regarding the person concerned.

5. There is no stipulation which would exempt consular officials if they came under any of the above list of exceptions, and official will when entering or leaving the country be required to produce proof that they are not engaged in any subversive activities.

The full text is being sent air mail.

(Part 1 of 2 Parts)

I have just learned from an official of the state department that a special procedure will be applied to Japanese who desire to depart via the Tatsuta Maru. Departure permits must be acquired within a period of ten days prior to sailing. Those wishing to make that ship would best put in their request for permits.

(A copy of the coded message No. 302, dated 25 November 1941 from Consul General Muto in San Francisco to the Japanese Consul in Honolulu will be found reproduced as Item No. 192, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

25 Nov. 1941.

From: Consul General Muto, San Francisco #302.

To: Japanese Consul, Honolulu.

Upon the expiration of the Anti-Comintern pact on the 24th of November, it has been decided to renew the pact for a period of 5 years. Today the 25th it is planned that the emissaries of Japan, Germany, Italy, Manchukoku, Kō, and Spain will affix their names to a 5 year renewal. Furthermore those who will participate in this agreement have been increased by the seven countries of China, Rumania, Bulgaria, Finland, Denmark, Slovakia, and KURENATIA.

NOMURA

On November 14 the President ordered the enforcement of the law #114 of May 22, 1918, as Amended June 21, 1941 regarding the prohibition and restriction of leaving and entering the country. Main points follow:

1. After this law is put in to effect, when American citizen enter or leave the U. S. (including the Canal Zone, all territories, and territorial waters) a passport issued by the Secretary of State and other interested authorities. This applies to ship's crews.

2. Foreigners when leaving the country must obtain permission from the Sec. State or his designated official, and are limited to harbors designated by the Sec. State, the immigration authorities in Taisho I-nen. However, the Sec. State is to refuse permission when he believes it to be against the interests of the U. S.

3. After this law is put into effect, the same sort of permission is required for foreigners entering the country, and when it is considered to be against the interests of the U. S. permission is not granted.

4. When it is considered necessary to enter or leave the country all documents, goods, etc. must be inspected.

5. Foreign crew members of ships entering U. S. ports from foreign ports in cases of reasonable necessity, provided that they have permits to enter and it is not against the interests of the U. S. may enter the country (in the opinion of immigration officials), are entitled to entry. However, the above does not change Presidential order (84 kel 9gō) of June 5, 1940 concerning offering of documentary proof of crew members?

6. The validity of permits for entering or leaving the country received by foreigners may be terminated at any time the Sec. State or (other officials) consider that entry or departure is against interests of U. S.

7. Provisions of this law except in the case of special provisions shall not be changed or ammended. (Part not clear—looks like additions to damage law.)

## Part II

8. It is necessary for all government officials to cooperate in the enforcement of the Sec. State's authority under this ordinance and all future ordinances, rules and orders. For the purpose of the above aim, if it is requested of the Sec. State he shall offer the services of a competent official.

Former Officials charged with enforcement of (this law Honpō?) are ordered to investigate and punnish violaters and prevent violation of the law of May 22, 1918, and ammendments of June 21, 1941.

9. Presidential order #8766 #6 paragraph first part is abolished.

Although this law has not been publicly proclaimed, according to intelligence reports, the Sec. State in cooperation with the Attorney General under authority delegated by the Presidential ordinance based on the law of May 22, 1918, and Amendments of June 21, 1941 are about to publish the rules for entering and leaving the Country in all official publications. According to the above (information?) foreigners desiring to leave the Country will need permission from the State Dept. and, although applications for leaving are few, it is believed that it will take more than 30 days.

[SECRET]

## MISCELLANEOUS

### SENT AND RECEIVED

(At this point in the Exhibit there appear seventeen coded Japanese messages covering the period 19 November 1941 to 2 December 1941. These messages will be found reproduced as Items Nos. 208 through 224, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

[Received on night of 7 December 1941]

The following are special usages for the "WA" and "WO" (PA) codes:—

#### 1. "WA" Code:—

This usage is primarily for use in encoding messages classified as "strictly secret", is the same as some that have been in use in the past, and is effected by the transposition of letters. There are the following five methods:

(a) Using units of 5 letters: Chose two key words (such as KANDA and KUDAN). Transpose according to these words. From the list chose one of the three letters (C-G-Q) and place this letter in the 2nd and 4th position of your 5-letter indicator. Choose at will a vowel (Y included) to fill in the 1st, 3rd and 5th position and put them together. Examples: ICICI—AGAGA—UQUQU. Since this type of transportation is common in these codes we will not go into detail re the transposition.

(b) Like (a), this method is by using units of 5 letters. Take two words from the key word list (this is SANSEI and SUISEI) and transpose the text in accordance with the numerical arrangement of the letters. Make up the indicator of the letters "Z", "J", and "X" with a vowel chosen at random. That is:—IZIZI—EJEJE—OXOXO.

(c) As above, 5 letters form a unit. Take three key words from the list (such as TOKYO—KYOTO—OSAKA) and transpose groups in accordance with the numerical position of the letters in the separate key words. The indicator is formed by choosing one of the two letters "T" or "D" and adding a vowel at random. Thus:—ATATA—UDUDU.

(d) In this method 7 letters will be considered a unit. One key word is taken from the list (such as OTOHIME) and the letters transposed by means of the numerical position of the letters of the key word. To form the indicator group take one of the following ("B"—"V"—"P") and add a random vowel. Thus; ABABA—IVIVI—OPOPO.

(e) Seven letters will be considered as a unit. Take two key words from the list (such as KUMAGAI—NAOZANE) and transpose accordingly. For an indicator choose one of the two ("M" or "N") and add a vowel of choice. Thus: IMIMI—ENENE.

2. Special usage for the "WO" code: This is supplementary to the usages given in above section. These are like paragraph 1, but are used in telegraphic messages only.

(a) Nine letters will be considered as a unit. Take a key word such as (TAGONOURA) and transpose accordingly. For the indicator take one of the two consonants "L" and "R" and put them in positions 1, 3, and 5. Add vowels of choice in positions 2 and 4. Thus: LOLOI—RURUR.

(b) Choose a key word of 11 letters (such as ODANOBUNAGA) and transpose accordingly. For an indicator put one of the following two consonants (T or D) in 1, 3, and 5 positions, add a vowel of choice, thus: TOTOT—DIDID.

(c) Choose a key word of 13 letters such as HANAYORIDANGO and transpose accordingly. For a key word place either H or F in positions 1, 3, and 5 and add a vowel of choice in positions 2 and 4. Thus: HAHAH—FIFIF.

(d) Choose a key word of 19 letters such as (KINOKUNIYABUNZAEMON) and transpose accordingly. For a key word use (K or G) as above.

(General) Be careful not to use a "WA" indicator on a "WO" message.

3. Method of encoding remainder or supplementary group:—The following method will be in case of both "WA" and "WO" codes.

(a) It is based on 5 letters. On the days listed on the left use the key to its right:—

|         |            |
|---------|------------|
| 1st and | 6th—54321  |
| 2nd and | 7th—43215  |
| 3rd and | 8th—32154  |
| 4th and | 9th—21543  |
| 5th and | 10th—15432 |

(more but too abbreviated)

On the afternoon of the 3rd one British gunboat entered Honolulu harbor. She left port early on the morning of the 4th. She was roughly of the 1,100 ton class. She had but one funnel and carried one 4 inch gun fore and aft.

Furthermore, immediately after the vessel entered port a sailor took some mail to the British Consular Office and received some mail in return.

From: Kita

To: F. M. Tokyo

6 DEC. 41.

Referring to last paragraph of your No. 123

1. The Army ordered several hundred balloons for training at Camp Davis NC on the American mainland. They considered (at that time) the practicability of their employment in the defense of Hawaii and Panama. Investigation of the vicinity of Pearl Harbor reveals no locations selected for their use or any preparations for constructing moorings. No evidence of training or personnel preparations were seen. It is concluded that their installation would be difficult. Even if they were actually provided they would interfere with operations at nearby Hickam Field, Ewa Field and Ford Island. The whole matter seems to have been dropped.

2. Am continuing in detail the investigation of the non-use of nets for torpedo defense of battleships and will report further.

PA-K2

#253 Re the last part of your #123<sup>a</sup>.

1. In the American Continent in October the Army began training barrage  
balloon troops at Camp Davis, North Carolina. Not only have they ordered  
four or five hundred balloons, but it is understood that they are considering the  
use of these balloons in the defense of Hawaii and Panama. In so far as Hawaii  
is concerned, though investigations have been made in the neighborhood of  
Pearl Harbor, they have not set up mooring equipment, nor have they selected  
the troops to man them. Furthermore, there is no indication that any training  
for the maintenance of balloons is being undertaken. At the present time there  
are no signs of barrage balloon equipment. In addition, it is difficult to imagine  
that they have actually any. However, even though they have actually made  
preparations, because they must control the air over the water and land runways  
of the airports in the vicinity of Pearl Harbor, Hickam, Ford and Ewa<sup>b</sup>, there are  
limits to the balloon defense of Pearl Harbor. I imagine that in all probability  
there is considerable opportunity left to take advantage for a surprise attack  
against these places.

2. In my opinion the battleships do not have torpedo nets. The details are  
not known. I will report the results of my investigation.

<sup>a</sup> Not available.

<sup>b</sup> Kana spelling.

From: The Foreign Minister ~~999~~ See A  
To: All Hands

*No date.*

Well known to you all is the fact that the empire is at this instant confronted with the gravest crisis in its history, and the problem of reducing that crisis is exclusively one of diplomacy. Those within and without the government expect big things of the Foreign Office and indeed I have a deep respect for the activities of the members of this department. The fact that I am so frankly giving you my opinion from the envoy to the head of an office is that I wish to encourage you one and all. Even tho we would rather be at home and even tho conditions are bad at this time we are diplomats and if our conduct is such as to disrupt our unity we may not only obstruct the course of diplomatic aims, but may stand in the way of our presenting a solid front; and by so doing place ourselves in a position of having no excuse to give. So at this time especially let us put our best foot forward and present a solid front to the world.

1 December 1941 (J19)

#241 (In 2 parts, complete).

Re your #119\*

Report on ship maneuvers in Pearl Harbor:

1. The place where practice maneuvers are held is about 500 nautical miles southeast of here.

Direction based on;

(1) The direction taken when the ships start out is usually southeast by south and ships disappear beyond the horizon in that direction.

(2) Have never seen the fleet go westward or head for the "KAIUI" straits northwards.

(3) The west sea of the Hawaiian Islands has many reefs and islands and is not suitable as an ocean maneuver practice sea.

(4) Direction of practice will avoid all merchant ship routes and official travel routes.

Distance based on;

(1) Fuel is plentyfull and long distance high speed is possible.

(2) Guns cannot be heard here.

(3) In one week's time, (actually the maneuvers mentioned in my message #231\*\* were for the duration of four full days of 144 hours), a round trip to a distance of 864 nautical miles could be reached (if speed is 12 knots), or 1152 nautical miles (if speed is 16 knots), or 1440 nautical miles (if speed is 20 miles) is possible, however, figuring to 50% of the time being used for maneuver technicalities, a guess that the point at which the maneuvers are held would be a point of about 500 miles from Pearl Harbor.

2. The usual schedule for departure and return of the battleships is: leaving on Tuesday and returning on Friday, or leaving on Friday and returning on Saturday of the following week. All ships stay in port about a period of one week.

To: Foreign Minister, Tokyo.

This office has a request from a Mr. W. R. B. McBain, manager of the Shanghai firm of George-McBain, and his wife Mrs. V. W. K. McBain for a visa to visit Japan. These people spend a good deal of their time in Shanghai, and have been residing here for the past six weeks. They wish to stop over between ships in Japan, and state that they have visited there many times before. They both have on two previous occasions (19 July 1939 and 25 Aug. 1939) obtained visas in Shanghai. They returned to their home country in 1940. Have you any objections to these visas? Answer to that question requested.

13 Nov. 1941.

From: Consul General Muto, San Francisco, #285

To: Japanese Consul, Honolulu (PA)

1. Even tho the Imperial Government has urged strongly that the U. S. reconsider its shipments of aviation gasoline to Vladivostock, it has been of no avail. Recently we called to the attention of the Soviets the fact that one of our ships

was sunk off the Japanese coast by a mine of Soviet manufacture, but the affair is still unsettled. Her main forces are now fighting the Germans and she is trying to follow a policy of procrastination elsewhere. We have since September controlled our military and followed a policy of non-aggravation with the Soviets while there is information to the effect that the Soviet's Far Eastern and Mongolian armies are appearing on her Moscow front. Although she is controlling any activity on the Soviet-Manchukoku border that would give rise to trouble, she also appears to have plans up her sleeve for use in case worse come to worst.

2. Since the establishment of the mutual defense agreement between us and French Indo China we have been progressing with plans to turn the south of French Indo China into a military base. The authorities there have since the middle of September been holding up import and export authorizations and are afraid that we are about to regiment the Annamites through the Greater East Asia policy and pressure is increasing against our rapprochement, and are obstructing many pending measures through a policy of delay. Our policy against this is fast taking form. Ambassador Yosizawa and party had arrived there by the end of October and plans starting several investigations using Hanoi as his headquarters. (Sumita the former official there is assisting).

3. England is hoping for active cooperation from Tailand whom she considers necessary for the defense of Malay, P. Ruma, and Singapore, but Thai appears to be maintaining a strict neutrality as between England and ourselves.

The Dutch East Indies stoutly maintains her stand that we have occupied French Indo China as a base from which to attack them and will not furnish us supplies, and also they have refused to even exchange products ship by ship on the barter system.

The Malay-Singapore areas are hastily strengthening defenses and reports say are nearing completion. On the other hand the Russo-German war will probably draw-out the war between Germany and England and in the end looks like a British victory, while we're stuck in the China incident and as a result of economic pressure from the U. S. will be impoverished, if their plans are realized. So apparent has their Anti-Japan attitude become of late that their attitude toward our ships and our evacuating citizens and our remaining citizens has been greatly stiffened.

From: Consul General Muto (San Francisco)

To: Japanese Consul, Honolulu

*To be handled with greatest secrecy*

1. This latest big campaign of the Germans which started on October 2nd is aimed at the control of European Russia through the occupation of Moscow and later the annihilation of all the remaining field forces of Soviet Russia. This objective has already to a great degree been realized, for the main strength of the Russians has been broken and the occupation of Moscow is merely a matter of time, it would seem.

Along with the defeat of the Russian Army unrest is growing among the people; and with this it would appear that the collapse of the Spanish Government is no longer a matter for worry. (Plans are under way for cutting off British and American supplies for Portugal). It appears that from now on Soviet Russia will hardly be an aggressive competitor.

The order of these events to the conclusion will be to secure the line Leningrad-Moscow-Halikov (?)—Rostov; then to reorganize their mobile units and even tho they are weary occupy the Caucasus.

This tracking down of the Soviet Army should not only deal a heavy blow to the British, but should throw some doubt into the business of bribing the Spanish Government with which is being carried out through the cooperation of the U. S.

Even tho there is the possibility of a quick settlement of the Russo-German conflict, looking at it from a standpoint of the ability of the Russians to resist (as I explained in a previous article), they have already turned down peace through surrender, and the Germans are not likely to take the role of appeasers.

2. England has not been resting since the outbreak of the Russo-German War, but has taken advantage of the respite to concentrate her force, and even tho the Russo-German war has come to the close of one phase already the plans for an invasion of England has been abandoned and it seems that Germany plans to continue her air warfare and blockade and at the same time start operation to occupy certain areas in the Near East and Mediterranean Sea. Even Britain can guess this, and is taking measures to strengthen her positions in the Near East. Because, as before, sea power in the Medit. Sea rests in the hands of the British, she threatens the supply lines of the Axis in North Africa, and it can be guessed that the German Medit. Sea campaign will be aimed at breaking that(?)

After the outbreak of the Russo-German War, sabotage has broken out in the occupied countries of Norway, France, Yugoslavia, Bulgaria, and Czechoslovakia fostered by the Communist party, but the German policy of pressure has reduced this pretty much until we believe it will hardly affect the future course of the war.

The U. S. has progressed toward abandoning her neutrality to the extent of patrolling the waters of certain areas and has issued orders to shoot at German boats within that area. Also she has occupied Iceland and Greenland, and sent troop to certain bases in South America and is approaching a state of participation in the war, and the fact that she is hesitating is due to public opinion at home.

Secy of War Stimson on the 3rd pointed out to Congress that the aliens in Hawaii amount to one tenth of the total population and emphasizing the danger of strikes and sabotage *destructive activity* he demanded that in case of the existence of an emergency or an attack, the President should be granted the right to declare martial law in Hawaii and also Porto Rico. According to information from Washington on the 4th, Delegate King issued a protesting statement to the effect that the above was an insult to the loyalty and patriotism the [local] government and people. The territorial governor also retorted that since the power to declare martial law was already vested in the governor of the territory there was no necessity for such legislation.

In short, the recent army proposal was to permit the President to directly order the local military commander to put martial law into effect.

According to information in the newspaper, Delegate King who is here at present says that as for the plan for a revision of the territorial nationality law, the United States wants to settle the problem of dual citizenship, but a complete settlement without negotiating with the interested countries cannot be expected. Consequently after the Delegate return to Washington, and has conferred with the War Department, it is his intention to introduce into Congress a resolution requesting provisions for the breaking off of nationality from the countries concerned.

The Special Session of the Legislative of Hawaii which opened from September 15th for the purpose of considering legislation for war time action "M-Day Bill", passed the aforesaid bill and the Territorial Governor affixed his signature to it on the 3rd. This bill invests far-reaching authority in the Territorial Governor in case of war, chief provisions of which are: the organization of special police and fire fighting forces and medical squads, etc., anti-air preparations, the utilization of community installations and highways, the regulation of food supplies and commodity prices, the control of rumors, etc. In order to put the above measures into effect a budget of \$500,000 is being appropriated. Details by mail.

released

appraised value

value, price

29 SEPT. 41.

Two of the seven fishing boats reported released according to stipulations were sold on the 26th at prices comparable to their appraised values to the Hawaii Canning Company which has a very close connection with the boats, and court proceedings were dispensed with.

In connection with the above, the former owners, at the beginning, as in my telegram, must pay to the court out of the selling price 20% of the appraised value (\$2,110 for one boat and \$1,017 for the other) and also court costs (\$178.86 for one and \$185.80 for the other).

It is expected that the same procedure will be followed in the cases of the other five boats.

However, the above being a civil case, a decision is expected, but criminal procedure still remains, but this also is expected to be disposed of with leniency.

Since the enforcement of the law freezing Japanese credits in America has been anticipated for a long time, at this office and through the Japanese language newspapers all the residents were warned of the effects upon them in case it was put into force, and even with the enforcement of the law on the 26th, the residents did not show any particular disquietude. The methods of application of the law were announced and since the actual restrictions on the residents' businesses, remittances to Japan, and importation of Japanese goods were considered quite lenient, they were accepted calmly. The remittances to Japan in anticipation of the freezing order and also the hoarding of U. S. currency has amounted to a considerable sum. Furthermore the United States authorities here have emphasized that although in the midsts of the worst anti American circumstances the residents have nothing to fear so long as they obey U. S. laws.

8 JULY 41.

A report regarding the Washington report of the later part of May that American pilots are joining the China Air Force. The local China Consul General on 10 June enrolled 100 men at his consulate (largely from local air groups). Newspaper reports indicate that the China military attache in Washington (makes arrangements?). Furthermore according to English (language) newspapers of the 5th 200 men have already (Toppa sever) gone (?). The Chinese Consul General avoids a statement regarding his orders.

Con't. It has been decided to confiscate 7 ships (total 8 ships). [no korizyū 1 seki no uti?] 3 vessels have been released under bond and 2 have already gone fishing.

# 1020 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

This matter of seizing fishing vessels is of a difficult nature: it is fishing season (?) and as it has a large influence on local food supplies, the authorities concerned are observing it. (?) [Part not clear—seems to be something about outrage against Japanese.] There is a movement to buy the confiscated ships (by U. S. Gov't?) and to release them under bond. At the same time Delegate King is making endeavors and those in Washington should make representations.

From: Kita #84.

To: Foreign Minister.

Later seizure proceeding have been instituted against the other 18 of the 19 ships mentioned in my previous dispatch. After considerable deliberation a court judgment was obtained under which the 1st of the ships was confiscated by the U. S. Government. Even tho it was to be put up at auction, judging from examples on the mainland, by the time the price is so reduced by sale at auction the owner gets nothing.

Furthermore the parties concerned get quite a blow from the customs as a result of this seizure. Already steps are being take to claim loss of a standpoint of damage to the boats, and in one case authoritz has been gained for a release from bond. Later on such steps will be taken in all cases.

21 MARCH 41.

From: Kita (forwarded by mailing code to Washington).

To: Foreign Minister, Tokyo.

According to dispatches from Auckland and Sydney. The light cruisers *Brooklyn* and *Savannah*, the destroyers *Case*, *Shaw*, *Cummings*, *Tucker* arrived at Auckland on the 17th; and the heavy cruisers *Chicago* and *Portland*, the destroyers *Clark*, *Cassin*, *Cunningham*, *Downs*, *Reid* arrived at Sydney—both groups on a friendly visit. The first group departed from Auckland on the 20th and may return to Pearl Harbor. It is reported that the second group will also go to Brisbane. Today's newspapers report that the above fleet sailed under sealed orders and that although they entered Pago Pago on the 9th and departed from there on the 11th, that the final destination was not known by "outsiders" (gaibu) until they arrived. The maintainance of secrecy on this trip was a great success it was reported.

From: Shokun.

In the Takakuwa case it seems difficult to force payment of the fee, the business being conducted with American capital. The American Trust is secretly conducting an investigation. It appears that the same person through a partner paid several thousand dollars addressed to Oimatsu, drawing on an "at sight bill." Is there no evidence of misappropriation of the funds held at that (your?) bank?

To: Foreign Minister, Tokyo.

Ambassador Kurusu delayed two days by clipper engine trouble left Midway and arrived here safety 1700/12.

1. The lower classes who were rounded up in the recent drive were leaders of the subversive party, and it is only natural that Thailand, at a time when rumors have been rife and in spite of the fact that it looked like the work of spies, should put the blame on the Japanese.

2. The problem goes deeper than just the dual-nationality question, and enemy sympathizers of whatever nationality have had to be controlled. All the more so when you consider the Thailanders who have become Japanese, and it would set a bad precedent if these were treated like the cases of those who made a trip some time ago for Mitsubishi. Since there remains the smirch of the Mitsubishi incident, I plan to carry out a thorough investigation.

28 JAN. '42

From: Foreign Minister, Tokyo #038 (Re yr msg. #061)

To: Minister Saigon

Re the victory celebration to be carried out upon the fall of Singapore including --- to be presented to the throne, decided upon in the special diet on 19 January I desire (these) details carried out in a suitable manner.

1. The celebrations will be completed by sunset on the day of the triumphal entry into Singapore (This day will be published by the information bureau)

2. From the day of the fall until the day of the celebration the national flag will be flown at every door.

On the day of the ceremony

(a) Before noon get all the citizens out doors and commemorate the day with stories of the imperial army and spirits of the departed. After the Prime ministers' broadcast #43) tell stories to the children.

(b) Have Shinto & Buddhist temples conduct "reporting the fall" ceremonies and fan, water sprinkling and prayer ceremonies.

(c) Carry out primary school sightseeing (trips) celebration ceremonies by junior organizations. Have military doctors comfort families; worship at shrines, drinking contests, athletic meets, military contests, military music. (Emphasize) the savings and other national policies.

Furthermore there are no objections in carrying out these ceremonies, if in addition to cooperating with affiliated organizations which celebrate according to local circumstances in China and Manchuria, as long as they do not result in confusion, if you take any suitable measures avoiding such things as impairing industrial output, wasting funds, injuring air defense and carrying on lantern and flag parades.

JAN 20.

As follows: (KYŪ BA) May mean emergency, -- emergency code? -- or may be the first in the list of names of countries appearing in this message.

The message is impossible to translate as it is. However, it should be taken in connection with # 647 A, which shows a similar list of names of countries with varying ~~w~~e letter groups after them. We may have here a new code in use, or possibly the suggestion of new code groups to be used for the countries in future -- the latter, however, seems pretty crude.

In connection with the former suggestion, should we not consider # 635 A, which seems to call for a new code to be put in use on January 20th, the date of this message?

RSS

MARCH 9

From Peiping #227 to Tokyo (Urgent)

Your wire No. 160 says, "Official Yoshihara of Kalgan has been ordered as from the 6th to take a post at DAIYA. Please have him leave immediately". Is this not a mistake? Please investigate and reply immediately.

1254 A

MARCH 9

From Tokyo (Urgent) #174 to Peiping

With regard to our wire #718 of last year.

1. Regarding the elevation of the status of Settlements, those who have MOSU SEI KOSHI (Note: Might not SEI, which follows MOSU in other parts of this message also, be something else, such as IDE or SUSUMI? The only translation which would fit the context in any way would be "Voice" so that MOSU SEI KOSHI would be "sent in their voice" i. e., "reported") are as follows. If the arrangements of all the offices are completed, we expect to put the establishment (of elevation of status) into effect on the 1st of April. Although we have received reports direct from the chiefs of the branch offices of Paotao and KAISHUU, we should receive reports from KOOWA and JYONI, so please arrange to have these reports in first.

2. With regard to governmental orders; in the case of colonies only, it will be alright to put into effect the completion of organization, in line with previous experience, and after sufficient leadership.

3. With regard to the desires of making the Settlement Chief's position an honorary one, especially bear in mind the relationship with Article 69 of the Regulations of Establishment. SPECIAL CODE by way of assurance.

1. HOTEI (Settlement Chief System; however, honorary position).

2. KAISHUU (Council System) No report from JOSHUU Consul.

3. TAAKU (Council system) DENPOO Consul General has sent report. However, no report regarding governmental order.

4. TYOOTEN (Council system) Report received from Tsinan Consul General.

5. KOOWA (Settlement Chief System, Salaried) No report concerning governmental order.

6. Paotao (Settlement Chief System. However, honorary) No report from KOOWA Consul General, therefore, also no report x x x x regarding governmental order.

MARCH 12.

From: Tokyo #191  
To: Peking.  
#021 to Shanghai Ambassador.

With regard to Settlement Chief, Settlement System, and the selection of people (officers?) of the settlement and their treatment (salary, housing, etc.), please bear in mind the following and instruct appropriately SPECIAL CODE by way of assurance.

1. The Settlement Chief system will be applicable only when an appropriate person is being obtained for the settlement. Therefore, the settlement chief will be thought of as a principle, and to hurry the selection of people for the settlement will be considered wrong.

2. The settlement chief, without regard for whether he is salaried or honorary, in connection with the business of the Settlement, (based on the ----- restrictions of Article 69) will take full responsibility with respect to the failure of business. Therefore, a spare time settlement chief is wrong.

3. With respect to the Chief of the Settlement and the other leaders, the character, the insight, etc., will be considered seriously before selection; the treatment (same as above) also, it is considered, should not be considered merely from the budget but should be arranged from considerations of the status, (rank) of the settlement (set by the government) and the candidate himself (it is understood of course that the amount of payment made must not be too much).

(Because of these considerations), the chief of the settlement, his assistants and directors and the treatment of these ----- should be, it is considered, arranged after your approval is given.

4. Further, with regard to Settlement Chiefs, their assistants, and directors, consideration is made of the future changes in personnel, and it is desired that arrangements be made in such a way that people will serve the settlements for long periods.

Chunking Broadcast (10th)

1. Chiang Kai Shek spoke, in general, as follows at the gathering of CHU SUU KI NEN (CHU is probably for CHUGOKU to mean China, but it is not known what the SUU might be. KINEN denotes anniversary or memorial, but contact with several Chinese in Honolulu failed to produce any knowledge of an anniversary on the 9th.) on the 9th.

"During my visit of half a month in India, I received a hearty welcome from the Indian government and the Indian people. China and India are in agreement with each other(?) and are great countries. With the nobility and the leaders of India, I had meetings at which our hearts were opened and the people have been inspired into cooperating with each other mutually and without regard for party or faction. The Indian government too, has now decided to fight. I hope that England will give political freedom to India and that the power of anti-aggression might be thus strengthened. The idea that India should be proud of China's 5 year fight has been conveyed to the Indian people and a recognition of our country has been brought to them sufficiently. I believe firmly that should Japan invade India, India will have the ability to destroy Japan.

2. On the afternoon of the 8th, Chiang Kai Shek met the Minister from Holland and a (military) Attache (under said minister) and also the Australian Minister (Igston).

Re the victory celebration to be carried out upon the fall of Singapore including-----to be presented to the throne, decided upon in the special diet on 19 January I desire these details carried out in a suitable manner.

1. The celebrations will be completed by sunset on the day of the triumphal entry into Singapore (this day will be published by the Information Bureau).

2. From the day of the fall until the day of the celebration the national flag will be flown at every door.

On the day of the ceremony—

(a) Before noon get all the citizens out doors and commemorate the day with stories of imperial army and spirits of the departed. After the Prime Minister's broadcast #43 tell stories to the children.

(b) Have shinto and Bud-d-hist temples conduct "reporting the fall" ceremonies and fan, water sprinkling and prayer ceremonies.

(c) Carry out primary school sightseeing (trips), celebration ceremonies by junior organizations. Have military doctors comfort families; worship at shrines, drinking contests, athletic meets, military contests, military music, (emphasize) the savings and other national policies.

Furthermore there are no objections in carrying out these ceremonies, if in addition to cooperating with affiliated organizations which celebrate according to local circumstances in China and Manchuria, as long as they do not result in confusion, if you take any suitable measures avoiding such things as impairing industrial output, wasting funds, injuring air defense and carrying on lantern and flag parades.

Togo.

From: Chengoai Thia #010

To: Foreign Minister, Tokyo

-----(-garbled)-----

The Tai army now on the northern frontier, including police amounts to over 10,000. On the 21st a portion of them were sent to Piruma ----- at me ----- Sataya they were bombed by the enemy.

HARADA.

28 JAN. 1942.

From Harada #012 (Re your msg #431).

To: Foreign Minister, Tokio.

-----1. The lower classes who were rounded up in the recent drive were leaders of the subversive party, and it is only natural that Tailand, at a time when rumors have been rife and in spite of the fact that it looked like the work of spies, should put the blame on the Japanese.

2. The problem goes deeper than just the dual-nationality question, and enemy sympathizers of whatever nationality have had to be controlled. All the more so when you consider the Tailanders who have become Japanized, and it would set a bad precedent if these were treated like the cases of those who made a trip some time ago for Mitsubishi. Since there remains the smirch of the Mitsubishi incident, I plan to carry out a thorough investigation.

17 JAN. 1942.

603A

From: Tokyo  
To: Hsingking

-----When we had an interview with the diplomatic representative (of Russia, the context shows,) on the 13th., (we said that) from the news which came to this office from a certain daily news agency, it was stated on the authority of a Chinese-----telegram in November that an American vessel had been sunk as the result of striking a mine. The United States, after some difficulties, had ignored this matter, it was reported, but (we inquired) if he did not think this was an American tanker: also, we asked if there were absolutely no case of Russian vessels sinking after striking a mine. The diplomatic representative denied absolutely that there was any truth in the former statement; regarding the latter statement he said that last year-----government-----a Soviet vessel struck a mine in Pita (Peter) Bay and received injuries, but was able to make port safely. Aside from this, there had been no cases of Soviet vessels striking mines, and this he wished received as his reply.

News from Yen-an-Fu (Communist Headquarters)

----- Chungking broadcast (says that) taking example from the Axis strategy of attack, the Allies received the suggestion that an immediate attack upon Japan should be attempted. The Yen-an-Fu Kaiho Nippo (writes) already in point of fact we are allies with Great Britain and the United States. The war against Japan is nothing more than a screen, this war merely offering an opportunity for the Anglo American front to develop another attack upon the Axis Powers, which is something we should find it important to realize at this time. Among the Axis Powers, the most important is Germany, and the harming of Germany is the main purpose of the world-wide strategems. That is to say, taking advantage of the crisis in Germany is, as a craft (strategem) the expansion of the line of operations on the Continent is most important. The importance of the war in the Pacific to the British and Americans is clear, and the Imperial command for China in this connection is the pressing of war against aggressor nations regardless of consumption (of materials) and the overthrow of Hitler will be victory for China (?) so at the present time cooperation with the Allies plus the greater and greater extension of the policy of long-time resistance, is the method of hastening the total victory of those opposed to the Axis Powers ----- This is the attitude which the paper (Kaiho Nippo) explains.

130A

From: Peking  
To: Nanking  
Shanghai  
Hankow  
Yenan-fu report -----

19 DEC. 1941.

The official newspaper of the Chinese communist party Kai Ho Niti To (Kaiho Jih Pao) in the editorial on the 13th said that Japan's purposes in the present

war are to incite peoples of all of the south sea areas in order to secure the resources (of that area), expel British and American interests—act in union ----- Germany and Italy ----- to increase her power. Japan's southward advance is, at the same time, the strengthening of the policy of encircling southwestern China, and also of grabbing the Pacific, and is truly inseparable from the China Japanese war.

On this critical occasion you (?) must calmly build up a battle line of all anti-Japanese parties of the Pacific countries. All of China military forces must attack actively; together with this the 8th Route Army, and the new Fourth Army must open up Rokoho opposition, begin a counter action against border friction, stirring up the Chinese people of the South Seas against the Japanese. Make most important duty of stirring an anti-war feeling among the people of Formosa, and strengthening the plans toward carrying this out.

MARCH 4.

With regard to your wires Nos. 133 and 400.

Although the fact of our wire No. 173 is present (Although the information set forth in our wire No. 173 are true) and although we should (eventually) have to carry on in accordance with above (information), if a request (or "petition") has to be submitted every month with respect to facility in obtaining loans as dealt with in this question, it would mean an unending series of repetitions. Thus, it is thought that one application (or "petition") should cover at least a period of about 6 months, in order that control and business may be facilitated.

Also with respect to the beginning of your wire No. 400: the proclamation on this question has been considered in this city since quite early ----- The leadership and organization has been towards cutting down the living expenses of enemy citizens as much as possible, but if these enemy citizens are to continue as at present, to live separately and to live under conditions no different than previous to the war, we cannot hope to limit the living expenses of these people merely by means of leadership (encouragement). In our area, (therefore) a study is being made with regard to the advisability of housing all of the enemy nationals in a definite area, of having them live jointly and of them letting them cook and eat jointly. If this is possible, the living expenses of these people will fall 100 yen per head, or 500 yen for 5 people, as reported in our wire as aforementioned ("-----").

From Peiping to Tokyo

MARCH 6.

Although we have rented the Sanitation (or "Sanitary") KONSU (might be abbreviation of "KONSUTORAKUSHION" for "Construction" or "Constructions"), the repairs necessary through the houses in order to make them usable will take a long time, and therefore, although we have (or "there are") quite a few people who are being transferred here and are arriving with their families, the situation is such that there are no houses in which to place these people. Therefore, as a temporary measure (or "a measure to meet the immediate situation") the houses (mentioned) in temporary enactment of our wire No. 182, are necessary, and we ask that you send us the necessary amount for rentals after arranging for permission to rent said houses.

From Peking to Tokyo

MARCH 7.

Extra

From Kato to Telegraph Officer Homura

I believe that you have KOOHAI (probably "seen", or "your attention has been 'drawn to'") our wire No. 216 (1) (2) (or "sections 1 and 2 of our wire No. 216") and the wire addressed you (2). It is especially requested that (the action mentioned) be carried out immediately.

1249 A

FUNADA.

From Tokyo to Hsinking

MARCH 7.

At the time of the (meeting) mentioned in our wire No. 89 (RUNOFU, name of a Russian representative) said that he had learned of the change of the Japanese Ambassador to Russia through a newspaper article (Red Party Organ dated 4th) and that Ambassador Sato (the newly appointed Ambassador), through having been Foreign Minister in the Hayashi (General Senjuro Hayashi, Premier Feb. to May 1937) cabinet, is well known to the Soviet Side. To this, I (this officer) said, that Ambassador Tatekawa (the previous Ambassador) had, because of ill health, been desirous of returning to Japan, that the Soviet Union knows that all of the Japanese Ambassadors to the Soviet Union in the past have been first class men of excellence (this clause is somewhat indefinite), that we believe that the Soviet Union well understands just where the purpose of the Japanese government lies, in having especially picked this new Ambassador who is a former Foreign Minister, a senior (old timer) in the diplomatic field, and who has a thorough knowledge of Soviet affairs, that we here, on this occasion, should calmly solve the various problems under discussion such as regular shipping schedules, TAIKA (might be "exchange", "freight accumulation" or "compensation"), petitions between Japan and Russia (?), Visas, and floating docks, and that another forward step would thus be taken in the friendship between the two countries. To this RUNOFU replied that he understood, and that everything will be done towards the solving of the problems as (his) ideas concerning them were the same as (I) had mentioned.

1250 A

FUNADA.

From Tientsin to Nanking, Shanghai, Tokyo, Peking, Thingtao, and Tsinan.

MARCH 7.

According to the Economic Weekly for the first week in March, the general situation, all commodities have a tendency of falling because of the effect on business of the doubt (distrust) of the rural (inland) areas. Cotton yarn and cloth opened with a tendency of being supported to some extent by the rural areas (probably "business inland") because of rapid and secret tendencies of speculators (?).

Rates falling; Dry goods, 44.60 Yen. Cotton Yarn (8 UMA 20 TE) 1.460 Yen. MEN FUN (perhaps "cotton waste" but from context, it is thought that this might be a mistake for MUGI FUN or MUGI KO, flour) the import of Shanghai powder (flour) is progressing smoothly, and as the CHUZAI KA (perhaps "stock here") settles down, and the movement of material stops because of low rates in the interior, the rates weaken-----25.903 Yen IJIRUSHI (?) 24.85 Yen. Sugar, a fall was seen because of the appearance of controlled com-

modities in the city towards the end of the previous week and the tendency of 1 JUN in the buying rate in the interior, Refined sugar, 235.80. Raw Sugar, 188.40. Peanuts, rates falling on both nuts and oil because of fall in Shanghai through lull in the year's exports, Nuts, 53.50 (highest on 6th) Oil, 104.90 (also highest on 6th).

1251 A

FUNADA.

MARCH 7.

Tokyo to Kalgan

With regard to the application for a permit to establish the Association (perhaps "Corporation") of MU KYOO (perhaps a mistake for MOO KYOO, Mongolia) Engineering and Building Industries; this has been carried out temporarily in accordance with your wire, Regular No. 97 of the 5th of last month. Please reply on following points:

1. Is it necessary, in accordance with Article 34 of the Civil Law, to especially make of said corporation a Juridical Corporate Person?

2. Is it impossible to attain the objectives (of said corporation) under the rules and regulations presently followed by the League of Industries (mentioned above) (Note: Last probably means "League of Engineering and Industrial workers" Also, it might be more correct to say, in above first three lines, "the Inner Mongolia Engineering and Building Corporation")?

3. What were the characteristics of the League(s) of Mongolian Engineering and Construction companies in the past?

4. Will the League of this industry be abolished upon formation of above corporation?

5. It has been reported that the head of said corporation Fujishima arrived there and that the establishment of said corporation took place under the direction of your office; is this true? (Note: The last might be a confirmation rather than a question.)

1252 A

FUNADA.

MARCH 7.

From: Tokyo

To: Hankow

To Business Representative Takano, resident in Daiya.

The expense appropriations for your office for the current year are as follows below. These will be sent by wire to Consul General Tanaka (at Hankow ?) and you are to receive them as delivered from that office. Within the Organization (or, Foundation) Fund of Yen 8,000 you are to pay immediately for repairs and equipment (it being understood that expenditure for desks and desk chairs shall be according to the plan), this grant to be completely repaid within the current year.

Government Expense, Actual Expense, Yen 60.

Ditto, Outright Expense, Yen 250.

Telegraphic Expenses for a diplomatic office abroad, Yen 25.

Expense for the Foundation of a diplomatic office abroad, Hankow office, Daiya branch office, and equipment fund, Yen 8,000.

Further, employees daily (wage) GEN 0 Yen. (Gen is probably an error for some figure) Typists within Yen 70, 11 may be employed. When appropriate people have been found, proceed on the basis of temporary action.

TEXT

For past month commander second fleet has been organizing a task force which comprises following units: Second fleet, third fleet including first and second base forces and first defense divisions, combined air force, desron three alrron seven, subron five and possible units of batdly three from first fleet

In message concerning these units South China fleet and French Indochina force have appeared as well as the naval station at Sama, Bako and Takao

Third base force at Palao and Rno Palao have also been engaged in extensive communications with second fleet commander

Combined air force has been assembled in Takao with indications that some components have moved to Hainan

Third fleet units believed to be moving in direction of Takao and Bako

Second base force appears transporting equipment of air forces to Taiwan

Takao radio today accepted traffic for unidentified second fleet unit and submarine division or squadron

Crudiv seven and desron three appear as an advance unit and may be en route South China

# 1060 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

There is believed to be strong concentration of submarines and air groups in the Marshalls which comprise alrron twenty four at least one carrier division unit plus probably one-third of the submarine fleet

Evaluate above to indicate strong force may be preparing to operate in southeastern Asia while component parts may operate from Palao and Marshalls

## MEMORANDUM

From: Assistant Director of Naval Communications (Op-20-G).

To: Adm. H. Kent Hewitt—Rm. 2750, Navy Bldg.

Via: Capt. F. O. Willenbucher (Op-20-4).

Subj: Dispatches—Forwarding of.

Ref: Secret letter, no serial, to Op-20-G, dated 3 July 1945, signed by H. Kent Hewitt.

Encl: Duplicates of dispatches requested in the reference.

1. In compliance with the reference, the following dispatches are forwarded:

CT.FJPZ-2 (1944 June 28)

1068 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

CT.FJPZ-2 (1944 Sep. 28)  
CT.FJPZ-2 (1944 Sep. 23)  
CT.FJPZ-2 (1944 Jan. 19, encl. F)  
CT.FJPZ-2 (1945 Jun. 29)

Japanese Plain Language Press Dispatches Intercepted Station S

2. It is requested that Op-20-4 place the enclosures in proper legal form for presentation to Mr. Sonnett, and make delivery to Mr. Sonnett.

J. N. Wenger  
J. N. WENGER,  
Captain, U. S. Navy.

THE SECRETARY OF THE NAVY,  
Washington 25, D. C., 6 Jul. 1945.

Op-20-4-imp  
Serial 0003720  
(SC)A17-24(1)

From: The Secretary of the Navy  
To: John F. Sonnett, Special Assistant  
Subj: Testimony and documentary evidence to be presented to Admiral H. Kent Hewitt, USN, concerning further Pearl Harbor investigation.  
Ref: (a) Precept, dated 2 May 1945, to Admiral H. Kent Hewitt, USN, concerning further Pearl Harbor investigation.  
Encl: (A) Jacket Form NJA 24, containing Japanese Plain Language Press Dispatches (Nos. 5077 to 5085, inclusive; Nos. 5257 to 5267, inclusive).  
(B) Jacket Form NJA 24, containing documents, CT.FJPZ-2 (1944 June 28); CT.FJPZ-2 (1944 Sep. 28); CT.FJPZ-2 (1944 Sep. 23); and CT.FJPZ-2 (1944 Jan. 19, encl. F).  
(C) Jacket Form NJA 24, containing document, CT.FJPZ-2 (1945 Jun 29).

1. Enclosures (A), (B) and (C), containing the following documents, certified in jacket forms NJA 24, are forwarded herewith for use in the proceedings directed by reference (a):

*Enclosure (A)*  
Japanese Plain Language Press Dispatches (Nos. 5077 to 5085, inclusive; Nos. 5257 to 5267, inclusive).

*Enclosure (B)*  
CT.FJPZ-2 (1944 June 28); CT.FJPZ-2 (1944 Sep. 28); CT.FJPZ-2 (1944 Sep. 23); and CT.FJPZ-2 (1944 Jan. 19, encl. F).

*Enclosure (C)*  
CT.FJPZ-2 (1945 Jun. 29).

2. Your attention is directed to the fact that enclosures (B) and (C) are classified TOP SECRET. When used in accordance with reference (a), the return of these documents to this office is directed.

13 Tokyo 3/12 United States probably believes she effectively restraining Japan by concentrating her naval force in Pacific but as irony fate would have it result is 80 percent United States Fleet quote immobilized unquote in Pacific while Germany been blessed with golden opportunity to give full play her naval activity in Atlantic writes naval editor Yomiurishimbun in front page today stop. Yomiuri editor thinks some eighty percent United States Navy now concentrated in Pacific consists seven or eight battleships three aircraft carriers some dozen out of fifteen heavy cruisers over fifty destroyers more than thirty submarines and large number auxiliary vessels all which now standing by Hawaii in addition two or three battleships and other units standing by west coast bases stop. Reviewing Japanese American negotiations Yomiuri editor opines United States apparently means to maintain peace in Pacific until 1946 when her two ocean fleet completed stop. Tightening ABCD encirclement against Japan as they do United States and Great Britain now throwing covetous eyes at Soviet fleet Far East which they wait to drag into ABCD camp stop. Yomiurishimbun however asserts quote its problematical whether Soviet Union play into Anglo American hands Soviet naval forces Far East consists more than hundred vessels including one cruiser five destroyers some ninety submarines two submarine bases and several river gunboats torpedo boats and minelayers and special service vessels in estimated Yomiurishimbun editor who outpoints Great Britain and United States paying special attention Soviet underwatercraft and air force stop. Yomiurishimbun declares quote survey Pacific situation clearly shows Japan seriously menaced by ABCD encirclement which United States tightening in order to realize her unholy design stop. But Japanese nation calmly watching situation with implicit confidence reposed in Imperial navy and army especially since both Prime Minister and concurrently War Minister General Tojo and Navy Minister Admiral Shimada assured nation before recent Diet session that full preparations been completed unquote Para.

14 Tokyo 3/12 Understood Vice Admiral Seizo Sakonji former minister air force ministry be appointed President semiofficial Imperial Oil Company succeeding Yoshiaki Hattai who appointed minister railways yesterday Para.

15 TOKYO 3/12 Financial experts expect total value yen linked currencies at end this year will top yen ten milliard mark inclusive Yen six milliard worth Bank of Japan notes yen seven hundred fifty million Bank of Korea notes yen two hundred fifty million Bank of Osaka notes yen milliard three hundred million notes Bank of Manchoukuo yen milliard notes Federal Reserve Bank China and yen hundred twenty million Bank of Mongolia notes stop. Incidentally its revealed circulation yen linked currency Japan controlled area East Asia at end of November exceeded yen eight milliard.

## HEWITT INQUIRY EXHIBIT No. 60

28 JUNE 1944

## MEMORANDUM FOR LIEUT. COMDR. BOONE

Subject: Japanese Diplomatic Traffic dated 1941.

Encl: (A) Analysis of Japanese Diplomatic messages on the Tokyo to Washington and Washington to Tokyo circuits from 1 January 1941 through 7 December 1941 which were missing or not translated.

1. At the request of Lieut. (jg) Connorton an inquiry has been made as to the sources from which intercepted Japanese Diplomatic traffic was received during 1941.

2. Mr. C. E. Fleming of GW recalls that during 1941 most of the Japanese Diplomatic traffic on the Washington-Tokyo and Tokyo-Washington circuits was intercepted by Station S. Some messages were missed due to static, atmospheric disturbances and incomplete coverage of all frequencies.

3. Other stations intercepting Diplomatic traffic were Stations A, W, S and H. These stations were assigned certain frequencies to cover. GX would have records of which frequencies were assigned to these stations.

4. Until the United States entered the war, little material was received directly from Western Union, Mackay Radio & Telegraph and other commercial concerns. Messages sent via these companies were often intercepted by RCA and forwarded to OP-20-G. After the outbreak of war, solid files were sent from these companies as well as from the All-America Cables & Radio Co. to OP-20-G.

5. It might be possible to trace some of the missing messages to the files held by the Army. During 1941 the Army and the Navy alternated days in processing Diplomatic traffic. It seems logical that the Army would have had a comparable number of unreadable and badly garbled messages as the Navy.

6. Any logs which dealt with the disposition of intercepted traffic and were originally held by GW have since been turned over to Lieut. Comdr. Murray and Lieut. Comdr. Raven.

SALLY T. LIGHTLE,  
Lieut. (jg), USNR.

Certified a true copy of a document on file In Op-20-G.

G. E. BOONE,  
Lt. Comdr., U. S. N. R.

28 JUNE 1944.

28 SEPTEMBER 1944

Following is a rough count of the number of worksheets held by GL-6 in CA, J-19, J-22, LA, PA-K2 and PURPLE diplomatic systems for the period from 1 November 1941 through 8 December 1941.

| System      | Total # of<br>msgs. | # of msgs<br>translated | # not trans-<br>lated | # partially<br>broken |
|-------------|---------------------|-------------------------|-----------------------|-----------------------|
| CA.....     | 7                   | 1                       | 6                     | .....                 |
| J-19.....   | 472                 | 75                      | 394                   | 3                     |
| J-22.....   | 192                 | 6                       | 146                   | 40                    |
| LA.....     | 650                 | 12                      | 481                   | 157                   |
| PA-K2.....  | 52                  | 13                      | 23                    | 16                    |
| PURPLE..... | 628                 | 417                     | 211                   | .....                 |
| Total.....  | 2,001               | 524                     | 1,261                 | 216                   |

Most of the worksheets have a teletype or station intercept sheet attached. Some have both the original and carbon of the teletype message attached.

Certified a true copy of a document on file in OP-20-G.

G. E. BOONE,  
Lt. Comdr., U. S. N. R.

Following is a survey of messages received by OP-20-G from 1-8 December 1941 showing the number received from each Station and the approximate time-lag involved. The information for this survey was taken from the GY Section Log for 1941 December.

| Station                      | # Msgs. | Time Lag |
|------------------------------|---------|----------|
| Sta. 1 Monmouth.....         | 9       | 2 days   |
| Sta. 2 San Fran.....         | 5       | 3 "      |
| Sta. 3 Fort Sam Houston..... | 4       | 3 days   |
| Sta. 5 Fort Shafter.....     | 1       | 4 "      |
| Sta. 6 Fort Mills.....       | 1       | 2 days   |
| Sta. 7 Fort Hunt.....        | 1       | 3 "      |
| Sta. 9 Rio De Janeiro.....   | 2       | 4 "      |
|                              | 2       | 1 day    |
|                              | 10      | 2 days   |
|                              | 1       | 3 "      |
|                              | 6       | 4 "      |
|                              | 2       | same day |
|                              | 1       | 1 day    |
|                              | 3       | 3 days   |
|                              | 7       | 6 days   |

Certified a true copy of a document on file in Op-20-G.

G. E. Boone,  
Lt. Comdr. U. S. N. R.

NAVY DEPARTMENT,  
OFFICE OF THE CHIEF OF NAVAL OPERATIONS.  
Washington, 6 January 1944.

*Memorandum to GY:*

1. Lieutenant Commander A. A. Murray and Lieutenant A. L. Braun were Watch Officers on the "Security" or "Purple" watch during the last half of 1941 and the first half of 1942. Lieutenant Commander Lafore was in charge of the watch (later known as GY-2) from about February 1942, (relieving Lieutenant Commander Linn).

2. The security watch worked Purple traffic on alternate days, the Army working the other days.

3. The traffic, besides that received from the Army, was received by teletype. If dated an Army date, it was sent to the Army; if dated our date, we worked it and sent the work sheet with the original message attached to GZ. Therefore, in general, we kept no original teletype traffic. We, however, maintained a file for each originator and into these files we put garbled messages, confirming copies of messages from our intercept stations and duplicate messages. These files also contained messages for earlier periods (1939-40), which had never been worked. It is possible that at intervals the files were reduced by the burning of the older dupes. (Our recollections on this are not clear.)

4. GZ had access to our files and frequently used material from them.

5. All plain text messages which came in were given to GZ. We kept no file of them.

6. When the Army took over the diplomatic system (about June, 1942), these files were turned over to them along with the machine, pertinent aids, forms, etc.

## JAPANESE PURPLE WORKSHEETS PROCESSED BY NAVY

A survey has been made of the file of purple worksheets held by OP-20-3GL-6 and GY section log for 1941 December in an attempt to determine the completeness of files of worksheets and translations and to account for any messages entered in the GY section log for which there are no worksheets on hand.

# 1088 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

## HEWITT INQUIRY EXHIBIT No. 62

TOP SECRET

Serial 0001391916

THE SECRETARY OF THE NAVY,  
Washington, 9 Jul 1945.

From: The Secretary of the Navy.

To: Admiral H. Kent Hewitt, U. S. N.

Subject: Testimony and Documentary Evidence to be Presented Concerning Further Pearl Harbor Investigation.

Reference: (a) Top Secret Ltr. from Admiral Hewitt to DNI, dated 5 July 1945, Subj: Files, request for.

Enclosure: (A) Photostatic copy of Top Secret Ltr. from DIO-14ND to DNI dated 19 April 1942, Subj: Encrypted Despatch Traffic of Japanese Consulate General, Honolulu, T. H., File 14ND/A8-5/OJ: EF37(I-95), with Enclosures (A) and (B).

1. Pursuant to Reference (a), Enclosure (A) is forwarded herewith.

JAMES FORRESTAL.

### FOURTEENTH NAVAL DISTRICT

District Intelligence Office, Sixth Floor, Young Hotel

WBS/wbs

HONOLULU, HAWAII, April 19, 1942.

14ND/A8-5/OJ

EF 37 (I-95)

Secret

From: The District Intelligence Officer.

To: The Director of Naval Intelligence (Head of Domestic Intelligence Branch).

Subject: ENCRYPTED DESPATCH TRAFFICE OF JAPANESE CONSULATE GENERAL, HONOLULU, T. H.

Enclosures:

(A) One copy of translation of Japanese Consulate General (Honolulu) Outgoing Message Log Book, classified as SECRET.

(B) One copy of translation of Japanese Consulate General (Honolulu) Incoming Message Log Book, classified as SECRET.

1. Enclosure (A), which was furnished this office by the Military Intelligence Division, Hawaiian Department, is forwarded for information. The Federal Bureau of Investigation, Honolulu, also supplied this office with two copies of the same enclosure, one of which has been sent to the "Unit" at the Navy Yard, Pearl Harbor, and the other retained in the files of the District Intelligence Office.

2. The Federal Bureau of Investigation, Honolulu, recently furnished this office with three copies of the incoming despatch log of the Japanese Consulate General, Honolulu, one copy of which is transmitted herewith as enclosure (B), one copy of which has been sent to the Pearl Harbor "Unit", and one copy of which is retained in the files of the District Intelligence Office.

3. Before leaving Honolulu, the Japanese Consul General was given three alternatives in the matter of disposing of papers in his possession: (a) to take them with him; (b) to pack, seal, and store them here; or, (c) to throw them away. He elected to throw away a great deal of written matter, most of which was first torn into pieces. The material from which enclosures (A) and (B) were taken was found among the papers so thrown away and placed together by translators attached to the Military Intelligence Division, the Federal Bureau of Investigation, and the District Intelligence Office.

4. The urgency of delivery of this letter and enclosures (A) and (B) is such that they will not reach the addressee in time by the next available officer courier. The originator therefore authorizes the transmission of this letter and enclosures (A) and (B) by registered mail to the continental limits of the United States and by registered airmail within the continental limits of the United States.

I. H. Mayfield,  
I. H. MAYFIELD.

## TOP SECRET

## Enclosure (A)

FEDERAL BUREAU OF INVESTIGATION,  
Honolulu, T. H., March 2, 1942.

The following is a translation of a form, printed in Japanese, on which radio messages transmitted by the Japanese Consulate General at Honolulu, T. H., were recorded:

Remarks:

Entries were not made in all of the spaces provided on the above form. The symbols, A N (cryptogram?), R Y A K U (code), and H E I (ordinary message), were written over the printed characters for "Official Dispatches" and are represented in the translation by A, B and C, respectively. There were also used in this manner the Japanese characters Y U (pertaining to postal?) and M U (a negative term).

### EXPLANATIONS

Types of Codes:

A ----- AN(GO)

B ----- RYAKU(GO)

C ----- HEI (ordinary)

Abbreviations:

CG ----- CONSUL GENERAL

ADS ----- ARCHIVES AND DOCUMENTS SECTION

TS ----- TELEGRAM SECTION

1. [2a] The letter GO is very similar to another letter, namely, REI, which may mean ORDER (in the sense of issued order), but since the letter—GO or

REI—may also be a designation of a certain type of code, this explanation is being attached for reference. This letter appears under columns entitled *TELEGRAM No. & CODE TYPE and CONTENTS*.

2. The word GOGAI is presumably a designation to the effect that the radio-gram does not belong to any one type of code for the word literally means "outside of number." However, the word may also be a designation of a certain type of code.

3. The word MU literally means nil or none, but this may also be a designation of a certain type of code.

## TOP SECRET

## HEWITT INQUIRY EXHIBIT No. 63

In reply refer to Initials and No. Op-30C1-AJ (SC) N20-12.  
Serial 09330.

NAVY DEPARTMENT,  
OFFICE OF THE CHIEF OF NAVAL OPERATIONS,  
Washington, Feb. 15, 1941.

From: The Chief of Naval Operations  
To: The Commander-in-Chief, Pacific Fleet  
Subject: Anti-torpedo baffles for protection against torpedo plane attacks, Pearl Harbor.

1. Consideration has been given to the installation of A/T baffles within Pearl Harbor for protection against torpedo plane attacks. It is considered that the relatively shallow depth of water limits the need for anti-torpedo nets in Pearl Harbor. In addition the congestion and the necessity for maneuvering room limit the practicability of the present type of baffles.

2. Certain limitations and considerations are advised to be borne in mind in planning the installation of anti-torpedo baffles within harbors, among which the following may be considered:

(a) A minimum depth of water of seventy-five feet may be assumed necessary to successfully drop torpedoes from planes. One hundred and fifty feet of water is desired. The maximum height planes at present experimentally drop torpedoes is 250 feet. Launching speeds are between 120 and 150 knots. Desirable height for dropping is sixty feet or less. About two hundred yards of torpedo run is necessary before the exploding device is armed, but this may be altered.

(b) There should be ample maneuvering room available for vessels approaching and leaving berths.

(c) Ships should be able to get away on short notice.

(d) Room must be available inside the baffles for tugs, fuel oil barges and harbor craft to maneuver alongside individual ships.

(e) Baffles should be clear of cable areas, ferry routes, and channels used by shipping.

(f) Baffles should be sufficient distance from anchored vessels to insure the vessels' safety in case a torpedo explodes on striking a baffle.

(g) High land in the vicinity of an anchorage makes a successful airplane attack from the land side most difficult.

(h) Vulnerable areas in the baffles should be so placed as to compel attacking

planes to come within effective range of anti-aircraft batteries before they can range their torpedoes.

(i) Availability of shore and ship anti-aircraft protection, balloon barrages, and aircraft protection.

(j) Availability of naturally well protected anchorages within a harbor from torpedo plane attack for a number of large ships. Where a large force such as a fleet is based, the installation of satisfactory baffles will be difficult because of the congestion.

3. As a matter of interest the successful attacks at Taranto were made at very low launching heights at reported ranges by the individual aviators of 400 to 1300 yards from the battleships, but the *depths of water* in which the torpedoes were launched were *between 14 and 15 fathoms*. The attacks were made in the face of intensive and apparently erratic anti-aircraft fire. The eastern shore line of the anchorage and moorings were protected by numerous balloon barrages, but there was no trawler borne balloon barrage to the west. The torpedoes were apparently dropped inside of the nets, probably A/T nets.

4. It is considered that certain large bays and harbors, where a fleet or large force of heavy ships may be anchored and exposed with a large body of water on an entire flank, should have that flank protected by a series of baffles if the water is deep enough for launching torpedoes. The main fleet anchorage at Scapa Flow, for instance, has an A/T net extending slightly to the north of a line between Calf of Flotta and Cava Island protecting the main fleet anchorage. The depth of water where this net is laid is approximately 17 fathoms. On the other hand constricted harbors, in which practically all available space is taken up by anchorages, and which is relatively deep probably must depend upon other defense measures. It might be possible and practicable to provide in some places, which are not protected by relatively shallow water, anti-torpedo baffles practically surrounding a limited number of berths for large ships, such as battleships or carriers. An extreme example of this is furnished at the present time by the French at Dakar, where double nets surround the Richelieu; she is placed similarly as in a dry dock, and evidently would have to open a section of the net to be hauled clear. The depth of water at Dakar, however, is very shallow.

5. The present A/T nets are very expensive, extremely heavy, their heavy anchors and moorings take up about 200 yards of space perpendicular to the line of the net, take a long time to lay, and are designed to stand up under heavy weather conditions. There is apparently a great need for the development of a light efficient torpedo net which could be laid temporarily and quickly within protected harbors and which can be readily removed. It is hoped that some such net can be developed in the near future.

6. Recommendations and comments of the Commander-in-Chief are especially desired.

H. R. STARK.

1. In view of the contents of reference (a), the Commander-in-Chief, U. S. Pacific Fleet, recommends that until a light efficient net, that can be laid temporarily and quickly is developed, no A/T nets be supplied this area.

H. E. KIMMEL.

# 1128 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

C-N20-12/ND14

20 MARCH 1941

From: Commandant, Fourteenth Naval District.

To: The Chief of Naval Operations.

Subject: Anti-torpedo baffles for protection against torpedo plane attacks.

Reference: (a) CNO Classified ltr serial 010230 of February 17, 1941.

1. In reply to reference (a) the following comment and recommendation on anti-torpedo baffles for vessels moored in Pearl Harbor is submitted.

(a) The depth of water in and alongside available berths in Pearl Harbor does not exceed forty-five (45) feet.

(b) There is limited maneuvering area in Pearl Harbor for vessels approaching and leaving berths which prevents the departure of a large group of vessels on short notice.

(c) Most of the available berths are located close aboard the main ship channels, which are crossed by cable and pipe lines as well as ferry routes. The installation of baffles for the fleet moorings would have to be so extensive that most of the entire channel area would be restricted.

2. Other harbors in the Fourteenth Naval District have a water depth limitation similar to Pearl Harbor.

3. In view of the foregoing the Commandant does not recommend the installation of baffles for moorings in Pearl Harbor or other harbors in the Fourteenth Naval District.

C. C. BLOCH.

Subject: Anti-torpedo baffles for protection against torpedo plane attacks.

Reference: (a) CNO conf. ltr. Op-30C1 Serial 010230 of Feb. 17, 1941.

1. In reference (a) the Commandants were requested to consider the employment of and to make recommendations concerning anti-torpedo baffles especially for the protection of large and valuable units of the fleet in their respective harbors and especially at the major fleet bases. In paragraph 3 were itemized certain limitations to consider in the use of A/T baffles among which the following was stated:

"A minimum depth of water of 75 feet may be assumed necessary to successfully drop torpedoes from planes. About two hundred yards of torpedo run is necessary before the exploding device is armed, but this may be altered."

2. Recent developments have shown that United States and British torpedoes may be dropped from planes at heights of as much as three hundred feet, and in some cases make initial dives of considerably less than 75 feet, and make excellent runs. Hence, it may be stated that it can not be assumed that any capital ship or other valuable vessel is safe when at anchor from this type of attack if surrounded by water at a sufficient distance to permit an attack to be developed and a sufficient run to arm the torpedo.

3. While no minimum depth of water in which naval vessels may be anchored can arbitrarily be assumed as providing safety from torpedo plane attack, it may be assumed that depth of water will be one of the factors considered by any attacking force, and an attack launched in relatively deep water (10 fathoms or more) is much more likely.

4. As a matter of information the torpedoes launched by the British at Taranto were, in general, in thirteen to fifteen fathoms of water, although several torpedoes may have been launched in eleven or twelve fathoms.

To: Commandant, Fourteenth Naval District.

Subject: Blocking Pearl Harbor Channel.

Reference: (a) Com-14 Conf. ltr. C-A16/H3/ND14(0800) of August 10, 1941.

1. In view of anti-submarine defenses approved for and now in process of installation at Honolulu and Pearl Harbor, the Commander-in-Chief does not desire to reopen the question of anti-submarine nets thereat.

2. With reference to laying defensive mine fields off those harbors, it is believed there is insufficient prospect of commensurate return for the restricted maneuverability and risks involved to our own ships.

3. The Commander-in-Chief has noted with approval the action initiated toward obtaining suitable radar for protection of channel entrance. He would like to see this matter vigorously prosecuted. Please keep him informed as to progress.

4. WPL-46 assigns salvage in these waters as a task for the forces afloat, assisted by such facilities as the shore establishment may be able to provide. Organization and assembly of equipment is now in process under Commander Base Force. It is requested that the results of the study and inventory referred to in paragraph (3) of reference (a) be made available to Commander Base Force and that, if and when necessity arises, appropriate local facilities and technical facilities be furnished him.

H. E. KIMMEL.

HEWITT INQUIRY EXHIBIT No. 64

SECRET

WAR DEPARTMENT

Washington, Feb. 7, 1941.

Subject: Air Defense of Pearl Harbor, Hawaii.

To: The Secretary of the Navy.

1. In replying to your letter of January 24, regarding the possibility of surprise attacks upon the Fleet or the Naval Base at Pearl Harbor, I wish to express complete concurrence as to the importance of this matter and the urgency of our making every possible preparation to meet such a hostile effort. The Hawaiian Department is the best equipped of all our overseas departments, and continues to hold a high priority for the completion of its projected defenses because of the importance of giving full protection to the Fleet.

2. The Hawaiian Project provides for one hundred and forty-eight pursuit planes. There are now in Hawaii thirty-six pursuit planes; nineteen of these are P-36's and seventeen are of somewhat less efficiency. I am arranging to have thirty-one P-36 pursuit planes assembled at San Diego for shipment to Hawaii within the next ten days, as agreed to with the Navy Department. This will bring

# 1130 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

the Army pursuit group in Hawaii up to fifty of the P-36 type and seventeen of a somewhat less efficient type. In addition, fifty of the new P-40-B pursuit planes, with their guns, leakproof tanks and modern armor will be assembled at San Diego about March 15 for shipment by carrier to Hawaii.

3. There are at present in the Hawaiian Islands eighty-two 3-inch AA guns, twenty 37-mm AA guns (en route), and one hundred and nine caliber .50 AA machine guns. The total project calls for ninety-eight 3-inch AA guns, one hundred and twenty 37-mm AA guns, and three hundred and eight caliber .50 AA machine guns.

4. With reference to the Aircraft Warning Service, the equipment therefor has been ordered and will be delivered in Hawaii in June. All arrangements for installation will have been made by the time the equipment is delivered. Inquiry develops the information that delivery of the necessary equipment cannot be made at an earlier date.

5. The Commanding General, Hawaiian Department, is being directed to give immediate consideration to the question of the employment of balloon barrages and the use of smoke in protecting the Fleet and base facilities. Barrage balloons are not available at the present time for installation and cannot be made available prior to the summer of 1941. At present there are three on hand and eighty-four being manufactured—forty for delivery by June 30, 1941, and the remainder by September. The Budget now has under consideration funds for two thousand nine hundred and fifty balloons. The value of smoke for screening vital areas on Oahu is a controversial subject. Qualified opinion is that atmospheric and geographic conditions in Oahu render the employment of smoke impracticable for large scale screening operations. However, the Commanding General will look into this matter again.

6. With reference to your other proposals for joint defense, I am forwarding a copy of your letter and this reply to the Commanding General, Hawaiian Department, and am directing him to cooperate with the local naval authorities in making those measures effective.

[s] HENRY L. STIMSON,  
*Secretary of War.*

## MEMORANDUM ENDORSEMENT

NAVY DEPARTMENT

FEBRUARY 13, 1941.

Op-30B3-AJ  
(SC)A7-2(2)/FFI  
D-27446

# 1136 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

## HIGH NORTH FLEET

There are at least eight to ten men-of-war and three or four naval auxiliaries in the High North Fleet. This Force operates in the KURILES-KAMCHATKA, HOKKAIDO-SAGHALIEN, and Northern HONSHU areas. It is apparent that the Headquarters for this Force is at OMINATO. There has been some air activity in connection with the operations of this Fleet, probably by shore-based seaplane squadrons in the above areas.

[10]

### Summation

|          | Total No. | 1st Flt | 2nd Flt | 3rd Flt | 4th Flt | 6th Flt | 1st China Fleet | 2nd China Fleet | 3rd China Fleet | Total | Attached to Naval Districts, inactive or at Navy Yards |

# Numbers include some OCL, ODD, OSS and oss.

[11] The above organization is believed to be quite accurate but attention is invited to the fact that ORANGE may (and probably will) regroup Fleets or units of Fleets into special Task Forces (or new Fleets) for special operations or to meet given conditions; for example: when ORANGE wanted to make a show of force in connection with its benevolent mediation in the THAILAND-FRENCH INDO-CHINA Dispute during the latter part of January 1941, a special reinforcement unit was sent from the FIRST and SECOND FLEETS to the SOUTH CHINA FLEET. This unit consisted of CRUDIV 7 (4 CA), DESRON 1 (1 CL-16 DD), CARDIV 2 (2 CV-1 DESRON), 1 AV and 1 or more XAV. The THIRD FLEET was actually organized in April 1941, but did not operate as such until the political situation permitted the FRENCH INDO-CHINA Base question to be forced in June-July 1941. It is of interest to note that the reinforcement of the SOUTH CHINA FLEET in January was a "Rehearsal Run" for the organization of the THIRD FLEET. Although the submarines were organized and operated in a separate Fleet (6th), they have also been split to operate with the 1st and 2nd FLEETS as well. The inclusion of the 3 COMBINED AIR FORCES into the 6th FLEET substantiates past reports of Joint Maneuvers of Submarines and Air Force with stress on their cooperation in Fleet Problems and Exercises.

[12]

### (B) MATERIAL INSTALLATIONS IN THE MANDATES

For many years Japan has effectively prevented observation of activities in the MANDATED ISLANDS. However, it is known that as a result of extensive hydrographic and meteorological surveys, considerable expansion and improvements have been completed in harbor development, "commercial" air facilities, communications and meteorological establishments in the principal islands (JALUIT, PONAPE, KUSAIE, TRUK, PALAO, and SAIPAN). Since late in 1940 ORANGE Naval and Air Operations in this area have increased and some forty to forty-five naval auxiliaries (cargo, transport, supply, and tankers ----- ex-merchant marine) now make continuous shuttle trips to the MANDATES with personnel, material, equipment and supplies. (Places marked # below have been destination for these vessels). The "Material Installations" are listed below to bring up to date the information reported in ONI-49, "Extracts from the Japanese Monograph 1939", pages 127.01 to 127.24 inclusive.

*Marshall Islands*

**JALUIT #** (Installations on JARBOR IS., IMIEJI IS. (EMIDJ IS.) and ENYBOR IS.)

(JARBOR IS.)

Naval Radio Station.  
High Frequency R. D. F.  
Meteorological Station.  
Naval Inspector Jaluit.  
6th Defence Force Headquarters ("Jaluit Detached Force").  
6th Defence Division (Base Force) Headquarters.  
Bases and trunnions for 6" guns are mounted along the Marine Parade (probably 3).  
A battery of 4.7 inch field pieces.  
Several mobile (pneumatic tired trucks) Searchlights, 10 inch (projector) diameter, 1500 candle power.  
Machine guns and A. A. guns. Latter mounted on trailers, towed by Diesel tractors.  
Barracks for garrison of 500 men (1940).  
Estimate 1000 Army troops arrived in February, 1941.  
Lookout towers.  
Civil Engineering Section.  
Detachment of 4th Civil Engineers.  
Detachment of Yokosuka Civil Engineers.  
Gasoline and oil tanks above ground (camouflaged)—1 mile South of JARBOR on reef formerly called "American Town".  
Coal Briquette Stowage.  
Deep water wharf and smaller jetties.  
Branch Office 4th Military Stores (Munitions) Department.  
Branch Office 4th Supply Department.  
#3 Branch Military Post Office.

[13] Two landing fields each with hanger capable of handling medium sized planes; adjacent buildings camouflaged. (Jaluit based Fighters and/or carrier planes).  
Mitsubishi Machine Shop situated between two air fields.  
Power plant (Diesel) for shop and airfields.  
Detachment of 6th Defence Force.

**JALUIT**

(IMIEJI IS. (EMIDJ IS.))

Naval Radio Station.  
Seaplane base at East Point (reference to IMIEJI BASE).  
Air Corps here.  
Civil Engineering Section.  
Ordnance Officer(s) attached.  
Detachment of 4th Civil Engineers.  
Detachment of Yokosuka Civil Engineers.  
Detachment from Kure Navy Yard.  
Detachment of 6th Defence Force.

**WOTJE #**

Naval Radio station.  
Meteorological station.  
Detachment of 6th Defence Force ("WOTJE Detached Force").  
Fortified (reported).  
Lookout towers.  
Landing Field (completed 1937—ONI 49). (Air Corps here; June 1941).  
Civil Engineer Section.  
Ordnance Officers attached.  
Detachment of 4th Civil Engineers.  
Detachment of Yokosuka Civil Engineers.  
Detachment from Yokosuka Navy Yard.  
Detachment from Kure Navy Yard.  
"Oil tanks".  
Deep water wharf.  
Branch Office—4th Supply Department.  
Branch 4th Military Stores (Munitions) Department.

## 1138 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

### **MALOELAP #—(TAROA IS.)**

Naval radio station.

Detachment of 6th Defence Force ("TAROA Detached Force").

"TAROA BASE".

Lookout towers.

Landing field under construction (1940).

Civil Engineering Section.

Ordnance Officers attached.

Detachment of 4th Civil Engineers.

"Storage plant".

Sanitary Corps in charge of Medical Officer.

### **[14] KWAJELIN # (establishment on both KWAJELIN and RUOTTO (ROI IS.))**

Naval Radio Stations (on KWAJELIN and RUOTTO).

"RUOTTO BASE". Air activity—June 1941.

Detachments of 6th Defence Force (on KWAJELIN and RUOTTO).

Shore Batteries of 6th Defence Force on KWAJELIN.

Shore Batteries of 6th Defence Force on RUOTTO.

Civil Engineering Section (RUOTTO).

Ordnance Officers attached (four or more).

Detachment of 4th Civil Engineers (KWAJELIN and RUOTTO).

Detachments from YOKOSUKA Civil Engineers (KWAJELIN and RUOTTO)

### **ENIWETOK #**

Naval Radio Station.

Meteorological Station.

Detachment of 6th Defence Force ("ENIWETOK Detached Force").

Fortified (reported).

1935—"Building in progress—submarine base?".

Landing Field here (?).

Detachment of 4th Civil Engineers. (One also on MERIREN IS. (PARRY IS.)).

Detachment from Kure Navy Yard.

### **POKAAKKU (TAONGI IS.)**

Naval Radio Station.

### **BIKINI**

Fortifications?

Earmarked for ORANGE Base?

### **RONGELAP #**

Naval Radio Station.

"Earmarked for ORANGE Base".

Actually used by ORANGE during maneuvers in past.

### **RONGERIK**

Naval Radio Station (reported).

### **UTIRIK**

Naval Radio Station.

Meteorological Station.

Naval personnel reported here.

### **WOTTO**

Naval Radio Station (reported).

### **[15] UJAE**

Naval Radio Station.

**MAJURO** (Used by Von Spee in 1914)

Naval Radio (?)

Naval personnel here.

Detachment of 4th Civil Engineers.

**EBON #**

Naval Radio (?)  
Naval personnel reported here.  
"BASE"----(?)

**MILLE**

Naval Radio Station.  
Naval personnel reported here.  
ORANGE considers MILLE extremely important.

*Carolines*

**UJELANG #**

Naval Radio Station.  
Meteorological Station.

**KUSAIE #**

Naval Radio Station.  
R. D. F. (reported).  
Meteorological Station.  
Detachment of 4th Defence Force.  
Submarine Base (?) (reported).  
Fortified (at least two gun emplacements reported).  
Lookout towers (day and night sentry watch).  
Land Plane field (reported).  
Seaplane operating base (reported).  
Mine and torpedo storage (reported).  
At least two Ordnance officers connected with work underway at KUSAIE.

**PINGELAP #**

Naval Radio Station.  
Detachment of 4th Defence Force.

**[16] SATAWAN**

Used by ORANGE SS in 1932.

**MORTLOCK**

Naval Radio Station.  
Detachment of 4th Defence Force.

**PONAPE #**

Naval Radio Station.  
R. D. F. reported.  
Meteorological Station.  
Detachment of 4th Defence Force ("PONAPE Detached Force").  
Army troops reported arrived here in February, 1941—estimated 1000 divided between PONAPE and TRUK.  
Fortified.  
"Air Field  $\frac{3}{4}$  mile South of the town . . . another base reported on tip of JOKAJ Island.  
Seaplane Facilities . . . "Air Base".  
11th Air Corps.  
Mine and Torpedo Storage (reported).  
Civil Engineering Section.  
At least two ordnance officers attached.  
Detachment of 4th Civil Engineers. (Active on LANGAR Is.).  
Detachment of YOKOSUKA Civil Engineers.  
Oil storage (reported).  
Branch Office, Military Stores (Munitions) Department.  
Branch Office, 4th Supply Department.  
4th Branch Military Post Office.

## 1140 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

### TRUK #

Naval Radio Station.

R. D. F. reported.

Meteorological Station.

Headquarters 4th Defence Force.

Detachment of 4th Defence Force (TRUK Detached Force").

"#70 BASE" (probably Air Base).

Army troops arrived here February, 1941—estimated 1000 divided between TRUK and PONAPE.

Fortified.

Land plane field on TOL Is . . . another at South end of DUBLON IS.

Air Corps arrived TRUK (June 1941).

Seaplane facilities.

Mine and Torpedo storage reported.

"Prepared for mine defence".

Mandate Headquarters 4th Civil Engineers.

Detachment of 4th Civil Engineers.

[17] Civil Engineer Section.

Detachment of Yokosuka Civil Engineers.

Detachment from Kure Navy Yard.

Oil storage (reported).

Mandate Headquarters 4th Military Stores (Munitions) Dept.

Branch Office 4th Military Stores (Munitions) Dept.

Mandate Headquarters 4th Supply Dept.

Branch Office 4th Supply Dept.

Mandate Headquarters of Military Post Offices.

PULUWAT # (PULOOT) (ENDERBY)

Naval Radio Station.

Detachment of 4th Defence Force.

LOLO #

Naval Radio Station.

Detachment of 4th Defence Force.

LANOTREK # (SWEDE)

Naval Radio.

Detachment of 4th Defence Force.

(Naval) "AIR BASE".

WOLEAI #

Naval Radio Station.

Reported earmarked for Seaplane base.

ULITHI #

Naval Radio Station.

Advance Fleet anchorage.

FAIS

"Commercial" Radio Station (JPF).

SOROL.

Naval Radio Station.

"Landing field in operation" reported.

[18] YAP #

Naval Radio Station.

Meteorological Station.

Naval personnel reported here.

Reported fortified.

Land plane field near GAGIL, (reported).

Has been extensively used as seaplane operating base.

Ex-YOKOHAMA Air Corps (?).

Civil Engineering Section.

Branch of the 4th Military Stores (Munitions) Department.

PALAO # (includes PALAO—PELELIU—etc.).

Naval Radio Stations (at least three).

H. F. ---- R. D. F.

Combined Radio and Signal Section.

Meteorological Station.

Headquarters 3rd Defence Division (Base Force).

Headquarters 3rd Defence Force.

Detachment of 3rd Defence Force.

Resident Naval Officer (Mandate Naval Headquarters).  
 Estimated 5000 Army troops arrived PALAO in February, 1941.  
 Army resident officers—liaison with Navy.  
 Observation tower or Battery Control station and artillery emplacements under construction on west side of BABELTHUAP Island (several 6" guns unloaded from transports).  
 All lighthouses believed used as Observation Posts or Battery Control stations.  
 Batteries believed emplaced near each lighthouse.  
 "Aircraft Detecting Device mounted on high hill at East end of KOROR Island.  
 Ammunition Storage to South of high hill on KOROR Island.  
 Barracks and Battery emplacements on PELELIU Island.  
 Barracks on West end of KOROR Island and at Southeast corner of BABELTHUAP Island.  
 Seaplane facilities and Landing Field on ARAKABESAN Island.  
 Seaplane facilities and Landing Field on PELELIU Island.  
 Naval Base on PELELIU Island.  
 "Fighting Plane Wing—PELELIU".  
 4th Air Corps.-----16th Seaplane Squadron.  
 4th Aircraft Technical Section.  
 Ex-CHITOSE Air Corps. (The 4th Air Corps?).  
 Mine and Torpedo storages (reported).  
 Civil Engineer Section.  
 At least four Ordnance Officers attached.  
 Detachment of 4th Civil Engineers.  
 Detachment of Yokosuka Civil Engineers.  
 Detachment from KURE Navy Yard.

[19] Branch 4th Military Stores (Munitions) Department.  
 Branch of 4th Supply Department.  
 Oil storage ("considerable") on S. W. side of MALAKAL Island.  
 Advance Fleet Anchorage at KOSSOL Passage.  
 Submarine Base (?) reported under construction on NGAJANGEL Is.  
 Branch Hydrographic Office  
 #2 Branch Military Post Office.

**HELEN REEF #**  
 Naval Radio Station.  
 Meteorological Station.  
 "Helen Reef Seaplane Base".  
 Construction activity observed.

**TOBI # (LORD NORTH)**  
 Naval Radio.  
 Five oil tanks observed.

**GREENWICH # (KAPINGAMARANGI)**  
 Naval Radio Station.  
 Detachment of 4th Defense Force.

*Bonin Island (Ogasawara Group) (not in Mandates).*

**CHICHIGIMA #**  
 Naval Radio Station.  
 HF—R. D. F. Station.  
 Army Garrison.  
 Fortified.  
 Naval Air Station (seaplane operating base).  
 Mine Storage (reported).  
 Civil Engineer Section.

*Marcus Island # (Minamitorishima) (not in Mandates)*

Naval Radio Station.  
 R. D. F. Station (?).  
 Meteorological Station.  
 "Marcus Island Detached Force".  
 "Marcus Island Base".  
 Land plane field (?) . . . (!)

## 1142 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

[20]

### *Marianas Islands*

#### **URACAS**

Land plane field (?) (reported).

#### **MAUG**

Seaplane (?) and Submarine Base (?) (reported).

Has been used for seaplane and submarine operations.

Fortified (reported).

Oil Storage (reported).

#### **PAGAN #**

Naval Radio Station.

A temporary air field here has been used by carrier planes.

Civil Engineering Section.

Detachment of 4th Civil Engineers.

Detachment of YOKOSUKA Civil Engineers.

#### **SAIPAN #**

Naval Radio Station.

H. F.—R. D. F. Station.

Meteorological Station.

Fortified—heavy guns—AA guns—searchlights—(reported).

Combined Lookout Stations and Shore Battery (control) Establishments, (at GARAPAN, NAFUTAN, LAULAU, FINA SUSU, MANIAGAHA (Is.) and others).

Army garrison—barracks—storehouses.

Fifth Defence Division (Base Force) Headquarters.

Fifth Defence Force Headquarters.

Detachment of Fifth Defence Force.

Saipan Naval Air Station—landplane field at ASLITO.

Seaplane facilities.

Fifth Air Corps (ex-KISARAZU Landplane Squadron(s) included?).

Fifth Aircraft Technical Department.

Mine and Torpedo Storage (reported).

Civil Engineering Section.

Detachment of 4th Civil Engineers.

Detachment of YOKOSUKA Civil Engineers.

Detachment from KURE Navy Yard.

Oil Storage reported.

Deep water wharf.

Branch of 4th Military Stores (Munitions) Department.

**SAIPAN SUPPLY DEPARTMENT.**

Branch of 4th Supply Department.

#1 Branch Military Post Office.

#### **[21] TENIAN #**

Naval Radio Station.

"Combined Lookout and Shore Battery (control) Stations".

Fortified.

Detachment of 5th Defence Force.

Civil Engineering Section.

Detachment of 4th Civil Engineers.

Ordnance Officer(s) attached.

Detachment of 4th Civil Engineers.

Detachment of YOKOSUKA Civil Engineers.

#### **ROTA**

Naval Radio Station.

Fortified (reported).

Defence works underway (reported).

Submarine Base (?) (reported).

#### **[22] C. PROBABLE FORCES, NAVAL AND OTHERS IN MANDATES**

(a) **FOURTH ("Mandate") FLEET.** (See Section A).

(b) **Naval Forces Ashore:**

3rd Defence Force (Headquarters PALAO).

5th Defence Force (Headquarters SAIPAN).

Detachment of 5th Defence Force on TENIAN and probably other Islands of MARIANAS (See Section B).

4th Defence Force (Headquarters TRUK).

Detachments of 4th Defence Force on outlying islands of Eastern and Central CAROLINES (See Section B).

6th Defence Force (Headquarters JALUIT).

Detachments of 6th Defence Force on outlying islands of MARSHALLS (See Section B).

(c) Army Forces Ashore:

On PALAO, SAIPAN, TRUK, PONAPE, JALUIT (See Section B).

(d) Navy Yard Detachments (labor and production (See Section B).  
Civil Engineer Detachments " " " (See Section B).

(e) Naval Air Forces:

Considerable activity. Exact composition and numbers not definite. The following table is constructed as a result of an analysis of fragmentary reports of varying degrees of reliability:

*Airron 24*

|               | Kamoi<br>(AV) |     | Maru<br>(XAV) |     | 4th-16th<br>Air<br>(Palao) |     | 5th-8th<br>Air<br>(Saipan) |     | 11th Air<br>(Ponape) |     | —th Air<br>(Truk?) |     | —th Air<br>(Jaluit) |     | Total |     |

When present work on expansion and construction of land plane bases is completed it is believed that ORANGE will use these for Type 96/97 twin engine land-plane, long range bombers and for fighters. These will be flown out to these bases in such numbers as to cope with a given situation.

[23]

#### D. ACTIVITIES IN PROGRESS IN THE MANDATES

When BLUE held Fleet XXI, the ORANGE FOURTH FLEET took up stations in the Eastern Mandates and intensified its radio intercept activities in conjunction with ORANGE trans-Pacific naval tankers. In late August—early September, 1940, ORANGE held maneuvers in the Mandated areas using the Air arm (carrier and shore-based planes) and Submarine Force to search for, locate, and attack a hypothetical enemy Force (represented by the FOURTH FLEET) advancing to the West from the vicinity of the Northern Gilberts. The general defence line seemed to be PONAPE—TRUK but details or conclusions of the exercises are not known. It may be significant that on the next Fleet reorganization, December, 1940, a separate SUBMARINE (SIXTH) FLEET was formed (See Section A).

ORANGE's decision to speed up the militarization was apparently reached concurrently with the signing of the Tri-Parte Pact, as movements of naval reserve auxiliaries (taken over from the Merchant Marine) to the Mandates became apparent thereafter. Since late in nineteen forty this movement of personnel, materials and supplies has progressively increased until in July, 1941, there were approximately forty to forty-five ships constantly engaged in round trips between ORANGE mainland and the Mandates. An analysis shows about sixty-five per cent of this shipping is destined for the Eastern CAROLINES and MARSHALLS.

Considerable air activity has been in evidence at SAIPAN, PALAO, TRUK, PONAPE and in the JALUIT area. Foreign steamers nearing these areas have been subjected to aircraft observations and close scrutiny by Patrol Planes, Bombers and Fighters. Heavy landplane bombers have made reconnaissance flights over the GILBERT ISLANDS (TARAWA, BUTARITARI, and BERU).

## DISCUSSION OF SHORE ORGANIZATIONS AND ACTIVITIES

During the early months of 1941, evidence has shown that an Administrative Organization has been set up for control and expansion of the military developments of the Mandates. This Mandate Organization is taking the line parallel to but separate from the parent organization, YOKOSUKA Administration chain, previously in control. While PALAO has always been the MANDATE Administrative center (and may continue to be) the focus of SUPPLY, CIVIL ENGINEERING and MUNITIONS Administration in the Mandates is now centered at TRUK.

An increase in the number of CIVIL ENGINEER Detachments on the various Islands has been very noticeable and while some are distinctly Detachments of the YOKOSUKA Civil Engineering Section, others are separately and distinctly Detachments of the FOURTH Civil Engineering Section which almost invariably has detachments on the same islands as the YOKOSUKA Branch Detachments. The Headquarters of the FOURTH CIVIL ENGINEERS was formed at KURE in November 1940 and moved to YOKOSUKA the latter part of January 1941, and thence to the Mandates about 20 February. Accompanying it were the 4th MILITARY STORES (MUNITIONS) and the 4th SUPPLY ADMINISTRATION which also have branch offices on the principal islands of the MANDATES.

The Commanders of the 3rd, 4th, 5th, and 6th DEFENCE DIVISIONS (BASE FORCES) have a Flagship and a Headquarters or Administrative Section, the latter remains ashore at the home base regardless of the movements of the Command or of the Flagship. Each DEFENCE DIVISION contains a DEFENCE FORCE which in the case of the 4th and 6th is divided into DETACHED FORCES on the islands in the vicinity of the Command's Headquarters. Close cooperation has been noted between the DEFENCE FORCES and the Aircraft activities at their home bases.

The 3rd DEFENCE DIVISION has four submarines attached, possibly old boats of the "Ro" type. It may be ORANGE intention to similarly organize the other DEFENCE DIVISIONS.

During late May 1941 ORANGE held maneuvers in the Mandates in connection with the dispatch of a part of the COMBINED AIR FORCE to that area (indoctrinal training?). The RYUJO (and possibly the HIRYU) and about half of the SUBMARINE FLEET also took part in this exercise. It is believed that the FOURTH FLEET acted as an "Enemy Fleet" attempting to penetrate into the MARSHALLS, with the AIR FORCES plus the SUBMARINE FLEET attempting to intercept them. It was reported that the ORANGE strategic high frequency Direction Finder net was active in this Phase, funnelling information to the AIR and SUBMARINE FORCES on a common chain via SAIPAN and there is some evidence that these Forces were under a unified command. After visits at WOTJE, KWAJELIN, and JALUIT the additional forces returned to their normal operating units at the end of June.

## HEWITT INQUIRY EXHIBIT No. 68

Cincpac File No.

UNITED STATES PACIFIC FLEET, U. S. S. PENNSYLVANIA, FLAGSHIP

December 8, 1941.

## REPORT OF PRISONER NUMBER ONE

Detailed information concerning this report will be submitted today. Preliminary report indicates the prisoner a Japanese Sub-Lieutenant, aged twenty-four years. Was pulled out of the water off Bellows Field this morning. Was taken prisoner by the Army and is held at Fort Shafter by Colonel Fielder. The officer refused to talk concerning the enemy's composition or disposition and at the present time the only information present is as follows:

1. He swam ashore from a reef one mile off Bellows Field.
2. He and another officer were the only members of a two-man submarine. The reason for his capture was that he was sneaking up on what he thought to be a capital ship and in order to navigate he had to open the hatch of the submarine—whereupon water came into the hatch and swamped the motor. He thereupon drifted upon the reef. This officer was Captain and Navigator. The other officer has not been recovered. Information indicates that there are more of these small submarines in the vicinity and that they were brought here from some type of a mother ship. The prisoner did state that he had to navigate a distance of a hundred miles before running aground upon the reef. At the time of his capture the officer wore a stop watch around his neck which stopped running at 0210. It is not known whether this is GCT or LCT. Although he did not give the enemy's forces or disposition he stated that so far as he knew the attack was a disappointment in that they expected a paralyzing blow to our fleet.
3. In accordance with the samuri code this prisoner has requested that he only be allowed to commit suicide.

It is evident that the officer appreciated the treatment afforded him by the naval questioners to that of the Army, and it is felt that with proper handling, further information *might* be derived from this officer.

Respectfully,

E. T. LAYTON.

## FOURTEENTH NAVAL DISTRICT

District Intelligence Office

Sixth Floor, Young Hotel

*Honolulu, Hawaii, December 8, 1941.*

CHC/MB

Memorandum for: Fleet Intelligence Officer.

1. Young, adult Japanese male—muscular build, cropped black hair—apparently in perfect health. Gave his age as 24, sub-Lieutenant in the Japanese Navy and a graduate of the Imperial Naval Academy.

2. He was without clothing of any kind, and seated in a chair wrapped in an army blanket. Before questioning was started it was learned that this prisoner was taken on the beach at Bellows Field. That he had swum ashore and had around his neck, on a lanyard, a stop watch which had salt water inside of it. The watch was stopped at 0210. The watch was inscribed on the reverse in Japanese characters—translated as follows: "Watch 2ND clock, Type 1, Navy #296. Movement No. 3346171." This man stated that he was an officer of the Japanese Navy and gave his name as KAZUO SAKAMAKI of Okayama Prefecture. He had been one of a crew of two in a submarine which had run ashore on a reef approximately one mile off Bellows Field. He stated that he was the Commanding Officer of the submarine and the navigator and that his shipmate was the engineer—entire crew consisted of himself and one shipmate. He admitted that the submarine was of a small type which operated from a mother ship but refused to give the name or tonnage of the mother ship or the distance at sea of his disembarkation from the mother ship. When questioned as to whether the submarine was diesel or electric propelled he refused to answer. He stated that he had navigated "more than a hundred miles" when asked if the distance were as much as one hundred miles. Too much credence should not be placed in this answer as he obviously realized he was being pumped. He stated that he wished to commit suicide and had not done so at the time of landing on shore because of the possibility which remained of making his escape and rejoining the Japanese Navy. He stated that he had now been disgraced and did not want his name or his ship information sent back to Japan. When complimented on the success of which his Naval comrades had made their attack, he stated that it had been much less successful than they had anticipated. We expressed surprise at this and he was asked what they originally expected to accomplish, he replied, in effect, a knock-out blow to your Navy.

3. He stated that off Bellows Field this morning he had been approaching a capital ship but that the darkness was so complete that he was forced to open his conning tower and stand in in the open hatch while running half submerged towards his target. As a result of the maneuver in the choppy sea, he shipped a great deal of water down the hatch which crippled his motor and this motor failure resulted, of course, in the loss of control of the submarine and his being dashed into a reef over one mile from Bellows Field. He and his fellow officer stripped, dived into the ocean and attempted to swim ashore. He stated that he last saw his shipmate in the heavy surf. He admitted the possibility that the Navy might examine the submarine, which had run on the reef (because he was not aware that Naval planes had subsequently bombed and sunk his submarine). He stated that there were no papers in the submarine and admitted that this type of submarine represented essentially a sort of enlarged variation of a one man torpedo. He stated "My greatest mistake was being captured. This is the first time I have failed. Please do not advise Japan about this. Please kill me." During the course of this questioning, which was begun by the aid of two competent interpreters, it developed that this young officer had some knowledge of English, which he at first did not disclose. Later on he explained his inexpertness in this language by saying that, while in the middle school, he had studied English, but in the Academy, in expectation of duty in the China Seas, he had selected Chinese.

4. A drawing of a petty officer's Navy Pilot's insignia was made by him and he explained the significance of the various details of this device.

5. There remains the possibility, if the Naval authorities so desire, that this submarine may yet be located and raised for examination of mechanical details, etc.

Submarine Base, Pearl Harbor, T. H.

December 8, 1941.

## CONFIDENTIAL

Memorandum: Fleet Intelligence Officer.

Subject: Investigation of Japanese Submarine Aground in Waimanalo Bay.

1. The submarine when first sighted was about six hundred yards from the beach, off the end of the run-way at Bellows Field. At the time of my arrival at the Field, three Navy Utility planes were engaged in dropping what appeared to be either twenty-five or fifty pound bombs, the bombs being dropped in pairs. No direct hits were made and out of about twelve bombs dropped six appeared to land within fifty feet of the submarine. After the bombing the submarine did not appear to have been damaged or to have altered its position.

2. The pilot who first sighted the submarine was interviewed and stated that when he picked it up there was a large oil slick around its stern, also its position had not changed any since the first sighting of it.

3. The operations officer at Bellows Field sent me up in a plane to get a clear view of the submarine and I was able to come within one hundred feet of it. The color was dull black with no distinguishing marks, between thirty and forty feet in length, and about four feet in breadth. There was a small periscope projecting about three feet from what appeared to be periscope shears. The contour followed the general line of all submarines and there was a basket like projection on the bow. At the time, the submarine was down by the stern with the bow and periscope shears coming out of water from time to time due to the action of the waves. Judging from the location of the bomb hits on the coral bottom, which could be seen from the plane, the submarine appeared to be drifting in towards the beach.

4. It is believed that with the minimum amount of effort, the submarine can be towed in and beached.

R. L. RUTTER,  
Lieutenant, U. S. Navy.

To a Commanding Officer:  
From Japanese Naval Officer  
KAZUO SAKAMAKI

I thank you for the kindly visit of yesterday. Now I will write down your requests of yesterday in Japanese. Please pardon my poor writing and composition.

## 1. BRIEF PERSONAL HISTORY

In August 1940 I was graduated from the Naval Academy and became a midshipman. In April of this year I was commissioned a sub-lieutenant in the navy, my present rank.

## 2. RECORD OF BATTLE

Your honorable "have" country instituted an economic blockade of Japan, a "have not" country, refusing to sell us oil, cotton and the like, until we had no choice but natural collapse. Because of this we began diplomatic negotiations with your country, but these ended in failure. Therefore, with a friend, I set out for Pearl Harbor with the purpose of sinking a battleship, but due to-----accident, although we were able to reach the mouth of the harbor by creeping underneath your bombs falling like rain, since the-----accident was fatal to the submarine, we determined to proceed without hesitation on the surface of the water, and dashing into the harbor, and climbing the gang-way ladder, hoped to leap onto the deck and die simultaneously with blowing up the enemy warship just as in olden times, during the Mongol invasion, our Tsuyu Kawano lowered the mast and boarded the enemy ship with it. However, because of the-----accident suffered at the harbor mouth, we struck a reef which given ten seconds we would have safely cleared. My first stratagem had failed. With this difference of ten seconds the fate was decided and one of the warships of your country was saved.

Seeing the success of our sister submarines and the splendid achievements of our air force, I left the mouth of the harbor, compelled to do so due to my submarine being disabled. Later, finally being unable to do anything with the submarine, I swam through the ocean and reached an enemy airport. Due to

## 1150 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

my exhaustion, I was captured without having time to even fight. And thus my sad fate began.

Due entirely to my inexpert navigation and strategy, my honor as a soldier has fallen to the ground. Thus I betrayed the expectations of our 100,000,000 (people) and became a sad prisoner of war disloyal to my country.

5. The talk I had with an understanding naval officer in the home of an army man in "Honolulu" was very pleasant. Because I thought about the trouble I would cause your country later on, and because I was unable to endure my shame, committing suicide or being shot to death became impossible, and thus began my sad life as a prisoner of war. Now that things have come to such a pass, I have started the life of a peaceful Japanese naval officer abiding by the rules of international law.

In olden times, Hakui and Shukusei of China, refusing to eat millet of a foreign land, went into the mountains and ate grass (?) until they starved, but I, since I began eating your country's bread, have thought what a cause for shame and sorrow it is.

Although I have caused you much annoyance, I have done things right along according to righteousness. However, such incidents as that which happened yesterday which is from the standpoint of your country a sad thing has been continued. My righteousness has made scores of men of your country withdraw all day long with their guns pointed at me and made them afraid, but as a result of this, I must face a death which to me is not too pleasing.

My willingness to die need not be mentioned; to be killed by one of your bullets of your country shall make me very happy. I pray for your country's lasting military success.

An uprighteous pistol has been aimed at me. This is my end. Good-bye.

4. To the Japanese people, especially to officers like ourselves, becoming a prisoner of war is inexcusable. Of course, whether or not there is a record of the incident or not, I will commit suicide upon my return to my native land. Even though we are unarmed, to bite with teeth and fight to the last is the Japanese spirit.

I pray that my death will forgive me for all my failures and I pray that my spirit will be enshrined at the Yasukuni (Shrine).

Please forward the following to the Japanese Navy Department.

### LAST WILL AND TESTAMENT

Although I plunged into the mouth of the harbor, and although I struck terror in the hearts (of the people of the islands?) I arrived at a situation wherein I could do nothing. For this I have no excuse to make. I do not desire to grasp this opportunity of being a prisoner of war. I am about to die after fighting for righteousness till the very end as an officer of the Japanese Navy.

Banzai for his Imperial Majesty.

Showa 16th year (1941), 14th day (Month omitted)

KAZUO SAKAMAKI,  
*Naval Sub-lieutenant*

### POEM COMPOSED AMONG THE ENEMY (ON THE UNFORTUNATE DAY THAT I BECAME A PRISONER OF WAR)

When cherry blossoms fall,  
Let them fall!  
Drenched are the its branches and leaves  
With the sorrow of today!

5. I like best "DOWN THE TORPEDO" and "AMONG THE SHOTS THROUGH THE MARGARET". I experienced all these things in this current battle which is the goal of all naval men's ambition, and I manifested the Yamato Damashii (Japanese spirit). Last night, again scores of bayonets and muzzles were pointed at me from the front door and from the window and from above my head. However, righteousness won. And although as a result of this a regrettable situation came about, I hope that all would be forgiven with my death. On the eve of my "fairly death" lamenting the many sacrifices of your country due to my "call of righteousness". I earnestly hope that this will be clearly understood, that supreme desire and joy in dying as a soldier by your country's bullets.

I appreciate your many kindness shown me up to now, and I pray for your success in the war.

Respectfully,

KAZUO SAKAMAKI.

## UNEASINESS IN JAPAN

With Okinawa about to be written off, Japan took stock of the situation last week and found the outlook grim. There was a tinge of desperation in various Tokyo announcements as spokesmen sought to condition the public for an expected invasion of the homeland. Like the nervous sleeper in the flat below, Japan sits up nights waiting for the other shoe to drop.

The Japanese public has been told by no less than Premier Suzuki that Okinawa was to be the decisive battle, that Japan itself might rise or fall on the outcome

<sup>1</sup> Pages referred to are indicated by italic figures enclosed by brackets and refer to pages of original exhibit.

of the battle in the Ryukyus. Newspapers and commentators were quick to echo the spirit of his fright talk. When the Naha-Shuri defense line was broken, the Japanese public must have known that a decisive phase was at hand. There was Okinawa all but lost; there was the ubiquitous Third Fleet hammering at Kyushu; there was the 11th Army Air Force raiding the northern Kurile Islands, and over all were the B-29s with the power to pick a city and obliterate it.

Tension mounted in Tokyo, or what was left of it. There was the publicly-aired conviction that the next Allied operation would be against the home islands. While the Tokyo Radio talked of elaborate underground structures for "a long war", the Japanese military took the wraps off "the home defense team" of pilots and aircraft. Carrier pilots of the Third Fleet suddenly found they had to beat off "a sky full of Japanese planes", manned by crack pilots who apparently had been saved up for some such final showing. Moreover, U. S. airmen reported the expert Jap flyers were coming up with new fighters which outperformed American Corsairs. (Identity of this new Japanese fighter plane has not been established, but elsewhere in this issue is a discussion of a possible new enemy plane recently shot down over Okinawa.)

Tokyo talked, too, of converting remnants of the Imperial Fleet into a suicide fleet or suicide units. English language broadcasts were beamed to North America pointing out that the recent shakeup in the Japanese Navy was calculated to put that arm on a suicide basis under new commanders who had originated and were versed in suicide tactics. There was even talk of converting the free balloon experiment into a direful threat to the U. S. mainland by means of suicide pilots. Propagandists said the pilotless balloons had demonstrated that such bags could get to the West Coast in 100 hours, so now the Japanese would send them over with pilots to spot targets for bombs in the balloons. Still other propagandists broadcast elaborate descriptions of vast underground fortifications and supply areas in the homeland which, they said, would introduce "a new kind of underground warfare."

It was all reminiscent of Germany's promises to her people of unlimited "secret weapons" before the end of the war in Europe.

Meanwhile, B-29s poured relentless destruction on Japan's principal cities in a terrible, methodical order. Tokyo, Yokohama, Nagoya, Osaka and Kobe—down the Tokaido line with train-like regularity and then back again, went the Superforts. On 5 June they were over Kobe, the end of the line, and two days later they were back at Osaka for the second time in a week. The Kobe raid was the 15th incendiary raid on the Empire. In the subsequent raid on Osaka HE bombs were mixed with 2,500 tons of incendiaries. The HE was aimed at Osaka Arsenal, Japan's largest. Before the Osaka raid, it was computed that a total area of nearly 90 square miles has been burned out or blasted to rubble in Japan's six major cities.

(At this point in the Exhibit the following items appear:

1. Aerial view of Tokyo showing damage effected through incendiary raids.
2. Aerial view of Osaka showing damage effected through incendiary raids.

The foregoing material will be found reproduced as Items Nos. 255, and 256, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

[2]

#### UNIDENTIFIED AIRCRAFT

From Air Group 9 come gun camera photographs of a possible new Japanese fighter which was shot down on 5 May over Okinawa. This aircraft was first reported to be a GEORGE but an examination of the photos shows that its only GEORGE-like features are general wing shape and twin gun installations. Features not characteristic of GEORGE 11 are:

- Long nose.
- Low wing and excessively long fillets.
- Narrow but tall fuselage aft of fillets.
- Full length rudder similar to TONY's.
- Notched out tail plane with fairly short chord.

While it is reported that the new version of GEORGE has a low wing, there has been no indication that the fuselage and empennage would be redesigned or

that the engine would be set farther forward. GEORGE 11 presents a very stubby, heavy appearance. The aircraft pictured here gives that impression only in side view because of the depth of fuselage; its narrowness from above, if fillets are discounted, is almost like OSCAR. The tail wheel appears to be non-retractable since no cover plates are visible.

Two conclusions may be drawn: (1) that the aircraft is the new GEORGE 21 which seems unlikely for the reasons stated, and (2) that it is a new type Navy fighter hitherto unphotographed—perhaps SAM 11.

(Two photographs, each showing two separate views, of an unidentified Japanese plane over Okinawa, referred to *supra*, will be found reproduced as Items Nos. 257 and 258, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

[5]

## NEW AIR COMMANDS IDENTIFIED

Identification of two important new Japanese air commands, the 6th Air Army and the 1st Mobile Base Air Force, has been made through recently captured documents.

Prior to the Okinawa campaign, only five air armies were known to exist. Several items recovered on Okinawa, however, mentioned the 6th Air Army. A "Very Secret" order, dated 6 February 1945, issued by the 19th Air Sector Command gave the jurisdiction of the new Army. (CINCPAC-CINCPOA Item No. B-18,287.) The order states:

"Imperial headquarters will plan the execution of Ten Air Operation in the East China Sea area as a joint Army-Navy function. The 6th Air Army, chiefly, will carry out aerial operations north of Okinawa (including Okinawa) and the 8th Air Division, generally, will carry out operations south of Okinawa (Okinawa included)."

Since it is known that an air army is a high echelon of command with a tactical and administrative responsibility over a large area, it is presumed that the jurisdiction of the new army also includes Kyushu. The 8th Air Division is based on Formosa. The Ten ("Sky") operation is apparently the name applied to the air defense of Okinawa and the Ryukyu area.

Japanese air armies previously identified include the 1st in the Empire, 2nd in Manchuria, 3rd in Southeast Asia, 4th in Southwest Pacific, and 5th in China.

Mention of the 1st Mobile Base Air Force (Kido Kichi Kokubutai) and its number designation, 1KFGB was found in a notebook on Okinawa. (CINCPAC-CINCPOA Item No. B-18,066.) A Base Air Force is the tactical equivalent of a Navy Air Fleet and operates under the CinC, Combined Fleet. The area covered by the 1st Mobile Base Air Force and its equivalent administrative air fleet is not known, but it is presumed to be an important sector of the Japanese homeland defense.

[6]

## JAPANESE FIGHTER DIRECTION

A description of Japanese fighter director methods, as they existed in April 1944, was captured on Luzon (ADVATIS Translation No. 74, ATIS Current Translations No. 156, 21 March 1945). Particularly interesting is the dependence of the Japanese on reconnaissance planes—which should make good targets—and on a constant speed and course of the attacking planes.

The physical system is not unlike our own shore-based system in basic respects. Various radars reports to a control station which we would call a filter center. At this location plots are displayed and evaluated and action is taken. (Apparently each radar reports bearing and range from itself and does not convert to a common reference point; nor does it appear to use any sort of "grid" system.) The Japanese have an organization designated an "Intelligence squad" which would compare to our intercept team. One sketch indicates that D/F equipment is used in some manner for tracking their own intercepting aircraft.

Numerous references in the document indicate that Japanese radar bearing and range discrimination are not reliable. Furthermore, the enemy does not seem to have any search radar which is dependable for altitude determination on incoming raids.

To compensate for shortcomings in bearing, range and altitude from their radar, scouting planes are sent out initially to contact our raids. These scouts shadow

## 1154 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

and report position, type, strength, altitude, etc., as an aid to directing the intercepting group. This would suggest the conclusion that our raids frequently will be spotted by Japanese reconnaissance planes, which will act as shadows and not as attacking units. The reconnaissance planes represent an important cog in the intercept system.

Due to the time element required in the filter center, the method of radio relay, and the fact that mechanical methods are utilized for computation of vectors, much time is wasted; time lag in plot is an obvious conclusion. All computation is on the premise that the "enemy raids" will remain on almost constant course and speed. This suggests that a few diversionary raids with marked changes in course and speed might create confusion in Japanese intercepts.

After their intercepting aircraft are given the initial "vector" and "range" on the "point of encounter" (intercept position), the subsequent changes in vector seem to be given in a manner similar to our clock-code method; e. g., "03.10" equals "right front ten kilometers."

(Copies of two photographs, each reflecting six views, of a Japanese "George" 11-Fighter, Interim Model, will be found reproduced as Items Nos. 259 and 260, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

[11]

### DEMOLITION SQUADS IN SALLYs

On 24 May six SALLYs carried Japanese "commandos" to Yontan airfield, Okinawa, in attempts to destroy U. S. aircraft and installations. The planes attempted wheels-up, power-off landings, but all except one which landed on the airfield, crashed and burned killing their occupants before any damage could be done. All planes were SALLY 2s, fitted with Type 100 1450 hp engines, the Army counterpart of the Kasei 11.

None of the six aircraft carried guns or armor plate or, as far as could be determined, radio gear. The top turrets had been removed and pieces of corrugated roofing, beaten flat, were nailed to boards 1 by 6 inches and tied over the turret hole with rope to inside structural members. Such aircraft maintenance as could be observed was extremely poor. Screws were cross-threaded or not screwed completely into place or were left out altogether. Ill-fitting pieces of fairing, apparently from other planes of the same model, had been forced into place. Much patchwork was noted and tires were considerably worn. In two of the planes were found small pieces of cardboard, 2 by 10 inches. Around the cardboard were wound five sizes of plain soldering wire, small pieces of which could be cut off and used as substitutes for burned-out fuses. Fuse boxes had some regular fuses installed and some short pieces of wire as substitutes, a possible indication of a shortage of fuses. Flare release racks were found on two aircraft, the flares doubtless being intended for use in the landings. One light smoke bomb was found, probably to be used to hide the raiders, once they were landed.

Extra bomb bay fuel tanks of approximately 130-gallon capacity were found in all the crashed aircraft. It is not clear why these would be needed, since SALLY's

(Photographs appearing at this point in the Exhibit include:

1. Two views of the Japanese plane, "Sally 2", one showing a tail section after attempted landing on Yontan airfield, Okinawa, and the other showing a plan after "wheels-up" landing on Yontan airfield.
2. View of a Japanese "Sally 2" plane after "wheels-up" landing on Yontan airfield.
3. Two views showing wreckage of two more "Sally 2s" near Yontan airfield.

The foregoing photographs will be found reproduced as Items Nos. 261, 262, and 263, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

normal range (at 75 per cent Vmax) without them is approximately 1200 miles, and from the nature of the operation it would not seem that a return trip for

the planes was anticipated. Oil tanks on one aircraft were only one-quarter full, indicating that the engines were badly worn or that the tanks were intentionally not filled in order to save oil.

The pilot of the one SALLY that landed most nearly intact is believed to have been inexperienced for these reasons: The automatic pilot was in operation and had never been turned off; controls were operational and functioned satisfactorily at the time of inspection, but the pilot had made a poor attempt at leveling off before landing, thereby striking the runway hard and injuring some of his passengers; main line switches and magneto switches were still on at the time of inspection.

The entire operation against Yontan airfield was in the familiar suicide tradition, a move of desperation, neither well-planned nor well-executed. It was not successful even if measured objectively in terms of physical damage done for losses taken.

(An aerial view of destruction wrought by American carrier based planes on Kanoya airfield will be found reproduced as Item No. 264. EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

#### DUMMY AIRCRAFT

Increased use of dummy aircraft on Japanese homeland fields is evident in many recent reconnaissance photographs. Photographs of three fields are reproduced here to illustrate the trend and to show some of the more obvious differences between the dummies and the real aircraft.

In spite of the painstaking care the Japanese have taken, the dummies look flimsy at best. They seem to warp and twist out of shape, either because of our gunfire or the elements. They are irregular and not precise enough to fool the eye when studied in photographs. Their very construction defeats their purpose, since the three-dimensional effect of solidity and strong shadow is weak. On the other hand, when these dummies are covered with camouflage netting the general effect can be attained and is more convincing.

To give a good idea of the lengths to which the Japanese have gone in the construction of dummy aircraft, a selection of typical drawings is published here. The original drawings were a part of two complete sets of blueprints captured on Okinawa (see "Weekly Intelligence", Vol. 1, No. 43). The dummies depicted are probably intended to represent NATE, SONIA and SALLY. How many other types of planes have been drawn or constructed is not now known. Several mediocre imitations of FRANK were spotted around Yontan Field on Okinawa (photos in "Weekly Intelligence", Vol. 1, No. 43).

Construction of dummies follows a pattern, not unlike stage scenery. The main members are of cedar and are comparable in size to our structural lumber. The lighter bracing and stiffeners are of common pine. All are nailed and spiked in place in a designated order. Structurally, the designs are only fair, as evidenced by their disintegration. Over this rough framework platform is woven the finish "basket". The coarseness of this weave allows the sun to penetrate and thereby to soften shadows cast on the ground. This is particularly noticeable in the Kanoya photograph. The "undercarriage", while elaborate for the SALLY and SONIA types, even including wooden wheels, consists generally of simple posts. Sometimes gasoline drums are used as supports, in much the same manner as they are beneath wrecked aircraft used as decoys.

(The following photographs appear at this point in the Exhibit:

1. Aerial photograph of Kanoya airfield.
2. Aerial photograph of Kikuchi airfield, Kyushu.
3. Aerial photograph of a Japanese airfield showing camouflaged dummy planes.

The foregoing material will be found reproduced as Items Nos. 265, 266, and 267, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

Three rendered sketches have been prepared from these Japanese drawings. Conventional shadows have been cast in an effort to show how these dummies would appear from the air. Gasoline drums have been drawn into each sketch to give scale. The shapes of the "aircraft" are true to the types imitated, but dummies seen to date have fallen far short of the shapes intended in the drawings.

Certain observations are pertinent. Though dummies to date have been flimsy,

are not faithful copies of the drawings, do not cast strong shadows and disintegrate under gunfire, they nevertheless look enough like the real thing from altitude under combat conditions. When covered with camouflage netting they are particularly hard to distinguish from operational aircraft. A recent report based on reconnaissance for mid-May (Report No. 659, InterpRon Two of 28 May 1945) shows that a total of 139 dummies are present on ten fields in Kyushu and Honshu, not including the large number shown in the Kanoya photograph. While these aircraft may be easy to distinguish on a photograph with a high power glass, they present a difficult spotting problem to pilots under combat conditions. For that reason, effort will be made in the future to publish any information on the subject which may be helpful in exposing to air personnel the Japanese use of dummy aircraft.

At this point in the Exhibit the following items appear:

1. Sketch of dummy Japanese plane, a "Sally."
2. Two sketches of dummy Japanese planes, a "Nate" and a "Sally."
3. Sketches showing captured drawings for construction of "Sally" dummies.
4. Sketches showing captured drawings for construction of "Nate" and "Sonia" dummies.
5. TAIC model photos of a "Baka," primarily a Japanese glider and secondarily a powered plane, being released from a Japanese "Betty" and of a "Baka" in flight.

The foregoing material will be found reproduced as Items Nos. 268 through 272, respectively, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

#### FURTHER ANALYSIS OF BAKA'S PERFORMANCE

Detailed analysis by TAIC of the aerodynamic characteristics of BAKA has led to a revision of the theoretical range, speed and glide angle estimates. BAKA is primarily a glider and *secondarily* a powered plane. The rockets greatly increase its speed for a short time, but cause only a slight range increase over its maximum glide range. Maximum horizontal range when released at 27,000 feet is 55 miles. Fifty-two of these miles would be travelled at a glide speed of 229 mph and at a glide angle of 5°35'; during the other three miles, the use of rockets would accelerate the speed to 535 mph in level flight. At a 50° or greater diving angle, maximum speed would be 618 mph. Whether the rockets were used at the beginning or the end of the run, or, whether they were used to climb would not appreciably affect the maximum range.

Against ships protected by heavy armor, presumably the rockets would be used at the end of the run in a torpedo approach, the pilot attempting to score a hit close to the water line. If launched from a distance, however, BAKA would be vulnerable to attack by fighters before reaching a position to complete effectively its own attack. Lacking maneuverability, BAKA could take but little evasive action in its unpowered glide and its only method of escape would be to fire one or more of its rockets. In this event, the increased velocity secured from the rocket would dissipate before BAKA could reach its target and its final terminal velocity would be substantially decreased.

Destruction of the parent aircraft is *extremely important* inasmuch as special fuselage modifications are necessary, and the available supply of adaptable parent aircraft controls the number of BAKAs that can be launched.

The accompanying range graph can be used to ascertain the estimated theoretical range of BAKA when launched from any determined altitude. It is not believed practical that release of BAKA will be made at altitudes in excess of 20,000 feet, so that the maximum practical range remains approximately 35 miles.

(A graph showing an estimation of the range of "Baka" will be found reproduced as Item No. 273, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

### AIRFIELD DAMAGE REPAIR

Extensive damage inflicted upon Japanese airfields by U. S. bombers has led the enemy to issue special orders for the repair and camouflage of the damage. In addition, signals have been arranged to indicate to returning enemy pilots which of the damaged portions have actually been repaired and which have been merely camouflaged.

A Staff Order of the Fourth Air Division, dated 8 September 1944 and recently captured on Okinawa (CINCPAC-CINCPOA Item B-17564-F) states that every effort must be made to repair bomb damage but, if it cannot be repaired before morning, it should be camouflaged. An accompanying diagram, reproduced below, illustrates the use of signal panels to indicate camouflaged damage and the location of repaired portions of a typical strip.

A complete translation of the document follows:

"1. All bomb damage to runways by air raids should be repaired if at all possible, overnight.

"2. When the above is impossible, at least a part of the runway should be repaired by the next morning and made serviceable.

"3. Unrepaired bomb damage on runways should be camouflaged by dawn, using camouflage nets and other available materials. Camouflage should convince enemy aerial reconnaissance that the previous day's damage has been completely repaired. Speedy repair should then be undertaken. However, damage repair should not be delayed for purposes of camouflage.

"4. Partial repair described in Item 2 and 3 above should be marked off according to the attached diagram. Red signal panels are placed next to camouflaged bomb damage and facing the repaired runway area. Panels are placed so that the sides of one will be parallel to those of the others."

(A diagram illustrating the use of signal panels to indicate camouflaged damage and the location of repaired portions of a typical strip, referred to *supra*, will be found reproduced as Item No. 274, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

### OXYGEN GENERATING APPARATUS

The oxygen generating apparatus now used in FRANK, NICK and other Japanese Army aircraft delivers an unusually large amount of oxygen for its low weight and will not explode if struck by shrapnel or bullets. In these respects it is much superior to conventional oxygen storage installations.

An examination of the equipment discloses that its main components are three generator tubes with individual filter attachments, the enclosing container and the immediate tubing and the necessary electrical connections.

The generator tube is of thin sheet iron or steel construction, plated with rust-proof metal, with soldered side and end plate seams. A socket and suitable electrical contact is provided at its lower end, while the smaller but similarly constructed filter cylinder is soldered in its insert recess at the opposite end. Overall dimensions are: generator length 1 foot 6 $\frac{1}{2}$  inches; overall length including filter 2 feet 3 $\frac{3}{4}$  inches; generator diameter 3 $\frac{1}{2}$  inches; filter diameter 2 $\frac{1}{2}$  inches.

The oxygen-producing material is a mixture of potassium chlorate ( $\text{KClO}_3$ ), iron, iron oxide and asbestos fiber. The action of the generator is initiated by an electric current heating a chrome-iron resistance wire, about which is wrapped a paper fuze. The fuze in turn ignites a fuze train which finally ignites the main compound. The mixture of constituents in contact with the fuze is richer in iron and iron oxide than is the remainder of the compound. Oxygen is produced by the heat-decomposition of the  $\text{KClO}_3$ . The iron oxide is a catalyst which allows the reaction to occur at a lower temperature, and the iron metal may act both as a heat source in reaction with the oxygen produced and as a catalyst.

(A front view of an oxygen generating apparatus with one cylinder missing will be found reproduced as Item No. 275, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

The enclosing container for the generator components is constructed of what seems to be aluminum alloy. The components of the case (back panel, doors and base) are apparently formed by a die-stamping process. At the time of the stamping, cooling perforations of about  $\frac{3}{4}$ -inch diameter are formed, spaced

at about 1½ inches between centers. Overall dimensions are: length 1 foot 8¾ inches; width 1 foot ¼ inch; depth 5¼ inches. Assembly consists of a back panel to which is riveted a base or socket holding section.

Two outward-swinging doors are hinged on each side of the back plate above the base, and are fitted with two bar-and-lever type latches. Other constructional details may be ascertained from photographs. An instruction plate with wiring and tubing diagram is secured to the front of the base.

The gross weight of the equipment (three generator-filter tubes, the container, and part of the tubing) is 25 pounds 4½ ounces. Each tube has a duration of 75 minutes, according to the attached nameplate. No volumetric computations have yet been made but it is believed that the generator delivers ample oxygen for any altitude the airplane may operate. An idea of duration per unit weight may be gained from the results of the quotient of time of delivery over weight, which shows that the equipment delivers 8.95 minutes of O<sub>2</sub> per pound of apparatus. Two disadvantages of the unit are that the generator reaction, once started, cannot be stopped. This, in turn, often necessitates by-passing a large amount of oxygen at lower altitudes. The long duration of oxygen production is apparently intended to counteract this.

(At this point in the Exhibit there appear two views on a plate captioned "Shades of Darius Green," including:

1. View of an oxygen generating apparatus.
2. View of a Japanese aircraft, a photograph of which was capture on Okinawa.

The foregoing will be found reproduced as Item No. 276, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

#### JAPANESE ELECTRIC TORPEDO

A Japanese electric "wakeless" torpedo, with a possible range greater than any other electrically-driven type known, has been recovered on Saipan.

Only incomplete information is available on the weapon, designated as Type 92, Mod. 1. On the example recovered and examined by MEIU No. 4, the warhead was missing and numerous parts which would have given additional indications of the torpedo's operation and capabilities had been removed, possibly by souvenir hunters.

(A photograph of a Type 92, Model I Japanese Torpedo will be found reproduced as Item No. 277, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

The range dial on the weapon is calibrated from 0 to 14000. Although the unit of measurement is not given, it is presumed to be meters, inasmuch as that unit of measurement has always been used by the Japanese to indicate range. If that is the case on this weapon, the maximum setting would give the torpedo a range almost twice as great as any other electric torpedo extant. This maximum range can probably be achieved only at a much reduced speed, however. At the estimated maximum speed of 28 knots, it is believed the torpedo would have an effective range of approximately 3000 yards.

The weapon is apparently modeled after the German G7E electric torpedo. Without the warhead, it is 19 feet, 1¾ inches long, and 21 inches in diameter. It has two batteries of 52 cells each and each cell has a voltage of 2.05. The batteries are 62 inches long, 14¾ inches wide, and 10 inches high. The motor is driven by direct current. Twin propellers, turning in opposite directions stabilize the torpedo during its run. Four tail vanes with horizontal and vertical rudders are mounted on the trailing end. No information is available on the type of warhead or explosive device used, or on the type of submarine capable of carrying the torpedo. As far as is known, the torpedo has not yet been used in combat by the Japanese.

(A photograph showing two views of a Japanese torpedo, one being of the tail and after body, and the other of the interior of the battery compartment will be found reproduced as Item No. 278, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

## VARIATION IN SCS

(Various views of the Japanese Type E Model Vessel referred to as "Sugar Charlie Sugar" and mentioned *infra*, will be found reproduced as Item No. 279, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

Photographs above are among the first received showing details of the standard economy Type E (mod) Sugar Charlie Sugar with foremast centered on the foredeck and a thin mainmast on the afterdeck. Shown below is a recent good photograph of the Type E (mod) with masts at forecastle and bridge. The two mast arrangements constitute the major variations found on this economy type. In other respects details of the two ships illustrated are very similar but among minor variations which may be observed in the future are placement of lifeboats and size of stack.

The foremast-centered variation of SCS can be distinguished from the larger (2300-ton) three-hatch Sugar Charlie Love by the position of the foremast with respect to hatches. At most, a mast can serve two hatches. If centered, it can serve the entire foredeck, which can have but two hatches—as on a Sugar Charlie Sugar. If the mast is forward of center it can serve only a part of the foredeck and a third hatch must be present—as on a Sugar Charlie Love. (See opposite page.)

(The following photographs appear at this point in the Exhibit:

1. View of a Japanese vessel referred to as "Sugar Charlie Sugar" with foremast at forecastle.
2. Photographs of two types of Japanese cargo vessels referred to as "Sugar Charlie Love" and "Fox Tare Dog."

The foregoing material will be found reproduced as Items Nos. 280 and 281, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

## I-24, MIDGET SUB CARRIER

The sketch below, reproduced from a drawing by a prisoner who served aboard the Japanese submarine I-24, illustrates how a midget submarine was transported to Pearl Harbor for the sneak attack of 7 December 1941. Other midgets were transported similarly for attacks on Sidney, Australia, and in the Solomons area. In the two years the POW was aboard, from April 1941 to May 1943, seven midget submarines were launched from the I-24. The prisoner's disclosures are contained in ONI Digest of Information from Prisoner of War Sources.

The smaller craft was carried on the main deck abaft the conning tower and was secured to the pressure hull by means of heavy clamps, the POW said. One of the clamps was released from within the midget, the rest from within the mother sub. No unusual difficulty was experienced in maintaining trim when diving with the small craft aboard.

Due to the limited range of the small subs, return to the "mother" ship was not planned, and was not accomplished in any of the seven instances. Crews of the midgets were expected to scuttle their boats after accomplishing their missions, and save themselves if possible.

(A sketch showing a Japanese submarine I-24 carrying a midget submarine will be found reproduced as Item No. 282, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

## CAMOUFLAGE VS PHOTO INTERPRETATION ON IWO JIMA

Pre-invasion photo interpretation of installations on Iwo Jima compared favorably with later ground studies of the island in areas where vegetation was sparse. In wooded areas, among pandanus trees and in heavy scrub growth, installations frequently were impossible to see and many which were not sheltered by natural growth were so well camouflaged it was impossible to determine whether an object was a military installation or a natural ground formation.

Along the barren beaches of the southern isthmus, interpretation of aerial photographs was comparatively easy, although dummy positions, revealed after-

ward by ground study, were so well constructed they were difficult to distinguish from the authentic.

Near the airfields, 500 to 800 yards from the beaches, blockhouses, covered artillery and large pillboxes, were observed and correctly interrupted. Smaller pillboxes and mortar emplacement, often as effective against our forces as the larger installations, could not be observed in photographs. Even on the ground frequently they could not be spotted from more than 15 yards' distance. Many of the smaller pillboxes used an effective camouflage of wire netting covered with brush over the fire lanes.

Interpretation of antiaircraft defense was more than 95 per cent accurate even though all these positions were well camouflaged. One of the few errors was the classification of a six-gun heavy AA battery, as automatic AA. The average diameter of revetments for this heavy gun battery was slightly less than 16 feet. The revetment of a nearby twin-mount automatic AA battery was slightly more than 15 feet. Nets and brush across the revetments obscured characteristics so that positive identification of either battery was impossible.

Approximately 30 percent of the casemated coast artillery and field artillery positions were observed in aerial photographs before heavy gunfire blasted away

(At this point in the Exhibit two items appear, as follows:

1. Photograph showing Japanese camouflage of a pillbox and a spigot mortar position.
2. Five views showing various types of Japanese camouflage technique.

The foregoing material will be found reproduced as Items Nos. 283 and 284, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

vegetation concealing other positions which allowed for a greater percentage of correct interpretation. Natural vegetation was used extensively on all positions. Camouflage discipline as evaluated from photographs was excellent during construction of positions. Materials used for covering blended into the surrounding terrain and vegetation, while earth from excavations was planted with grass to obliterate traces of military activity. Heavy coast defense guns and field artillery were well concealed under trees.

Emplacements for machine guns and 150-mm mortars have similar characteristics. Consequently, a few of the latter were interpreted as machine gun positions. Small mortar or rocket emplacements were unobserved in photographs.

CINCPAC-CINPOA Bulletin No. 136-45, concerning a ground study of the defense installations of Iwo Jima, points out the limitations of excellent vertical photographs. The two maps enclosed with this issue of "Weekly Intelligence" show (1) a plot of defense installations on Iwo as determined from photo interpretation on D-15, and (2) positions plotted from a ground study of the island.

A review of aerial photographs, supplemented by a ground study knowledge of the island, disclosed most of the larger installations, such as the CD guns at the East Boat Basin. These casemates were discovered by comparing changes in the ground noted in successive sorties dated from 15 June 1944 to 4 February 1945, listed in Supplement to Defense Installations of Iwo Jima, CINCPAC-CINPOA Bulletin No. 137-45.

Despite excellent camouflage and camouflage discipline, stereo pairs revealed the height of the concrete position in which the CD gun was emplaced. The photographs taught photo interpreters not to rely solely on the best sortie of a strategic area, but to study thoroughly all differences in terrain as revealed at different dates. It is of utmost importance that aerial photographs of strategic areas be obtained at an early date and at frequent intervals thereafter for comparative studies. Low stereo obliques of beach areas were excellent in uncovering camouflaged beach positions.

Operational maps, including contours and terrain features, were made from aerial photographs where there were discrepancies occasioned by absence of ground control. The extremely rugged terrain was not portrayed on the contours of the situation map. Depth of draws and ravines was hidden by tall trees, and stereo comparagraphs could not determine heights beneath this vegetation. This resulted in little more than a general picture of the terrain for unit commanders. These limitations serve to point out the need for vectographs or some type of three-dimensional picture covering the area assigned to each tactical commander.

(At this point in the Exhibit two photographs appear, as follows:

1. Photograph showing Casemated CD Guns over East Boat Basin, Iwo Jima.
2. Photograph showing U. S. Marines blowing up a cave harboring Japanese snipers on Okinawa.

The foregoing material will be found reproduced as Items Nos. 285 and 286, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

[33]

#### OKINAWA DEFENSE DOCTRINE

The situation facing U. S. troops poised for assault against Okinawa appeared to be a formidable one. From seven to eight possible centers of resistance were believed disposed within the immediate area of the proposed zone of action. Photographs revealed prepared defenses around Katchin Hanto on the east side of the island sufficient to indicate a regimental position.

But an agreeable surprise was in store for us. By the evening of the initial landing day our forces were approximately two days ahead of schedule. Fortifications overlooking the Hagushi beaches had been abandoned. Yontan airfield, reputed to be one of the best in the Pacific, had been left practically intact. Antiaircraft emplacements either had dummy guns or were empty. In a sense, the enemy handed U. S. troops their primary objective on a silver platter.

This new "tactical reasoning" on the part of the Japanese could not be explained immediately. However, a recent report from the III Phil Corps clarifies the enemy's failure to oppose our landing.

In previous operations, it is pointed out, the enemy defended his important beach areas and airfields with the utmost tenacity, withdrawing to a final defensive line only when he was driven from his forward positions. On Okinawa the Japanese were forced to deviate from such a course because they had insufficient troops available for defense of the island. Consequently, the enemy chose the more important military installations to defend, leaving the others to be destroyed by his retreating forces.

"It is definitely known," the report asserts, "that the Japanese high command issued orders to the forces in the Yontan-Katena area to destroy the airfields should we initiate a landing in that sector. The force was then to join the 62nd Division for a defense of southern Okinawa.

"This indicates that the enemy did not intend to make a concerted stand in the Yontan-Katena area. Instead, he chose the narrow approaches to southern Okinawa where he could concentrate all his defenses in depth and employ the minimum force necessary to halt a further advance. The extensive network of dummy and unoccupied positions in the area further substantiates such plans."

A captured document sheds additional light on the Japanese tactical plan for the defense of other islands in the Nansei Shoto. The document refers to the "Okinawan Type of Defense" as the plan to be followed.

"From an analysis of this document," the report points out, "it would appear that the so called 'Okinawan Type of Defense' is a definite tactical plan or scheme of defense approved by the Japanese High Command. Its primary purpose is the conservation of manpower. Important beach areas and even airfields are temporarily abandoned while the main defense line is held in force.

"This main defense line is organized in depth and makes maximum use of terrain consistent with the size of the force and frontage to be held. It is so designed to enable the defenders to fight a long 'war of attrition', denying the invader use of [34] captured installations."

The enemy's appreciation of terrain and tactical use of weapons on Okinawa was excellent, the report states. First line defenses were prepared on forward slopes where automatic weapons were emplaced. Flat trajectory fire was utilized to its maximum extent. During bombardment the Japanese moved back to prepared defenses on the reverse slope, reoccupying forward positions when the bombardment lifted.

When forced from forward positions, the enemy withdrew to the crest of ridges, from which plunging fire was delivered on advancing troops. Once dislodged from the ridges, he continued his defense in fortified positions on reverse slopes.

Other Japanese tactics, it is pointed out, differed little from those encountered on previous operations. They included night infiltrations, raiding parties, wire cutting and miscellaneous harassing actions.

"The term 'organization' is complimentary to enemy units encountered by the III Corps," the report states. "Miscellaneous air and ground units were thrown together in last-minute confusion and in practically no instance did they carry out the duties assigned them. The lone exception to this was the organized resistance on Motobu Peninsula."

According to the report, Japanese equipment was lacking in quantity. This is substantiated by a 32nd Army order of 23 March 1945 to the 1st Special Infantry Regiment which read: "In view of the limited amount of equipment available, each unit will utilize what it already possesses and devise methods to increase its supply of equipment."

Consistent with the order were various POW statements referring to bamboo spears and hand grenades as the only weapons issued many of the labor troops. These poorly equipped labor units, according to POWs, were nicknamed the Bimbo Butai, or "Poor Unit."

The Japanese made extensive use of Okinawa natives in various branches of the service, and it is assumed that all able-bodied Okinawans were subject to service as reservists.

A captured dispatch dated September 1944, written by the commanding officer of the 24th Division, states: "Reservists can be employed as army troops and with their main strength carry on diversionary (raiding) warfare. They also can be employed to work in rear areas as replacements for front line troops, or in such duties as collecting intelligence, security, guarding and liaison. Care should be taken that the execution of these (training) plans will not seriously interfere with making a livelihood. Such things as arms and uniforms are not specially provided Guard Units (reservists). Therefore, the commanders will use available equipment."

(Two sketches made from a document captured on Okinawa, revealing the organization of "fire points" will be found reproduced as Item No. 287, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

#### [36] ENEMY CRITICISMS OF OWN ARTILLERY MANEUVERS

Weakness in their own artillery training were described in a Japanese critique of maneuvers held on Iwo Jima before the Allied landings. Details were set forth in a document captured on the island and translated as CINCPAC-CINCPAC Item No. 4569.

Colonel Kaido, who commanded the island's artillery group which was made up of several units of various organizations, presided at the critique, and outlined shortcomings in training as revealed in the maneuvers.

Principal criticism was directed at gun crews who were satisfied to drop shells or barrages merely in an enemy area, and did not score direct hits on the target. Crews were warned that the ammunition supply for the defense of the island was small and there was little hope for replenishment; therefore, they must perfect their work so that they hit every target.

Faulty firing preparations were responsible for their inability to hit desired targets, the critique stated. In many cases calculation of firing data was incorrect and corrections were inaccurate, obstructions to aiming instruments were not cleared away, sighting and aligning points were improperly chosen, and guns which should have fired in battery frequently missed the signal and fired singly. Furthermore, mortar base plates were not firmly embedded, it was said.

Another weakness mentioned in the document was the poor discipline shown officers and men alike during maneuvers. Incidents were brought to light in which gun crews received orders from battery commanders and then acted independently in carrying them out. Liaison suffered because subordinates refused to obey orders from superiors, and many of the officers "lacked spiritual power and bravery, and were unsatisfactory in dress, physical bearing and command."

Several gun squad leaders were unsatisfactory, failing to exhibit proper leadership. Others were said to have stood around their guns like spectators while firing was in progress.

In other instances, squad leaders made errors in firing because they had failed to establish liaison with the platoon commanders. Some squad leaders failed completely to give firing orders, did not understand the method of handling the

gun or how to change from direct to indirect sighting, nor could they direct the fire of the gun or properly designate targets to be brought under fire.

In the Japanese Army, a noncommissioned officer in charge of artillery observation has many duties. Primarily, he must be able to take over the duties of the fire control platoon commander, or even the company commander. He must reconnoiter the enemy situation, calculate some of the firing data, and spot artillery bursts.

Personnel performing this function during the Iwo maneuvers lacked experience and most of them were unaware of their duties. Observation suffered. During actual firing of problems, reports were sent in from observers concerning enemy targets and spotting of bursts without any previous check by noncoms in charge.

[37] Signal NCOs received their share of blame in the critique: "Most of them just stood around as onlookers, leaving liaison to subordinates. They were inexperienced, deficient in their sense of responsibilities, and did not understand their duties."

If a hitch occurs in Japanese artillery liaison, it is the duty of the Signal NCO to go to the scene and take charge. In event of a complete breakdown, he must re-establish contact by previously-arranged methods.

Attached NCOs without specific duties must be given work such as forwarding reports and acting as messengers. They should not, says the report, be allowed just to "sit around putting logs on the fire."

Apparently platoon leaders spent considerable time in dugouts receiving orders from company commanders by telephone or messenger and transmitting the orders to subordinates in a like manner. It was noted that too many of them failed to acquaint themselves with the targets, reconnoiter objectives and determine methods of fire. They delegated these responsibilities to the noncoms. They lacked knowledge of the various duties of the NCOs and many of them knew little of the equipment they were using.

Additional drill on command and technique of fire, was threatened for those officers who "do not call out the sensing of bursts, who deliberate over what to call the sensing, who issue commands slowly, make mistakes in commands, bury themselves in handbooks and firing tables, or busy themselves looking through telescopes".

(A photograph of an open site for a Type I 47 mm. Antitank Gun recovered on Iwo Jima will be found reproduced as Item No. 288, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

[42]

### FLAK OVER JAPAN

During the first ten months of sustained air operations over Japan antiaircraft fire, while considerable, did not prove as extensive as had been anticipated. As a result of greater concentration of fire power and increasing experience, however, the enemy AA is already improving in both accuracy and intensity.

An analysis of operations extending into May 1945 reports that over cities and industrial areas the fire seemed to come principally from heavy AA guns. Defenses in those areas apparently were designed to combat heavy bombers operating at high altitudes. Airfield defenses, however, in anticipation of low-flying attacks by lighter aircraft, have been characterized by a preponderance of medium and light AA weapons.

Search and fire control radar have been employed with varying success. Accurate tracking by searchlights has been reported in several instances by B-29s. On some occasions, however, after picking up targets and passing them for several seconds successfully from light to light, the searchlight defenses seem to become confused. In other instances, pick-ups were made only after searching, probably indicating the use of sound locators rather than radar. Most accurate of the searchlights were those aboard ships in Tokyo Bay.

Planes illuminated by searchlights were fired upon; those which were not illuminated usually escaped attack. Apparently AA batteries at night are restricted to firing at lighted targets, although it is known that gun-laying radar sometimes is used. Such radar is generally employed with heavy batteries in industrial or other built-up areas. Comparatively poor results with such fire indicate either inferior performance of equipment or effective radar counter measures on the part of attacking aircraft.

The Japanese early warning system is based on the ubiquitous picket boat, land-based radar and visual observation station. Detection by boat crews apparently is either visual or aural, with the warning to the home islands being CW (continuous wave) or by voice, if urgent. Picket boats are generally well equipped with AA medium and light weapons.

In addition to the normal land-based defenses, Japanese are employing various types of supplementary weapons. In harbor cities, ship-based AA usually contributes to the defense of the area. In such cases, the volume, and generally the accuracy and range of AA fire is increased greatly. Vari-colored bursts are generally indications of naval AA fire. Rockets, "balls of fire", phosphorous

projectiles, balloons towed by aircraft, and other novel devices have been used, but none of these has resulted in any appreciable damage to attacking planes.

More complete analysis of Japanese AA defenses and the operational significance of such defenses have been published in Flak Intelligence Memorandum No. 6, entitled "Flak Over Japan". (CINCPAC-CINCPAO Bulletin No. 127-45).

[43]

#### AA FIRING BY HEAVY NAVAL GUNS

Additional evidence that the Japanese are employing the heavy guns of battleships and cruisers as antiaircraft weapons is contained in a notebook captured and translated as CINCPAC-CINCPAO Item No. 12,170. The use of such guns for AA purposes has been reported previously by naval aviators who have encountered major units of the Japanese fleet.

In late December operations one of our patrol bombers picked up the enemy task force which had shelled Mindoro the day before. With radar control, the bomber let down through the overcast to within eight miles of the Japanese force and broke out on its starboard beam. The task force showed little concern until the plane got within six miles, when each enemy unit started evasive action and began to circle. At this time, two of the larger ships favored the aircraft with one-half broadside each from their main batteries. No purely antiaircraft guns were fired from the force, just these tremendous broadsides of service ammunition. The search plane went off about 75 miles and returned, this time getting to within five miles before the ships broke formation and started evasive circling. Once again, the ships fired a broadside at the one aircraft in the distance. Although the air crew kept a sharp lookout, they could see no bursts, possibly because of the low visibility.

Naval fliers who attacked and sank the Japanese battleship YAMATO in April reported that antiaircraft salvos were fired at them by the main batteries of that vessel. Although the U. S. pilots reported heavy explosions nearby they suffered no damage.

The notebook captured on Saipan reflects the content of a lecture delivered by a Warrant Officer at the Mie Naval Air Group. According to the student who penned the notes: "Each and every type of naval gun is used for antiaircraft firing, including the heaviest weapons on our battleships." Initially, percussion-fuzed projectiles were used in an effort to bring down hostile aircraft, but the obvious ineffectiveness of such shells prompted the development of a special time-fuzed projectile. The notes mention the "Komochi Dan" shell as an example of this type round.

The student made no claims as to the actual ranges at which the heavy guns conduct AA fire, but listed the following classes of ships, showing calibers and ranges:

|                  |                    |               |
|------------------|--------------------|---------------|
| 36 cm (14.1 in.) | ISE Class (BB-XCV) | 35,000 meters |
| 20 cm ( 7.8 in.) | NACHI Class (CA)   | 27,800 meters |

Of these ships, two of the ISE Class, the ISE and the HYUGA, and two NACHI Class cruisers remain.

The student had little to say about methods of fire control except for a vague reference that "the first step in firing is to set the sight for a range of 10,000 meters." This is thought to refer to local control sighting apparatus. The notes add that "four rounds per gun are available for firing at an airplane flying in to bomb and since the NACHI has ten guns, forty rounds can be fired. However, since this will not bring the plane down, we use a method of firing now to bring the planes [44] within a barrage." Just how this is accomplished is not indicated, but in the absence of AA directors, barrage fire is the only feasible type of fire control to be employed by such guns.

In the case of the patrol bomber the ships may have been attempting to "bring the planes within a barrage," as discussed in the notes, either with service ammunition or perhaps with shrapnel rounds which burst far beyond the target aircraft.

The employment of main batteries, particularly of cruisers and destroyers, against aircraft is certainly practicable provided proper time-fuzed high explosive or shrapnel projectiles are developed. So far, this Japanese unorthodox use of main batteries has not proved very effective against our aircraft. It has startled air crews who suddenly find themselves among flak bursts while still miles from the nearest source of AA fire.

## AIR COMBAT NOTES

In a recent night interception, a BETTY was observed without exhaust patterns, indicating that the Japanese may have developed an effective exhaust flame damper. Another BETTY vectored by two F6Fs demonstrated excellent evasive action by spiraling in dives, changing air speed radically, changing course and using cloud cover. At the same time, the enemy confused the radar scope by effectively dispensing "window". The armor and damage control were good, judging from the plane's ability to evade fighters, even after taking damaging hits.

Jettisoning of burning objects by Japanese night fighters, presumably to create the illusion of a "plane destroyed", has been reported. By the use of such tactics, the Japanese apparently hope to escape or maneuver for a more favorable attack position. Such deception is not new with the Japanese. As early as 1943, it was reported that enemy pilots, under attack by U. S. interceptors would dive and, at the same time, release black smoke from the nacelle to create the illusion of a fatal hit.

A ZEKE hit several times in a recent action continued straight ahead on the water, without taking evasive action. An F4U following saw the ZEKE strike the water four or five times, each time bouncing up and regaining flying speed. Finally the F4U scored hits and exploded the ZEKE.

An Avenger pilot on a night patrol over Okinawa spotted a bogie, and diving, expended all his ammunition without success. Not wishing to lose his prey, the Avenger pilot turned, engaged the enemy with rockets, and shot the wing off the Jap plane. Two of three rockets fired scored.

[45]

## 11TH YEAR TYPE 12CM CD GUN

Eleventh Year Type 12 cm coast defense guns encountered on Luzon and Iwo Jima are believed similar to other types of 12 cm dual purpose and coast defense guns used by the Japanese. Many of these have been naval guns converted for use on land.

The bore characteristics of the 11th year type are identical to those of the 3rd year type 12 cm 45 caliber coast defense gun. Both have a maximum range of approximately 13,000 yards and a maximum muzzle velocity of about 2,090 feet per second when fired with a full propellant charge. Semi-fixed ammunition is used. Besides the HE projectiles with time fuzes recovered, documents mention a "Star" and practice projectile. Fuzes prescribed include the 5th year type nose fuze modification 1, a Type 92 fuze, and another 30 second time fuze.

The recoil tubes, two above and one below the barrel in contrast to the usual three above, simplify identification of the weapon. The breech block, although of the familiar hand-operated horizontal sliding type, does not pass all the way across the breech ring. The slot in the rear of the breech ring is cut in keyhole shape. This saves weight but increases the difficulty of loading.

The gun is of the built-up type with uniform right-hand rifling. It is mounted on a rectangular upper carriage. Its conical base sometimes may be imbedded in a rock foundation. Elevation control is on the left of the piece and traverse on the right with appropriate scales on the sides of the gun. Both the elevation and traverse operators were provided with 15 power, 4-degree sights and had speaking tubes for communication. Besides the normal range scale, a range correction scale is at the left of the piece. It is believed an operator is employed for each, with the elevation handwheel operator normally firing the gun. Firing also may be accomplished by a lanyard attached to the right side of the breech block.

(At this point in the Exhibit, there appears a photograph of a front view of a Japanese 45-caliber Post Defense Gun on Luzon. This photograph will be found reproduced as Item No. 290, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

The guns recovered on Luzon were manufactured in March 1944 by the Sasebo Naval Ordnance Depot, and it is possible that these 11th Year Type weapons were made to replace the well-known 3rd Year Type 12 cm CD guns.

Both on Iwo Jima and on Luzon, the guns were found in casemated positions and could not be elevated above 25 or 30 degrees. The fields of fire were limited by the firing slits to about 60°. On Luzon the emplacements were oval-shaped, 15 feet wide and 30 feet long, and constructed of coconut logs covered by earth.

On Iwo the emplacements were concrete casemates. Information on this weapon has been collated from reports of Iwo Jima observers, from the 5250th TIC Company and from Item B-3833 which appeared in CINCPAC-CINCPOA Translations and Interrogations No. 25.

Condensed data on the gun follows:

|                                       |                |
|---------------------------------------|----------------|
| Bore diameter.....                    | 120 mm.        |
| Overall length of gun.....            | 18 ft. 3¼ in.  |
| Length of tube.....                   | 17 ft. 3¾ in.  |
| Length of rifling.....                | 14 ft. 8½ in.  |
| Number of lands.....                  | 36             |
| Length of upper recoil cylinders..... | 4 ft. 7 in.    |
| Length of lower recoil cylinder.....  | 2 ft. 5¼ in.   |
| Max. elevation (scale reading).....   | 50 degrees     |
| Max. depression (scale reading).....  | 10 degrees     |
| Transverse.....                       | 350 degrees    |
| Diameter of lower carriage.....       | 4 ft. 2 in.    |
| Height of gun.....                    | 6 ft. 11 in.   |
| Maximum muzzle velocity.....          | 2,090 ft. sec. |
| Maximum range.....                    | 13,000 yds.    |

(Two views showing the mechanism of a Japanese 11th Year Type 12 cm. Gun located on Iwo Jima will be found reproduced as Item No. 291, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

#### RIFLE GRENADE LAUNCHER

(A photograph of a large Spigot-type Grenade Launcher will be found reproduced as Item No. 292, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

A new, spigot-type rifle grenade launcher which is slightly larger (27 mm. in diameter) than the previously encountered type has been recovered in the Philippines.

This launcher may be used with both 6.5 mm. and 7.7 mm. rifles. From its measurements it was found by the 5250th TIC Company that Type 3 high explosive and incendiary rifle grenades might be fired from this launcher. It is likely that the smoke rifle grenade and Type 91 grenade with spigot attachment also may be fired. (For description of grenades see CINCPAC-CINCPOA Bulletin 135-45, Japanese Grenades).

The new launcher differs also in method of attachment to the rifle. To attach, the knurled sleeve is unscrewed to allow the two prongs of the adapter to slide and catch on the rear of the front sight mount. The sleeve is then tightened, locking the prongs in position behind the sight mount. Two smaller projections fit around the bayonet lug to increase stability.

(A photograph of a Japanese Improvised Armored Car captured in the Philippines will be found reproduced as Item No. 293, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

#### PRODUCTION OF INTELLIGENCE MATERIAL

Production of intelligence material in support of an operation invariably strains available printing and reproduction resources. An intelligence activity cannot be judged solely on the quantity of output, nor are there any figures that would represent the total efforts of all hands. The figures here presented are only for the maps produced by Army Engineers and distributed through JICPOA, and the JICPOA production of photographic prints and printed intelligence material. When it is realized that in the periods considered, much more material was originated and distributed by other agencies, the magnitude of the task can be appreciated.

Assault maps, bombardment charts and air support maps produced in the Central Pacific Area since the Gilbert Islands operation in November 1943 totaled 8,375,776 sheets weighing 354.2 tons. The volume for each operation has risen steadily, from 8.7 tons of material for the Gilberts to 121 tons for the Okinawa campaign. Tonnages prepared in this area alone for each major Pacific operation are shown in an accompanying graph. It should be borne in

mind that much additional material in this category, such as air target and shore bombardment charts, was prepared elsewhere.

Printed and mimeographed material in the year beginning 1 June 1944 amounted to 72,909,000 sheets weighing 729 tons. (The standard printed sheet such as that used in "Weekly Intelligence" carries a total of eight pages—four on each side; mimeographed sheets carry two pages). Peak printing load for the year was during the week of 27 January, when 5,200,000 sheets were printed.

The greatest production increase was in the photographic field. The number of contact print turned out jumped from 59,365 in the first quarter of 1943 to an estimated 3,000,000 (weighing 78.75 tons) for the second quarter of 1945. The principal increase occurred after inauguration of aerial reconnaissance flights over Japan and nearby areas, with resultant preparation of mosaics.

(At this point in the Exhibit, three items appear as follows:

1. Two graphs, one illustrating quarterly production of contact print photographs and the other illustrating production of maps and charts for major Pacific operations.
2. A graph illustrating the monthly production of printed and mimeographed intelligence material for the Central Pacific area, 1 June 1944 to 31 May 1945.
3. A photograph showing fire bombs being dropped from B-29's on Yokohama.

The foregoing material will be found reproduced as Items Nos. 294, 295, and 296, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

---

Re your (claim?) of last year 1475 I am telegraphing increased amt of 3310 yen gov't expenses from private fund.

Togo.

From: Harada

To: Foreign Minister, Tokyo.

1. The lower classes who were rounded-up in the recent drive were leaders of the subversive party, and it is only natural that Thailand, at a time when rumors have been rife and in spite of the fact that it looked like the work of spies, should put the blame on the Japanese.

2. The problem goes deeper than just the dual-nationality question, and enemy sympathizers of whatever nationality have had to be controlled. All the more so when you consider the Tailanders who have become Japanized, and it would set a bad precedent if these were treated like the cases of those who made a trip some time ago for Mitsubishi. Since there remains the smirch of the Mitsubishi incident, I plan to carry out a thorough investigation.

28 JAN. '42.

From: Foreign Minister, Tokyo #038 (Re yr msg. #061).

To: Minister, Saigon.

Re the victory celebration to be carried out upon the fall of Singapore including \* \* \* to be presented to the throne, decided upon in the special diet on 19 January I desire (these) details carried out in a suitable manner.

1. The celebrations will be completed by sunset on the day of the triumphal entry into Singapore (This day will be published by the information bureau).

2. From the day of the fall until the day of the celebration the national flag will be flown at every door.

On the day of the ceremony

(a) Before noon get all the citizens out doors and commemorate the day with stories of the imperial army and spirits of the departed. After the Prime minister's broadcast (#43) tell stories to the children.

(b) Have Shinto & Budhist temples conduct "reporting the fall" ceremonies and fan, water sprinkling and prayer ceremonies.

(c) Carry out primary school sightseeing (trips) celebration ceremonies by junior organization. Have military doctors comfort families; worship at shrines, drinking contests, athletic meets military contests, military music. (Emphasize) the savings and other national policies.

Furthermore there are no objections in carrying out these ceremonies, if in addition to cooperating with affiliated organizations which celebrate according to local circumstances in China and Manchuria, as long as they do not result in confusion, if you take any suitable measures avoiding such things as impairing industrial output, wasting funds, injuring air defense and carrying on lantern and flag parades.

Togo.

In relation to your despatch numbered 842 there is no objection to handling the Belgium Embassy's—despatch—in the same fashion as an enemy countries despatch. In Japan no special disposition is being made for Belgians nor Belgian interests also in China in the cases when the necessity of taking special methods in order to preserve — of your secret message — there is no objection to using same type of handling as for an enemy country.

In relation to method handling banking, gold silver deposits etc.

From: Chefoo.

To: Tokyo.

JAN 20.

As follows: (KYU BA) May mean emergency,—emergency code?—or may be the first in the list of names of countries appearing in this message.

The message is impossible to translate as it is. However, it should be taken in connection with #674A, which shows a similar list of names of countries with varying letter groups after them. We may have here a new code in use, or possibly the suggestion of new code groups to be used for the countries in future—the latter, however, seems pretty crude.

In connection with the former suggestion, should we not consider #635A, which seems to call for a new code to be put in use on January 20th., the date of this message?

RSS.

Your wire No. 160 says, "Official Yoshihara of Kalgan has been ordered as from the 6th to take a post at DAIYA. Please have him leave immediately". Is this not a mistake? Please investigate and reply immediately.

1254 A

From Tokyo (Urgent) #174 to Peiping.

MARCH 9.

With regard to our wire #718 of last year.

1. Regarding the elevation of the status of Settlements, those who have MOSU SEI KOSHI (Note: Might not SEI, which follows MOSU in other parts of this message also, be something else, such as IDE? The only translation which would fit the context in any way would be "Voice" so that MOSU SEI KOSHI would be "sent in their voice" i.e., "reported") are as follows. If the arrangements of all the offices are completed, we expect to put the establishment (of elevation of status) into effect on the 1st of April. Although we have received reports direct from the chiefs of the branch offices of Paotao and KAISHUU, we should receive reports from KOOWA and JYONI, so please arrange to have these reports in first.

2. With regard to governmental orders; in the case of colonies only, it will be alright to put into effect the completion of organization, in line with previous experience, and after sufficient leadership.

3. With regard to the desires of making the Settlement Chief's position an honorary one, especially bear in mind the relationship with Article 69 of the Regulations of Establishment. SPECIAL CODE by way of assurance.

1. HOTEI (Settlement Chief System; however, honorary position)

2. KAISHUU (Council System) No report from JOSHUU Consul.

3. TAAKU (Council system) DENPOO Consul General has sent report.

However, no report regarding governmental order.

4. TYOOTEN (Council system) Report received from Tsinan Consul General.

5. KOOWA (Settlement Chief System, Salaried) No report concerning governmental order.

6. Paotao (Settlement Chief System, However, honorary) No report from KOOWA Consul General, therefore, also no report regarding governmental order.

MARCH 9.

From Peiping # 229 to Tokyo.  
Regarding your message # 157.

Because of the phenomenal rise in price of building materials, an additional amount of approximately Yen 10,113.70 (for building materials) Yen ----- 805.30; making a total appropriation\* of Yen 35,919.00 which will be necessary or else the work cannot be completed, we are informed by the workmen. This situation here makes the (increase) unavoidable. Wherefore, we request that the difference amounting to Yen 8,212.50 may be sent as a supplementary appropriation. In case this seems, upon consideration, difficult, we will have no recourse (here) but to reduce the amount (of the building) SPECIAL CODE.

# 1260 A

RSS

\*There seems to be something lack, or in error, in the figures, as they do not work out properly. The message does, however, indicate something of the difficulties being encountered by the New Order in a rapidly rising cost price.

MARCH 9.

From Peiping #220 to Tokyo.

Circ. #170 to Nanking. Shanghai.

With regard to our wire Extra No. 56.

The various offices concerned with the establishment of Settlements have carried out temporary enactment, and there being considerations to make in connection with this, it is desired that arrangements be made to MAI BIRO (?) the rules and regulations. Further the newly established Settlements are Paoting, Shanhaikwan, Tanshan, KOOWA, Paotao, Haichow, TYOTEN, Tangku, SINGOO, Chefoo and Kaifeng, totalling 11.

Further, the matters in the rules, which are short of those necessary towards putting the matter into effect, (which must be known with regard to putting the matter into effect) are 1. To put into effect on April First. 2. The book of names which is to be built up for the first (election) will be built up by the 15th of that month in accordance with the rules of February 1st, 1943. (In article 83 of tax regulations; the first period levy, 6 months from the end of July, of the business tax; those having paid income taxes for this period will have votes by virtue of their having paid a business tax. Therefore, ----- elections are not to be held ----- will be alright. 3. In respect to the establishment of colonies, the directors of the colonies will be appointed by the consuls and their period of service will be until there is an election which will take place in accordance with regulations. The question of whether or not these three points are necessary is being considered.

(NOTE: It is believed that SHOWA ZYUU 8 NEN, 1943 in above message might be a mistake for some previous year)

MARCH 12.

From: Tokyo. #191 to Peking  
#021 to Shanghai Ambassador

With regard to Settlement Chief, Settlement System, and the selection of people (officers?) of the settlement and their treatment (salary, housing etc.), please bear in mind the following and instruct appropriately SPECIAL CODE by way of assurance.

1. The Settlement Chief system will be applicable only when an appropriate person is being obtained for the settlement. Therefore, the settlement chief will be thought of as a principle, and to hurry the selection of people for the settlement will be considered wrong.

2. The settlement chief, without regard for whether he is salaried or honorary, in connection with the business of the settlement, (based on the ----- restrictions of Article 69) will take full responsibility with respect to the failure of business. Therefore, a spare time settlement chief is wrong.

3. With respect to the Chief of the Settlement and the other leaders, the character, the insight, etc., will be considered seriously before selection; the treatment (same as above) also, it is considered, should not be considered merely from the budget but should be arranged from considerations of the status, (rank) of the settlement (set by the government) and the candidate himself (it is understood of course that the amount of payment made must not be too much). (Because of these considerations), the chief of the settlement, his assistants and directors and the treatment of these ---- should be, it is considered, arranged after your approval is given.

4. Further, with regard to Settlement Chiefs, their assistants, and directors, consideration is made of the future changes in personnel, and it is desired that arrangements be made in such a way that people will serve the settlements for long periods.

MARCH 9,

From Canton #195 to Tokyo. Circ. #069 to Peiping, Nanking, Shanghai.

Regarding my message #182.

In view of the fact that the Army authorities here report having recently received orders from headquarters (Tokyo), we have been pressing the study of a definite plan for caring for enemy aliens living, and causing them to do their cooking for themselves jointly, in order to reduce the cost of living, and we have been making preparations as far as was possible, to carry this out in accordance with your message of December last, 4th and following columns (or lines), and especially in accordance with column (or, line) 1 and the upper (or, former) part of column 4 (or, line 4). However, the Army's proposition is something approximating internment, which we feel is unfortunate (literally, not interesting). In general, we have expressed our opinion that enemy aliens (with the exception of those subject to exchange) should be encouraged of their own accord to form groups, and thus to bring down the expense of living for each individual. This is sent to keep you informed.

## 1188 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

MARCH 10.

From Nanking Minister #266 to Tokyo; Cir. #146 to Hsingking, Canton, Hankow and 1 other.

Chunking Broadcast (8th).

1—The United States is dispatching a commission to New Delhi to offer encouragement in the matter of the protection of India and the construction of a route for transportation of supplies to China. This information comes from a source with direct contact with the White House.

2—The Chungking government has dispatched their Minister to Turkey, Choo I Shun (instructions how to write in Chinese characters) to Iran to conclude a treaty of commerce, and also to arrange for the exchange of ministers.

3—According to a dispatch from Angora, the former United States Ambassador to Moscow, Steinhart, called upon the Turkish Foreign Minister on the 7th., and the call lasted for more than an hour; moreover, - - - - - TAI MI, German Ambassador, is reported to be returning to his country for consultation with his government.

4—Chiang Kaishek held a long conference with the British Ambassador on the 7th.

5—After the arrival of the visiting commission, Chiang Kaishek will organize through the Burmese Cultural Society for the observance of a Burma Day, on the 8th., when the British Ambassador, Go Tetsu Jō, (Wu Tieh-cheng), Ō Bun Kō (Weng Wen-hao), and TIN KA FU (Chen Kuo-fu), are to broadcast to the Burmese people.

Peter Hansen, a citizen of Germany, resident here, (at present 62 years of age), in charge of the Yale students abroad of the Peking TOO SOO FU KO DOO HEI 6 ZYUU GOO believed to be the name of institution, Possible, P(eking U(niversity) M(edical) C(ollege) "with an average of about sixty students ?) has expressed the request that we confer with the Home Office and secure a visa that he may attend a meeting of the Yale Students Abroad, to be held in the building of the K. K. Laygold Company, Kyoobashi Ku, Tokyo City. We request that you will send us instructions in reply by wire.

#1258 A

MARCH 8.

From Peiping #221 to Tokyo.

Regarding my message # 220

In the case of the new organization of a settlement in any Consular area or subconsular area, the head of the mission has according to the fifth article of the rules, met with the consul and (carried out) the GAITOO JIKOO (literally, applicable items) appropriate items of the detailed regulations, and has been accustomed to appoint the members of the settlement governing body of their first meeting. There is some doubt here, however, as to whether this method of handling is acceptable, and so we request your wired instructions in reply.

# 1259 A

RSS.

MARCH 7.

From Nanking #276 to Peiping; Circ. #2450 to Tokyo. Hsingking. Canton.

Chunking Broadcast (10th).

1. Chiang Kai Shek spoke, in general, as follows at the gathering of CHU SUU KI NEN (CHU is probably for CHUGOKU to mean China, but it is not known what the SUU might be. KINEN denotes anniversary or memorial, but contact with several Chinese in Honolulu failed to produce any knowledge of an anniversary on the 9th.) on the 9th.

"During my visit of half a month in India, I received a hearty welcome from the Indian government and the Indian people. China and India are in agreement with each other (?) and are great countries. With the nobility and the leaders of India, I had meetings at which our hearts were opened and the people have been inspired into cooperating with each other mutually and without regard for party or faction. The Indian government too, has now decided to

fight. I hope that England will give political freedom to India and that the power of anti-aggression might be thus strengthened. The idea that India should be proud of China's 5 year fight has been conveyed to the Indian people, and a recognition of our country has been brought to them sufficiently. I believe firmly that should Japan invade India, India will have the ability to destroy Japan.

2. On the afternoon of the 8th, Chiang Kai Shek met the Minister from Holland and a (military) Attache (under said minister) and also the Australian Minister (Igston).

To: Minister Saigon.

Re the victory celebration to be carried out upon the fall of Singapore including - - - - to be presented to the throne, decided upon in the special Diet on 19 January I desire these details carried out in a suitable manner.

1. The celebrations will be completed by sunset on the day of the triumphal entry into Singapore (this day will be published by the Information Bureau)

2. From the day of the fall until the day of the celebration the national flag will be flown at every door.

On the day of the ceremony—

(a) Before noon get all the citizens out doors and commemorate the day with stories of Imperial army and spirits of the departed. After the Prime Minister's broadcast #43 tell stories to the children.

(b) Have Shinto and Buddhist temples conduct "reporting the fall" ceremonies and fan, water sprinkling and prayer ceremonies.

(c) Carry out primary school sightseeing (trips) celebration ceremonies by junior organizations. Have military doctors comfort families; worship at shrines, drinking contests, athletic meets, military contests, military music (Emphasize) the savings and other national policies.

Furthermore there are no objections in carrying out these ceremonies, if in addition to cooperating with affiliated organizations which celebrate according to local circumstances in China and Manchuria as long as they do not result in confusion, if you take any suitable measures avoiding such things as impairing industrial output, wasting funds, injuring air defense and carrying on lantern and flag parades/

HARADA.

28 JAN 1942.

From. Harada #012 (Re your msg #431).  
To: Foreign Minister—Tokio.

----- 1. The lower classes who were rounded up in the recent drive were leaders of the subversive party, and it is only natural that Tailand, at a time when rumors have been rife and in spite of the fact that it looked like the work of spies, should put the blame on the Japanese.

2. The problem goes deeper than just the dual-nationality question, and enemy sympathizers of whatever nationality have had to be controlled. All the more so when you consider the Tallanders who have become Japanized, and it would set a bad precedent if these were treated like the cases of those who made a trip some time ago for Mitsubishi. Since there remains the smirch of the Mitsubishi incident, I plan to carry out a thorough investigation.

JAN 21.

From: PEKING.

To: NANKING, SHANGHAI, CANTON, HSINGKING.

News from Yen-an-Fu (Communist Headquarters)

. . . Chungkings broadcast (says that) taking example from the Axis strategy of attack, the Allies received the suggestion that an immediate attack upon Japan should be attempted. The Yen-an-Fu Kaiho Nippo (writes) already in point of fact we are Allies with Britian and the United States. The war against Japan is nothing more than a screen, this war merely offering an opportunity for the Anglo American front to develop another attack upon the Axis Powers, which is something we should find it important to realize at this time. Among the Axis Powers, the most important is Germany, and the harming of Germany is the main purpose of the world wide strategems. That is to say, taking advantage of the crisis in Germany is, as a craft (strategem) the expansion of the line of operations on the continent is most important. The importance of the war in the Pacific to the British and Americans is clear, and the Imperial Command for China in this connection is the pressing of war against aggressor nations regardless of consumption (of materials) and the overthrow of Hitler will be victory for China (?) so at the present time cooperation with the Allies plus the greater and greater extension of the polley of long time resistance, is the method of hastening the total victory of those opposed to the Axis Powers. . . . This is the attitude which the paper (Kaiho Nippo) explains.

---

19 DEC. 1941.

130A

From: Peking.

To: Nanking, Shanghai, Hankow.

Yenan-Fu report. . . .

The official newspaper of the Chinese Communist Party Kai Ho Niti To (Kaiho Jih Pao) in the editorial on the 13th said that Japan's purposes in the present war are to incite peoples of all of the South Seas areas in order to secure the resources (of that area), expel British and American Interests - - - act in union - - - Germany and Italy - - - to increase her power. Japan's southward advance is, at

the same time, the strengthening of the policy of encircling southwest China, and also of grabbing the Pacific, and is truly inseparable from the China Japanese war.

On this critical occasion you(?) must calmly build up a battle line of all anti-Japanese parties of the Pacific countries. All of China military forces must attack actively; together with this the 8th route army, and the new fourth army must open up Rokoho opposition, begin a counter action against border friction, stirring up the Chinese people of the South Seas against the Japanese. Make most important duty of stirring an anti-war feeling among the people of Formosa, and strengthening the plans toward carrying this out.

(Funada).

100 A

DEC. 18 0443.

From: Buenos Aires.

To: Tokyo.

Today the seventeenth all local papers carried the speech of the navy minister before the Diet in Tokyo, showing great respect. (In the report of American losses) 3 battleships, a mine layer, transport, (one each?) but in addition the loss of 1 aircraft carrier, which is in the present report, seems not to have been reported, so I ask your honorable inquiry into the matter.

/s/ HORIKIRI, Japanese Ambassador.

DEC. 16.

From: Nanking.

To: Tsingtao, Amoy, Hsingking, Peking, Kalgan, Tientsin.

... regarding the rejection by the British military in HongKong of the well intentioned advice (to surrender) on the 16th the special propaganda chief made the announcement; the rejection by British of the humane advice tendered by Japan lays upon the barbarous British the entire responsibility of the exposure of a million several hundred thousand compatriots to the horrors of war. Our compatriots (?) in Kongkong Yotai notice of subjugation compatriots . . . . in line with the - - - national policy we are pushing the plans in connection with the greater Asia war in a positive manner, and at this time we appeal to you people to strive from the protection of your Asiatic country and drive out (expunge) the humiliation of your country which has been practiced by the English for a hundred years. I earnestly desire that you will work for the revival of East Asia . . . along this line he gave out his interview.

DEC. 16

From: Tsinan.

To: Tientsin, Peking, Nanking.

... in the tactics employed against the harming of the road (railroad) by the local maintenance guild, all of the Chinese living within your area (our area?) have been commandeered, materials and domestic animals have as far as possible been confiscated, and everything possible has been carried out to prevent (coiling up—the word used of snakes coiling to spring). About a month and a half have passed since the beginning of these tactics and the efficacy--- carrying out was becoming evident, then the Japan Anglo-American war began and again there are evidences that the enemy in this area are beginning to crawl about again.

The army lines of communication - - - and the regular communication systems are constantly sabotaged (it is attempted). On the night of the 9th, 10 ri (25 miles, if Japanese "ri"; 39.30 kilometers. If Chinese "li" is intended, then the distance would be 6.54 kilometers). South of Daimon Station, on the Shimo Line, an attempt was made upon the roadbed (no harm was wrought); on the - - - Kosai Line, in the neighborhood of Senshu village a freight train was wrecked; and the like. The chief in charge of the line, and the guard have been warned that in case of trouble due to carelessness, they cannot escape punishment. According to - - - Okai Sen, in that section after the local police had applied appropriate encouragement (or pressure) the conduct of the Chinese, while not showing anything which could be definitely defined, has, nevertheless, steadily shown a tendency to trust more than formerly, with the arrival of the news of Japanese victories. This information is sent for your information.

From Canton to Tokyo, Hankow, Nanking, Shanghai, Swatow and Hoikow.

MARCH 4.

With regard to your wires Nos. 133 and 400.

Although the fact of our wire No. 173 is present (Although the information set forth in our wire No. 173 are true) and although we should (eventually) have to carry on in accordance with above (information), if a request (or "petition") has to be submitted every month with respect to facility in obtaining loans as dealt with in this question, it would mean an unending series of

repetitions. Thus, it is thought that one application (or "petition") should cover at least a period of about 6 months, in order that control and business may be facilitated.

Also with respect to the beginning of your wire No. 400: the proclamation on this question has been considered in this city since quite early - - - . The leadership and organization has been towards cutting down the living expenses of enemy citizens as much as possible, but if these enemy citizens are to continue as at present, to live separately and to live under conditions no different than previous to the war, we cannot hope to limit the living expenses of these people merely by means of leadership (encouragement). In our area, (therefore) a study is being made with regard to the advisability of housing all of the enemy nationals in a definite area, of having them live jointly and of them letting them cook and eat jointly. If this is possible, the living expenses of these people will fall 100 yen per head, or 500 yen for 5 people, as reported in our wire as aforementioned (" . . . ).

#1229 A  
RSS

From: Tokyo.  
To: Hsingking.

MARCH 5.

This message, number #1230 A, is so full of lacunae that any translation seems impossible. It is one of several such messages from Tokyo to the Hsingking Consulate, apprizing them of the news that is appearing in Russian papers. There also seems to be some report of an article in the Rome Times (if there is such a paper) regarding Soviet-Japanese relations, and something about the Soviet Consulate and staff in Japan. Unless the lacunae can be filled in somewhat, re-grouping would probably accomplish nothing.

#1230 A

From: Tokyo.  
To: Canton.

MARCH 6.

Extra numeral message.

Your messages number 44, number 53, and numbers 141 and 151 being missing, we desire a clear cut answer regarding them. (Or possibly an "explanatory answer").

# 1231 A

Extra

From Kato to Telegraph Officer Homura

I believe that you have KOOHAI (probably "seen", or "your attention has been 'drawn to'") our wire No. 216 (1) (2) (or "sections 1 and 2 of our wire No. 216") and the wire addressed you (2). It is especially requested that (the action mentioned) be carried out immediately.

1249 A

funada

From: Tokyo to Hsinking.

MARCH 7.

At the time of the (meeting) mentioned in our wire No. 89 (RUNOFU, name of a Russian representative) said that he had learned of the change of the Japanese Ambassador to Russia through a newspaper article (Red Party Organ dated 4th) and that Ambassador Sato (the newly appointed Ambassador), through having been Foreign Minister in the Hayashi (General Senjuro Hayashi, Premier Feb. to May 1937) cabinet, is well known to the Soviet Side. To this, I (this officer) said, that Ambassador Tatekawa (the previous Ambassador) had, because of ill health, been desirous of returning to Japan, that the Soviet Union knows that all of the Japanese Ambassadors to the Soviet Union in the past have been first class men of excellence (this clause is some-

## 1204 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

what indefinite), that we believe that the Soviet Union well understands just where the purpose of the Japanese government lies, in having especially picked this new Ambassador who is a former Foreign Minister, a senior (old timer) in the diplomatic field, and who has a thorough knowledge of Soviet affairs, that we here, on this occasion, should calmly solve the various problems under discussion such as regular shipping schedules, TAIKA (might be "exchange", "freight accumulation" or "compensation"), petitions between Japan and Russia (?), Visas, and floating docks, and that another forward step would thus be taken in the friendship between the two countries. To this RUNOFU replied that he understood, and that everything will be done towards the solving of the problems as (his) ideas concerning them were the same as (I) had mentioned.

1250 A

funada

MARCH 7.

From: Tientsin to Nanking. Shanghai. Tokyo. Peiping. Thingtao and Tsinan

According to the Economic Weekly for the first week in March, the general situation, all commodities have a tendency of falling because of the effect on business of the doubt (distrust) of the rural (inland) areas. Cotton yarn and cloth opened with a tendency of being supported to some extent by the rural areas (probably "business inland") because of rapid and secret tendencies of speculators (?).

Rates falling: Dry goods, 44.60 Yen. Cotton Yarn (8 UMA 20 TE) 1.460 Yen. MEN FUN (perhaps "cotton waste" but from context, it is thought that this might be a mistake for MUGI FUN or MUGI KO, flour), the import of Shanghai powder (flour) is progressing smoothly, and as the CHUZAI KA (perhaps "stock here") settles down, and the movement of material stops because of low rates in the interior, the rates weaken - - - 25.903 Yen IJIRUSHI (?) 24.85 Yen. Sugar, a fall was seen because of the appearance of controlled commodities in the city towards the end of the previous week and the tendency of 1 JUN in the buying rate in the interior, Refined sugar, 235.80. Raw Sugar, 188.40. Peanuts, rates falling on both nuts and oil because of fall in Shanghai through lull in the year's exports. Nuts, 53.50 (highest on 6th) Oil, 104.90 (also highest on 6th)

1251 A

funada

Tokyo to Kalgan.

MARCH 7.

With regard to the application for a permit to establish the Association (perhaps "Corporation") of MU KYOO (perhaps a mistake for MOO KYOO, Mongolia) Engineering and Building Industries; this has been carried out temporarily in accordance with your wire, Regular No. 97 of the 5th of last month. Please reply on following points:

1. Is it necessary, in accordance with Article 34 of the Civil Law, to especially make of said corporation a Juridical Corporate Person?

2. Is it impossible to attain the objectives (of said corporation) under the rules and regulations presently followed by the League of Industries (mentioned above) (Note: Last probably means "League of Engineering and Industrial workers". Also, it might be more correct to say, in above first three lines, "the Inner Mongolia Engineering and Building Corporation")?

3. What were the characteristics of the League(s) of Mongolian Engineering and Construction companies in the past?

4. Will the League of this industry be abolished upon formation of above corporation?

5. It has been reported that the head of said corporation Fujishima arrived there and that the establishment of said corporation took place under the direction of your office; is this true? (Note The last might be a confirmation rather than a question)

1252 A

funada

From: Tokyo.

MARCH 7.

To: Hankow.

To Business Representative Takano, resident in Daiya.

The expense appropriations for your office for the current year are as follows below. These will be sent by wire to Consul General Tanaka (at Hankow?) and you are to receive them as delivered from that office. Within the organization (or, Foundation) Fund of Yen 8,000 you are to pay immediately for repairs and equipment (it being understood that expenditure for desks and desk chairs shall be according to the plan), this grant to be completely repaid within the current year.

Government expense, actual expense----- Yen 60.

Ditto, outright expense----- " 250.

Telegraphic expenses for a diplomatic office abroad, Yen 25. Expense for the Foundation of a diplomatic office abroad, Hankow office, Daiya branch office, and equipment fund, Yen 8,000.

Further, employees daily (wage) GEN 0 Yen. (Gen is probably an error for some figure) Typists within Yen 70, 11 may be employed. When appropriate people have been found, proceed on the basis of temporary action.

*Secret*

From: Commander-in-Chief, United States Pacific Fleet.

To: The Chief of Naval Operations.

Subject: Damage to Ships of the Pacific Fleet resulting from Enemy Attacks at Pearl Harbor, 7 December 1941.

References:

- (a) Cincpac Secret Desp. 072244 of December 1941.
- (b) Cincpac Secret Desp. 081015 of December 1941.
- (c) Cincpac Secret Desp. 100220 of December 1941.
- (d) Cincpac Secret Desp. 102043 of December 1941.

1. The following report relative to damage sustained by ships of the Pacific Fleet resulting from enemy attacks on 7 December 1941 is submitted. This amplifies reports submitted by references (a) to (d) inclusive:

(a) **BATTLESHIPS.**

**ARIZONA** sunk at berth as result of aircraft torpedoes and heavy bombs which exploded forward magazines. Ship is considered to be a total wreck.

**CALIFORNIA** sunk at berth as a result of hits by two or more aircraft torpedoes; also received one large bomb hit amidships which caused serious fire. Recommendations regarding salvage and repairs will be forwarded later.

**NEVADA** damaged by heavy bombs, possibly mine in the channel and aircraft torpedoes. Beached across from hospital point to prevent sinking after an attempt to sortie. Batteries intact and manned though no power is on the ship. Recommendations regarding salvage and repairs will be made later.

**OKLAHOMA** capsized at berth as a result of receiving three or more hits by aircraft torpedoes. Recommendations regarding salvage will be made later.

**PENNSYLVANIA** slightly damaged by bomb hit, starboard side of boat deck while in drydock number 1, Navy Yard, Pearl Harbor. Repairs have been completed and ship is ready for service.

[2] **MARYLAND** damaged by bomb hit on forecastle and near miss. Ship was moved to the Navy Yard on 11 December and expected to be fully ready for service 13 December.

**TENNESSEE** received one heavy bomb through turret top which did not explode, but put 2 rammers out of commission. Also one bomb hit aft which

## 1214 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

cracked one 14" gun. Heat from the ARIZONA fire melted and ignited paint in after portion of the second deck which was badly burned out. Ship is now heavily wedged to mooring by reason of the WEST VIRGINIA leaning against her. Steps are being taken to dynamite the mooring to permit the removal of the TENNESSEE. Repairs are proceeding and it is estimated that by 14 December ship will be ready for service less one 14" gun.

WEST VIRGINIA sunk at berth as result of four aircraft torpedoes and one bomb hit. There is considerable damage from fire. Recommendations regarding salvage and repairs will be made later.

### (b) CRUISERS.

HELENA damaged by bomb hit at frame 30, starboard side, opening up side under armor belt for distance of about 50 feet. Number one and two fire rooms and forward engine room flooded. Ship is now in drydock #2 Navy Yard, Pearl Harbor to effect repairs to make seaworthy. It is estimated that new shell and framing will be completed within two weeks and ship will be able to operate with two shafts and with all gun batteries in commission. It is recommended that ship proceed to Mare Island for completion of repairs to hull and machinery.

HONOLULU damaged by near miss at approximately frame 40 port side. Hole approximately 20 feet by 6 feet underwater. Ship being docked in drydock #1 today and it is estimated that work will be completed to make her fully effective by 16 December.

[3] RALEIGH damaged by one aircraft torpedo which flooded forward half of machinery plant. Also hit by small bomb forward which penetrated three decks and went out ships' side and did not explode. It is proposed to dock the RALEIGH following completion of the HONOLULU to effect underwater repairs to make seaworthy. Recommendations as to whether all repairs to make the ship fully serviceable should be undertaken at Navy Yard, Pearl Harbor or a mainland navy yard, will be forwarded later.

### (c) DESTROYERS.

CASSIN and DOWNES damaged by bomb in number one drydock, Navy Yard, Pearl Harbor ahead of PENNSYLVANIA. Bomb hit DOWNES exploding her torpedoes warheads and causing serious oil fire. CASSIN was damaged by fire and was knocked off drydock blocking and fell over on DOWNES. DOWNES appears to be total loss except for salvageable parts and materials. Recommendations regarding salvage and repairs to CASSIN will be forwarded later.

SHAW hit by bomb while docked on floating drydock. Forward part of ship and floating drydock badly damaged by fire resulting from oil and powder. After part of ship not seriously damaged. Recommendations regarding repairs will be forwarded later.

### (d) AUXILIARY VESSELS.

OGLALA sunk by aircraft torpedo and near miss by bomb at ten-ton dock at Navy Yard, Pearl Harbor. Recommendations regarding salvage and repairs will be forwarded at a later date.

UTAH damaged and capsized as a result of hits by aircraft torpedoes. Recommendations regarding salvage and repairs will be forwarded later.

CURTISS damaged by enemy plane out of control which flew into crane mast and by bomb which exploded damaging hangar space causing fire which destroyed all radio equipment. Ship is entirely seaworthy. Repairs are [4] proceeding and ship will be ready for operations less one amidships crane by 15 December.

VESTAL damaged by a bomb hit aft while at berth at Pearl Harbor, is undertaking repairs with own repair force. It is estimated that the ship will be fully ready as a repair ship by 17 December. Docking may not be required.

2. It is believed that the sinking of the OKLAHOMA, NEVADA, CALIFORNIA and WEST VIRGINIA is in large part due to the ships having been in condition XRAY. Had time been available to set condition ZED before receiving damage, progressive flooding might have been avoided.

H. E. KIMMEL.

SECRET.

Subject: Report of Action of 7 December 1941.

3. Before the attacks were completed, Commander Patrol Wing TWO, in accordance with standard orders, established such search as he was able to do with the planes remaining.

4. It is estimated from the radio calls exchanged, bearings received, and examination of enemy crashed planes, that 4 to 6 Japanese carriers participated in the raid. Enclosure (D), forwarded herewith, represents the disposition of our Task Forces in effect for 7 December, as well as the action taken to locate and destroy the enemy forces.

5. All reports received from commands afloat are unanimous in their praise for the magnificent behaviour of our personnel. Specific cases deserving commendation and reward will be reported in separate correspondence.

6. Partial report of damage, as submitted in enclosure (B) is supplemented herewith by enclosure (C).

7. Revised reports of casualties to personnel are being submitted as frequently as sufficient accurate data are available. Additional information concerning the results of the action on 7 December will be forwarded as soon as the remaining missing narratives have been received.

H. E. KIMMEL.

*Pearl Harbor, T. H., Dec. 21, 1941.*

From: Rear Admiral H. E. Kimmel, U. S. Navy.

To: The Secretary of the Navy.

Via: The Chief of Naval Operations.

Subject: Report of Action of 7 December 1941.

Enclosure:

- (A) Partial narrative of events occurring during Japanese Air Raid on Pearl Harbor, 7 December 1941.
- (B) Cincpac secret letter L11-1(1)(90) serial 02019 of December 12, 1941, to OpNav. Subject: Damage to Ships Pacific Fleet Resulting From Japanese Attack 7 December 1941.
- (C) Supplementary partial report of damage to ships.
- (D) Disposition of our forces, sortie from harbor, and conduct of the search.

1. The first indication of the attack on Pearl Harbor on the morning of 7 December 1941 was a telephone report received by the Staff Duty Officer from the Fourteenth Naval District Duty Officer at about 0720 (LCT). It reported an attack by the WARD on a hostile submarine off the entrance of Pearl Harbor. Twenty minutes thereafter another telephone report from Operations Officer

## 1216 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Patrol Wing TWO, was received that a patrol plane had sunk a hostile submarine south of the entrance buoy. This was followed by an additional telephone report from the Fourteenth Naval District stating the WARD was towing a sampan into Honolulu. At about 0752 a telephone report was received from the Navy Yard Signal Tower as follows: "*Enemy Air Raid—Not Drill*". Almost simultaneously Japanese planes were observed over the Fleet. Dive bombers were bombing the adjacent air fields, accompanied by torpedo plane attacks on the ships in the harbor. From then on there was almost continuous enemy air activity of some kind over the harbor, but there seemed to be separate periods of intense activity as if different new waves were arriving prior to departure of last one. The first of these periods lasted from about 0755 to around 0820. Another period was from about 0900 to 0930 and consisted mainly of dive bombers, a third wave, by high altitude bombers, interspersed with dive bombing and straffing came over about 0930. Meanwhile enemy submarines were reported in Pearl Harbor. One submarine was rammed and sunk by the MONAGHAN. All enemy planes withdrew about 1000.

2. It appears that the raid on OAHU was excellently planned and executed in that every air field on the island was bombed and strafed in an attempt to demobilize all planes.

(Enclosure D)

## 1218 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

In addition the tenders (destroyer) DOBBIN and WHITNEY were in port and the submarine tender PELIAS.

The Task Forces shown herein, except EIGHT and TWELVE which were on special missions to improve war readiness of Wake and Midway, were in accordance with the organization of the Pacific Fleet which had been effective since 30 April 1941, and revised on 31 October 1941. The Task Forces were operating in accordance with the approved employment schedule of the Fleet and the special tasks assigned. It will be noted that all combatant vessels were assigned to Task Forces. This assignment was in accordance with their war missions and all training was conducted with that in mind.

(b) The Fleet was operating under the "security plan" originally issued on 15 February and revised on 14 October 1941. [4] This provided for the possibility of a declaration of war being preceded by:

- (a) A surprise attack on ships in Pearl Harbor,
- (b) A surprise submarine attack on ships in the operating area,
- (c) A combination of both.

The provisions of the security measures were always followed by ships in the operating areas, even to the point of having ready ammunition at the guns. Frequent surprise drills were held by ships in Pearl Harbor in coordination with Army and distant activities to test the provisions of the security measures against air and submarine attacks on ships in port. Since, however, the times in port had to be devoted to upkeep, and limited recreation periods, and *since the intelligence information indicated complete security from any surprise air attack*, the provisions of the air security plan were not fully effective in port. At the time of the attack, however, provisions had been made and were in effect to provide against sabotage on ships, docks and equipment, and all ships had armed patrols and careful routine inspections of the ships during the entire time in port. In the battleships, two machine guns were always manned and ready and two 5"/25 guns were manned with stand-by crews and 15 rounds of ammunition at each gun.

(c) In addition and as provided in the Security Plan, a daily search of all operating areas was conducted by planes of Patrol Wing TWO. This was an early morning search of about 200 miles to cover the general areas in which the Fleet would be operating during the day.

Such a search was being conducted on 7 December and planes on that search were in the air at the time of the attack. In addition, 4 planes were operating with the submarines in the training of intertype exercises for communication and recognition. They search the area toward Lahaina Roads on that morning.

(d) The first indication of any enemy force in the area was the appearance of a submarine close aboard the ANTARES returning from Canton Island and preparing to enter Honolulu while towing a barge. This submarine was attacked by a destroyer of the off-shore patrol which was called by the ANTARES. This was at about 0645. In addition, plane one of VP-14 dropped a bomb on a submarine off the entrance to Pearl. In this connection numerous sonic contacts had been reported in the operating waters close to Pearl during the last six months but no actual visual [5] contacts had been made. In addition, no attacks had been made on these suspected submarines because the Navy Department had prohibited such attacks except within the 3 mile limit. When the international situation grew more tense, however, the Commander-in-Chief directed ships to attack submarines suspected to be operating this area, and it was on this authority that the WARD and VP-14 attacked on the morning of 7 December.

These submarine attacks were followed by a report from the Navy Signal Tower "Enemy air raid, this is not a drill" at about 0752. It will be noted that the attack occurred while the crews of ships were just finishing breakfast on Sunday morning.

The information regarding the air raid was sent to all Task Forces at 0800, followed by a despatch "Hostilities with Japan commenced with air raid on Pearl" at 0812.

The effect of the surprise attack and the damage inflicted with damage to communications made it practically impossible to organize an air search except by the 7 PBY's in the air at the time.

(e) At 0817 Commander-in-Chief, Pacific Fleet, directed Patrol Wing TWO to search for the enemy, and the PBY's in the air started to search. The 3 on the morning search started to search sector 310-000 to a distance of 300 miles. The first plane started out at once.

The 4 PBY's operating with the submarine started search sector 245-285 to 300 miles out, the first plane of that search got away at about 0945.

No plane in those areas searched was anything. At 0830 Commander-in-Chief advised Task Force THREE, EIGHT and TWELVE to rendezvous as directed by Commander Task Force EIGHT and stated that instructions would be issued as soon as enemy was located.

(f) While it appeared logical that the attack should come from the northward so that the planes would fly down wind with their loads, no such evidence was available from the nature of the attack. Certain information indicated that carriers or enemy forces were operating to the southward. A direction finder bearing of radio transmissions at 1018 was received to indicate that an enemy force bore 178 from Pearl. This was not a positive indication of an enemy position but did indicate the probability of an enemy carrier to the southward. A message was received from a ship with the MINNEAPOLIS call at 0950 stating that carrier had been sighted. The MINNEAPOLIS was then south of Oahu. At 1010 4 DM's sent a message that they were in area Sail 2 and that two carriers were in sight. This was later corrected to say the [6] message should have been NOT in sight.

In addition, a message from Kaneohe received at 1000 stated "Captured enemy have marked positions, bearing 223-90 miles from Pearl Harbor." These marks in Japanese script were later found not pertinent to the attack.

This information was passed to Task Forces at sea as an indication of probable location of enemy forces. In addition, at 1018 the Task Force Commanders were advised that there were only 12 VP's available in Pearl for search and that there was some indication that the enemy was to the northward. They were directed to locate and attack the enemy of unknown composition. Search was instituted at once by Task Force EIGHT who was then somewhat south by west of Pearl. At 1020, 15 VSB from ENTERPRISE loaded with 1000 lb. bombs were launched to search for and attack a reported group of 4 transports off Barber's Point. The origin of the report about the transports is unknown and it probably was enemy deception because surface craft proceeding to attack them were attacked by enemy submarines in that area. Ships that could do so cleared the harbor by this time and were organized as a separate Task Force ONE at 1105 and directed to report to Commander Task Force EIGHT to assist in locating and destroying the enemy.

(g) It was not possible to start an organized search with aircraft with the forces on Oahu until the late morning. By about 1100, however, in addition to the 7 PBY's which had started the search between 0815 and 0915, as the planes became serviceable they were started on the following searches:

Army—2 B-17

2 A-20A

3 B-18

3 B-17 095-165, 300 miles

Navy—4 planes VP-24, 245-275, 300 miles

2 planes VJ, 355-005, 300 miles.

3 planes VP-14, 295-350, 200 miles

4 planes VP-23, 215-245, 200 miles

#### *Battleship & Cruiser Planes*

6 VOS, 135-215, 200 miles

9 SBD, 330-030, 200 miles

6 J2F in westward sector

[7] The concentrated air search was conducted to the northward and westward because of the belief that the major enemy attack force was in that direction. In addition, the disposition of Task Forces at sea was such that they were able to search to the southward.

At about 1345 one plane of the ENTERPRISE reported contact with surface forces in position 20-32 N and 158-40 W, and followed closely by a report that the patrol was being attacked by a VF plane. This report was apparently in error because the position is only about 60 miles from Pearl.

At 1330 a radio direction finder bearing on an enemy frequency and by a ship using the "AKAGI" call was picked up and gave a bearing of 183° from Pearl and another unidentified unit was found to be on bearing 167 from Pearl. This information was passed to the Task Forces at sea and on that information and the supposition that any enemy forces in the area south of Oahu would retire, toward Jalint, the senior Task Force Commander at sea directed Task Force

## 1220 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

TWELVE at 1552, to intercept and destroy the enemy. In addition, Task Force ONE which had joined Task Force EIGHT was directed to proceed to search with surface force and attack. The surface force search was also based on a retirement toward Jalint.

No contacts were made and the enemy was not located, except that 2 planes from the cruiser NORTHAMPTON made contact with an enemy fighter at 1120 just north of NIIHAU and after 20 minutes in spite of the enemy superior speed and gun power succeeded in shooting him down. No report of this attack ever reached the Commander-in-Chief.

From the chart later discovered from enemy planes shot down there is no indication that any carriers operated to the southward of Oahu. The charts do indicate, however, that the attack was launched from a point about 200 miles to the northward and that the carrier retired to the northward at full speed while waiting planes to return from the attack. (It appears then that the enemy carriers in this area were well beyond the daylight search curve of the planes sent out to find them and therefore were successful in evading all contacts with our air forces in the area).

The search by surface craft, carrier aircraft and their ship-based planes to the southward was not successful. It appears probable that the enemy used radio deception by placing a ship to the southward to use deceptive radio calls, to indicate the presence of enemy forces in that area. It may be possible too that if enemy forces were in that area that they retired at high speed to the southward beyond the range of our ships and aircraft.

[8] (h) At 0800 the positions of the ships at sea were approximately as follows:

|                   |   |          |
|-------------------|---|----------|
| Task Force TWELVE | — | 18-30 N  |
|                   |   | 168-40 W |
| Task Force EIGHT  | — | 20-50 N  |
|                   |   | 158-50 W |
| Task Force ONE    | — | 20-32 N  |
|                   |   | 159-45 W |

Task Force EIGHT was proceeding on course 170 at 17 knots. His position was in the area to the northwestward of Johnston Island. The cruiser planes searched to the northward of the island and the carrier planes in a south-easterly direction to a distance of 200 miles for the 0800 position.

In addition, the planes of VP-21 departed Midway and searched the area from Midway to Johnston and then from Johnston to Pearl Harbor. Six planes of Patwing TWO searched the sector with the median of 220° from Pearl Harbor to a distance of 550 miles. The planes from the ENTERPRISE searched the sector 315 to 270 from the carrier's daylight position.

By these searches practically the entire area in the Oahu-Midway-Johnston Island triangle was completely covered.

In addition, the available planes of Patwing TWO searched an area of 200 miles all around Oahu. It was not possible to extend this search further to seaward because of the small number of available planes.

(i) Because Task Force EIGHT was low in fuel, that Force entered Pearl Harbor after dark on 8 December, fueled, provisioned and took on ammunition and departed for sea before daylight on 9 December.

### 9 December

On 9 December the position of Task Force TWELVE was about 600 miles S. S. W. of Oahu proceeding toward the island. A 200 mile search was being conducted in the morning all around the carrier position during the morning and a 150 mile search along the line of the carrier course during the afternoon.

After departure from Pearl Harbor Task Force EIGHT proceeded to the northeastward from Oahu for search operations in that area.

Task Force ONE returned to port on 9 December.

[9] Using Oahu based planes the following search was conducted starting in the morning of 9 December:

|                      |           |             |
|----------------------|-----------|-------------|
| 300-010              | 500 miles | 10 VP       |
| 010-060              | 300 miles | 10 B-18     |
| 060-210              | 200 miles | 18 VSO      |
| 210-030              | 300 miles | 6 VJ        |
| and in the afternoon |           |             |
| 330-020              |           | 4 Army B-20 |

The sector to the southwest of Oahu was covered by the LEXINGTON planes as mentioned before.

No contact with enemy or surface forces were made. Numerous submarines were reported, probably many false contacts, but all were attacked by planes.

A16-3/(02088)  
*SECRET*

From: Rear Admiral H. E. Kimmel, U. S. Navy.

To: The Secretary of the Navy.

Via: The Chief of Naval Operations.

Subject: Report of Action of 7 December 1941.

Enclosure:

- (A) Partial narrative of events occurring during Japanese Air Raid on Pearl Harbor, 7 December 1941.
- (B) Cincpac secret letter L11-1(1) (50) serial 02019 of December 12, 1941, to OpNav. Subject: Damage to Ships Pacific Fleet Resulting From Japanese Attack 7 December 1941.
- (C) Supplementary partial report of damage to ships.
- (D) Disposition of air forces, sortie from harbor, and conduct of the search.

1. The first indication of the attack on Pearl Harbor on the morning of 7 December 1941 was a telephone report received by the Staff Duty Officer from the Fourteenth Naval District Duty Officer at about 0720 (LCT). It reported an attack by the WARD on a hostile submarine off the entrance of Pearl Harbor. Twenty minutes thereafter another telephone report from Operations Officer, Patrol Wing Two, was received that a patrol plane had sunk a hostile submarine south of the entrance buoy. This was followed by an additional telephone report from the Fourteenth Naval District stating the WARD was towing a sanpan into Honolulu. At about 0752 a telephone report was received from the Navy Yard Signal Tower as follows: "Enemy Air Raid—Not Drill". Almost simultaneously Japanese planes were observed over the Fleet. Dive bombers were bombing the adjacent air fields, accompanied by torpedo plane attacks on the ships in the harbor. From then on there was almost continuous enemy air activity of some kind over the harbor, but there seemed to be separate periods of intense activity as if different new waves were arriving prior to departure of last one. The first of these periods lasted from about 0755 to around 0820. Another period was from about 0900 to 0930 and consisted mainly of dive bombers, a third wave, by high altitude bombers, interspersed with dive bombing and straffing came over about 0930. Meanwhile enemy submarines were reported in Pearl Harbor. One submarine was rammed and sunk by the MOMAGHAN. All enemy planes withdrew about 1000.

2. It appears that the raid on OAHU was excellently planned and executed in that every air field on the island was bombed and strafed in an attempt to demobilize all planes.

3. Before the attacks were completed, Commander Patrol Wing TWO, in accordance with standard orders, established such search as he was able to do with the planes remaining.

## 1222 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

4. It is estimated from the radio calls exchanged, bearings received, and examination of enemy crashed planes, that 4 to 6 Japanese carriers participated in the raid. Enclosure (D), forwarded herewith, represents the disposition of our Task Forces in effect for 7 December, as well as the action taken to locate and destroy the enemy forces.

5. All reports received from commands afloat are unanimous in their praise for the magnificent behavior of our personnel. Specific cases deserving commendation and reward will be reported in separate correspondence.

6. Partial report of damage, as submitted in enclosure (B) is supplemented herewith by enclosure (C).

7. Revised reports of casualties to personnel are being submitted as frequently as sufficient accurate data are available. Additional information concerning the results of the action on 7 December will be forwarded as soon as the remaining missing narratives have been received.

H. E. KIMMEL.

The attached report (enclosure (A)) is compiled from the narrative reports received from each ship listed in the second column, in addition to the incoming and outgoing messages of the Commander-in-Chief's file and a few intelligence reports.

This is only a partial report as individual ship's reports are still being received. The report contains a few inaccuracies which when time permits, will be checked and verified and a corrected report submitted to the Department.

### NARRATIVE OF EVENTS OCCURRING DURING JAPANESE AIR RAID ON DECEMBER 7, 1941

0618

On the morning 7 Dec. Task Force 8 (ENTERPRISE, NORTHAMPTON, SALT LAKE CITY, CHESTER, (Crudiv 5), DUNLAP, ELLOT, FANNING, BENHAM, GRIDLEY, MAURY, BALCH, (Desron 6) were returning to Pearl Harbor after completing mission vicinity Wake Island. From position approximately 215 miles West of Pearl routine scouting flight launched. Flight had orders to search ahead sector through 045-135° for distance 150 miles. These planes to proceed Pearl. Three planes also launched to establish inner air patrol.

0630 ANTARES

Arrived off Pearl Harbor, from Canton and Palmyra with 500 tons steel barge in tow. Sighted suspicious object 1500 yds. on stbd. quarter. Appeared to be small submarine but could not positively identify it. Accordingly notified inshore patrol ship, WARD, to investigate it.

0633 ANTARES

Observed Navy Patrol plane circle and drop 2 smoke pots near object.

0645 ANTARES

Observed WARD commence firing for 2 minutes. Patrol plane appeared to drop bombs or depth charged object which disappeared.

0700 VP Squadron 24

Had four of the six PBV5 planes depart Pearl Harbor for scheduled training exercise in operating area C-5. One of the remaining two planes was out of commission for structural changes; the other in standby status for ready duty.

0700

Plane 14P-1 sank enemy sub. 1 mile off P. H. entrance. FORCES UNDER COMMAND OF PATWING TWO (COMTASKFOR 9) disposed as follows: Patron 21-Midway; Patron 11, 12, 14, Kaneohe; Patron 21, 22, 23, 24, Pearl Harbor. WRIGHT enroute from P.H. for Midway. Condition of readiness B-5. (50% aircraft on 4 hours notice). Specific duty assignments required 6 planes from Patron 14 24 and 12 to be ready for flight on 30 minutes notice. Total number of planes ready for flight or in the air in 4 hours or less: 72. At the time first bomb dropped 14 patrol aircraft were in the air (7 on search from Midway) 58 ready for flight in 4 hours or less. Nine undergoing repairs.

- 0735 PATRON 21 Patwing 2 staff duty officer received and decoded message 14P-1 sank enemy submarine one mile off Pearl Harbor.
- 0740 PATRON 21 Staff duty officer C-C informed by CPW2 of patrol plane sinking report. Patwing 2 proceeded to draft a search plan.
- 0715 KEOSANQUA Began to receive tow from ANTARES. 0758.  
0728 HELM Underway from berth X-7 for deperming buoys at West Loch. All hands at special sea detail stations. Both boats manned and in the water with instructions to follow the ship to West Loch. All magnetic compasses and chronometers had been left in the BLUE preparatory to deperming.
- 0743 Local hostilities commenced with air raid on Pearl. Received message from plane #1 of VP14 to CTF 3 that plane had sunk one enemy submarine one mile off Pearl Harbor entrance.
- 0745 AVOCET Moored at Berth F-1A, NAS Dock, Pearl Harbor. Bomb explosion and planes heard and sighted attacking Ford Island hangars.
- TUCKER Nested alongside WHITNEY. 5" gun #3 could not be fired. All other guns and .50 cal. machine guns fired at attacking planes during all attacks. No loss of personnel or material. It is believed this vessel shot down three or four enemy planes.
- PATRON 11 Two planes in hangar—4 planes at south end of hangar—6 planes on ramp. As soon as raid started three rifles were manned immediately. Two machine guns manned in a plane being removed from the hangar. Machine gun position in plane abandoned and guns moved to safer position. Set up 2 machine gun nests near south end of hangar. Damage received: 7 planes burned; one wrecked; and four damaged but can be repaired. All hangar, office equipment, and stores destroyed.
- 0745 PATRON 12 Two planes moored in Kaneohe Bay, two in hangar and 8 on parking apron. Upon being attacked manned machine guns in planes, mounted machine guns in pits and used rifles. Observed second wave of horizontal bombers did not release bombs. Own losses—8 PBV-5's—planes completely destroyed, two severely damaged; two moderately damaged, all hangar, office equipment and stores destroyed.
- 0750 TRACY Moored port side to Berth 15, Navy Yard, Pearl Harbor, undergoing overhaul. PREBLE and CUMMINGS moored to starboard in that order. Ship totally disabled with main auxiliary machinery boilers and gun batteries dismantled.
- 0750 TAUTOG Observed enemy three plane formation of dive bombers over Alea fleet landing on southwest course. Enemy character not discovered until bombs were dropped.
- 0750 CALIFORNIA Sounded general quarters and set condition Zed. Lieutenant Commander M. N. Little, First Lieutenant, was S. O. P. on board and made preparations for getting underway.
- 0750 CASSIN's Commanding Officer observed about 100 feet away from starboard side of dry dock #1 at altitude of 100 feet an airplane with large red disks on bottom of wings. Sounded general quarters and made attempts to locate ammunition; part of 5" guns under overhaul. .50 calibre machine guns were unlimbered.
- 0750 PATRON 21 Drafting of CPW2 search plan completed.  
0750 OKLAHOMA (0750 or 0753) struck by 3 torpedoes on port side frames 25, 35-40 and 115. Ship heeled to port 45° meanwhile A. A. batteries manned and G. Q. executed. Rapid heeling of ship and oil and water on decks rendered service to guns ineffective.

## 1224 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| 0750 CURTIS | Moored in berth X-22, condition X-RAY. Number 3 boiler steaming. Ship at G. Q. Ship straffed by fighter planes. Observed bomb hit on VP hangar at NAS. UTAH, RALEIGH and RICHMOND attacked by torpedoes.                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 0750 PYRO   | Secured along West Loch dock, stbd. side to. Heard noise of low flying aircraft and explosion in Navy Yard area. Observed two low wing monoplanes about 100 feet above water head for PYRO's port beam. Planes zoomed clear of ship and was observed to be Japanese. Sounded General Quarters and prepared to get underway.                                                                                                                                                                                                                                                                                                                       |
| 0752 AVOCET | Sounded General Quarters and opened fire with 3" A. A. battery. Hit Japanese plane which had just turned away after torpedoing CALIFORNIA. Plane burst into flames and crashed near Naval Hospital. Fired 144 rounds 3" 50 cal. and 1750 rounds .30 cal.                                                                                                                                                                                                                                                                                                                                                                                          |
| 0753 PRUITT | PRUITT reports 10 planes flying low, 200 ft., bombed Ford Island and blew up hangar.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 0753 TERN   | Notified of attack and made preparation for getting underway.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 0753 TRACY  | Observed BB's attacked from astern by about 10 dive bombers. Torpedo planes at about 100 feet approached from Easterly direction attacking BB's. TRACY O. O. D. saw dive bombers attack BB's (10 planes and Ford Is. from North). Attack followed by horizontal and dive bombers on same objective plus ships in dry dock. 1 dive bomber passed close enough to observe that it was a single engine by-plane probably type 94.                                                                                                                                                                                                                    |
| 0754 GAMBLE | Heard explosions on Ford Island.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 0755 BAGLEY | Moored Navy Yard Pearl Harbor, berth B-22, repairs to starboard bilge keel. Sighted dive bombers in action over Hickam Field. They were believed at that time to be Army bombers. Shortly after this time enemy plane approached from the direction of Merry Point at about 30-40 feet altitude and dropped torpedo on OKLAHOMA and retired. Opened up with forward machine guns on attacking plane. Machine gun fire bagged 8th plane, it swerved and torpedo dropped and exploded in bank 30 feet ahead of BAGLEY. Plane finally downed in channel. Continued machine gunning enemy planes. 3 planes believed to have been shot down by BAGLEY. |
| BOBOLINK    | Observed about 12 dive bombers centering their attack south hangars of Ford Island.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| BREESE      | Moored in berth D-3, Middle Loch, in nest with division order of ships from starboard U. S. S. RAMSAY, BREESE, MONTGOMERY, and GAMBLE. Observed bombing of old hangar on Ford Island. Sounded General Quarters, set Condition "A", and made preparations for getting under way. Sent boats to landing to pick up men.                                                                                                                                                                                                                                                                                                                             |
| CACHALOT    | Moored at Berth #1, Navy Yard, Pearl Harbor undergoing scheduled overhaul.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| CASTOR      | Sounded general quarters. Ship berthed at Merry Point.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| CONYNGHAM   | Heading north moored starboard side to WHITNEY at berth X-8. REID, TUCKER, CASE, and SELF-RIDGE outboard. Ship undergoing routine tender overhaul, receiving power from tender. Noted large fire on Ford Island and observed horizontal and dive bombing planes attacking. Sounded General Quarters.                                                                                                                                                                                                                                                                                                                                              |

|      |                   |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|      | <b>DEWEY</b>      | Observed UTAH to be torpedoed and to list rapidly. DEWEY at nest, DesDiv ONE, with PHELPS alongside port side DOBBIN at X-2 under overhaul.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0755 | <b>DOLPHIN</b>    | Moored portside to Pier 4, Submarine Base, Pearl Harbor. Japanese aircraft delivered dive bomb and torpedo attack on Pearl Harbor. Sounded General Quarters.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
|      | <b>HEIM</b>       | Turned into West Loch channel and headed up toward depurging buoys.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
|      | <b>HENLEY</b>     | Through error in gangway watch in calling crew to quarters for muster at 0755, General Alarm was sounded instead of gas alarm as customary. Observed first torpedo plane attack on UTAH. Crew proceeded to Battle Stations while General Alarm sounded the second time. Set material condition AFIRM. Made preparations for getting underway. Opened fire on light bomber, altitude about 17,000 feet apparently steady on Northerly course; approaching from seaward and passing over Ford Island.                                                                                                                                                                                                                                                                                                                                                                                                 |
|      | <b>HONOLULU</b>   | Moored port side to berth B21 Navy Yard, Pearl with U. S. S. St. LOUIS alongside stbd. side. Planes were seen diving on HICKAM FIELD. At the same time a wave of torpedo planes were seen approaching over fleet landing. Sounded general quarters and passed word "Enemy Air Raid". Ship prepared to get underway. A. A. batteries came into action gun by gun as they were manned. 50 caliber and 30 caliber M. G.'s fired on enemy torpedo planes attacking the BB's. From this time until raid ended 30 caliber, 50 caliber and 5"/25 A. A. guns fired at every available target. Service ammunition expended 2,800 rounds of 30 caliber, 4,500 of 50 caliber, 250 rounds of 5"/25 caliber.<br>12 two-seat low wing monoplanes flying low from Southeast dropped one torpedo at each battleship. Saw two planes destroyed.<br>18 low-wing dive bombers from Southeast. All bombed Hickam Field. |
|      | <b>MinDiv ONE</b> | Undergoing scheduled overhaul, moored in repair base. Guns and ammunition removed. Crews, except the watch on board, living in Navy Yard receiving barracks.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0755 | <b>MinDiv ONE</b> | Japanese planes were seen to attack the BB's. Men were sent to adjacent ships, NEW ORLEANS, SAN FRANCISCO, and CUMMINGS, to assist in manning A.A. guns and handle ammunition. Meanwhile receiving barracks sent men (our) to other ships to assist in fighting fires or handling ammunition. These men reported to PENNSYLVANIA, CALIFORNIA, and WHITNEY. Also in the Yard. Miner's Mates were sent to West Loch. 50 and 30 caliber MG's were reassembled and remounted and ammunition was obtained from NEW ORLEANS, SAN FRANCISCO and Marine Barracks. These guns were used against the enemy making the later attacks. No ship of division suffered damage.                                                                                                                                                                                                                                     |
|      | <b>PATTERSON</b>  | Moored at berth X-11, battle stations manned. Opened fire with main and 50 caliber batteries. The PATTERSON considered that at least one enemy plane was shot down. The plane Claimed by PATTERSON was one observed diving on CURTISS approaching from ahead at about 400 ft. altitude. Plane was seen to fall apart at same time shot was fired by #2 gun.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

# 1226 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| PHOENIX     | First attacking plane sighted from Signal Bridge attacking from north of Ford Island. Plane had all guns firing. Passed over stern of Raleigh and proceeded toward Ford Island Control Tower and dropped bomb.                                                                                                                                                                                                                                                                                                                       |
| PREBLE      | On 7 December was undergoing Navy Yard overhaul at berth B-15 with no ammunition on board and the engineering plant dismantled. First attack on battleships began with about 20 torpedo planes. Planes were in low horizontal flight when observed and attacked from eastward. Enemy planes approached battleships to close range before releasing torpedoes.                                                                                                                                                                        |
| RALEIGH     | Commanding Officer felt dull explosion and looking out airport observed water boiling amidships. Received report that Japanese were attacking fleet. Sounded general quarters.                                                                                                                                                                                                                                                                                                                                                       |
| RAMAPO      | Both planes were successfully hoisted out by hand power. Doctor was directed to report to SOLACE. Damage repair party was sent to capsized UTAH to cut men out of hull. Sent Signal to send pontoon and a lighter alongside from BALTIMORE to RALEIGH. These were delivered and secured to port quarter and acted as an outrigger. Torpedoes, minus warheads were pushed overboard and beached at Ford Island. A1 stanchions, boat skids and life rafts and booms were jettisoned. Both anchors let go.                              |
| RAMSAY      | O. O. D. observed Japanese dive bomber come in close and drop couple of bombs. Sounded General Quarters and opened fire with A. A. Guns (3''). Motor Torpedo Boats on board also opened fire with machine guns. Order of attack observed to be dive bombers strafing, torpedo planes, dive bombers bombing, horizontal planes bombin.                                                                                                                                                                                                |
| REID        | Our personnel reported 3'' shell hit plane. No losses in personnel and no material damage.                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| SOLACE      | Moored at berth D-3 observed bomb land on western end of Ford Island.                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| SUMNER      | Observed unidentified planes attacking Ford Island. Received report of air raid, closed all watertight doors and ports, called away rescue parties; prepared hospital facilities and sent 2 motor launches with rescue parties to ARIZONA.                                                                                                                                                                                                                                                                                           |
| SWAN        | Was moored to the new dock at the southern end of the Submarine Base, port side to, bow to eastward. Armament is four 3'' 25 caliber A. A. guns, four 50 caliber machine guns, and one 5'' 51 caliber broadside.                                                                                                                                                                                                                                                                                                                     |
| TAUTOG      | Sounded General Quarters. In Marine Railway, boiler upkeep. Observed bomb dropped on South ramp of Fleet Air Base.                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0755        | Observed about 20 planes approaching on line of OAHU railroad tracks, and over Merry's point. Torpedoes were dropped from about 50 feet after submarine base pier was passed. Fourth plane in line and plane near end of line were shot down by this ship and HULBERT before torpedoes were dropped.                                                                                                                                                                                                                                 |
| 0755 VESTAL | A Japanese plane flew from North to South over a fish pond adjacent to water front resident of Lt. B. B. Black, U. S. N. R. on the East shore of Pearl City Peninsula. A long burst of machine gun fire was directed at the breakwater enclosing the fish pond, and a single fisherman wearing a white shirt was seen to run rapidly along the breakwater. This material is forwarded to indicate that enemy pilots were directing fire at individuals (civillans) at a considerable distance from any military military objectives. |
|             | Sounded General Quarters. Manned A. A. battery, 3'' A. A. and 5'' broadside and .30 cal. M. G.                                                                                                                                                                                                                                                                                                                                                                                                                                       |

|                        |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

| VIREO                  | Moored inboard at Coal Dock (seaward end) with TURKEY, BOBOLINK, and RAIL, outboard.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| WIDGEON                | No remarks except machine gun and rifle fire used against enemy. No losses or damage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| WEST VIRGINIA          | Passed word "Away fire and rescue party" followed by General Quarters. Two heavy shocks felt on hull of W. Va. apparently forward and on port side. Ship began to list rapidly to port. Another third heavy shock felt to port. Plane on top of turret 4 caught on fire. A heavy explosion occurred with about 20° list on ship to port. Central station directed to counter-flood. The following last explosion flashed a flame about 15 feet high occurred forward on ARIZONA. A second flash occurred on the ARIZONA higher than the foretop. Burning debris rained on quarter deck of W. Va. After the 2 ARIZONA explosions the W. VA. began to right itself when a large fire broke out amidships. Word received from central station to abandon ship. A wall of flame advancing toward the W. VA. and TENNESSEE from the ARIZONA. W. VA. personnel began to abandon ship as fire had grown out of control. Meanwhile magazines of W. VA. had been flooded. W. VA. personnel report to TENNESSEE. Remaining survivors ashore and elsewhere sent back to W. VA. to fight fire. Fire on W. VA. extinguished Monday afternoon. |
| 0756 BOBOLINK          | Ready duty status, moored at next end, of coal docks with VIREO and TURKEY inboard, RAIL outboard. Informed by gangway watch that Japanese planes were bombing us. Sounded general quarters.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| GAMBLE                 | Wave of about 50 Japanese planes attacked battleships and Naval Air Station, Ford Island, planes flying at low altitudes about 500 feet over battleships from direction of Diamond Head, about 700 feet over Ford Island. Five successive waves of the attack of about 10 planes each.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| MinDiv TWO<br>THORNTON | Went to General Quarters and set condition "A". Reports attack by Japanese aircraft commenced; general alarm was sounded and all hands went to air defense stations. THORNTON moored port side to dock at berth S-1, Submarine Base, Pearl Harbor. Stations manned were as follows: Control, Machine gun Battery Control, Repair, and 4 .50 cal. machine guns, 3 .30 cal. Lewis machine guns. 3 .30 Browning automatic rifles, and 12 .30 cal. Springfield rifles.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 0757                   | Ensign Chiles of JARVIS called Lieut. Ford and said "Someone is bombing us".                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| BREESE<br>CONYNGHAM    | Opened fire with .50 cal. machine guns. Observed Torpedo planes attacking RALEIGH, UTAH, and DETROIT from the West.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| DEWEY<br>HELENA        | Sounded general quarters. Moored at 1010 dock, berth 2, portside to dock, OGLALA alongside starboard side. Reported observed planes over Ford Island, 14,000 ft. altitude. Signaller on bridge with previous duty on Asiatic Station identified planes immediately. General alarm sounded and service ammunition broken out.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| HULL                   | General Quarters. Prepared to get underway.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 0757 NEW ORLEANS       | Moored at berth 16, Navy Yard, Pearl Harbor undergoing engine repairs, receiving power and light from dock. Sighted enemy planes dive bombing Ford Island; sounded G. Q.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0757 PENNSYLVANIA      | In dry dock #1. 3 propeller shafts removed. Destroyers CASSIN and DOWNES in dock ahead of PENNSYLVANIA. Floating dock west of new dry dock adjoining PENNSYLVANIA occupied by SHAW.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

# 1228 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Cruiser HELENA and OGLALA at Berth B-2 (PENNSYLVANIA normal berth). CALIFORNIA in F-3, MD F-4 inboard, OKLAHOMA outboard; Berth F-6 TENNESSEE inboard WEST VIRGINIA outboard, F7 ARIZONA, F8 NEVADA. Machine guns in foremast manned and condition watch of A. A. personnel available. Ship receiving steam water and power from yard. Heard explosions on end of Ford Is. and realized an air raid in progress after 2nd explosion. Air defense sounded, followed by Gen. Qtrs. Set Condition YOKE.

0757 SUMNER Signal watch and quartermaster on bridge sighted ten dive bombers attacking Navy Yard. Observed two explosions in Navy Yard. Sounded alarm.

0757 TREVER Mine Division FOUR moored at buoys D-7, bows towards Pearl City, in order from north: TREVER, WASMUTH, ZAND, and PERRY. Sounded general quarters at time when first bomb was dropped by Japanese on north side of Ford Island.

0757 WASMUTH WASMUTH reports first Japanese planes attacked. Went to General Quarters at once with all guns in action within 3 minutes. However, as ship was inside nest of four only two after guns could bear. Made all preparations for getting underway.

0757 PATRON 21 First bomb dropped near VP-22 hangar. Message order broadcast to all ships present "AIR RAID P. H. X THIS IS NOT DRILL" (a similar message was sent by CinCPac).

0757 ZANE ZANE moored bow and stern in nest with Mine Division Four at buoys D-7; order from port to starboard; TREVER, WASMUTH, ZANE and PERRY. First call to standby colors sounded. Signalmen on watch observed single Jap plane drop bomb from about 10000 feet on southern end Ford Island after approach from Northward. Sounded General Quarters; manned A. A. battery. Commenced firing with A. A. battery at all planes passing within reasonable distances. Made all preparations to get underway.

0758 ANTARES ANTARES heard explosion in P. H. and observed Japanese planes delivering attack.

0758 BAGLEY BAGLEY observed torpedo plane come in from direction of Merry Point between Navy Yard and Kuahua Island, 30 or 40 feet altitude, headed for OKLAHOMA. About 2 to 3 hundred yards from OKLAHOMA, plane dropped its torpedo and hit OKLAHOMA amidships. Sounded General Quarters and commenced firing. Hit fourth plane coming in which was seen to crash in channel off Officers Club landing. Machine gun fire on 8th plane made it swerve to left causing torpedo to drop and explode in bank about 30 feet ahead of BAGLEY. Number one machine gun downed plane in Navy Yard channel. Third torpedo plane hit by BAGLEY was observed headed for light cruisers HONOLULU and ST. LOUIS astern of BAGLEY. Plane went out of control, dropped its torpedo and seemed to hit I-head crane in Navy Yard. This was about the eleventh plane to come in. Next plane hit by BAGLEY came over dock but was downed with a short burst. Torpedo dropped in lumber pile and plane believed to have crashed on dock. Fifth plane brought down by BAGLEY came down on starboard side, nose directly up into air and spun into crash loosing its torpedo. Sixth plane brought down by BAGLEY was a dive bomber during second phase of attack and after torpedo attack. This plane was shot down by 5" gun and those from other ships.

0758 CUMMINGS CUMMINGS observed enemy planes making torpedo attack on BBs moored to East side Ford Island. Sounded General Quarters.

0758 GAMBLE Went to General Quarters, opened fire with .50 cal. machine guns on planes passing over nest at about 800 feet altitude. Set material condition affirm except for certain protected ammunition passages.

0758 JARVIS General Quarters sounded on JARVIS.

0758 HULBERT HULBERT sounded general quarters. Torpedo plane sighted heading west over east lock preparing to launch torpedo against battleship off Ford Island. HULBERT reports bringing down 1 Japanese torpedo plane by .50 cal. A. A. fire from berth S-3, Submarine Base.

0758 HULL Gangway watch opened fire with .45 caliber pistol on two (2) planes crossing bow within 50 yards.

0758 MUGFORD Moored port side to the U. S. S. SACRAMENTO, berth No. 6, Navy Yard. U. S. S. JARVIS moored port side to MUGFORD. Attack started. Japanese planes dive on Ford Island. Several large bombs struck the sea plane landing ramps followed by explosions near hangars. Several Japanese planes came in low from southwest and released torpedoes which struck OKLAHOMA and WEST VIRGINIA. Enemy torpedo planes came in continuously from same direction and fired torpedoes at the BBs.

0758 REID REID went to General Quarters.

0758 RIGEI Ford Island attack by 10 dive bombers from North at 10,000 feet.

0758 TENNESSEE TENNESSEE attacked by enemy planes (Japanese), Oily water around stern burning. Canvas awning on stern on fire, Turret III. Smoke pouring into Repair I. Smoke so thick, cannot see. Repair I have man standby magazine flood, Turret III. All boats on fire. Fire in maintop, secondary aft. Fire in maintop seems to be out. WEST VIRGINIA's quarterdeck and planes on fire. Fire on Turret III. Could not get morphine out of doctor's room because it was unsafe; men report that room was too hot to go in and cut safe open. D-310 excessively hot—investigate. Squadron of planes diving on Navy Yard. Repair I, unit 3, abandoned station—too hot. Fire on topside seems to be under control. D-310-A is all right. Set Condition ZED in lower handling room of Turret III. OKLAHOMA seems to be capsizing. CALIFORNIA down by the stern. WEST VIRGINIA has pretty bad fire below Signal Bridge. TENNESSEE was hit twice, soon after attack began; one hit (bomb) on face of Turret II, and bomb hit on top of Turret III, penetrating.

0758 THORNTON THORNTON commenced firing with .50 cal. machine gun battery followed immediately by .30 cal. machine guns and .30 cal. rifles.

0759 GAMBLE GAMBLE opened fire with 3"/23 cal. AA guns, firing as planes came within range, fuses set 3 to 8 secs.

0759 HELM First enemy plane sighted in shallow dive over Ford Island, headed Northwest. Observed first bomb hit on hangar at southwest end of Ford Island. Called crew to General Quarters. Opened magazines and got ammunition to guns.

0759 JARVIS Lieut. Ford and Lieut. Johansen of JARVIS reach bridge. Jap torpedo planes coming in at 30 to 60 second intervals, approaching from Merry Point direction and attacking BBs.

0759 SUMNER Observed torpedo planes approach over S. E. Loch attacking BBs, circling Ford Island and flying off to south west.

# 1230 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

0759 WHITNEY Observed air raid attack by Japanese air force and explosions on Ford Island. WHITNEY moored bow and stern to buoys X-8 and X-8x, 6 fathoms of water, supplying steam, electricity, fresh and flushing water to CONNYNGHAM, REID, TUCKER, CASE, and SELFRIDGE, moored alongside to port.

0759 PELIAS PELIAS reports 9 dive bombers attacked out of direction of sun the Battleships. One broke off and dive bombed PENNSYLVANIA.

0800 - - - - Two officers from ship hiking in back of Alea witnessed attack. They stated later that 3 separate flights of planes appeared at 3 levels: low, medium and high from the north.

0800 VIERO C. O. VIERO heard an explosion. Immediately Japanese planes were seen, and General Quarters sounded.

0800 ANTARES ANTARES under machine gun fire. Topside hit by machine gun bullets. Bomb and shell fragments. Being unarmed no offensive tactics were possible. In order to avoid placing ship and personnel in jeopardy, authority was requested to enter Honolulu harbor.

0800 COMINBATFOR Comineraft in OGLALA observed enemy bomb fall seaward and Ford Island; no damage. The next bomb caused fires near waters. Flames flared up from structures southend of island. Next bomb fell alongside or on board 7 battleships moored at F-1 eastside of Ford Island. Jap planes flew between fifty and 100 feet of water, dropping 3 torpedos or mines in channel on line between OGLALA and seaward end of Ford Island.

Torpedo hit OGLALA and HELENA simultaneously. These ships were moored abreast of B-2 of ten ten dock OGLALA outboard. Both ships opened fire with A.A. battery. OGLALA signalled C-C possibility that mines had been dropped. Two contract tugs were hailed to haul OGLALA aft of HELENA. Submersible pumps for OGLALA were obtained from HELENA, but could not be used as no power was available. Observed one Jap plane shot down. Planes were strafing as well as bombing. Observed 4 battleships hit with bombs, fires broke out, and one battleship tured over. Enemy planes appeared to fly in groups of 6 to 10. NEVADA underway to clear channel, but apparently was struck by torpedo or mine. A minute later 2 bombs fell only one hit in the NEVADA. On 2nd attack observed bomb dropped on fwd part of PENNSYLVANIA in dry-dock. Flames appeared from two destroyers in the same dock. Observed another Jap plane fall in water. Observed bomb fall close to destroyers in floating drydock. Destroyer later caught on fire.

0800 CASSIN CASSIN saw another plane come down to about 75 feet on parallel course drydock #1. Plane dropped torpedo aimed at CALIFORNIA at range 200 yards.

0800 CASTOR CASTOR 3" A. A. and .30 cal. machine guns commenced firing against enemy torpedo planes, low and close aboard, and against dive bombers. Observed one enemy torpedo plane at about 500 to 700 yards range and 500 ft. altitude due aft of ship and heading across to Ford Island with parts of fuselage shot away. Plane grounded either on Ford Island or beyond. Removed covered lighter alongside with 450 aerial depth charges.

0800 DOLPHIN Machine guns and rifles manned and fired at enemy aircraft which were flying very low. Ready identification could be made by the large red balls on each

wing. Report received plane had been shot down and dove into channel off pier 3.

0800 BLUE UTAH torpedoed. General alarm was sounded, and word passed throughout the ship to man battle stations and prepare to get underway immediately.

0800 RIGEL RIGEL vicinity #1 dry dock and ten ten dock strafed and bombed by 15 dive bombers from South. Altitude 600 to 100 feet.

0800 WHITNEY WHITNEY sounded general quarters. First plane passed over ship low altitude, strafing with machine guns.

0800 HELM Torpedo planes sighted approaching from direction of Barber's Point. They passed over West Loch channel and dropped torpedoes either in North Channel or across the island. Targets for these planes appeared to be ships in berths F-9 to F-13. The planes came in low, and several strafed the ship. All bullets missed the ship by a few feet. No fire was opened, since the forward machine guns, which could bear, were covered with preservative grease and had to be cleaned before they could fire.

0800 HELM Backed engines and commenced maneuvering ship out of West Loch channel to head for entrance.

0800 JARVIS Ensign Greene OOD of JARVIS reported on bridge. Prior to this he had been directing activities around the quarterdeck. He was told to go to the after firing battery. Ensign Chiles was actively organizing the forward battery without orders. Ensign Fleece already on the director. Orders given to open fire.

0800 MUGFORD Commenced assembly of engineering plant which had been placed out of commission for yard overhaul. Connected fuel oil hose to yard line. 8,000 gallons total on board.

0800 PHOENIX Bombing attack on BBs. Plane markings, varied U. S. swastikas, and rising sun painted on fusilage.

0800 RALEIGH Opened fire with AA battery of 3"/50 cal. 1.1" and .50 cal. guns. Ship started to heel to port and received report that torpedo had struck #2 fireroom. #1 and 2 firerooms and forward engine-room completely flooded. Fire in #3 went out. Directed counter-flooding. As it appeared that ship would capsize, orders were given to jettison topside.

0800 RALEIGH Both planes successfully hoisted out by hand. Doctor was directed to report to SOLACE. Damage repair party was sent to capsized UTAH to cut men out of hull. Sent signal to send pontoons and lighter from alongside BALTIMORE to RALEIGH. These were delivered and secured to port quarter and acted as outrigger. Torpedoes minus warheads were beached at Ford Island. All stanchions, boat skids, and life rafts and booms were jettisoned. Anchors were let go.

Attacked by torpedo plane and bombing plane. Sounded General Quarters. Received severe underwater hit frame 84, portside. Followed by another hit which caused ship to list 15°. Passed word "all hands on deck". Not possible to repel attack as all ammunition was in magazines and secured. 5" and 1.1 guns covered with steel housing; .50 and .30 caliber machine guns dismounted and stowed below decks. Ship covered with two layers 6 by 12 timbers. Above conditions necessitated by UTAH being used by ships as bombing target during current operations. Received bomb explosion in port aircastle.

## 1232 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|                 |                                                                                                                                                                                                                                                                                                                                                                                                                                   |
|-----------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0801 PRUITT     | Reported OKLAHOMA and ARIZONA attacked from southerly direction. Number of torpedo planes attacked from southeast.                                                                                                                                                                                                                                                                                                                |
| 0801 NEVADA     | Observed enemy air attack. Sounded general quarters. Two machine guns forward and two aft had been already on continuous watch under the alert program.                                                                                                                                                                                                                                                                           |
| 0801 MUGFORD    | Sounded General Quarters.                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0801 SUMNER     | Saw dense smoke rising behind Kuahual Peninsula believed from ARIZONA, blazing oil floating down from line of BBs. Opened fire—#3 gun manned and commenced firing four minutes after the attack on Navy Yard was observed, and before any other gun in the vicinity had commenced firing. Made direct hit on and destroyed torpedo plane making approach on BBs.                                                                  |
| 0801 HELENA     | Opened fire. Hit by torpedo, range 500 yds., starboard side, approximately frame 75, 18 feet below water line. Four near misses from bombs received and one strafing attack with little damaged. Issued gas masks and protective clothing. Once gun opposition was in full swing, Japanese planes were noted to turn away from gunfire or keep at respectable altitude.                                                           |
| 0802 DEWEY      | Four .50 caliber machine guns fired at planes attacking battleships and Ford Island.                                                                                                                                                                                                                                                                                                                                              |
| 0802 TREVER     | Opened fire with .50 caliber machine guns.                                                                                                                                                                                                                                                                                                                                                                                        |
| 0802 NEVADA     | Opened fire with machine guns on enemy planes approaching on port beam. One plane brought down 100 yards of NEVADA's port quarter; one plane dropped torpedo which struck the NEVADA on port bow.                                                                                                                                                                                                                                 |
| 0802 PENNA.     | Attack by Torpedo planes from west and south, about 12 or 15. PENNA. reported as first ship opening fire on plane. After release of torpedoes three planes came in low from port beam strafing PENNA., though not affected. Bearing of torpedo attack and one enemy plane observed to burst into flames 2000 yds on stbd bow. Dive bombing attacks and torpedo attacks on Pearl Harbor, and dive bombing attacks on Hickam Field. |
| 0803 CUMMINGS   | After Machine Guns opened fire on Japanese torpedo planes.                                                                                                                                                                                                                                                                                                                                                                        |
| 0803 CALIFORNIA | Opened fire with machine guns and ready guns, on torpedo planes.                                                                                                                                                                                                                                                                                                                                                                  |
| 0803 SWAN       | Opened fire with 3" A. A. guns. All sea valves and hatches closed and commenced placing boilers in commission. Observed one direct hit with 3" gun—plane crashed beyond drydock area. No material damage suffered.                                                                                                                                                                                                                |
| 0803 CACHELOT   | Enemy planes passed within range and arc of guns. Opened up with .30 and .50 caliber machine guns.                                                                                                                                                                                                                                                                                                                                |
| 0803 NEVADA     | NEVADA opened fire with 5" A. A. Members of crew claim both broadside scored direct hit on torpedo plane which disintegrated in midair.                                                                                                                                                                                                                                                                                           |
| 0804 JARVIS     | Machine guns opened fire.                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0804 WHITNEY    | Commenced firing with .50 cal. AA guns. Received signal to get underway.                                                                                                                                                                                                                                                                                                                                                          |

|      |             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
|------|-------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0805 | MUGFORD     | Opened fire with .50 caliber MG's. Shot down Japanese plane, altitude 800 feet on the stbd. quarter, passing aft on stbd. hand. This plane had fired a torpedo at the U. S. S. OGLALA.                                                                                                                                                                                                                                                                                                                                                                |
| 0805 | TRACY       | Observed torpedo planes coming in from easterly direction and launching torpedoes at BBs at Ford Is. At first attack ship closed up as much as possible and broke out fighting equipment.                                                                                                                                                                                                                                                                                                                                                             |
| 0805 | NEW ORLEANS | Sighted enemy torpedo planes on port quarter, flying low across stern. Rifle fire and pistol fire opened from fantail as first planes flew by to launch torpedoes at battleships. Manned 1.1 battery and machine guns aft in time to fire at three or four enemy planes.                                                                                                                                                                                                                                                                              |
| 0805 | VESTAL      | Struck by two bombs. VESTAL moored to port side of ARIZONA B-F7. One bomb struck stbd. side fr. 44. Penetrated 3 decks, exploding in GSK stores, cutting fire main and electric cables in crew space. Hold set on fire and wrecked. Another bomb struck at fr. 110 on port side, passed through the shops and fuel oil tank. Bomb explosion forward damaged practically all stores. Heat of explosion necessitated flooding fwd. magazines. Material damaged consisted of 3 life rafts, 6 mooring lines, one gangway, port lenses and windows broken. |
| 0805 | VESTAL      | Opened fire, and shortly after A. A. breach jammed, blast from ARIZONA cleared gun station, killing one man. Fired with machine guns on enemy planes until they were withdrawn. Fired at torpedo plane which was seen to burst into flame and disappear over Ford Island. Following personnel damage was done: 9 dead, 7 missing, 19 in hospital.                                                                                                                                                                                                     |
| 0805 | RIGEL       | BBs attacked from altitude 185 feet from southeast by 12 torpedo planes, 300 to 500 yard range.                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 0805 | HELM        | Opened fire with after machine guns at planes over main channel, followed shortly by forward machine guns firing at passing torpedo planes.                                                                                                                                                                                                                                                                                                                                                                                                           |
| 0805 | HULL        | #4 machine gun opened fire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 0805 | CURTISS     | Firing with 5'' local control and .50 cal. machine guns. Lighted off boilers 1, 2 and 4.                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 0805 | UTAH        | Listed about 40° to port. Attacking planes strafed crew as ship was abandoned.                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0805 | SUMNER      | Torpedo plane passed close aboard within 100 yards of SUMNER, stern on West course, altitude 75'. Levelled off for launching torpedo at BB. Struck by direct hit from sumner's #3 A. A. gun, range 300 yards. Plane disintegrated in smoke and sank in fragments. Torpedo believed sunk without exploding.                                                                                                                                                                                                                                            |
| 0805 | JARVIS      | 5'' opened fire. #3 gun believed to be the first 5'' gun in harbor to open fire..                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 0805 | BREESE      | Opened fire with 3'' A. A. guns.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 0805 | RAMSAY      | Sounded general quarters and opened fire with .50 cal and 3'' cal guns. RAMSAY liberty party returning in MONTGOMERY boat was strafed by torpedo planes which were observed to fire 3 torpedoes into UTAH and RALEIGH.                                                                                                                                                                                                                                                                                                                                |
| 0805 | GAMBLE      | Mounted and commenced firing with .30 cal. machine guns on galley deck house.                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0805 | BLUE        | Opened fire with .50 caliber machine guns on Japanese planes diving on ships in harbor.                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 0805 | CASSIN      | Observed HELENA open fire followed by PENNSYLVANIA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0805 | CALIFORNIA  | Reported two torpedoes struck port side, frame 100, making 40 ft. long hole extending from first seam below armor belt to bilge keel.                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 0806 | PHOENIX     | Made radio signal to ships of sector four "prepare to get underway".                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

## 1234 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

| 0810 | THORNTON            | First dive bombing attack ended.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 0810 | CUMMINGS            | Commenced preparations for getting underway in accordance general signal. Opened fire main battery on dive bombers over BBs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 0810 |                     | Enemy aircraft bomb struck hangar and aircraft parking space adjacent to VP-24 parking area. Ready plane suffered a severed wing spar. Plane was then machine gunned and caught fire. Fire was extinguished and plane has been repaired and is in service. Plane undergoing structural changes not damaged and is now operating. Personnel present mounted machine guns in available planes and opened fire on attacking planes. One low-winged biplane flying from across hangar 54 on course about 250 lost both wings.                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0810 | NEW ORLEANS         | All batteries NEW ORLEANS except 8" battery in action. Area around berths 14-19 incl, subjected to dive bombing attack by approximately ten enemy planes. Attack turned away by combined fire of HONOLULU and NEW ORLEANS. Observed three bombs drop; one falling ahead of and another falling astern of the RIGEL. These failed to explode. Third bomb landed midway between RIGEL and NEW ORLEANS exploding and causing damage from flying fragments. During raid yard power failed or was cut off leaving vessel in darkness without power except auxiliary battery power. Heavy drain of machinery raising steam for getting underway exhausted auxiliary batteries so much that lighting was very dim and of practically no use. All work in engineering spaces, magazines and ammunition passageways conducted by flashlight. Hoists and guns worked by hand with consequent reduction of volume of fire. AA directors were off ship. |
| 0810 | UTAH                | Listed 80° to port mooring lines parting and two minutes later ship capsized. Ship abandoned.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |
| 0810 | UTAH                | Capsized. Salvage operations undertaken immediately in order to rescue entrapped personnel. 32 men thus rescued. Estimated number of torpedoes to hit ship about 5; no bombs were observed to have hit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |

|      |                |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

| 0810 | PHOENIX        | MG battery opened fire on attacking planes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 0810 | DEWEY          | Guns 1-2-3 and 5.5", no power on ship.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 0810 | HELM           | Fire from port machine gun hit plane approaching from South. Plane observed to veer sharply, catch on fire and crash behind trees near Hickam Field. Damage to enemy:—1 plane shot down by machine gun fire.                                                                                                                                                                                                                                                                                                                                                                      |
| 0810 | CASSIN         | Observed Japanese plane crash over tree near hospital. Five high altitude, 12,000 ft, bombers passed overhead from forward aft and dropped large bombs. Observed OKLAHOMA roll over.                                                                                                                                                                                                                                                                                                                                                                                              |
| 0810 | PRUITT         | Commenced making preparations to get underway. Lighted off four boilers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 0810 | GAMBIE         | Opened fire with 5" guns on dive bombers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0810 | CALIFORNIA     | Commanding Officer, Captain M. S. Bennion mortally wounded.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 0810 | W. VIRGINIA    | Set condition affirm. Commenced firing with 3" A. A. guns.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0810 | WHITNEY        | Counted 6 or 7 torpedoes in OKLAHOMA. NEVADA, WEST VIRGINIA, and ARIZONA also torpedoed. Apparently, ARIZONA forward magazine exploded. Noted OGLALA torpedoed alongside HELENA at 10-10 dock.                                                                                                                                                                                                                                                                                                                                                                                    |
| 0810 | JARVIS         | Opened fire with after machine guns.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 0810 | REID           | No material or personnel damage.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 0810 | WHITNEY        | Reports formation of high altitude planes came in from S. W. attacking battleships and Ford Island followed by another wave from the same direction. Torpedo planes were small and carried only one bomb. Dive bombers also small and carried but one bomb. At coal docks nested with 4 minesweepers. Opened fire with 3" A. A. 15 minutes after first bomb dropped on Pearl. Opened fire with .30 machine guns, rifles and pistols 20 minutes after first attack. A string of 20 bombs fell in channel astern. Shrapnel fell throughout ship. No material or personnel damage.   |
| 0810 | RAIL           | OGLALA listing to port. Attack started again. Heavy A. A. fire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0812 | MUGFORD        | Hostilities with Japan commenced with air raid on Pearl.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 9812 | Outgoing       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0812 | COMSECTOR FOUR | Sector 4 Prepare to get underway                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 0812 | HULL           | All machine guns plus two automatic rifles on the bridge and one on after deck, firing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 0812 | RIGEL          | Torpedo planes attacked from S. E. at 500 feet and attacked BBs from altitude 125 feet, range 300 to 500 yards.                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0812 |                | Task Force 8 received Message from CinC Air Raid on Pearl Harbor. This is no drill. This time about coincided with expected arrival ENTERPRISE planes at Pearl. Task Force Comdr. first concerned that planes were assumed to be unfriendly by harbor defenses. It was not until subsequent dispatches were received that it was realized hostilities with Japan had begun. TF-8 operated in area South Kaula Rock for air attack should enemy be located North or South of Oahu. No authentic information available regarding location. Maintained combat and inner air patrols. |
| 0812 | SIGARD         | Undergoing overhaul in Navy Yard stbd side to PRUIT Berth 18. Ship totally disabled as to main and auxiliary machinery and gun battery. Observed Squadron of Japanese planes coming in from Southwest, diving from 5,000 feet on Ford Island.                                                                                                                                                                                                                                                                                                                                     |
| 0813 | CONYNGHAM      | Observed attacking plane shot down by fire from nest. Plane crashed near CURTISS.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 0813 | HELM           | Passed gate vessel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

## 1236 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

0815 - Aircraft in flight informed hostilities with Japan commenced with air raid on Pearl. VP-24 directed to search sector 240-280 for carriers. Ten miles south of Barbers Point plane 24-VP-4 sighted unidentified submarine near force consisting of INDIANAPOLIS and 4 Destroyers. Submarine made crash dive and spot marked by float lights. Completed search through 200 miles and returned to Pearl.

0815 PENNA Reports NEVADA underway and about on PENNA stbd qtr. Distance about 600 yds when dive bombing attack observed approaching PENNA on port bow. 10 or 15 planes coming in succession just before reaching PENNA  $\frac{3}{4}$  planes appeared to swerve to left. Number of them dropping bombs at the NEV. 1 dive bomber dropped bomb on SHAW in floating dry dock and set it on fire. NEV observed to slowly swing around head to port broadside to channel, on fire fwd. Observed 2nd Group of enemy planes fly toward Hickam Field. VIREO opened fire expending 22 rounds 3" A. A. Ammunition.

0815 RIGEL Undergoing major repairs and conversion at Navy Yard. No motive power available. All power etc. from yard. Air attack began. As this vessel had no armament no offensive action could be taken. Accordingly rescue work was commenced on WEST VIRGINIA personnel. About 100 men (in track of burning oil) had been blown into the water. These were rescued first. The torpedo, bombing and machine gun assaults on the WEST VIRGINIA continued while the rescue operations progressed. One rescue boat was struck by bomb and sunk. Crew thrown into water. Moored B-13 Navy Yard undergoing major repairs. Services from Navy Yard.

0815 SICARD Set condition of readiness "AFFIRM". 2 fire parties were formed fore and aft.

0815 MUGFORD Shot down one enemy plane bearing astern making approach on battleship at altitude 20 feet off water. Plane crashed on Ford Island aflame, torpedo not launched.

0815 PHOENIX A. A. battery opened fire.

0815 CASSIN Observed another group of 5 high altitude bombers passed overhead and let loose bombs.

0815 PRUITT Observed 12 bombing planes in close "V" formation bombed (horizontal attack) from 10,000 feet from Southwest.

0815 JARVIS All guns and machine guns of JARVIS in action. MUGFORD noted to be delivering high volume of fire.

0815 SUMNER Checked fire.

0817 CINCPAC Directed Compatwing TWO locate enemy force.

0817 HELM Sighted conning tower of submarine to right of channel, Northward of buoy #1. Gave orders to open fire, pointer fire, but submarine submerged before guns could get on.

0818 CONYNGHAM Opened fire with remaining 5" guns at horizontal bombers passing overhead in direction of Schofield Barracks.

0820 TRACY Sent men to CUMMINGS to assist batteries and approximately 15 men to PENNA to fight fires.

0820 HELM Opened fire on submarine off Tripod Reef; no hits observed. Submarine appeared to be touching bottom on ledge of reef, and in line of breakers. Steering motor short circuited—bridge lost steering control.

0620 SICARD Was manned 2 .30 cal. M. G.s. Bombers began to attack ships at 1010 dock and battleships in vicinity of Ford Island. SICARD hits were observed on planes but no apparent damage was done.

| 0825 | SUMNER     | Opened fire on ten dive bombers attacking Navy Yard Dry Dock. These planes approached from cloud bank in South East. Heard terrific explosion in Navy Yard—vicinity of Dry Dock followed by dense cloud of smoke. Dive bomber passed 300 yards from SUMNER and DD's HULBERT and THORNTON, tail of plane ignited. Plane turned southward and disappeared over Halawa district. Observed six horizontal bombers approaching from southeast at 8,000 feet. Planes circled and approached Ford Island from Southwest and dropped bombs over DD's. Planes then circled to Southeast. One plane left it's formation, turned towards Navy Yard losing altitude rapidly, passed SUMNER at 400 feet altitude range 500 yards; was fired on by SUMNER. When over center Southeast Loch, plane began smoking and was lost in thick smoke over Navy Yard. It was a two-seater monoplane, gunner in rear seat protected by shield, orange disk on side just abaft rear cockpit. Planes crossing low ahead of nest to Northeast were taken under fire by CONYNGHAM and nest. One burst into flame and exploded in clump of trees in Alea Heights. |

| 0830 | PENNA      | Reports about 5 high bombing attacks obs. to have passed over PENNA. one from port bow one from ahead one from ahead to stbd 2 from astern. Altitude about 2000 feet.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 0830 | VIREO      | Brought down one enemy plane which landed in vicinity of Hickam Field. 400 rounds of .30 cal. M.G. ammunition expended. One personnel casualty to PRICE, Radioman, on telephone watch astern of vessel. PRICE returned to duty 10 December. No damage to vessel. Made ready to get underway.                                                                                                                                                                                                                                                                                                                                                       |
| 0830 | VESTAL     | Prepared to get underway.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 0830 | MUGFORD    | Five enemy planes in V formation passed directly overhead, making horizontal bombing attack.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 0830 | SUMNER     | Checked fire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 0830 | RIGEL      | 15 Heavy bombers in 3-V formation 8 to 10 thousand feet from S. E. bombed BB's.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 0830 | WHITNEY    | Issued ammunition and ordnance stores to destroyers alongside. Secured steam to destroyers.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0830 | HELM       | Fired at enemy plane with forward machine guns. May have hit plane.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 0830 | NEVADA     | Heavy bombing attack received.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 0830 | HULL       | Two Vee's high level bombers (10,000 feet) directly overhead seen intermittently through the clouds. Opened fire with all guns. Formations broke up and dropped their bombs in cane field.                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0830 | CALIFORNIA | Opened fire on Dive bombers with 5" and forward machine guns; shot down one enemy dive bomber which crashed in flames.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 0830 | BREESE     | Sighted conning towers of two submarines in North channel but could not open fire because of interior berth. Observed MONAGHAN proceed down channel at full speed to ram leading submarine which had just fired torpedo at U. S. S. CURTIS but missed. U. S. S. MONAGHAN dropped 2 depth charges and submarine, about 250 ton type arose upside down and sank.                                                                                                                                                                                                                                                                                     |
| 0830 | ZANE       | Sighted strange submarine 200 yards astern of MEDUSA moored in K-23. Guns would not bear as ZANE was inboard ship.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 0830 | CASSIN     | Received signal from PENNSYLVANIA, Senior destroyer officer report on board.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 0830 | HENLEY     | Underway from buoy X-11. Large bomb struck water 150 yards from port bow. Received signal "submarine in harbor". MACDONOUGH directly ahead made depth charge attack and cleared at high speed. HENLEY was third ship in sortie. After rounding Hospital Point, subjected to straffing attack by light bomber, coming up from astern and showing five distinct sources of machine gun fire from plane as plane passed ship. It was seen to crash offshore in a few minutes. Another light bomber approached from starboard at 2,000 feet and was taken under fire with another destroyer. Close burst forces plane to dive and it crashed into sea. |
| 0830 | DOWNES     | Open fire with 5-inch, on blocks. DOWNES struck on after deck house by bombs.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 0830 | RIGEL      | Captain returned on board. Bomb struck astern and midway between pliers 13 & 14. 150 small holes were blown into port quarter RIGEL. Above waterline.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| 0835 | CURTIS     | Ready to get underway. Sighted submarine periscope on starboard quarter, distance 700 yards. Opened fire on submarine.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 0830 | REID       | First group of enemy planes taken under fire of REID with forward 5" and .50 caliber machine guns.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 0830 | Outgoing   | To MPL RDO SAN DIEGO & MPM RDO WALLUPE: I must have instantaneous relay for my dispatches.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |

0830 COM-14 To NAS Pearl: Hostile Japanese air attack x Hickham Field bombed x stay clear this area as long as gas permits x keep in contact this station.

0832 CALIFORNIA Reported one enemy plane shot down over Ford Island.

0832 SICARD observed 4 flights horizontal bombers attacking battleships, followed by 8 torpedo bombers. OKLA-HOMA struck by several torpedoes, took heavy list to Stbd and capsized. ARIZONA struck by torpedoes and heavy bomb.

0832 PYRO Observed enemy planes crash and burst into flame towards Barbers Point. Pilots bailed out. Observed damage to ship which consisted of broken steam line; repaired by ship's force.

0835 SICARD Sent working party 20 men to CUMMINGS to handle ammunition, and 4 gunner's mates to NEW ORLEANS to assist her battery. 10 men previously detailed to PENNSYLVANIA to assist damage control.

0835 BOBOLINK Moved out of next and to first buoy. Observed Japanese plane crash near Hickam Field. Believe it result of minesweeper firing.

0835 PREBLE Reports first phase of attack completed.

0838 COM-14 To SHIPS PRESENT: Send boats to Ford Island.

0838 MUGFORD W. VA burning. ARIZONA on fire. Tugs trying to pull overturned OKLA clear. U. S. S. VESTAL clearing NEVADA.

0840 CALIFORNIA Shaken by 4 near bomb hits and splintered considerably by fragments.

0840 CURTIS Submarine surfaced and fired one torpedo up North channel toward destroyers. Conning tower hit twice by gun #3.

0843 CURTIS Ceased firing on submarine and observed MONAGHAN drop 2 depth charges. Air bubbles and slick appeared.

0840 CUMMINGS Opened fire to repel straffing attack. Glide bomber observed to veer away from ship with smoke trailing, passed over new boiler shop and disappeared in smoke.

0840 JARVIS Noted NEVADA underway and standing out. Dive bombed, hit several times and beached. SHAW hit and caught on fire in drydock. Two destroyers in drydock with PENNSYLVANIA hit.

0840 TREVER Ready for getting underway. TREVER could not clear because other ships astern were clearing buoys D-3 and D-4. Enemy plane brought down vicinity of Pearl City. Second plane brought down 200 yards off Beckoning Point.

0842 MUGFORD U. S. S. VESTAL clear of NEVADA.

0845 PHOENIX Ship ready to get underway.

0845 SICARD Observed attack broken off.

0845 VESTAL Observed ARIZONA quarterdeck awashed. With no steering gear VESTAL got underway while tug pulled her bow away from ARIZONA. Starting to list to Stbd VESTAL was maneuvered into position with South end of MCrews Point bearing 80° distance 910 yds.

0845 MUGFORD Executed signal to get underway to Task Forces One and Two. Tugs pulled OGLALA clear of HELENA.

0845 CALIFORNIA Commander Stone, executive officer, arrived and assumed command of CALIFORNIA. Combatfor returned on board.

0845 CACHALOT Dive bomb and straffing attacks made by enemy.

# 1240 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

| 0845      | HULL                    | Second Attack. All attacks except one was broken up. One formation of three planes continued on. Two of these were shot down; one by USS DOBBIN and one by the next of ships. Two bombs landed astern of next, close to side of DOBBIN.                                                                                                                                                                                                                                                                                                                                                                                                  |
| 0845      | CASTOR                  | Ready to get underway.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0847      | BLUE                    | Underway upon execution of signal to get underway from berth X-7. Maintained fire on enemy planes with main battery and machine guns while steaming out of harbor. Four planes fired on with main battery were later seen to go down in smoke. It is claimed that two of these planes were definitely shot down by this vessel. One was seen to crash in field on Waipio Pena., and the second crashed into crane on stern of USS CURTISS. Two planes that dove over the ship were fired on by the .50 caliber machine guns. It is claimed that one of these planes, seen to crash near Pan American Dock, was shot down by this vessel. |

Opened fire with AA.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 0855      | MUGFORD                 | NEVADA Underway. Dense smoke over Ford Island.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 0855      | PRUITT                  | A tanker was towed clear of Ford Island.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 0855      | WHITNEY                 | Observed about 10 planes made high altitude horizontal bombing.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 0855      | USS RALPH TALBOT RAMSAY | Observed second air attack by Japanese bombing planes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0855      |                         | Was moored bow to southward to buoy X-11 with PATTERSON to port and HENLEY to starboard.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 0855      |                         | Underway proceeding out of harbor. Believe RAMSAY is responsible for shooting down plane with .50 cal. Assumed anti-submarine patrol on clearing channel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 0857      | CTF 2                   | To all ships: Enemy submarine in North Channel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| 0859      | UNKNOWN                 | To Cincpac: Ten aircraft approaching Pearl Harbor from Southwest.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0900      | TRACY                   | Reports high altitude bombers passed overhead in several waves. One bomb fell in slip between stern of RIGEL and CUMMINGS at Berth 15.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |
| 0900      | MUGFORD                 | Attack started again from the South. Army planes taking off from HICKAM FIELD.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 0900      | RIGEL                   | Executive Officer returned on board. Traffic congestion delayed all hands. The one exception to all hands was Lt. H. E. Morgan who did not return until 0800 next morning. Lt. Morgan's behavior is being investigated.                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 0900      | SICARD                  | Observed dive bombers from S. E. attack ships moored to Navy Yard docks, followed by waves of dive and horizontal bombers on ships at Ford Island and docks.                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

0900 OGLALA Approaching 40° list to port. Ordered all hands abandon ship. Only gun crews and Cominbatfor remained.

0900 PHOENIX Formation of 11 planes passed over fleet on heading 070. Approximate altitude 10,000 feet. Planes appeared to be painted silver. Expended fifty rounds of 5". No apparent damage to planes. There were two flights of this nature. Time of second cannot be approximated. Expended fifty rounds of 5".

0900 HONOLULU Enemy bomber sighted flying directly towards this ship from direction Merry Point with an altitude of 1,000 feet. Was seen to swerve to its left, pass over the Navy Yard, smoking, losing altitude and appeared to crash near Naval Hospital. This plane was under the fire of several ships, including the port 5" and machine gun batteries of the HONOLULU. Damage to enemy observed, one torpedo plane shot down between berth 21, Submarine Base, one torpedo plane shot down between berth 21 BB. (Note: Damage listed above is at unknown times).

0900 TAUTOG Observed planes approaching in direction Hickam Field high in southwest and mostly obscured by clouds. App. 18 planes turned left over Hickam Field and made dive bombing attacks on ships in yard. Dive appeared slow and bombs released were very low. One plane observed out of control in flames. Scattered enemy planes observed until 1130. Most dive bombers appeared to drop two bombs each.

0900 CALIFORNIA One bomb, possibly 15" projectile with tail vanes, struck CALIFORNIA abreast casemate one, frame 59, penetrated to second deck and exploded rupturing forward and after bulkheads of A-611 and overhead into A-705. Armored hatch to machine shop badly sprung and couldn't be closed, resulting in serious fire.

0900 BREESE Projectile from BREESE 3" AA battery struck dive bomber which had just attacked CURTISS. Forward section of plane with motor landed on North side of Waipie Peninsula.

0900 RALPH TALBOT Underway. While enroute to entrance expended 150 rounds 5"/38 cal. and 1500 rounds .50 cal. Observed two planes crash and another start to smoke badly. Two enemy planes dove low over bridge and was hit by our .50 cal machine guns. Plane crashed along shore Pearl City abeam of us. Used after 5" guns to fire on plane attacking CURTISS.

0900 DEWEY Second wave attack started by light bombers lasting 10 minutes under fire by DWEY throughout attack.

0900 PATTERSON Underway and stood out of harbor. No damage sustained by PATTERSON.

0900 SOLACE Ship underway and shifted from Berth X4 to Berth X13. No material or personnel damage to ship proper.

0900 BOBOLINK Observed suspicious sign of Japanese submarine and signalled to destroyers, but signal apparently not seen.

0900 BOBOLINK Observed three flights of high altitude bombers approaching from due south to north. 7 planes in each flight, altitude about 17,000 feet. One flight dropped bombs on Hickam, second flight passed directly over coal docks and dropped bombs further up in yard; third flight passed over West Lock, one plane dropping bombs near entrance while others maintained course and dropped them beyond Ford Island.

## 1242 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|                        |              |                                                                                                                                                                                                                                                                                                                                                                                    |
|------------------------|--------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0900                   | RALEIGH      | Dive bomber attack came in which was met with warm reception. One bomb hit ship a glancing blow going through carpenter shop and oil tank, piercing the skin below water line and finally detonating on bottom of harbor. Plane machine gunned ship also. Steam raised in 3 and 4 firerooms and pumps started. Five bombing planes under fire were observed to crash close aboard. |
| 0900                   | HONOLULU     | 5 high altitude bombers, 12 to 15,000 feet appeared. 5 high altitude bombers from South, 12 to 15,000 feet. All bombed Pearl Harbor and Ford Island Area.                                                                                                                                                                                                                          |
| 0900                   | RIGEL        | 15 dive bombers 6 to 10 thousand feet from N. attacked DDs and NEVADA.                                                                                                                                                                                                                                                                                                             |
| 0900                   | SOLACE       | Got underway and shifted from Berth X-4, near BOBBIN and destroyers to berth X-13 in the clear. Made boat trips to WEST VIRGINIA to bring back casualties.                                                                                                                                                                                                                         |
| 0900                   | DOBBIN       | Fired upon enemy plane headed astern of ship. Plane crashed upon trees in Navy Yard.                                                                                                                                                                                                                                                                                               |
| 0900                   | OGLALA       | Capsized along 10-10 deck.                                                                                                                                                                                                                                                                                                                                                         |
| 0900-<br>0900-<br>0915 | PHOENIX      | Dive bombing attack on ships berth northern side of Ford Island. Attack was made at about 30° angle, opposed with AA and MG batteries. Expended 20 rounds of 5". One plane disintegrated by DD fire.                                                                                                                                                                               |
| 0900-<br>0930          | PHOENIX      | Effected periodic fire on planes delivering low-level bombing attack on navy yard and ships berth there.                                                                                                                                                                                                                                                                           |
| 0901                   | CUMMINGS     | Observed twelve scattered planes over Ford Island; air raid resumed. Opened fire with main battery on horizontal bombers approaching over Navy Yard industrial section.                                                                                                                                                                                                            |
| 0902                   | MUGFORD      | Formation of planes sighted to South. Decks of ARIZONA and W. VA. level with water. Dense smoke pouring from NEVADA.                                                                                                                                                                                                                                                               |
| 0903                   | DOLPHIN      | Reports another attack from higher altitude.                                                                                                                                                                                                                                                                                                                                       |
| 0903                   | Outgoing     | To MIDWAY: Pearl Harbor bombed no indication direction attack take off attempt locate Japanese Forces.                                                                                                                                                                                                                                                                             |
| 0903                   | Outgoing     | To WAKE: Pearl bombed by Japanese be on alert.                                                                                                                                                                                                                                                                                                                                     |
| 0905                   | CURTISS      | Obs. 1 of 3 planes pulling out of dive was hit by CURTISS and crashed into #1 crane. Tank exploded and plane burned on Boat Deck.                                                                                                                                                                                                                                                  |
| 0905                   | SUMNER       | Fired on wave of dive bombers approaching Navy Yard. Dive bombers also attacked HICKAM FIELD and BB. No hits, when firing on latter planes. Observed light dive bomber with conspicuous red tail zig-zag over Navy Yard as if observing casualties at end of phase.                                                                                                                |
| 0905                   | TRACY        | Attack by approximately 10 dive bombers from direction of the sun, which indicated drydock as objective. Group of 6, 3, and 9 planes observed at altitude of 8 to 10,000 feet. Bomb seen to fall between berths 13 and 15 in slip. TRACY gig damaged by fragmentation; no casualties.                                                                                              |
| 0905                   | PREBLE       | Observed about 30 dive bombers make second attack in twin-motored monoplanes. Observed one bomb fall in slip 25 yards on starboard quarter. Observed a bomb fall astern of HONOLULU in berth B-21. Observed numerous bombs fall in vicinity of drydock area.                                                                                                                       |
| 0905                   | WHITNEY      | Observed one Japanese plane fall down in flames on hilltop, bearing northeast, true.                                                                                                                                                                                                                                                                                               |
| 0906                   | PENNSYLVANIA | The second attack coming in slightly on port bow dropped bombs on ships in drydock. One heavy bomb hit the destroyer DOWNES in dock ahead of PENNSYLVANIA, and one hit dock approximately                                                                                                                                                                                          |

abreast frame 20 while one hit the boat deck of the **PENNSYLVANIA** a few feet abaft gun #7. This bomb passed through boat deck and detonated in #5 gun #9 casemate. Fifth bomb believed to have struck water outside of dock. Observed plane crash in hospital grounds. Observers claim to have destroyed six enemy planes. Consider two hit by **PENNSYLVANIA**.

0906 **MUGFORD** Japanese planes diving at Ford Island from south-east. **NEVADA** standing down south channel.

0907 **PRUITT** Observed straffing and light bombing attack, plus heavy horizontal bombing attack from about 10,000 feet made on ships and Ford Island. One bomb hit close to stern of **RIGEL**.

0907 **PENNSYLVANIA** Bomb hit on dock and cut yard power, subsequently power on the ship was taken from storage batteries, meanwhile, firemain pressure cut off.

0907 Outgoing **ALL HANDS**: Cease firing on B17's attempting to land at Hickam.

0908 **CONYNGHAM** Reports one plane attacking on starboard bow shot down by nest and crashed in Pearl City.

0908 Com 14  
to ASP Do not fire on our planes coming in.

0908 **NEVADA** Attack slackened.

0909 **MUGFORD** Bomb dropped some 400 yards on **MUGFORD** port bow. Ship in repair basin hit.

0910 **PERRY** Mine Division **FOUR** underway at intervals and stood out to take off shore patrol duty.

0910 SecNav to Alnav **Execute WPL FORTY SIX** against Japan.

0910 Dive bombers attacked ships at Pier 19; bombs fell in water ahead and astern within 25 yds. of **CUMMINGS**.

0910 **DOBBIN** Attacked by 3 enemy planes. 3 bombs dropped—all near misses. Fragments struck stern of ship injuring #4 3" AA gun crew. 3 killed, 2 injured. Damage: small holes through decks, bulkheads, booms, #1 **MWB** hull damaged beyond repair.

0910 **BLUE** Passed channel entrance buoys, and set course 120 true. Proceeded to sector three to patrol station.

0910 **RIGEL** 10 to 12 dive bombers from S. attacked ships in Repair Basin with bombs and mach. guns.

0910 **PHOENIX** Second bombing attack on **BB**. Expended sixty rounds of 5". After planes came out of dive and turned towards berth C-6, planes were brought under fire of **MG** battery.

0910 **VESTAL** Anchored in 35' of water. Soundings and draft readings showed ship settling at and listing to stbd. Draft aft increased to 27', list  $6\frac{1}{2}^{\circ}$ . C. O. **Vestal** decided to ground ship.

0912 **CURTISS** Reports group of planes under heavy fire attacked. During attack one bomb hit stern mooring buoy. 1 fell short, one over, one hit ship starboard side of boat deck, passed through Carpenter Shop and Radio Repair Shop, entered Hangar and detonated on Main Deck. Explosion destroyed bulk heads, deck, etc., within radius of 30 feet. Equipment destroyed in Hangar, Handling Room etc. One plane shot down 1000 yards on port bow and 1500 yards on port beam. Another plane shot on port beam landing in water off Pan-Air dock. One plane reported crashed in cane field astern and one forward of ship.

0910 **CONYNGHAM** Opened fire on horizontal bombers approaching from ahead and from direction of Schofield.

0910 **THORNTON** Second wave dive bombing attack commenced and ended at 0917. Throughout the entire period there was horizontal bombing in various Pearl Harbor areas.

# 1244 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|      |          |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
|------|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 0911 | MUGFORD  | Horizontal Japanese bombers passed overhead. Observed dive bombers approach from port bow, altitude 5,000 feet and release bombs. Bombs landed on concrete dock 12' from ship's side amidships. Penetrated dock exploding underneath and jaring ship. Heavy black smoke coming from SHAW in floating drydock.                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| 0912 | PYRO     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
| 0912 | MUGFORD  | NEVADA stopped south side of south channel.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0913 | MUGFORD  | Attack completed. No damage. No casualties sustained by this ship.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| 0913 | PREBLE   | Large explosion on DOWNES.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0915 |          | Small enemy fighter approached ship from astern in medium glide and dropped two bombs, which exploded in water about 50 yards off port bow and 20 yards of starboard bow. After machine guns opened fire but did not hit plane. Shock shorted relay to steering (which had just been repaired) and damaged gyro rotor. Choke coils, tubes and resistors in sound gear burned out, echo ranging inoperative. Seems below waterline on starboard side forward sprung. A-15, A-301, A-401, and A-402 flooded. These compartments closed off and pumped out during afternoon. F'S smoke generators jumped track, breaking air line connection.                                                                                                                                         |
| 0915 | HELM     | Captain Bunkley returned to CALIFORNIA and assumed command.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0915 | NEVADA   | 5" AA battery fired on enemy planes to eastward. NEVADA suffered at least 6 bomb hits and one torpedo hit.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0915 | MUGFORD  | Thick black smoke coming from drydock.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 0915 | TRACY    | Commanding Officer returned aboard and found 2 .50 cal. mach. guns mounted and ready. 2 dive bombers attacked out of the gun. 1 plane pulling out over sub. base and flying low over building 155 crashed in flames in vicinity of hospital point after salvo by CUMMINGS. Plane appeared to be a type 95 dive bomber, planes appeared to be at about 3,000 feet to seaward of Hickam, were 18 planes in formation type V.                                                                                                                                                                                                                                                                                                                                                         |
| 0917 | PRUITT   | Observed low flying pursuit planes strafing with machine gun fire on ships moored in the vicinity of Berth 18. Observers on this ship believe many high altitude horizontal bombs either failed to explode or landed outside the harbor area where they could not be observed. An indeterminate number of fighters took part in the raid, with approximately 30 bombers. Approaches were made on a steady course and all horizontal bombing was made in close formation at about 10,000 feet. The four cruisers and light minelayers in the Navy Yard were strafed several times by low flying planes but not a single bomb appeared to have been aimed at those ships. Small caliber fire of minelayers brought down one Japanese plane. Cleared nest and proceeded down channel. |
| 0917 | BREESE   | CUMMINGS fired on a light bomber. Plane observed smoking heavily as it flew out of sight to southwestward.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         |
| 0920 |          | Observed low winged dive bombers from South to Southeast, 400 feet pullout. Two bombers bombed industrial and drydock areas. One bomb, (clearly visible on its descent, 250 lbs), passed through edge of concrete dock, angle of descent 45°, and exploded underwater between ship and dock.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 0920 | HONOLULU | Damage to HONOLULU: oil tanks various, decks bulged in magazines, various leaks sprung and decks slightly fuddled, power lease to turret #2 grounded, turret #1 partially grounded, mercury thrown out of gyros, fore and aft, range finders, main battery de-ranged fore and aft.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

|         |              |                                                                                                                                                                                                                                                                                                         |

| 0040 | NEVADA       | Grounded off Hospital Point.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 0041 | PENNSYLVANIA | Observed warheads on DOWNES explode covering area with debris. Section of torpedo tube, weighing about 1,000 lbs. landed on PENNSYLVANIA fore-castle. Fire brought under control before serious damage resulted. CASSIN rolled over on DOWNES. It was noted by everyone participating in action that after an hour or more heavy thirst was experienced requiring considerable drinking water. This confirms the necessity of having water at all battle stations.                                                                                                                                            |
| 0042 | BREESE       | Cleared channel entrance with degaussing gear cut in and took station as offshore patrol in section 3.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0042 | Received     | COM 14 To ASP & NAVSHORE ACTIVITIES: Brief concentrations reported 25 miles south by south east of Barbers Point x not definite.                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| 0043 | TERN         | Underway from alongside deck to pick up survivors in harbor. Received 47 survivors.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           |
| 0045 | DEWEY        | Third wave of attack started by dive bombers. DOBBIN and Desdiv One were target with 3 or 4 planes attacking. One bomb hit close aboard starboard quarter and one hit water between HULL and DEWEY astern. No damage, Guns 1 and 2 firing when not blanked by DOBBIN. It is believed that Desdiv ONE destroyed two planes. Ammunition expended: 76 rounds 5'', 1300 rounds .50 cal.                                                                                                                                                                                                                           |
| 0045 | CACHALOT     | Joined in fire against enemy bombers. No damage received. Nearest enemy bomb dropped 20' off starboard quarter and did not explode. Nearest torpedo passed 100 yards astern.                                                                                                                                                                                                                                                                                                                                                                                                                                  |
| 0045 | MUGFORD      | OGALA capsized to port.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       |
| 0046 | MUGFORD      | Japanese planes in from SW low.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               |

| 0048 | TENNESSEE    | Observed planes coming in on starboard bow; did not know whether enemy or friendly. Ship will not get underway until further orders. Engineering Department, stand by. Destroyer, from Navy Yard, getting underway. Unidentified ship in Pearl Harbor down by stern.                                                                                                                                                                                                                                                                                                                                          |
| 0950 | VESTAL       | Grounded.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
| 0950 | BLUE         | Good sound contact on submarine. Maneuvered to attack and dropped four depth charges. Regained sound contact on same submarine. Dropped two depth charges. Investigated and observed large oil slick and air bubbles rising to surface. It is felt that this submarine was definitely sunk. Obtained third contact on a submarine that was apparently headed for ST. LOUIS, which was at the time heading out on course approximately 150 true, at high speed. Two depth charges dropped, and upon return noticed large oil slick on surface. It is claimed that one, and possibly two, submarines were sunk. |
| 0950 | Outgoing     | Two enemy carriers reported 30 miles southwest Barbers Point. (Sent to CTF 8).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| 0951 | TENNESSEE    | Reports lighter alongside starboard beam on fire (ammunition lighter, top blown out, can see no ammunition on it).                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 0951 | Received     | COM 14 TO ASP: Two planes seen dropping heavy charges off harbor entrance which did not explode; think they are mines.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| 0952 | Outgoing     | Battleships remain in port probable channel mined.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            |
| 0954 | TENNESSEE    | Observed bow of MARYLAND on fire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| 0954 | Received     | SOPA SANDIEGO TO ASP HAWAIIAN AREA: Los Angeles Harbor Air Defense Plan Number ONE effective.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |

# 1248 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|         |                |                                                                                                                                                                                                                                                            |

| 1030 | HENLEY       | Visual signal from TREVER reported the HENLEY'S captain and executive officer on board that vessel.                                                                                                                                                                                                                                             |
| 1030 | BLUE         | Upon completion of attacks, BLUE screened ST. LOUIS.                                                                                                                                                                                                                                                                                            |
| 1030 | SICARD       | SICARD observed attack break off. Mustered crew, no injuries or casualties.                                                                                                                                                                                                                                                                     |
| 1030 | PHOENIX      | Got underway and started out north of channel. Received message from TENNESSEE from CINCPAC "Do not Sortie". Turned around in channel and started back to berth C-6. On receipt of orders from Comcrubatfor proceeded via south channel and completed sortie and joined Comtaskfor ONE.                                                         |
| 1030 | MUGFORD      | Fuel oil barge moored starboard quarter.                                                                                                                                                                                                                                                                                                        |
| 1030 | PENNSYLVANIA | Sent motor launches to West Lock for more ammunition.                                                                                                                                                                                                                                                                                           |
| 1031 | UNKNOWN      | This vessel and 4 DM in southwest S2 NO enemy carriers in sight.                                                                                                                                                                                                                                                                                |
| 1032 | TENNESSEE    | TENNESSEE observes ARIZONA abandoning ship. Repair II reports all C&R soundings normal. Repair IV reports all soundings normal. Repair III reports all soundings normal. Pull circuit L28 at aft. Distribution Board. Mr. Teague says hatches cannot be opened from inside wardroom country—too hot.                                            |

# 1250 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|         |              |                                                                                                                                                                                                                                   |
|---------|--------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 1032    | SIGNAL TOWER | To CINCPAC: These ships underway but have not cleared the entrance yet: DETROIT—JARVIS—PERRY—NEW ORLEANS—GAMBLE—CHEW.                                                                                                             |
| 1033    | COMBATSHIPS  | Be ready to repel repeated air attacks.                                                                                                                                                                                           |
| 1033    | CTF3, CTF8   | To ASP: Submarines reported 10 miles south Barber's Point.                                                                                                                                                                        |
| 1033    | TENNESSEE    | TENNESSEE 6° down by stern from flooding of D-306, D-312-M.                                                                                                                                                                       |
| 1036    | TENNESSEE    | Unit 2, Repair I, combatting fire in W. R. Country. Dead men forward of conning tower, sent stretcher party.                                                                                                                      |
| 1036    | WASMUTH      | Dropped sound depth charge on suspicious water, setting 200 feet, bearing 217°, distance 3.4 miles from Pearl Harbor entrance buoys. Brought up large quantities of oil, but no wreckage.                                         |
| 1040    |              | June 8 bearing (bilateral) 357° or 178° T from HEEIA. June 8 in COMCARDIVS (AKAGI).                                                                                                                                               |
| 1040    | Comdesron 3  | Underway accordance signal from tower, and oral orders. Joined antisub patrol operating off entrance. Made two sound contacts; dropped 3 and 2 depth charges. Oil observed on water but no conclusive evidence of submarine loss. |
| 1040    | COMBASEFOR   | To Cominron 2: Sweep South channel from East Loch to entrance magnetic and moored mines.                                                                                                                                          |
| 1040    | MUGFORD      | Commenced receiving fuel from oil barge in addition to oil from yard line.                                                                                                                                                        |
| 1040    | TRACY        | TRACY reported CUMMINGS underway after returning all TRACY men. 10 men sent to help fight fire in CALIFORNIA.                                                                                                                     |
| 1042    | Combatfor    | To Cap't. NYD: The CALIFORNIA is on fire inside. Probably two tugs with fire equipment could save her.                                                                                                                            |
| 1045    | DOWNES       | Fire on CASSIN brought under control.                                                                                                                                                                                             |
| 1046    | COMBATSHIPS  | To BATSHIPS IN COMPANY: All battleships send pilots and aviation personnel to Ford Island immediately.                                                                                                                            |
| 1046    | CTF8         | DF bearings indicate enemy carrier bearing 178 from Barber's Point.                                                                                                                                                               |
| 1048    | TENNESSEE    | To CINCPAC: TENNESSEE 30% damage. CALIFORNIA has been sunk. Doubtful—checking.                                                                                                                                                    |
| 1050    | TERN         | Proceeded to put out fire on USS ARIZONA. Shifted over to WEST VIRGINIA by orders from MARYLAND.                                                                                                                                  |
| 1051    | CPW 1        | To Plane 2 VP14: Search sector 310 to 320. Take due caution.                                                                                                                                                                      |
| Unknown | CTF 8        | To CINCPAC: CINCPAC 2012 Acknowledge.                                                                                                                                                                                             |
| 1053    | MINNEAPOLIS  | To CINCPAC: MINNEAPOLIS center area VICTOR ONE.                                                                                                                                                                                   |
| 1055    | CTF 8        | To CINCPAC: Am depending on Pearl for scouting information.                                                                                                                                                                       |
| 1055    | CTF 8        | CTF 8 launched six VCS to search sector 000-045° to 150 miles.                                                                                                                                                                    |
| 1055    | SUMNER       | Fired two rounds 3" at plane dead ahead, altitude 8,000. No hits. Fired all 50 caliber.                                                                                                                                           |
| 1056    | MUGFORD      | Japanese planes attacking from North. (Note: These are apparently friendly planes.)                                                                                                                                               |
| 1058    | MUGFORD      | Numerous explosions from WEST VIRGINIA and ARIZONA                                                                                                                                                                                |
| 1058    | TENNESSEE    | Observed Naval Air Station planes in air.                                                                                                                                                                                         |
| 1058    | PATRON 23    | To CPW ONE: Investigating suspicious vessel 21 00, 159 59.                                                                                                                                                                        |
| 1100    | TRACY        | Japanese have definitely withdrawn.                                                                                                                                                                                               |

**KANURE** **KANURE** sez at 1235 (Local Time) "I HAVE FUEL FOR 10 MINUTES"

**KANURE 1410** at 1240 "I WILL FLY AS LONG AS I HAVE FUEL". Someone on 7033 at 1247 said "HAVE NOT BE OPPOSED."

**SAME FREQUENCY BELIEVE SINIRE FROM "SISO" at 1250 "WHAT IS YOUR COURSE".**

**RUS18 and YUNES** believed to be Commander Carriers.

**SUT12** believed to be a Carrier.

**SISORE** is either another Comdr in the Air or Comdr Transport Group.

**SISO** is Boss of **SISORE**.

No further bearings of radio intelligence of the Striking Force until following day 8 December 1941.

**TRANSMISSION:**

**1450** **SIME 010.01 I—HA●NKIARIYA**

**ANSWER:**

**2 HA●NKAIARI**

**1410 —** **BEARINGS—SAREMU 338. S. 4 on 7632 kes (M)**

**WASMUTH** rigges twin, ship moored minesweep with **USS ZANE**, 400 fathoms of wire between ships, depressers at 5 fathoms, no floats. At 1547 entered Pearl Harbor entrance channel and swept up channel to gate vessel, where wire parted. At 1620 anchored off Coal Dock and retrieved sweep gear. At 1628 underway. At 1635 the Captain returned aboard, Lieutenant Commander Agnew, USN, left and joined **TREVER**. Returned off harbor entrance and resumed patrol in company with **Mindiv 4**.

**1412 GAMBLE** Sighted sampan bearing 320 T.

**1415 TENNESSEE** Set condition **ZED** from Turret III, second deck, aft. Repair I, Unit 2, lending out fire hose to play water on **WEST VIRGINIA**. Received report that one of our destroyers sank Jap submarine.

**1426 BOBOLINK** Passed sweep wire to **TURKEY** and commenced sweeping off Honolulu Harbor.

**1435 GAMBLE** Slowed to investigate but did not search. Sampan position approximately 4 miles south of Barbers Point.

**1455 VIREO** While waiting for arrival of ammunition, towed ammunition lighter with 14' powder away from deck to decrease menace of explosion. Delivered ammunition to **ARGONNE**.

**1500 TENNESSEE** Report states that Wake Island had been bombed by 30 bombers. Ens. Kable still alive. Hudgell dead; also Miller and Adams.

**1600 MIDWAY** Via Commercial Cable . . . "On 7073 . . . SISO 246 . . . Fair . . . SIME 245 Poor NAS Midway" Plane language **SASO V SAREMU #3 . . . A FU''- KUMA YORI 150 to "30 MAIRU NEN 200 1115 . . .**

**1505 DEWEY** Underway and standing out of harbor.

**1550 BOBOLINK** Received orders from Commander Base Force to report 1010 dock immediately.

**1551 TENNESSEE** Repair 4.—All outboard voids normal. All soundings normal. Received report that **PENNSYLVANIA** had been hit while in drydock. No. 2 machine gun repaired and in commission again.

**1552 — —** CTF 12 given orders by CTF 8 to intercept and destroy possible enemy carriers operating south coast of Oahu. It was assumed after attacks enemy carriers would withdraw via Jaulit.

**1626 GAMBLE** Sighted smoke bomb off port bow.

## 1258 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

|      |                             |                                                                                                                                                                                                                                                                   |

| 1628 | TENNESSEE                   | Open up wardroom country and sleepy hollow. Fire on WEST VIRGINIA seems to be under control. Repair I cut off # 32 vent system; smoke coming down.                                                                                                                |
| 1630 | n— —                        | Task Force ONE just ordered by CTF 8 proceed and attack.                                                                                                                                                                                                          |
| 1631 | GAMBLE                      | Reports submarine surfaced.                                                                                                                                                                                                                                       |
| 1632 | GAMBLE                      | Fired one shot 4" gun and missed, short and to the left. Submarine displayed U. S. Colors, and ceased firing. Submarine submerged and fired recognition red smoke bomb.                                                                                           |
| 1640 | BOBOLINK                    | While off dock 1010, received orders to assist NEVADA. Orders changed to go alongside CALIFORNIA.                                                                                                                                                                 |
| 1642 | — —                         | Attack group of 16 VF, 18 VTB's and 4 VSB smokers launched by Comtaskforce EIGHT with no results. (VTB planes armed with torpedoes recovered after dark.) Six VF planes proceeded Pearl mistaken for unfriendly and four shot down.                               |
| 1647 | GAMBLE                      | Proceed west.                                                                                                                                                                                                                                                     |
| 1647 | TENNESSEE                   | Told forward Battle Dressing Station to send doctor and stretcher party to WEST VIRGINIA bridge to get Captain. Ship astern (ARIZONA) blew up. Two planes bearing 350°.                                                                                           |
| 1655 | WHITNEY                     | Reports CASE left from alongside.                                                                                                                                                                                                                                 |
| 1659 | TENNESSEE                   | Engines ahead 1/3. Repairs 2 and 4; — send 2 rescue breathers each, and spare oxygen bottles to starboard side of WEST VIRGINIA quarterdeck.                                                                                                                      |
| 1703 | TENNESSEE                   | Word received to stop main engines. Delivered 6 gas masks to WEST VIRGINIA.                                                                                                                                                                                       |
| 1705 | WHITNEY                     | Reports TUCKER left from alongside.                                                                                                                                                                                                                               |
| 1730 | BOBOLINK                    | Moored alongside WIDGEON next to CALIFORNIA for salvage purposes.                                                                                                                                                                                                 |
| 1732 | CAMBLE                      | Sighted ENTERPRISE and exchanged calls. Instructed by Commander Aircraft, Battle Force to join ENTERPRISE.                                                                                                                                                        |
| 1736 | --                          | Comairbatfor ordered GAMBLE to join that vessel as part of AS Screen.                                                                                                                                                                                             |
| 1740 | BOBOLINK                    | Commenced pumping to continue thought the night.                                                                                                                                                                                                                  |
| 1744 | GAMBLE                      | Joined ENTERPRISE and took station as third ship with two other plane guard destroyers.                                                                                                                                                                           |
| 0755 | PELIAS<br>(Insert on p. 12) | Moored at Berths S-11 and 12, Submarine Base, reports first attack was indicated by sound of machine gun fire directed at single engine Jap torpedo plane flying low over ship's bow. The plane launched a torpedo at ARIZONA which seen later burst into flames. |
| 1755 | TENNESSEE                   | Plane bearing 345. Plane signalled with red light; did not understand meaning of signal.                                                                                                                                                                          |
| 1800 | PENNSYLVANIA                | Reports complete replacement of ammunition effected.                                                                                                                                                                                                              |
| 1823 | TENNESSEE                   | Observed plane bearing about 300.                                                                                                                                                                                                                                 |
| 1833 | TENNESSEE                   | Plane bearing about 345 (Running lights on; believed friendly).                                                                                                                                                                                                   |
| 1835 | TENNESSEE                   | Plane on port beam; running lights on.                                                                                                                                                                                                                            |
| 1837 | TENNESSEE                   | Plane coming in from dead ahead; bright lights on it.                                                                                                                                                                                                             |
| 1838 | TENNESSEE                   | Plane bearing about 245.                                                                                                                                                                                                                                          |
| 1855 | TENNESSEE                   | ENTERPRISE planes approaching Cahu.                                                                                                                                                                                                                               |
| 1900 | TENNESSEE                   | Plane bearing from dead ahead; running lights burning.                                                                                                                                                                                                            |
| 1953 | TENNESSEE                   | Word passed over loudspeaker "All men having hammocks in port hammock nettings remove them, and stow same inboard."                                                                                                                                               |
| 2100 | TRACY                       | Reports friendly planes with running lights were by AA batteries, but TRACY did not fire.                                                                                                                                                                         |
| 2100 | TRACY                       | Moored alongside CALIFORNIA and commenced salvage work.                                                                                                                                                                                                           |

2100 SICARD

Observed 3 lighted planes, altitude 5000 approaching FORD ISLAND from South NEW ORLEANS challenged without success and opened. Other ships followed too. SICARD checked fire considering planes were friendly. Other ships continued firing.

2110 VIREO

Observed AA fire opened and planes shot down. Aviator fell astern of VIREO, was rescued and identified from ENTERPRISE. Dispatch was sent to inform control that ENTERPRISE planes were in air.

1. The following report relative to damage sustained by ships of the Pacific Fleet resulting from enemy attacks on 7 December 1941 is submitted. This amplifies reports submitted by references (a) to (d) inclusive:

(a) **BATTLESHIPS.**

**ARIZONA** sunk at berth as result of aircraft torpedoes and heavy bombs which exploded forward magazines. Ship is considered to be a total wreck.

**CALIFORNIA** sunk at berth as a result of hits by two or more aircraft torpedoes; also received one large bomb hit amidships which caused serious fire. Recommendations regarding salvage and repairs will be forwarded later.

**NEVADA** damaged by heavy bombs, possibly mine in the channel and aircraft torpedoes. Beached across from hospital point to prevent sinking after an attempt to sortie. Batteries intact and manned though no power is on the ship. Recommendations regarding salvage and repairs will be made later.

**OKLAHOMA** capsized at berth as a result of receiving three or more hits by aircraft torpedoes. Recommendations regarding salvage will be made later.

**PENNSYLVANIA** slightly damaged by bomb hit, starboard side of boat deck while in drydock number 1, Navy Yard Pearl Harbor. Repairs have been completed and ship is ready for service.

**MARYLAND** damaged by bomb hit on forecandle and near mls. Ship was moved to the Navy Yard on 11 December and is expected to be fully ready for service 13 December.

**TENNESSEE** received one heavy bomb through turret top which did not explode, but put 8 rammers out of commission. Also one bomb hit aft which cracked one 14" gun. Heat from the **ARIZONA** fire melted and ignited paint in after portion of the second deck which was badly burned out. Ship is now heavily wedged to mooring by reason of the **WEST VIRGINIA** leaning against her. Steps are being taken to dynamite the mooring to permit the removal of the **TENNESSEE**. Repairs are proceeding and it is estimated that by 14 December ship will be ready for service less one 14" gun.

**WEST VIRGINIA** sunk at berth as result of four aircraft torpedoes and one bomb hit. There is considerable damage from fire. Recommendations regarding salvage and repairs will be made later.

(b) **CRUISER.**

**HELENA** damaged by bomb hit at frame 50, starboard side, opening up side under armor belt for distance of about 30 feet. Number one and two fire rooms and forward engine room flooded. Ship is now in drydock #8, Navy Yard, Pearl Harbor, to effect repairs to make seaworthy. It is estimated that new shell and framing will be completed within two weeks and ship will be able to operate with two shafts and with all gun batteries in commission. It is recommended that ship proceed to Mare Island for completion of repairs to hull and machinery.

## 1260 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

**HONOLULU** damaged by near miss at approximately frame 40 port side. Hole approximately 20 feet by 6 feet underwater. Ship being docked in drydock #1 today and it is estimated that work will be completed to make her fully effective by 16 December.

**RALEIGH** damaged by one aircraft torpedo which flooded forward half of machinery plant. Also hit by small bomb forward which penetrated three decks and went out ships' side and did not explode. It is proposed to dock the **RALEIGH** following completion of the **HONOLULU** to effect underwater repairs to make seaworthy. Recommendations as to whether all repairs to make the ship fully serviceable should be undertaken at Navy Yard, Pearl Harbor or a mainland navy yard, will be forwarded later.

### (c) DESTROYERS.

**CASSIN** and **DOWNES** damaged by bomb in number one drydock, Navy Yard, Pearl Harbor ahead of **PENNSYLVANIA**. Bomb hit **DOWNES** exploding her torpedoes warheads and causing serious oil fire. **CASSIN** was damaged by fire and was knocked off drydock blocking and fell over on **DOWNES**. **DOWNES** appears to be total loss except for salvageable parts and materials. Recommendation regarding salvage and repairs to **CASSIN** will be forwarded later.

**SHAW** hit by bomb while docked on floating drydock. Forward part of ship and floating drydock badly damaged by fire resulting from oil and powder. After part of ship not seriously damaged. Recommendations regarding repairs will be forwarded later.

### (d) AUXILIARY VESSELS.

**UGLALA** sunk by aircraft torpedo and near miss by bomb at ten-ten dock at Navy Yard, Pearl Harbor. Recommendations regarding salvage and repairs will be forwarded at a later date.

**UTAH** damaged and capsized as a result of hits by aircraft torpedoes. Recommendations regarding salvage and repairs will be forwarded later.

**CURTISS** damaged by enemy plane out of control which flew into crane mast and by bomb which exploded damaging hangar space causing fire which destroyed all radio equipment. Ship is entirely seaworthy. Repairs are proceeding and ship will be ready for operations less one midships crane by 18 December.

**VESTAL** damaged by a bomb hit aft while at berth at Pearl Harbor is undertaking repairs with one repair force. It is estimated that the ship will be fully ready as a repair ship by 17 December. Docking may not be required.

2. It is believed that the sinking of the **OKLAHOMA**, **NEVADA**, **CALIFORNIA** and **WEST VIRGINIA** is in large part due to the ships having been in condition **XRAY**. Had time been available to set condition **ZED** before receiving damage, progressive flooding might have been avoided.

H. E. KIMMEL.

UNITED STATES PACIFIC FLEET,  
U. S. S. **PENNSYLVANIA**, Flagship,  
Pearl Harbor, T. H., December 21, 1941.

### *Summary of damage sustained by ships of Pacific Fleet from enemy attacks at Pearl Harbor, 7 December 1941*

| Ship            | Damage incurred and cause                                                                                                                      | Repairs proceeding and proposed                                                                                                      |
|-----------------|------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------------------------------------------|
| ARIZONA.....    | Sunk at berth. Aircraft torpedoes and heavy bombs exploding forward magazines.                                                                 | Propose caisson the ship and make recommendation thereafter.                                                                         |
| CALIFORNIA..... | Sunk at berth. Two or more aircraft torpedoes and one large bomb hit amidships causing fire. Part of A. A. battery still manned and available. | Propose caisson ship, repair to make watertight and return to mainland for complete repairs. (Tow).                                  |
| MARYLAND.....   | Bomb hit frame 14, penetrated and exploded, holing shell, decks and bulkheads forward of fr. 24.                                               | NYPH repairing shell to make seaworthy. Decks, bulkheads to be completed at NYPH.                                                    |
| NEVADA.....     | Heavy bombs, aircraft torpedoes and possibly a mine in channel. Beached across from Hospital Pt. AA batteries still manned and available.      | Propose float ship (caisson may not be required), repair to make watertight and return to mainland yard for complete repairs. (Tow). |

*Summary of damage sustained by ships of Pacific Fleet from enemy attacks at Pearl Harbor, December 1941—Continued*

| Ship               | Damage incurred and cause                                                                                                                                                   | Repairs proceeding and proposed                                                                                                               |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------|
| OKLAHOMA.....      | Capsized at berth. Three or more aircraft torpedoes.                                                                                                                        | Propose right and float ship (caisson may not be required) repair to make watertight and return to mainland yard for complete repairs. (Two). |
| PENNSYLVANIA.....  | Bomb hit starboard side boat deck.....                                                                                                                                      | Repairs completed.                                                                                                                            |
| TENNESSEE.....     | One heavy bomb (dud) through turret top. One medium bomb aft cracked 14" gun. Fire aft 2nd deck due to heat from ARIZONA. Electrical circuits 2nd deck aft damaged by fire. | NYPH repairing shell to make seaworthy and habitable. NYPS complete habilitation, renew 14" gun, and watertight integrity.                    |
| WEST VIRGINIA..... | Sunk at berth. Four aircraft torpedoes and one heavy bomb hit. Considerable damage by fire.                                                                                 | Propose caisson ship. Repair to make watertight and return to mainland for complete repairs. (Two).                                           |
| HELENA.....        | Forward fire and engine rooms flooded by aircraft torpedo. Some machinery badly damaged.                                                                                    | NYPH repairing shell to make seaworthy. Propose return to NYMI for complete repairs. (Two shafts).                                            |
| HONOLULU.....      | Bomb. Near miss frame 40, port. Flooded five magazines and handling room II turret. Damaged electrical circuits in flooded spaces.                                          | NYPH proceeding with complete repairs.                                                                                                        |
| RALEIGH.....       | One aircraft torpedo, and small bomb (dud) which penetrated three decks and ship's side aft. Forward engine room and forward firerooms flooded and damaged.                 | NYPH to make repairs to make seaworthy when HONOLULU is undocked. Propose return to NYMI (on 2 shafts) for complete repairs.                  |
| CASSIN.....        | Drydock No. 1 ahead of PENNSYLVANIA. Bomb hit DOWNES exploding her torpedo warheads and causing serious fire. CASSIN knocked off blocks and fell over on DOWNES.            | Propose upright, patch and float out CASSIN for possible repairs to return to full or limited service. Further recommendations later.         |
| DOWNES.....        |                                                                                                                                                                             |                                                                                                                                               |
| SHAW.....          | Bombed while docked on floating drydock. Forward part of ship and floating dock badly damaged by fire.                                                                      | Propose float and reconstruct forward part—return to mainland yard for complete repairs, possibly under own power.                            |
| OGLALA.....        | Sunk by aircraft torpedo and possibly near miss by bomb.                                                                                                                    | Salvage doubtful. Recommendation later.                                                                                                       |
| UTAH.....          | Capsized and sunk by aircraft torpedoes.                                                                                                                                    | Recommendations re salvage and repairs later.                                                                                                 |
| CURTISS.....       | Enemy plane out of control flew into crane mast. One bomb exploded in hangar space. All radio equipment destroyed. Ship entirely seaworthy.                                 | NYPH, replace radio and effect necessary repairs to hangar space.                                                                             |
| VESTAL.....        | Bomb hit aft, holing shell. Beached....                                                                                                                                     | Repairs proceeding by own repair force. May not require docking.                                                                              |

TANGIER—In port.

CURTISS—In port.

MCFARLAND

HULBERT

THORNTON

All planes on the ground on ready notice had been furnished with a search directive in the event that any contacts with surface forces were developed by the early morning search. This plan never became effective because damage to the planes prevented.

**MARINE PLANES**

|          |                           |    |
|----------|---------------------------|----|
| VMF 221  | —Wake                     |    |
| VM3B 231 | —Enroute Midway LEXINGTON |    |
| VM3B 232 | —Ewa 4 hours notice       | 18 |
| VMJ 252  | —Ewa                      | 2  |

**BASE FORCE**

**ARGONNE**, plus auxiliaries and repair vessels, were in port.  
Aircraft of Base Force

|         |       |                 |
|---------|-------|-----------------|
| VJ-1-9  | J2F   | Pearl           |
| 9       | JRS   | Pearl           |
| VJ-2-10 | J2F   | Pearl           |
| 4       | PBY-1 | (2 at Johnston) |
| VJ-3-1  | J2V   | Pearl           |
| 4       | JRB   | at Main         |
| 1       | JRF   |                 |
| 2       | BT    |                 |

In addition the tenders (destroyer) **DOBBIN** and **WHITNEY** were in port and the submarine tender **PELLAS**.

The Task Forces shown herein, except **EIGHT** and **TWELVE** which were on special missions to improve war readiness of **Wake** and **Midway**, were in accordance with the organization of the Pacific Fleet which had been effective since 30 April 1941, and revised on 31 October 1941. The Task Forces were operating in accordance with the approved employment schedule of the Fleet and the special tasks assigned. It will be noted that all combatant vessels were assigned to Task Forces. This assignment was in accordance with their war missions and all training was conducted with that in mind.

(b) The Fleet was operating under the "security plan" originally issued on 15 February and revised on 14 October 1941. This provided for the possibility of a declaration of war being preceded by:

- (a) A surprise attack on ships in Pearl Harbor,
- (b) A surprise submarine attack on ships in the operating area.
- (c) A combination of both.

The provisions of the security measures were always followed by ships in the operating areas, even to the point of having ready ammunition at the guns. Frequent surprise drills were held by ships in Pearl Harbor in coordination with Army and distant activities to test the provisions of the security measures against air and submarine attacks on ships in port. Since, however, the times in port had to be devoted to upkeep, and limited recreation periods, and since the intelligence information indicated complete security from any surprise air attack, the provisions of the air security plan were not fully effective in port. At the time of the attack, however, provisions had been made and were in effect to provide against sabotage on ships, docks and equipment, and all ships had armed patrols and careful routine inspections of the ships during the entire time in port. In the battleships, two machine guns were always manned and ready and two 5-/25 guns were manned with stand-by crews and 15 rounds of ammunition at each gun.

(c) In addition and as provided in the Security Plan, a daily search of all operating areas was conducted by planes of Patrol Wing TWO. This was an early morning search of about 200 miles to cover the general areas in which the Fleet would be operating during the day.

Such a search was being conducted on 7 December and planes on that search were in the air at the time of the attack. In addition, 4 planes were operating with the submarines in the training of intertype exercises for communication and recognition. They searched the area toward Lahaina Roads on that morning.

(d) The first indication of any enemy force in the area was the appearance of a submarine close aboard the **ANTARES** returning from Canton Island and preparing to enter Honolulu while towing a barge. This submarine was attacked by a destroyer of the off-shore patrol which was called by the **ANTARES**. This was at about 0645. In addition, plane one of VP-14 dropped a bomb on a submarine off the entrance to Pearl. In this connection numerous sonic contacts had been reported in the operating waters close to Pearl during the last six months but no actual visual contacts had been made. In addition, no attacks had been made on these suspected submarines because the Navy Department had

prohibited such attacks except within the 3 mile limit. When the international situation grew more tense, however, the Commander-in-Chief directed ships to attack submarines suspected to be operating this area, and it was on this authority that the WARD and VP-14 attacked on the morning of 7 December.

These submarine attacks were followed by a report from the Navy Signal Tower "Enemy air raid, this is not a drill" at about 0752. It will be noted that the attack occurred while the crews of ships were just finishing breakfast on Sunday morning.

The information regarding the air raid was sent to all Task Forces at 0800, followed by a despatch "Hostilities with Japan commenced with air raid on Pearl" at 0812.

The effect of the surprise attack and the damage inflicted with damage to communications made it practically impossible to organize an air search except by the 7 PBY's in the air at the time.

(e) At 0817 Commander-in-Chief, Pacific Fleet, directed Patrol Wing TWO to search for the enemy, and the PBY's in the air started to search. The 3 on the morning search started to search sector 310-000 to a distance of 300 miles. The first plane started out at once.

The 4 PBY's, operating with the submarines started search sector 245-285 to 300 miles out, the first plane of that search got away at about 0945.

No plane in these areas searched saw anything. At 0830 Commander-in-Chief advised Task Force THREE, EIGHT and TWELVE to rendezvous as directed by Commander Task Force EIGHT and stated that instructions would be issued as soon as enemy was located.

(f) While it appeared logical that the attack should come from the northward so that the planes would fly down wind with their loads, no such evidence was available from the nature of the attack. Certain information indicated that carriers or enemy forces were operating to the southward. A direction finder bearing of radio transmissions at 1046 was received to indicate that an enemy force bore 178 from Pearl. This was not a positive indication of an enemy position but did indicate the probability of an enemy carrier to the southward. A message was received from a ship with the MINNEAPOLIS call at 0950 stating that carrier had been sighted. The MINNEAPOLIS was then south of Oahu. At 1010 4 DM's sent a message that they were in area Sail 2 and that two carriers were in sight. This was later corrected to say the message should have been *NOT* in sight.

In addition, a message from Kaneohe received at 1000 stated "Captured enemy have marked positions, bearing 223-90 miles from Pearl Harbor". These marks in Japanese script were later found not pertinent to the attack.

This information was passed to Task Forces at sea as an indication of probable location of enemy forces. In addition, at 1018 the Task Force Commanders were advised that there were only 12 VP's available in Pearl for search and that there was some indication that the enemy was to the northward. They were directed to locate and attack the enemy of unknown composition. Search was instituted at once by Task Force EIGHT who was then somewhere west by south of Pearl. At 1020, 15 V-19 from ENTERPRISE loaded with 1000 lb. bombs were launched to search for and attack a reported group of 4 transports off Barbor's Point. The origin of the report about the transports is unknown and it probably was enemy deception because surface craft proceeding to attack them were attacked by enemy submarines in that area. Ships that could do so cleared the harbor by this time and were organized as a separate Task Force ONE at 1105 and directed to report to Commander Task Force EIGHT to assist in locating and destroying the enemy.

(g) It was not possible to start an organized search with aircraft with the forces on Oahu until the late morning. By about 1100, however, in addition to the 7PBY's which had started the search between 0815 and 0915, as the planes became serviceable they were started on the following searches:

Army—2 B-17

2 A-20A

3 B-18

3 B-17, 095-165, 300 miles

Navy—4 planes VP-24, 245-275, 300 miles.

2 planes VJ, 355-005, 300 miles

3 planes VP-14, 295-350, 200 miles

4 planes VP-23, 215-245, 200 miles

*Battleship & Cruiser Planes*

6 VOS, 135-215, 200 miles  
9 SBD, 330-030, 200 miles  
6 J2F in westward sector

The concentrated air search was conducted to the northward and westward because of the belief that the major enemy attack force was in that direction. In addition, the disposition of Task Forces at sea was such that they were able to search to the southward.

At about 1345 one plane of the ENTERPRISE reported contact with surface forces in position 20-32 N and 158-40 W, and followed closely by a report that the patrol was being attacked by a VF plane. This report was apparently in error because the position is only about 60 miles from Pearl.

At 1330 a radio direction finder bearing on an enemy frequency and by a ship using the "AKAGI" call was picked up and gave a bearing of 189° from Pearl and another unidentified unit was found to be on bearing 167 from Pearl. This information was passed to the Task Forces at sea and on that information and the supposition that any enemy forces in the area south of Oahu would retire, toward Jalint, the senior Task Force Commander at sea directed Task Force Twelve at 1552, to intercept and destroy the enemy. In addition, Task Force ONE which had joined Task Force EIGHT was directed to proceed to search with surface force and attack. The surface force search was also based on a retirement toward Jalint.

No contacts were made and the enemy was not located, except that 2 planes from the cruiser NORTHAMPTON made contact with an enemy fighter at 1120 just north of NIHAU and after 20 minutes in spite of the enemy superior speed and gun power succeeded in shooting him down. No report of this attack ever reached the Commander-in-Chief.

From the chart later discovered from enemy planes shot down there is no indication that any carriers operated to the southward of Oahu. The charts do indicate, however, that the attack was launched from a point about 200 miles to the northward and that the carrier retired to the northward at full speed while waiting planes to return from the attack. (It appears then that the enemy carriers in this area were well beyond the daylight search curve of the planes sent out to find them and therefore were successful in evading all contacts with our air forces in the area).

The search by surface craft, carrier aircraft and their ship-based planes to the southward was not successful. It appears probable that the enemy used radio deception by placing a ship to the southward to use deceptive radio calls, to indicate the presence of enemy forces in that area. It may be possible too that if enemy forces were in that area that they retired at high speed to the southward beyond the range of our ships and aircraft.

(h) At 0800 the positions of the ships at sea were approximately as follows:

Task Force TWELVE—18-30N, 168-40 W.

Task Force EIGHT—20-50 N, 158-50 W.

Task Force ONE—20-32 N, 159-45 W.

Task Force TWELVE was proceeding on course 170 at 17 knots. His position was in the area to the northwestward of Johnston Island. The cruiser planes searched to the northward of the island and the carrier planes in a southeasterly direction to a distance of 200 miles for the 0800 position.

In addition, the planes of VP-21 departed Midway and searched the area from Midway to Johnston and then from Johnston to Pearl Harbor. Six planes of Patwing TWO searched the sector with the median of 220° from Pearl Harbor to a distance of 550 miles. The planes from the ENTERPRISE searched the sector 315 to 270 from the carrier's daylight position.

By these searches practically the entire area in the Oahu-Midway-Johnston Island triangle was completely covered.

In addition, the available planes of Patwing TWO searched an area of 200 miles all around Oahu. It was not possible to extend this search further to seaward because of the small number of available planes.

(i) Because Task Force EIGHT was low in fuel, that Force entered Pearl Harbor after dark on 8 December, fueled, provisioned and took on ammunition and departed for sea before daylight on 9 December.

*9 December*

On 9 December the position of Task Force TWELVE was about 600 miles S.S.W. of Oahu proceeding toward the island. A 200 mile search was being conducted

# 1266 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

in the morning all around the carrier position during the morning and a 150-mile search along the line of the carrier course during the afternoon.

After departure from Pearl Harbor Task Force EIGHT proceeded to the northeastward from Oahu for search operations in that area.

Task Force ONE returned to port on 9 December.

## U. S. S. PENNSYLVANIA, Flagship

Using Oahu based planes the following search was conducted starting in the morning of 9 December:

300-010 500 miles 10 VP  
010-060 300 miles 10 B-18  
060-210 200 miles 18 VSO  
210-030 300 miles 6 VJ  
and in the afternoon  
330-020 4 Army B-20

The sector to the southwest of Oahu was covered by the LEXINGTON planes as mentioned before.

No contact with enemy or surface forces were made. Numerous submarines were reported, probably many false contacts, but all were attacked by planes.

## HEWITT INQUIRY EXHIBIT No. 74

OFFICE OF THE COMMANDANT,  
FOURTEENTH NAVAL DISTRICT,  
Pearl Harbor, T. H., 3 February, 1942.

*Confidential*

From: Commandant, Fourteenth Naval District.

To: Commander-in-Chief, U. S. Pacific Fleet.

Subject: War Diary for period 7 December to 1 January.

Reference: (a) Conf. desp. 032307 dated 3 January, 1942 from CinCPac to Com14.

Enclosure: (A) Three copies of subject diary.

1. In compliance with reference (a), enclosure (A) is forwarded herewith. This diary has been compiled from the logs and reports submitted by various district activities. In certain instances, reports of individuals have been quoted not because their opinions or remarks are considered of special value, but in order to give an insight to the reactions of the personnel concerned.

[1] WAR DIARY OF FOURTEENTH NAVAL DISTRICT FOR PERIOD 7 DECEMBER  
TO 1 JANUARY

*Preliminary Action on 7 December:*

The first indication of an enemy force was the sighting of a submarine periscope at 0350 by the U. S. S. CONDOR, engaged in minesweeping close to the entrance buoys of the Pearl Harbor channel.

After verification, the CONDOR reported the situation by blinker to the guard ship, U. S. S. WARD. The submarine was seen to turn inshore and head in a westerly direction toward Barbers Point.

The WARD's log reports that general quarters was sounded at 0408 and search was made for the unidentified submarine. The ship secured from general quarters at 0435 and continued on patrol of the Pearl Harbor entrance.

The initial positive contact occurred at 0637 when the WARD sighted the conning tower and periscope of a submarine apparently headed for Pearl Harbor, trailing the U. S. S. ANTARES.

The WARD started an attack at 0640, bearing down on the submarine while increasing speed from 5 to 25 knots. She opened fire at 0645 with guns 1 and 3, firing one shot from each gun. The first shot, at a range of 100 yards, passed directly over the conning tower. The second shot, fired at a range of 50 yards or [2] less from No. 3 gun, scored a direct hit at the waterline junction of the hull and conning tower. The submarine was observed to heel over to starboard and start to sink and, after running into the WARD's depth charge barrage, went down in 1,200 feet of water. A large amount of oil appeared on the surface where the depth charges exploded.

A despatch by voice transmission was sent to the commandant at 0654 stating: We have attacked, fired upon and dropped charges upon submarine operating in defensive sea area."

This message was reported delivered to the district duty officer, Lieutenant Commander Harold Kaminski, at 0712. He immediately notified the chief of staff, Captain J. B. Earle, who informed the commandant.

Lieutenant Commander Kaminski notified the duty officer of the Commander-in-Chief, Pacific Fleet, at 0715 and also notified Commander Charles B. Momsen, war plans officer for the district.

The commandant ordered the ready duty destroyer (Monaghan) sent out. At 0737 a despatch was sent to the WARD, asking verification of the report and details of the attack.

Following the WARD'S message and prior to the Japanese air raid, no other reports were received at headquarters to indicate or verify the enemy's presence.

Within a few minutes after the raid started, the commandant arrived at headquarters and took charge. Orders issued were: [3] "Close all navy yard gates to traffic. Have the Captain of the Yard detail fire parties. Notify marines to make all men available to assist in fighting fires. Notify marines to bring in from Salt Lake camp all available marines. Notify yard to flood drydocks. Make arrangements for civilian workmen to be rounded up and brought to the yard to assist in damage control. Notify hospital to establish emergency measures for caring for killed and wounded."

*The Air Raid:*

The air raid on Pearl Harbor and Hickam Field area started at 0755, according to most observers. Some reports indicate the end of the raid came about 0940, although apparently there were enemy planes active as late as 1130, Captain H. F. Bruns, the district public works officer, stating in his report that the raid lasted until approximately 1130. (NOTE: Residents on Milhau sighted two planes between 1300 and 1400 flying over that island. One crashed and the other flew on West. Presumably these planes had left Oahu after 1200).

The district supply officer, Captain John J. Gaffney, reported the final attack was over by 0940. His summary follows:

"The heavy pall of smoke from burning fuel oil afforded not only a point of aim for the dive bombing attack which came about 0920 but somewhat obscured vision. A seaplane hangar was on [4] fire at Ford Island and the floating drydock with the SHAW appeared to be burning. The all directional bombing attack came shortly after the NEVADA cleared the dredge opposite Fox-1 where three hits halted the NEVADA in the channel. She dropped one anchor, backed on it, came over in the direction of the floating dock and finally moved over to Waipio Point. A hit in Drydock No. 1 struck the DOWNES and another

## 1268 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

hit of a smaller bomb was made on the PENNSYLVANIA. The Japanese pressed home the dive bombing well under 600 feet. Wing and fuselage marking were clearly visible. Their maneuverings to avoid collisions were noteworthy. The attack concentrated over the NEVADA which was underway in the channel and evidently every effort was directed toward sinking her in the channel. This attack was over by 0940. . . "

First Lieutenant J. S. O'Halloran, duty officer, 3rd Defense Battalion, F. M. F., stated in his report: "At about 0940, after about one hour and 45 minutes after the attack started, the air was clear of enemy aircraft."

Commander Harry R. Hayes, USN (Ret.), directed by Captain C. C. Baughman, captain of the yard, to a station on the signal tower to handle, insofar as possible, the movements of ships and other craft in the harbor, stated: "The attack on the NEVADA apparently ended the raid on Pearl Harbor, but for some time enemy aircraft were observed bombing Hickam Field. . . ."

[5] Captain Baughman, in a summary of events obtained from personnel under him, stated that at 0855 the NEVADA got underway and stood down South Channel. This summary further reported that at "0910 enemy dive bombers attacked Hickam Field, the PENNSYLVANIA, CASSIN, DOWNES, SHAW and NEVADA, the last named ship being in the South Channel opposite YFD-2 (the floating drydock). The three destroyers were set on fire and minor damage was inflicted on the PENNSYLVANIA. The NEVADA was badly damaged and lost way, and with the assistance of tugs was grounded on Waipio peninsula southeast of Beckoning Point."

The captain of the yard's summary placed the end of the raid at 0920.

In line with some observations that the air raid occurred in three waves of planes is the report of Russel B. Smith, radioman 3rd class, in the U.S.S. NEVADA, who was later assigned to duty at the Luualualei radio station. Smith was blown from his ship during the attack in the south channel and swam ashore.

His report follows in part:

"I proceeded to the bridge during the lull after the first attack. From there the ARIZONA was plainly visible, a mass of flames. Her after turrets and mainmast were all that could be seen, the rest was a mass of flames. We cast off lines and started to get underway. As we passed the battle line, I saw the OKLAHOMA completely capsized and the rest of the damaged battleships, some burning fiercely. There were several other ships underway in the harbor.

[6] "As we neared the floating drydock the second attack began. Our anti-aircraft guns again went into action. Suddenly there was a deafening roar. Smoke and debris was flying everywhere. Shortly after another bomb struck, setting the ship on fire.

"The next thing I remember is the cold water hitting me in the face. I was near the drydock, which was burning fiercely, and quite a distance from shore. The life preserver that I had securely strapped on was gone. After reaching shore, I and several other men who had swam ashore started for the naval hospital. At this time the third attack came but the Jap planes were kept off by the antiaircraft fire."

### *Sequence and Type of Attacks:*

Reports received by the commandant indicate the following sequence of attack:

1. Attack on the naval air station, Ford Island, and Hickam Field. This started about 0755 and consisted of dive bombing and strafing.
2. Attack on major units of the fleet, launched by torpedo plane and dive bombers and accompanied by strafing.
3. Attack on area by horizontal bombing from high altitude. This is reported to have occurred about 0815.
4. A second high altitude bombing attack apparently carried out immediately before the final intensive dive bombing attack and after a lull of approximately 15 minutes in the raid.
5. Dive bombing and strafing attack launched about 0910.

### *[7] Number of Planes Involved:*

Reports indicate that approximately 150 planes attacked army and navy activities on Oahu.

Marine corps observers reported that approximately 30 planes participated in the first attack on Pearl Harbor. Other reports stated that up to 50 planes engaged in the initial attack on the Pearl Harbor area, including approximately 20 torpedo planes.

Personnel on the signal tower estimated 30 dive bombers took part in the final intensive bombing attack. The smallest estimate was 18.

On the high altitude bombing, reports of the number of planes observed varied from five to 18, and altitudes were estimated 10,000 and 16,000 feet.

Between 0745 and 0800 an estimated total of 75 planes were sighted by personnel at Lualualei radio station, approaching the station from the west and turning sharply in the direction of Pearl Harbor and Barbers Point upon reaching a position near the shore line. One observer stated that he counted 75 planes. These planes returned on this course some time later, observers reported.

W. L. Waltrous, chief radioman, stated that about 0745 he observed a large flight of planes proceeding toward Pearl Harbor. "Upon reaching a point directly abeam of the radio station, it appeared that a formation of 15 to 20 planes detached themselves from the main flight and turned left. They proceeded [8] directly over the radio station at an altitude of approximately 2,000 feet, in the general direction of Wheeler field."

An observe at the Lualualei naval ammunition depot, according to a report submitted by Captain J. S. Dowell, inspector of ordnance in charge, stated:

"Near 0800 while motorized patrol was being relieved I counted 25 bombers in groups of five flying very high. They proceeded straight over the mountains on the Nanakuli side of the depot headed in the direction of Pearl Harbor. There were also two units of fighter planes, about five in each. They were flying lower than the bombers, about the height of the mountains, in a straight line one behind the other. One group headed for Pohakea pass toward Schofield; the other circled over the depot near the mountains and then headed over Ponakea pass."

Captain Dowell also reported that at West Loch "at 0850, enemy planes were observed leaving Pearl Harbor evidently en route to Ewa mooring mast, passing close to West Loch. Planes observed were approximately 60 to 70 in number . . ."

The officer in charge at Camp Andrews, Nanakuli, reported a flight of 64 planes passed over the camp about 0730 headed toward Pearl Harbor.

Other observations of plane approaches were submitted as follows:

Lieutenant Commander R. B. Norris, C-V(L), then an [9] employee of RCA Communications, Inc., at Kahuku radio station, reported that "at approximately 0740 . . . I observed a group of planes flying at very high altitude approach Kahuku Point in a course from north due south. It is estimated that 20 or 22 planes were in this group . . . Low clouds made it impossible to see the entire group at any one moment . . . The planes were soon out of visible range but still heading due south after passing over the radio station."

A civilian at Mokuleia reported observing a flight of 32 planes coming in over water from the direction of Kahuku Point between 0800 and 0815 and heading directly towards Schofield. Observer reported that the count of 32 was verified by a resident of Wai'alua.

A man on duty at the direction finder unit at Lualualei reported that he observed "Several formations" at about 0900 heading toward Pearl Harbor from the northwest. "There were at least 55 planes that I was able to count, flying in groups of fives . . . Their height was such that it was almost impossible to see them."

According to this observer, another group of seven, flying at the same altitude but further out from the other groups, turned seaward and circled back over land, heading over the reservation in the direction of Wheeler field.

#### [10] *Attacks at Kaneohe Bay Naval Air Station and Ewa Field:*

Almost simultaneously with the raid on Pearl Harbor, the Japanese attacked Kaneohe Bay naval air station. Ewa field at Barbers Point was subjected to enemy strafing.

Commander H. M. Martin, commanding officer of the naval air station, Kaneohe Bay, reported that two attacks were executed at that base.

The initial attack started about 0750, with about a squadron of planes coming down very low in shallow dives and strafing with incendiary bullets. This attack lasted 10 to 15 minutes and was followed after a 25 minute interval by bombing and strafing by another squadron of planes, similar to our BT's. Bombs of 100 pounds were dropped, apparently high explosive in type but some of them probably incendiary because of the resulting fires. The majority of casualties resulted from this attack, the men being struck by machine gun fire and bomb fragments.

## 1270 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

Most of the injured personnel were in the squadrons attempting to either launch their planes or trying to save those planes not yet damaged. During this attack which also lasted 10 to 15 minutes, the antiaircraft fire was considerably augmented by machine guns rigged on the planes and on temporary mounts, and one of the enemy planes was shot down on the station. Another crashed in Kailua bay.

### [11] *Damage:*

Captain H. F. Bruns, district public works officer, following a survey after the raid, reported:

"There was no serious damage to any navy shore structures except at Ford Island and Kaneohe. It was plain that ships and planes were the objectives of the attackers. By concentrating even briefly on shore structures the attackers could have caused extensive damage, particularly by an incendiary attack on the oil tanks and other inflammable objects."

With the exception of Hangar No. 6 and its surrounding parking area, very little major damage was done to the naval air station, Pearl Harbor. The hangar was apparently set on fire as a result of a bomb explosion immediately to the east and the resultant explosive action of nearby patrol planes which were ignited by the same explosion. There were about five bomb hits in the vicinity of the hangar, the largest producing a crater approximately 20 feet in diameter and seven feet deep. The northeast quarter of the hangar was badly gutted by fire but relatively minor damage was done to structural steel.

Fresh water service to Ford Island from the navy yard was cut off. The U. S. S. ARIZONA at mooring Pox-7 settled on the 12 inch main, crushing it, and the six inch temporary line to the south end of the island was broken at the navy yard side as a result of bombing. Service was restored by installing a new 16 inch main from Hospital Point.

[12] At the Kaneohe naval air station, Hangar No. 2 was set on fire during the first attack and severe damage resulted, although the structure was deemed salvageable. The seaplane warming up platform was also damaged by bomb hits.

### *Public Works Department Activities:*

Action taken by the public works department at the time of the raid was based on the department's acceptance that its function was to maintain essential services—power, water and communications, to furnish transportation as required, to protect against fires and to remedy structural damage.

In a description of activities of the public works department during the attack, Captain Bruns said:

"As rapidly as officers reported, they were despatched to various locations for specific jobs of surveillance and fire fighting. Civilian workers went to their regular jobs, unless otherwise directed. Sizeable forces were sent to both tank farms. The contractors at Kuahua were quickly organized to meet emergency calls, and men and equipment were despatched to points of need in the navy yard area. Repeated inspections were made to locate possible fires. The drydock contractors organized workers to get the Gantry crane clear of the fire between the drydocks and to make the new drydock ready for service as quickly as possible.

"The public works department through its own and contractors' [13] personnel gave assistance in restoring water main to Ford Island, restoring power and communication services in navy yard, furnishing trucks for the transportation of wounded and for other purposes, withdrawing dredges to prevent blocking of channel, establishing watcher services for administration building, arranging burials and providing graves, and answering distress calls generally."

### *Action by Yard Fire Department and Yard Craft:*

In the navy yard, the fire department was first called to Building 367, near the hospital, to extinguish a fire caused by the crash of a Japanese plane. Later the department answered a call to extinguish the fire in Drydock No. 1 where the CASSIN and DOWNES were burning. The major part of the yard fire fighting equipment was used in controlling this fire and preventing its spread to the PENNSYLVANIA. The fire in the floating drydock was also combatted.

Yard craft engaged in fighting fires on fleet units, assisted in picking up survivors and in getting ships underway.

*Action Reported by* \_\_\_\_\_

Immediately upon the first raid by hostile planes, all sentry posts were doubled and the remainder of the command present were alerted. Those alerted stood by under arms under cover as a mobile reserve for emergency employment. These men were soon assigned to various situations.

[14] The defense battallions immediately went into action with antiaircraft machine guns with telling effect. Two gun batteries were emplaced in the navy yard but were not ready for action until ammunition could be trucked from the naval ammunition depot. They were ready at 1100.

All motor transportation was pooled for general use and was active throughout the day. Among the services rendered was assistance in collecting and hauling casualties from the waterfront to the naval hospital.

One set of barracks (100 man type), the Noncommissioned Officers' Club and the Post Exchange were vacated and prepared for caring for casualties. The medical officers set up an operating and dressing room in the Post Exchange.

The three general messes were thrown open and served food, on a 24 hour basis, to all comers. It is estimated that during the first 24 hours about 6,000 meals were served to civilian workmen of the navy yard. That service was discontinued only after the food supply at the regular established eating places could be replenished.

*Care of Fleet Personnel:*

At the Yard Receiving Station, immediate steps were taken to account for survivors and emergency hospital units were established in new barrack buildings and Navy Arena. Fleet pooling activity centered at this station. Emergency rations, stores, [15] bedding and clothing were issued to survivors of sunken ships. Preparations were made for serving meals on a 24 hour basis. Rations were prepared and served to over 8,000 personnel.

All available spaces, including the Navy Arena and barracks buildings under construction were converted into emergency living quarters. All chief petty officers' rooms were converted into officers' quarters.

Between December 12 and 31 all housing facilities were occupied to the fullest degree, and an overflow of from 1,500 to 2,500 men was accommodated in the arena, the number varying with the arrival and subsequent assignment to duties of drafts from the mainland.

*Medical Department Activities:*

The district medical officer, Captain R. E. Stoops, reported 686 non-fatal casualties were received for treatment at regular navy medical department establishments, at civilian establishments and emergency wards established during the crisis.

In the disposition of the dead, utmost care was taken in the matter of identification.

A total of 313 dead were brought to the naval hospital on December 7. The following day, it became evident that the problem of burial would be much greater than originally contemplated. Additional land for a new navy plot was obtained [16] in Oahu cemetery, and a 25 acre site for a new naval cemetery was selected between North and South Halawa streams at Red Hill.

The following is a summary of interments made during the period from December 7 to 31, inclusive:

|                                                    |     |
|----------------------------------------------------|-----|
| Service personnel interred at Oahu cemetery_____   | 328 |
| Service personnel interred at Halawa cemetery_____ | 204 |
| Service personnel interred at Kaneohe Bay_____     | 18  |

550

Japanese service personnel buried total 18.

Of our service personnel, 293 were unidentified, but at least some of these were expected to be identified following receipt of Forms "N" in their cases at the Navy Department.

The following named vessels left the Navy Yard on this date:

|               |            |
|---------------|------------|
| USS ST. LOUIS | USS RAMAPO |
| USS CUMMINGS  | USS SWAN   |
| USS JARVIS    | USS TERN   |
| USS MUGFORD   |            |

[19] *December 8, 1941.*—Yard forces initiated repairs to damages caused in the December 7th raid, and assisted in restoring a supply of fresh water to Ford Island, both fresh water pipe lines to Ford Island having been destroyed. Arrangements were made for Yard Public Works organization and equipment to assist to the fullest practicable extent in ships' salvage operations.

USS ALLEN arrived at B-6.

*December 9, 1941.*—Emergency electrical supply from Navy Yard power plant was furnished to Hickam Field and the Section Base. Made preliminary survey for air raid requirements for Yard personnel. Construction begun for shelters by personnel of Shop 70 and contractors' force. Sandbags placed for protection of office personnel, electric power transformer substations and communication centers.

*December 10, 1941.*—USS ALLEN departed.

USS CROW departed.

USS MARYLAND arrived.

YO-43 departed.

USS SWAN arrived.

The USS HELENA was docked in DD-2. This is the first vessel docked in this new dock which was completed approximately one year in advance of the contract date.

[20] December 11, 1941.—USS SWAN departed.

December 12, 1941.—New 25-ton crane was moved from erection tracks to permanent rails, around DD-2.

USS PENNSYLVANIA departed.

USS AYLWIN arrived, docked on Marine Railway, undocked and departed.

USS NARWHAL arrived.

December 13, 1941.—USS NEW ORLEANS departed.

USS SACRAMENTO departed.

YC-477 departed.

USS HONOLULU docked in DD-1.

USS DOLPHIN arrived, docked in Marine Railway.

USS McDONOUGH arrived.

USS PHELPS arrived.

USS THORNTON arrived.

USS INDIANAPOLIS arrived.

December 14, 1941.—USS DOLPHIN undocked and departed.

USS SAN FRANCISCO departed.

[21] USS HOVEY arrived and departed.

USS CHANDLER arrived and departed.

December 15, 1941.—USS MUGFORD arrived and docked in Marine Railway.

December 16, 1941.—USS MUGFORD undocked and departed.

USS TENNESSEE arrived.

USS KAULA arrived.

Night inspection made of exterior lighting and shop blackout conditions by Admiral Furlong, the Captain of the Yard, the Manager, and the Production Officer.

December 17, 1941.—Repairs to crane rail on east side of DD #1 and to 15-ton crane were completed. Received permission from Commanding Officer, Hickam Field, to use area in Hickam Field between Hickam Gate and main Yard Gate for stowage.

USS SOUTHARD arrived and docked on Marine Railway.

December 18, 1941.—USS SOUTHARD undocked and departed.

USS CRELE departed.

Contractors started work in earnest on DD #4.

YSD-27 completed and placed in service.

[22] December 19, 1941.—New 25-ton traveling crane at Repair Basin completed.

USS SHAW docked on Marine Railway.

USS CURTISS arrived.

USS MONAGHAN arrived and departed.

USS BREESE arrived and departed.

USS SEMINOLE arrived and departed.

December 20, 1941.—Work begun to repair and place into operation the 1,000,000 gallon concrete underground reservoir in rear of Administration Building at present unused.

USS SCHLEY departed.

USS CHANDLER arrived and departed.

USS CRAVEN arrived.

USS PENNSYLVANIA departed. This vessel had re-entered the Yard on 12 December, 1941.

USS MARYLAND departed.

USS TENNESSEE departed.

Yard help requested by Base Force salvage party on USS CASSIN, DOWNES and OGLALA.

December 21, 1941.—Yard Public Works initiated work at Coaling Basin to provide space for inflammables.

[23] USS CHEW arrived.

USS RAIL arrived.

Base Force took over salvage work on USS OGLALA and NEVADA.

Draft of workmen from mainland received via USS LURLINE.

USS BOGGS arrived.

USS NARWHAL departed.

*December 23, 1941.*—USS BOGGS departed.

USS WARD arrived.

USS TROUT arrived.

USS RALEIGH arrived.

[24] USS THORNTON departed.

USS SONOMA arrived.

*December 24, 1941.*—USS SHAW undocked from Marine Railway.

USS CACHALOT departed.

*December 25, 1941.*—Rear Admiral William R. Furlong, USN, assumed duties as Commandant of the Navy Yard, Pearl Harbor, and assistant to the district commandant, in accordance with competent orders.

USS TRACY docked on Marine Railway.

USS HOPKINS arrived.

USS PHOENIX arrived.

USS WARD departed.

*December 26, 1941.*—USS SCHLEY arrived.

USS NARWHAL arrived.

YF-24C arrived.

*December 27, 1941.*—USS CURTISS departed.

*December 28, 1941.*—USS CRAVEN departed.

[25] USS HOPKINS departed.

USS ALLEN arrived.

The 50-ton floating derrick Havslide was damaged, a hole being punched in her bottom by projection from the CALIFORNIA, alongside which she was working.

*December 29, 1941.*—Work completed on inflammable storage at Coal Basin.

USS FARRAGUT arrived.

USS RENHAM arrived.

USS ELLET arrived.

USS COCKATOO arrived.

*December 30, 1941.*—USS PHOENIX departed.

USS CHEW arrived.

USS FARRAGUT departed.

USS SALT LAKE CITY arrived.

*December 31, 1941.*—USS HELENA undocked from DD #2.

During this month the Yard force has been engaged for twenty-four hours each day in herculean efforts to salvage materials and repair vessels and their units damaged during the raid of 7 December. In addition, the regular work load has been properly [26] carried on and expedited wherever possible. Arrivals of vessels entered in this diary indicate arrivals for work to be accomplished; departures indicate completion of the work and release of availability. Base Force Salvage parties, the Mobile Repair Unit and the Navy Yard have pulled together to accomplish a common result.

Authenticated—

/s/ C. S. GILLETTE,  
Captain U. S. N.

## Notes on activities of the Base Force Salvage organization:

Base Force Salvage was organized under the Commander base force with Commander J. M. Steel, USN, officer-in-charge. Senior Salvage Engineer, Lieutenant Commander C. L. Curtis, USNR, was in immediate charge of salvage operations.

A temporary office was established, north of Building No. 129, and the first vessels assigned to this unit for salvage were the USS CASEIN, DORNES, SHAW and OGLALA.

Both the MARYLAND and TENNESSEE were delivered to the Navy Yard and study and preparation were made for ultimate salvage of the CALIFORNIA, UTAH, WEST VIRGINIA, ARIZONA, OKLAHOMA, the floating drydock and a Japanese submarine off Ford Island.

On December 17, the USS VESTAL was floated and the USS RALEIGH was ready for delivery to the yard. Removal of equipment from the [27] WEST VIRGINIA was underway. The OGLALA and NEVADA were surveyed for refloating and this work started.

On December 18 pumping operations and repair work were started on YFD-2.

On December 23, the organization had seven diving units in operation. The Mobile Repair Unit consisting of more than 20 officers and 1,000 men reported for duty this date.

#### *Pearl Harbor water area defense activities:*

Captain H. D. Bode, USN, reported for duty as Assistant to the Captain of the Yard on December 10 and was assigned as defense officer in connection with defenses of the Pearl Harbor water area.

A study was made of defense requirements with view to immediate and rapid procurement of defensive material. A Pearl Harbor inner harbor patrol was put in operation. Arrangements were made for use of motor torpedo boats and ready attack destroyer in the harbor patrol organization, and for regular routine sweeping of the harbor by special equipment (magnetic and acoustic). Plan for harbor patrol was established by Naval Base Defense Order No. 11, dated December 26, 1941.

Arrangements were made to expedite the manufacture of antitorpedo nets of yard design. Installation of Light Indicator Net was started and this was placed in operation December 27. Establish [28] ment of 16 observation stations for mine watch was outlined and a start was made on installation of temporary control lines for range entrance lights and outer channel buoys.

Manufacture of special type floating solid steel curtain of interlocking pile sheeting was completed for Drydock No. 2 and cofferdam of Drydock No. 3.

#### *District Material Report:*

A total of 31 small yachts and sampans were acquired during the period of 7 December to 31 December 1941 for use as district craft. Such craft have been assigned to Commander Inshore Patrol for inshore patrol, Captain of the Yard for harbor patrol and Commander Base Force for salvage and supply facilities.

The following eight vessels were partially converted during this period: C. G. 400, C. G. 403, XYP-161, XYP-166, XYP-155, C. G. 196, XYP-157 and XYP-14-14.

During the period of this report the shipyard and drydock facilities of the Inter-Island Drydock Co., Ltd., the Hawaiian Tuna Packers, Ltd., and Young Brothers, Ltd., have been available to the district for the repair and conversion of district craft. The Hawaiian Tuna Packers, Ltd., shipyard has experienced some labor shortage which has limited the facilities to the conversion program of sampans with deferment of small contractors tugs and barges. No improvement in this labor condition is likely as long [29] as other defense contracts are in progress. The work load and productive force at the Inter-Island Drydock Co., Ltd., is satisfactory. Drydock facilities at Young Brothers, Ltd., are in use. The size of the dock and lack of repair facilities limits the availability for other craft.

#### *Supply Department Activities:*

After the attack on the fleet, arrangements were made to distribute food and clothing to certain focal points, namely: For Island, for the crews of certain battleships, to the Arena, the Receiving Station, the Officers' Club, the Marine Barracks and the Naval Hospital.

The first week of the war was a period of continuous demand for emergency issues of clothing, food, mattresses, blankets, ordnance material, lumber, sand bags, flash lights, batteries and innumerable ship materials. Issues and deliveries of these items were expedited, but a firm check on the requiring activities was made to justify quantities requisitioned.

Replenishment and augmentation of all critical items were immediately started after the outbreak of war. Shipments of fresh and dry provisions, steel, clothing,

## 1276 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

lumber, cots, helmets, small arms, burlap sand bags, bedding, salvage gear, etc., were requested of the west coast yards and the Navy Department.

[30] At the end of the first week, practically all of the business of the supply department had been returned to normal, although accelerated, channels of supply.

### *Communication Activities:*

First action taken was the transmission of air raid warning by NPM on all of its circuits, done immediately by direction of the District Communication Officer who was notified of the raid by the communication watch officer at the navy yard.

The high power TAW transmitter at Lualualei had been shut down by previous arrangement to repair radio towers and shift the general power transformers. This transmitter was restored to full commission with power from the Hawaiian Electric Co., by 0949. The high frequency transmitters were placed on auxiliary operation without interruption.

Radio communication and radio control between the navy yard, radio Wailupe and Lualualei, and from the Commander-in-Chief, Pacific Fleet, to Lualualei were established by low power sets so that there was no serious interruption of radio communications on any circuit from the Fourteenth Naval District.

There were many cases of interruptions to telephone communications caused by damage to cables.

[31] All radio control activities were transferred from Radio Wailupe into bombproof building No. 2 and Radio Wahiawa by December 17 without interruption of communications.

The activities of the District Combat Intelligence Unit at Radio Heela have been transferred to Radio Wailupe pending further transfer to Radio Wahiawa.

Additional telephone facilities have been installed to meet the sudden increase of demand and to provide alternate communication channels.

Arrangements for emergency communications, using auxiliary power units and facilities of the commercial communication companies, have been completed.

Two telephone trunks and one teletype circuit between the Harbor Control Post and Aliamanu Crater were completed by January 1, 1942, and the laying of a 100 pair cable to connect the navy yard and the Salt Lake area was underway at maximum speed.

### *Port Director's Report:*

The following Army, Navy, N. T. S., and commercial vessel movements were effected:

#### December 7, 1941:

S. S. JAGERSFONTEIN arrived Honolulu 0930.

U. S. S. ANTARES arrived Honolulu at 0945.

U. S. S. NAVAJO arrived Honolulu at 1400.

#### [32] December 8, 1941:

S. S. MANINI arrived at 0700 from Vancouver, B. C.

S. S. PAT DOHENY (TKR) arrived Honolulu at 0730.

S. S. MALAMA arrived Honolulu at 0830 from Pacific Coast.

S. S. HALEAKALA arrived Honolulu at 1630 from Hickam.

#### December 9, 1941:

S. S. LANSING arrived Honolulu at 0730 from New Guinea.

U. S. S. ANTARES shifted from Honolulu to Pearl Harbor at 0935.

S. S. MAKAWELI arrived Honolulu at 1425 from Pacific Coast.

#### December 10, 1941:

U. S. S. ROBIN arrived Honolulu at 1100 from Palmyra.

U. S. S. ROBIN shifted from Honolulu to Pearl Harbor at 1245

S. S. WEIMEA arrived Honolulu at 1245 from San Francisco.

S. S. ROSEVILLE (Norwegian) arrived Honolulu at 1530 from Los Angeles Harbor.

U. S. C. & Geodetic Survey EXPLORER arrived Honolulu at 1545 from sea.

S. S. PRUSA arrived Honolulu at 1800 from Manila.

#### December 11, 1941:

S. S. MAUNALEI arrived Honolulu 1155 from San Francisco.

S. S. ROYAL T. FRANK arrived Honolulu at 1915 from sea.

#### December 12, 1941:

S. S. PORTLAND arrived Honolulu at 1400 from Pacific Coast.

S. S. HALEAKALA sailed Honolulu at 1145 for Kahului.

S. S. HALEAKALA arrived Honolulu at 1330 from sea.

S. S. ADMIRAL CHASE arrived Honolulu 1500 from Vancouver, B. C.

December 13, 1941:

- S. S. LANSING sailed Honolulu at 1300 for Vancouver, B. C.
- S. S. PYRO sailed Honolulu at 1300 for Pacific Coast.
- S. S. HALEAKALA sailed Honolulu at 1830 for Kahului.
- S. S. COAST MERCHANT arrived Honolulu at 1400 from Pacific Coast.
- U. S. S. REGULUS arrived Honolulu at 1000 from Midway Island.

December 14, 1941:

- S. S. HAWAII sailed from Honolulu at 1600 for Port Allen.
- S. S. HALEAKALA arrived Kahului at 0600 from Honolulu.
- [33] 0615 report received that U. S. S. TREVOR was standing by torpedoed merchantman. Position 043° true 29 miles from Makapu Point.
- 0615 report received that S. S. PYRO attacked but not damaged at 0350 by submarine. Position 334° true 85 miles from Barbers Point.
- 0645—U. S. S. TREVOR reported picking up survivors from Norwegian steamer HEOUGH.
- 0650—U. S. S. TREVOR reported standing in Honolulu, berth Pier 6, with HEOUGH survivors.

December 15, 1941:

- S. S. HALHAKALA sailed from Kahului at 0500 for Christmas Is.
- S. S. CASTOR sailed from Pearl Harbor at 0830 for Honolulu.
- S. S. CASTOR arrived Honolulu at 1228 from Pearl Harbor.
- S. S. HAWAII arrived Port Allen at 0600 from Honolulu.
- U. S. A. T. IRVIN L. HUNT arrived Honolulu at 1242 from Manila.

December 16, 1941:

- S. S. HAWAII sailed from Port Allen at 1600 for Honolulu.
- S. S. MANINI sailed from Honolulu at 1200 for Wellington, New Zealand.
- S. S. MALAMA sailed from Honolulu at 1200 for Wellington, New Zealand.
- S. S. RUSA sailed from Honolulu at 1200 for Panama Canal.
- S. S. PAT DOHENEY sailed from Honolulu at 1200 for Pacific Coast.
- S. S. MAKAWELI sailed from Honolulu at 1760 for Kahului.
- S. S. ADMIRAL CHASE sailed Honolulu at 1200 for Sydney, Australia.
- S. S. PERMANENTE sailed Honolulu at 1200 for Pacific Coast.
- U. S. S. KAULA arrived Honolulu at 0900 from Palmyra Island.
- S. S. HUMUULA arrived Honolulu at 0900 from Christmas Island.
- U. S. A. T. N. L. SCOTT arrived Honolulu at 1600 from Manila, P. I.
- S. S. PRES. COOLIDGE arrived Honolulu at 1600 from Manila, P. I.
- S. S. STEELMAKER arrived Honolulu at (?) from Pacific Coast.

December 17, 1941:

- S. S. MAUNALEI sailed Honolulu at 1730 for Kahului.
- S. S. MALIKO sailed Kahului at 1900 for Hilo.
- S. S. HAWAII arrived Honolulu 0730 from Port Allen.
- S. S. MAKAWELI arrived Kahului at 130 from Honolulu.

[34] December 18, 1941:

- U. S. S. CASTOR sailed Honolulu at 1430 for Pacific Coast.
- U. S. S. JUPITER sailed Pearl Harbor at 1430 for Pacific Coast.
- S. S. MEMPHIS CITY sailed Hilo at 2000 for Pacific Coast.
- S. S. HUALALAI sailed Hilo at 1700 for Pacific Coast.
- U. S. S. SEPULGA arrived Pearl Harbor at 1100 from Pacific Coast.
- S. S. MAUNALEI arrived Kahului at 0600 from Honolulu.
- S. S. MALIKO arrived Hilo at 0600 from Kahului.
- S. S. LAKE FRANCIS arrived Honolulu at 0922 from Christmas Is.

December 19, 1941:

- S. S. LAKE FRANCIS sailed Honolulu at 1348 for Pacific Coast.
- S. S. RAMAPO sailed Honolulu at 1300 for Pacific Coast.
- S. S. LILOA sailed Port Allen at 1345 for Pacific Coast.
- S. S. KOHALA sailed Ahukini at 1530 for Pacific Coast.
- U. S. A. T. N. L. SCOTT sailed Honolulu at 1120 for Pacific Coast.
- S. S. PRES. COOLIDGE sailed Honolulu at 1125 for Pacific Coast.
- U. S. S. PROCYON arrived Pearl Harbor at 1045 from Pacific Coast.
- S. S. MAPELE arrived Honolulu at 1000 from New Zealand.
- S. S. ORTOLAN arrived Pearl Harbor at 1700.
- S. S. HUALALAI arrived Honolulu at 1000 from Hilo.

December 20, 1941:

- S. S. JAGERSFONTEIN sailed Honolulu at 1120 for Batvia.
- S. S. MONTGOMERY CITY sailed Honolulu at 1600 for Pacific Coast.
- U. S. A. T. IRVIN L. HUNT sailed Honolulu at 1630 for Pacific Coast.

## 1278 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

S. S. MAUNALEI sailed Kahului at 1800 for Hilo.

S. S. MAPELE sailed Honolulu at 1600 for Pacific Coast.

U. S. S. WILLIAM WARD BURROWS arrived Pearl Harbor at 1000 from vicinity Wake Island. Last port departure Johnston.

December 21, 1941:

S. S. STEELMAKER sailed Honolulu at 1500 for Kahului.

U. S. S. WILLIAM WARD BURROWS sailed Pearl Harbor at 0630 for Honolulu.

S. S. KAILUA sailed Hilo at 1100 for Pacific Coast.

S. S. MALIKO sailed Hilo at 1100 for Pacific Coast.

U. S. S. WILLIAM WARD BURROWS arrived Honolulu at 0800 from Pearl Harbor.

S. S. MAUNALEI arrived Hilo at 0600 for Kahului.

[35] Dawn—30 survivors from S. S. LAHAINA arrived Maui and reported vessel attacked by shell fire from surfaced submarine on afternoon of December 11th. Ship sank December 12th. All the ship's crew cleared the ship; four men died on way to Maui; survivors returned to Oahu December 30, 1941 by plane.

December 22, 1941:

S. S. MAKAWELI sailed Kahului at 0625 for Pacific Coast.

S. S. STEELMAKER arrived Kahului at 0700 from Honolulu.

December 23, 1941:

S. S. MAKUA sailed Honolulu at 1755 from Ahukini.

U. S. S. LITCHFIELD arrived Pearl Harbor 1330 from sea.

December 24, 1941:

S. S. HAWAII sailed Honolulu 0720 for Kaunakakai.

S. S. HAWAII sailed Kaunakakai at 1330 for Kahului.

S. S. STEELMAKER sailed Kahului at 1730 for Hilo.

U. S. SUMNER sailed Pearl Harbor at 0800 for sea.

S. S. HUMUULA sailed Honolulu 0832 for sea.

U. S. S. DOLPHIN and 1 destroyer sailed Pearl Harbor for sea at 0930.

U. S. S. ALDEBARAN arrived Pearl Harbor at 1500 from Pacific Coast.

U. S. S. HARRIS arrived Pearl Harbor at 1500 from Pacific Coast.

U. S. S. ABINE arrived Pearl Harbor at 1500 from Pacific Coast.

U. S. A. T. TASKER BLISS arrived Honolulu at 1325 from Pacific Coast.

U. S. S. PLATTE arrived Honolulu at 1330 from Pacific Coast.

S. S. PRES. GARFIELD arrived Honolulu at 1335 from Pacific Coast.

U. S. S. HERCULES arrived Pearl Harbor at 1730 from Pacific Coast.

S. S. HAWAII arrived Kaunakakai at 1130 from Honolulu.

S. S. MAKUA arrived Ahukini at 0730 from Honolulu.

U. S. S. GREYLING and U. S. S. LITCHFIELD arrived Pearl Harbor at 1400 from sea.

December 25, 1941:

U. S. S. PROCYON sailed Pearl Harbor at 0700 for Honolulu.

S. S. HAWAII sailed Kahului at 1657 for Hilo.

U. S. S. PROCYON arrived Honolulu at 0740 from Pearl Harbor.

S. S. STEELMAKER arrived Hilo at 0700 from Kahului.

[36] December 26, 1941:

S. S. LURLINE sailed Honolulu 1045 for Pacific Coast.

S. S. MATSONIA sailed Honolulu at 1015 for Pacific Coast.

S. S. MONTEREY sailed Honolulu at 1038 for Pacific Coast.

U. S. S. SABINE sailed Pearl Harbor at 0642 for Honolulu.

U. S. S. PLATTE sailed Honolulu at 0755 for Pearl Harbor.

S. S. HAMAKUA arrived Honolulu at 0955 from sea.

U. S. S. SABINE arrived at Honolulu at 0755 from Pearl Harbor.

U. S. S. PLATTE arrived Pearl Harbor at 0835 from Honolulu.

S. S. HAWAII arrived Hilo at 0600 from Kahului.

S. S. BIRMINGHAM CITY arrived Honolulu at 1215 from Panama Canal.

December 27, 1941:

S. S. ROYAL T. FRANK sailed Honolulu at 1725 for Port Allen.

S. S. MAKUA sailed Ahukini at 0830 for Kahului.

Twelve (12) survivors picked up off Oahu reported S. S. MANINI torpedoed December 17, 1941, at 1840 A. S. T. (0504 G. C. T. 18 December), position 18°35'N, 156°13'W. Ship sank in six minutes. Two life boats put over. December 29, 1941, 19 more survivors picked up by U. S. S. PATERSON, west of Oahu, making 31 survivors in all.

**December 28, 1941:**

U. S. S. SABINE sailed Honolulu at 1528 for Pacific Coast.  
 U. S. S. NEOSHO sailed Pearl Harbor at 1600 for sea.  
 U. S. S. CURTISS sailed Pearl Harbor at 1600 for Pacific Coast.  
 S. S. HAWAII sailed Hilo at 1830 for Kahului.  
 S. S. STEELMAKER sailed Hilo at 1830 for Kahului.  
 S. S. ROYAL T. FRANK sailed Port Allen at 1700 for Honolulu.  
 S. S. ROYAL T. FRANK arrived Port Allen at 0700 from Honolulu.  
 S. S. MAKUA arrived Kahului at 0745 from Ahukini.  
 S. S. ARTHUR FOSS and two barges arrived Honolulu at 1500 from Wake Island.

1000—thirteen (13) survivors from S. S. PRUSA arrived Honolulu and reported vessel sunk at 0536, 18 December, 1941,—120 miles south of southern point Hawaii. Nine (9) missing.

**December 29, 1941:**

S. S. HAWAII sailed Kahului (Time not available) for Kaunakakai.  
 S. S. HAWAII sailed Kaunakakai (Time not available) for Honolulu.  
 S. S. HAWAII arrived Kahului at 0700 from Hilo.  
 S. S. STEELMAKER arrived Kahului at 0700 from Hilo.  
 S. S. ROYAL T. FRANK arrived Honolulu at 0630 from Port Allen.  
 S. S. HAWAII arrived Kaunakakai at 1100 from Kahului.

**[37] December 30, 1941:**

U. S. S. HERCULES sailed Pearl Harbor at 0715 for Honolulu.  
 S. S. PRES. GARFIELD sailed Honolulu at 1036 for Pacific Coast.  
 U. S. A. T. TASKER BLISS sailed Honolulu at 1043 for Pacific Coast.  
 U. S. PROCYON sailed Honolulu at 1010 for Pacific Coast.  
 U. S. S. HARRIS sailed Pearl Harbor at 0930 for Pacific Coast.  
 U. S. S. THRESHER sailed Pearl Harbor at 0930 for sea.  
 U. S. S. HERCULES arrived Honolulu at 0830 from Pearl Harbor.  
 U. S. S. TRITON arrived Pearl Harbor at 1830 from sea.  
 S. S. HAWAII arrived Honolulu at 0715 from Kaunakakai.  
 U. S. S. WALNUT (C. G. S.) arrived Honolulu at 0700 from sea.

**December 31, 1941:**

S. S. HAMAKUA sailed Honolulu at 1752 for Nawiliwili.  
 S. S. HUALALAI sailed Honolulu at 1743 for Kahului.  
 S. S. BIRMINGHAM CITY sailed Honolulu at 1740 for Kahului.  
 S. S. NIAGARA arrived Pearl Harbor at 1200 from sea.

/s/ M. R. DEX.

Activities of District Intelligence Office and Office of the Cable and Radio Censor:  
 At 0830 December 7, the order was given to have all Intelligence personnel on active duty report to their stations immediately.

Orders were given to mobilize all Naval Reserve Intelligence personnel and to establish censorship of cable and overseas radio.

Appropriate Intelligence reports (including interrogation of Japanese lieutenant captured from small submarine stranded in Waimanalo Bay and examination of various documents and equipment from crashed Japanese planes) have been submitted to proper [38] authorities including the U. S. Pacific Fleet Intelligence Officer, Combat Intelligence Officer, local representatives of the Military Intelligence Division and the Federal Bureau of Investigation, and the Office of Naval Intelligence.

During the period 7 to 31 December, 1941, the District Intelligence Service in collaboration with the local representatives of the Federal Bureau of Investigation and the Military Intelligence Division conducted investigations of many rumors and reports concerning alleged parachutists, signals, lights, poisoned water, unexploded bombs, etc., and assisted the local representatives of the Federal Bureau of Investigation and the Military Intelligence Division in rounding up suspects and collecting unauthorized radios and firearms.

At 1100 December 7, censorship was established and a ban clamped down on all incoming and outgoing cables, radiograms and trans-Pacific telephone calls. On December 8, after rules for censorship and requirements of messages were issued to operating companies and to the Field Censors, regular censorship and release of all traffic were begun at 1300.

Tentative trans-Pacific telephone censorship regulations were issued to the public on December 19.

# 1280 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

## Personnel Office Report:

The following information on officer and enlisted personnel. [39] is submitted for the period of 7 December to 31 December, 1941:

### Officer Personnel

| Total number of enlisted men called to active duty during this period ----- | 46       |

### Action at Wake:

Enemy activity started with a bombing attack by 24 twin-engined land planes on December 8. Almost daily attacks were made by Japanese aircraft until the island was finally overwhelmed by aerial and surface attack on December 22. A surface raid was also carried out on December 11. Enemy losses reported include one light cruiser, four destroyers, a gunboat, a submarine and more than 12 planes.

### [40] Action at Midway:

The only enemy activity against Midway was a surface raid on December 8 in which two cruisers and two destroyers are reported to have participated. Shore batteries registered three 3 inch hits on one of the destroyers and two 5 inch hits on a cruiser. A total of 14 casualties including two dead resulted from enemy shelling.

A curtailment of contract work was proposed under the existing situation and plans made to eliminate projects which would require a long time for completion to a usable stage. It was proposed to stop work temporarily on the submarine base buildings and modify other projects to suit immediate needs. It was further proposed to reduce the contractors' force 50 per cent, leaving a total of 770 workers.

### Action at Johnston:

Initial action against Johnston was a star shelling by a submarine on December 12, followed by other surface raids on December 15, 21 and 22. The December 15 raid saw an enemy light cruiser fire 10 salvos at 9,000 yards range. The power house was destroyed and the stills and boilers were badly damaged. Since the enemy ceased fire about 10 minutes after and at a time when the island was well lighted by an oil fire, it was believed that Johnston shore batteries came close to their mark.

[41] A star shelling, probably by a submarine, occurred on December 21, this action ceasing after fire was returned by shore battery. On December 22, a submarine shelled Sand Island and destroyed the CAA homing tower. The 5 inch battery on Johnston fired 10 salvos with each gun at 7,000 yards range before the submarine submerged.

In a directive on December 13, it was specified that a sufficient force of civilians was to be kept at the island to operate all of the power plants and continue with a program as follows: Complete gasoline tanks to a usable stage, complete a runway 2,500 feet in length, construct bachelor officers' quarters and the dispensary, construct temporary magazine as necessary and splinter proof shelters, construct an emergency sewage system and a salt water system, a power plant

and distribution system and a radar installation. A total of 270 civilian employees was estimated as necessary for the outlined work.

On December 25, the commandant directed that the resident officer in charge and facilities of the contractors' organization be placed at the disposal of the commanding officer of the air station for necessary defense and protection measures in the present emergency.

The program was to include shelters and protection around key structures.

After taking care of emergency items, the contractors' force [42] was to complete personnel buildings and services. Temporary storage for ammunition, gasoline and other supplies, the runway and all essential items were to be completed at the earliest possible date to permit evacuation of civilian employees and make room for military personnel. The permanent bombproof shelter and communication center were not to be built as originally planned. Scattered splinter proof shelters would be substituted as needed.

The foregoing was altered the following day by a directive that Johnston was to retain the least number of employees—not to exceed 200—to complete the essential defense structures including the runway to 2,500 feet length and to operate mechanical equipment. The least skilled and the nonessential trades would be evacuated first, and the military force would assist with unskilled labor as necessary after evacuation.

Of a total of 307 contractors' employees, 110 were evacuated by the end of the month.

#### *Action at Palmyra:*

There was no enemy activity against Palmyra until December 24 when the air station was shelled by a submarine at about 3,000 yards range. Six rounds fired registered one hit on the U. S. Engineer Department Dredge Sacramento, causing only minor damage.

All of the island's batteries were in Condition 1 before the action. The submarine submerged after a five inch shore battery fired two star shells and 12 navy common A. P. shells. No hits were observed.

[43] Change of the construction program as required by existing conditions was directed.

Palmyra was to maintain the minimum number of civilian employees—not over 250—needed to complete structures and essential defense measures, operate mechanical equipment as well as the dredge and other plant. The island was to provide a 5,000 foot runway together with emergency defenses.

On December 31, the naval air station reported its radar was in commission.

#### *Summary of Actions Against Submarines:*

A total of 52 depth charge attacks on submarine contact were reported by district forces during the period of this diary.

Reports were received from the USS WARD, USS CHEW, USS SCHLEY, USS COCKATOO and USCG TANAY.

Enemy submarine activity in the operating areas of these forces was materially curtailed, giving some tangible evidence of the effect of the attacks.

*Sunday, December 7, 1941*

### DUTY OFFICER'S LOG

- 1145 Assumed the duty December 6, 1941.  
" Routine duties.  
0712 Received despatch from USS WARD . . . "We have attacked, fired upon, and dropped charges upon submarine operating in defensive sea area". Upon receipt of despatch, immediately endeavored to raise Commandant's Aide and could not contact him. Called and contacted CINCPAC duty officer and read him the despatch. Sent message to ready duty DD, USS MAHAN "Get underway immediately and contact USS Ward in defensive sea area". Instructed Communication Office to send copy of the last message to the USS WARD for information. Called Chief of Staff Captain Earle, notifying him of WARD's message. He requested confirmation from WARD. Relayed to WARD.  
0720 Called War Plans Officer, Comdr. Momsen, and was ordered to call Ensign Logan. Logan arrived 0725 (approximately).  
0725 Received following message from USS WARD "We have intercepted a sampan—we are escorting this sampan into Honolulu—please inform Coast Guard to send cutter for relieve us of sampan".

Certified a true copy:

GEO. H. SIMPSON,  
Aide to the Commandant, Fourteenth Naval District.

EXTRACT FROM THE WAR DIARY OF THE USS CONDOR (AMc#14) OF DECEMBER 1941

*December 7, 1941*

- 0210-0445 Swept for Magnetic Mines in area off entrance buoys to Pearl Harbor.  
0342 Sighted periscope of a submerged submarine. Following diagram illustrates contact:

(The diagram referred to, *supra*, illustrating contact with a Japanese submarine by the USS WARD on 7 December 1941 at 0342 will be found reproduced as Item No. 297, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

Submarine when first sighted was approximately 100 feet away on the port bow on a collision course with the CONDOR but turned sharply to the left. The following message was sent by yardarm blinker to the U. S. S. WARD, "Sighted submerged submarine on westerly course, speed 9 knots." About five minutes later the WARD requested by radio further information concerning the submarine. Information concerning the course was given and the WARD continued search while this vessel continued on its assigned mission. The submarine was not sighted again.

- 0443 Secured from General Quarters.

- 0520 By radio to U. S. S. CONDOR: "WHAT IS THE DISTANCE OF THE SUBMARINE THAT YOU SIGHTED". By radio from U. S. S. CONDOR: "SUBS COURSE WAS 020 MAGNETIC AND WAS HEAD-ING FOR ENTRANCE BUOYS".

- 0525 U. S. S. CROSSBILL and U. S. S. CONDOR stood in channel.

- 0527 By radio to U. S. S. CONDOR: "DO YOU HAVE ANY ADDITIONAL INFORMATION CONCERNING THE SUBMARINE". By radio from U. S. S. CONDOR: "THERE IS NO ADDITIONAL INFORMATION".

- 0534 By radio to U. S. S. CONDOR: "THANK YOU FOR YOUR REPORT OF SUBMARINE. WE WILL CONTINUE SEARCH. NOTIFY IF YOU RECEIVE ANY FURTHER INFORMATION".

- 0605 Exchanged calls with U. S. S. ANTARES.

- 0640 Sighted unidentified submarine 1 point off starboard bow. Sounded General Quarters. All engines ahead full, course 125° T and pgc, 118 psc.  
0645 Commenced firing on submarine. Fired two salvos. Observed second salvo to be direct hit on enemy submarine conning tower. Commenced depth charge attack.

- 0646 Ceased firing and ceased depth charge attack.

## 1284 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- 0648 Stopped sampan number 248 (32A453) in vicinity of attack and notified Coast Guard to escort sampan to Honolulu.
- 0654 By radio to Commandant, Fourteenth Naval District: "WE HAVE ATTACKED FIRED UPON AND DROPPED DEPTH CHARGES ON A SUBMARINE OPERATING IN DEFENSIVE SEA AREAS".
- 0703 Established sound contact on enemy submarine. Steaming on various courses and speeds conforming to attack.
- 0705 Commenced depth charge attack.
- 0706 Sighted black oil bubble 300 yards astern. Ceased depth charge attack.

WAR DIARY OF OFFICER IN CHARGE, NET & BOOM DEFENSES FOURTEENTH NAVAL DISTRICT

Kept in accordance with District Order No. 2-42

*Sunday December 7 1941*

#### DUTY OFFICER'S LOG

1145 Assumed the duty December 6, 1941.

" Routine duties.

0712 Received despatch from USS WARD. . . "We have attacked, fired upon, and dropped charges upon submarine operating in defensive sea area". Upon receipt of despatch, immediately endeavored to raise Commandant's Aide and could not contact him. Called and contacted CINCPAC duty officer and read him the despatch. Sent message to ready duty DD, USS MAHAN "Get underway immediately and contact USS WARD in defensive sea area". Instructed Communication Office to send copy of the last message to the USS WARD for information. Called Chief of Staff Captain Earle, notifying him of WARD'S message. He requested confirmation from WARD. Relayed to WARD.

0720 Called War Plans Officer, Comdr. Momsen, and was ordered to call Ensign Logan. Logan arrived 0725 (approximately).

- 0725 Received following message from USS WARD "We have intercepted a sampan—we are escorting this sampan into Honolulu—please inform Coast Guard to send cutter for relieve us of sampan".
- 0726 Called Coast Guard. Could not contact an officer but was informed by Communications Office (14ND) that Coast Guard had received WARD'S second message simultaneously. Comdr. Momsen arrived Operations Office a few minutes after Ensign Logan.
- 9728 Started to call all department heads, after arranging with telephone office to keep lines open.
- 0755 At approximately 0755 (but not later) heard a plane approaching from south. I saw it from southerly lanai of Administration Bldg. and could discern Rising Sun insignia of Japan under the wings. Plane was joined shortly by others with some insignia on it. They were the dive bomber type. Bombs were dropped and the first attack was on. Tried to reach the YNG 17 by telephone. Unable to get through. Continued calling YNG 17 without being able to make contact. Made telephone contact with YNG 17 at approximately 0830 and ordered Ensign Eastman to close the A/T and A/B immediately. About this time there was a slight lull in the attack, followed by a much heavier and concentrated attack, and I believe that it was in this attack that the formations of torpedo planes came in over PEARL HARBOR. It was during this attack that our defensive firing was increasing perceptibly. Noise was deafening. This attack lasted much longer than the first.

Captain Earle, Chief of Staff, arrived during this second attack. Endeavored to close HONOLULU A/T and A/B. Had considerable difficulty in getting through. Finally, Lt. Ottley's home was called and was informed that he had departed for the Control Station of the HONOLULU Net and Boom. Tried to reach him there without success. During this period the third attack began. Defensive firing exceedingly heavy, bombing likewise.

The Commandant and his Aide arrived during the third attack.

Fires from Hickam Field and 10-10 dock were raging. Everything was obscured by smoke. It was impossible to use the phone during this time because of noise. This attack appeared to me to be the heaviest and longest. After the third attack subsided, contact was made with the Officer in Charge, HONOLULU Net Operating Station, and he was ordered to close the HONOLULU Net and Boom immediately. Was later informed by Mr. Ottley that the Mess Hall at Sand Island had been bombed and one man injured, but that they were still able to operate.

Capt. Finlay, Senior Coast Guard Officer, had assumed his duties as Captain of the Port (HONOLULU) and was in direct administrative charge of the HONOLULU Net and Boom.

Commandant's Aide for Aviation arrived during the last attack.

There followed a lull, followed by what I considered a relatively light attack.

Shortly thereafter the attacks ceased.

Simultaneously with the events listed above the following occurred on December 1941.

Communications with YNG 17 and the Section Base were out. To become informed of the conditions of the gate vessel, the PEARL HARBOR Net & Boom Operating Crew, and of Net & Boom vessels at the Section Base, Ensign John H. Hofer went to the foregoing and subsequently arranged to have additional weapons, ammunition gas mask and helmets delivered to them.

Enlisted personnel was not adequate for the war time operation of the Net & Boom Defenses. Follow up requests for personnel requirements previously submitted were made to District Personnel Officer.

Study was given to the obtaining of standby winches for the HONOLULU Net & Boom, and for the PEARL HARBOR Net & Boom.

Routine Duties.

H. KAMINSKI  
Lt. Comdr. D-V (G) USNR

Monday, December 8, 1941

1. In accordance with previously formulated plans, action was taken to provide war time ordnance, for all Net and Boom Stations and vessels. Requests were made to the District Ordnance Officer.

## 1286 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

2. An underwater inspection was requested to made of the Pearl Harbor anti-torpedo net and anti-motorboat boom (by divers to be obtained from ComBaseFor) for the purpose of determining whether the Nets had been directly penetrated or disturbed during or prior to the attack of the 7th. This inspection, conducted on the 12th of December, revealed that the nets had not been penetrated and substantiated the belief that the Japanese submarine known to be in Pearl Harbor, entered in the wake of our own AMc's, Sunday a. m., December 7th.

3. A recommendation was submitted to the Captain of the Yard to cancel the system of visual signals now in effect for denoting the opened and closed status of the Pearl Harbor Net and Boom. This was approved.

Tuesday, December 9, 1941

1. Enlisted personnel urgently needed in Net and Boom operating forces were obtained from the Emergency Fleet Personnel office. Additional personnel requests were submitted to District Personnel office to complete operating forces.

2. The attack of Dec. 7th, re-opened the subject of the unprotected areas existing under the Pearl Harbor Net and Boom. The conventional A/T Net stipulated for this installation by BuOrd extends to a depth of 35' only, and was designed primarily for torpedo protection. There is a section directly under the main gate of approximately 350' ranging in depth from 45' to 82' (dredged for a damaged ship channel), and the possibility of a submarine passing through this section undetected is realized. Pending the receipt of reliable information or directives it is not deemed advisable to make any immediate changes in the Net and Boom. However changes will be made as soon as advisable.

3. The District Ordnance Superintendent advised that two 50 cal. machine guns would shortly be made available for Net and Boom defenses. It is intended to place one on the YNg 17 and one on the YN 47.

Wednesday, December 10, 1941

1. A study was made and action was taken to provide emergency standby opening and closing wires for the Nets and Booms at both Pearl and Honolulu Harbors. This wire will be available for immediate use in case of damage to wire now in use.

2. In view of the questionable reliability of the temporary winches installed for operation of the Nets and Booms at Pearl and Honolulu Harbors. The Bureau of Ordnance was requested by despatch to expedite shipment of the regular Bureau of Yards and Docks winches. In anticipation of the delay expected in the shipping of the regular winches alternate means of opening and closing the gates in case of breakdown were established as follows:—

### HONOLULU A/T AND A/B:—PIER 1 WINCH STATION (CLOSING STATION)

|                 |   |                   |                                       |
|-----------------|---|-------------------|---------------------------------------|
| Emergency means | { | #1 equipment----- | temporary installation, diesel winch. |
|                 |   | #2 equipment----- | YN47, COCKENCE                        |
|                 |   | #3 equipment----- | Army truck M                          |

### SAND ISLAND WINCH STATION (OPENING STATION)

|                 |   |                   |                                           |
|-----------------|---|-------------------|-------------------------------------------|
| Emergency means | { | #1 equipment----- | original installation, two diesel winches |
|                 |   | #2 equipment----- | YN47, COCKENCE                            |
|                 |   | #3 equipment----- | Army tractors M                           |

### PEARL HARBOR A/T AND A/B GATE VESSEL (CLOSING) STATION

|                 |   |                   |                   |
|-----------------|---|-------------------|-------------------|
| Emergency means | { | #1 equipment----- | starboard winches |
|                 |   | #2 equipment----- | port winches      |
|                 |   | #3 equipment----- | YN56, WAPELLO     |
|                 |   | #4 equipment----- | YN2, YN7, YN53    |

### FORT WEAVER WINCH STATION (OPENING)

|                 |   |                   |                                          |
|-----------------|---|-------------------|------------------------------------------|
| Emergency means | { | #1 equipment----- | temporarily installed two diesel winches |
|                 |   | #2 equipment----- | YN56, WAPELLO                            |
|                 |   | #3 equipment----- | YN2, YN7, YN53                           |
|                 |   | #3 equipment----- | Army tractors M                          |

M Arrangements were made with the Army officers concerned for the use of this equipment in event of a breakdown of equipment temporarily installed.

Thursday, December 11, 1941

1. Commander Base Force designated staff officer Lieutenant Commander RAINES to assist in the preparation of tentative plans, and also in the installation for aerial torpedo net protection of ships, berths, and drydocks in Pearl Harbor. Working in cooperation with the Public Works Department, improvised materials were envisioned as being temporarily necessary for this work. Arrangements were made to obtain sheet piling, re-inforcing rods welded to fencing, and target rafts to augment the relatively meagre quantity of regular A/T nets and appurtenances now available at the Net Depot. Work commenced on this project and the wire fencing separating Pearl Harbor Navy Yard was removed for this purpose.

2. The baffle in front of the YNg 17, which serves as torpedo protection for that part of the Pearl Harbor A/T and A/B which otherwise would be unprotected, was moved in closer to the YNg 17, in view of the data received regarding the midget Japanese submarine which washed ashore at Waimanolo Bay.

Action was taken to provide a direct phone from the YNg 17 to the Captain of the Yard's office.

Friday, December 12, 1941

1. A study was made of the feasibility of manufacturing torpedo net grommets in the Navy Yard, so as to make available as soon as possible the large amount of net that will be needed for protection of capitol ships in Pearl Harbor. To this end a canvass was made of the following local firms with the intention of securing whatever wire could be used for this job: Honolulu Iron Works; Theo H. Davies & Co. Ltd., Oahu Junk Co., American Factors, and the local utility companies. Samples of some of this wire that could be obtained were delivered to the District Chemical laboratory for measuring tensile strength and ascertaining chemical composition. Reports received later revealed that this wire would be unsatisfactory for the job, it being much too low in carbon content to afford suitable wire for manufacturing A/A net grommets.

2. Plans were made to lower the inner A/T and A/B net at Pearl to within 2 feet of the bottom of the channel. This is to be done as soon as additional net is received from the mainland.

Saturday, December 13, 1941

1. Detailed soundings and the taking of profile data was completed for the Pearl Harbor A/T and A/B for the purpose of providing working information as to how to best lower the nets to protect the space created by the dredging of the damaged ship channel. The problem is attributable to the fact that the depths of water under the nets when in a closed position is greater than the depths of water under the nets when in an open position. This condition prohibits the lengthening of all the nets to the deepest depths because if this were done, the nets would then become fouled on the bottom when opened because of the lesser depths existing as stated afore. To overcome this problem a recommendation was made to fill in, with dredged materials, the hole directly under the center of the net to a depth of approximately 45'. This recommendation was opposed because of the lesser depths which would then exist in the damaged ship channel. A further study is being made of the afore problem.

Sunday, December 14, 1941

1. Plans were made to install a light indicator net at the site of the old anti-boat log boom in Pearl Harbor channel. Operating personnel, officers and men, equipment and supplies, were arranged for.

2. The Bureau of Ordnance was despatched to ship by Clipper material needed for this installation.

Monday, December 14, 1941

1. Work continued on the organization of the Light Indicator Net Station.

2. Captain Bode, U.S.N., assisting the Captain of the Yard, discussed plans for protecting ships, berths, and drydocks in Pearl Harbor. A study will be made of materials needed, and BuOrd will be despatched to ship same as soon as possible.

## 1288 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

**Tuesday, December 16, 1941**

1. In preparation for the installation of the Light Indicator Net, the old anti-boat log boom was removed to the Net Depot quay wall and later stored ashore.
2. An inspection was made of part of the midget Japanese submarine now at the Submarine Base. Available information indicates that it would be extremely precarious, if not impossible, for an underwater craft of this type to directly penetrate or even go under the Pearl Harbor A/T and A/B when the gate was closed, without advertising its presence.

**Wednesday, December 17 1941**

1. Routine administration.

**Thursday, December 18 1941**

1. In consonance with ONI reports relative to attempted attacks on British Net and Boom Defenses, consideration was given to the installing of large searchlights at Net and Boom stations. Approval was granted by BuShips to install 12" searchlights on the YNg 17 and at the Honolulu Net Operating Station. This will be done at once.

**Friday, December 19, 1941**

1. Installation plans were completed for the Light Indicator Net. The Net Depot will commence assembling the Net today, using these plans for reference.
2. Arrangements were made to equip the YN 7 with electric power transmission wire so as to enable her to supply current to the YNg 17 in event of power failure in the gate vessel.

**Saturday, December 20, 1941**

1. Routine Administration.

**Sunday, December 21, 1941**

1. The ground moorings for the Indicator Net were layed this date.
2. Indicator Net panels were assembled and brailled up to conform to bottom soundings. This Net will be installed December 22 and December 23rd. Indicator floats were shipped by clipper.

**Monday, December 22, 1941**

1. Routine Administration.

**Tuesday, December 23, 1941**

1. Study is being made of the practicability of installing a Light Indicator Net to the seaward (bault) line (main gate section) of the Pearl Harbor A/T and A/B. If the study reveals this expediency to be practical, then the opening now afforded by the damaged ship channel to attacking underwater craft will be closed. This study is being conducted in conjunction with the study of the feasibility and advisability of installing an anti-submarine net at the entrance to Pearl Harbor channel.

**Wednesday, December 24, 1941**

1. Routine Administration.

**Thursday, December 25, 1941**

1. Routine Administration.

**Friday, December 26, 1941**

1. Routine Administration.

**Saturday, December 27, 1941**

1. In accordance with District policy, Net and Boom vessels completed strip ship plans.

Sunday, December 28, 1941

1. In light of expanded Net and Boom operations, a complete revision of Net and Boom enlisted personnel was submitted to District Personnel Officer for forwarding to the Bureau of Navigation.

Monday, December 29, 1941

1. Routine Administration.

Tuesday, December 30, 1941

1. Routine Administration.

Confidential

From: Commanding Officer.

To: Commandant, 14th Naval District.

Subject: War Diary.

Reference: (a) District Order No. 2-42, Jan. 5, 1942.

Enclosure: (A) War Diary of U. S. S. WARD for month of December, 1941.

1. In accordance with instructions contained in Reference (a) there is submitted herewith War Diary of the U. S. S. WARD, in triplicate, for the month of December, 1941.

W. W. OUTERBRIDGE.

WAR DIARY

December 7, 1941

0 to 4:

Steaming singly under boiler #1 and #2 on Channel Entrance Patrol off Pearl Harbor, T. H. Maneuvering on various courses and speeds to maintain position with standard speed 15 knots, 137 r. p. m.

0200 U. S. S. CROSSBILL and U. S. S. CONDOR stood out of Pearl Harbor and commenced mine sweeping operations.

4 to 8:

0405 Received following visual message from U. S. S. CONDOR: "HAVE SIGHTED SUBMERGED SUBMARINE ON WESTERLY COURSE".

0403 Sounded General Quarters.

0443 Secured from General Quarters.

0520 By radio to U. S. S. CONDOR: "WHAT IS THE DISTANCE OF THE SUBMARINE THAT YOU SIGHTED". By radio from U. S. S. CONDOR: "SUBS COURSE WAS 020 MAGNETIC AND WAS HEADING FOR ENTRANCE BUOYS".

0525 U. S. S. CROSSBILL and U. S. S. CONDOR stood in channel.

0527 By radio to U. S. S. CONDOR: "DO YOU HAVE ANY ADDITIONAL INFORMATION CONCERNING THE SUBMARINE". By radio from U. S. S. CONDOR: "THERE IS NO ADDITIONAL INFORMATION".

0534 By radio to U. S. S. CONDOR: "THANK YOU FOR YOUR REPORT OF SUBMARINE. WE WILL CONTINUE SEARCH. NOTIFY IF YOU RECEIVE ANY FURTHER INFORMATION".

0605 Exchanged calls with U. S. S. ANTARES.

0640 Sighted unidentified submarine 1 point off starboard bow. Sounded General Quarters. All engines ahead full, course 125°T and pgc, 118 psc.

0645 Commenced firing on submarine. Fired two salvos. Observed second salvo to be direct hit on enemy submarine conning tower. Commenced depth charge attack.

0646 Ceased firing and ceased depth charge attack.

Coast Guard to escort sampan to Honolulu.

0648 Stopped sampan number 248 (32A453) in vicinity of attack and notified Coast Guard to escort sampan to Honolulu.

## 1290 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- 0645 By radio to Commandant, Fourteenth Naval District: "WE HAVE ATTACKED FIRED UPON AND DROPPED DEPTH CHARGES ON A SUBMARINE OPERATING IN DEFENSIVE SEA AREAS".
- 0703 Established sound contact on enemy submarine. Steaming on various courses and speeds conforming to attack.
- 0705 Commenced depth charge attack.
- 0706 Sighted black oil bubble 300 yards astern. Ceased depth charge attack.
- 0736 From radio to Commandant Fourteenth Naval District and Coast Guard Station, Honolulu: "WE SIGHTED AND CAPTURED SAMPAN. WE ARE ESCORTING SAMPAN IN TO HONOLULU. PLEASE NOTIFY COAST GUARD TO RELIEVE US OF SAMPAN".
- 0754 Sighted squadrons of enemy planes approaching from Barber's Point heading for Pearl Harbor.
- 0755 Japanese planes commenced bombing attack on Pearl Harbor.

DD139/A16-3/(759)

U. S. S. WARD,  
Pearl Harbor, T. H., December 13, 1941.

From: Commanding Officer.

To: Commandant, Fourteenth Naval District.

Via: (1) Commander Destroyer Division EIGHTY.

(2) Commander Inshore Patrol.

Subject: Sinking of a Japanese Submarine by U. S. S. WARD.

1. While patrolling Pearl Harbor Entrance on Sunday, December 7, 1941, the U. S. S. WARD attacked an unidentified submarine in the Restricted Area off the Harbor.

The facts are as follows:

(1) At 0637 the Officer-of-the-deck said, "Captain come on the bridge". A conning tower with periscope of a submarine was visible. She was apparently heading for Pearl Harbor trailing the U. S. S. ANTARES. The ANTARES was standing toward the channel entrance towing a lighter.

(2) At 0640 the attack started. The WARD bore down on the submarine while accelerating from 5 to 25 knots.

(3) At 0645 the WARD opened fire with No. 1 and 3 guns and began dropping depth charges. One shot was fired from each gun. The shot from No. 1 gun missed, passing directly over the conning tower. The shot from No. 3 gun fired at a range of 50 yards or less struck the submarine at the waterline which was the junction of the hull and conning tower. Damage was seen by several members of the crew. This was a square positive hit. There was no evidence of ricochet. The submarine was seen to heel over to starboard. The projectile was not seen to explode outside the hull of the submarine. There was no splash of any size that might result from an explosion or ricochet.

(4) Immediately after being hit the submarine appeared to slow and sink. She ran into our depth charge barrage and appeared to be directly over an exploding charge. The depth charges were set for 100 feet.

(5) The submarine sank in 1200 feet of water and could not be located with supersonic detector. There was a large amount of oil on the surface where the depth charges exploded.

(6) The attack was made at 0645 which was before Pearl Harbor was bombed by Japanese planes.

(7) A dispatch by voice transmission was sent to Commandant, Fourteenth Naval District at 0645 which stated:

"WE HAVE ATTACKED, FIRED UPON, AND DROPPED DEPTH CHARGES ON A SUBMARINE OPERATING IN DEFENSIVE SEA AREAS".

(8) The performance of duty by the officers and men during this attack was in accordance with the traditions of this service.

### PERTINENT INFORMATION

*Appearance of submarine:* Cylindrical tube about 80 feet long with small oval shaped conning tower. It had no deck. It was painted dark green and was covered with moss indicating that it had been at sea for a considerable period.

**Behavior during attack:** In spite of the five minute run from the time of sighting and time of attack, the submarine apparently did not see or detect the WARD. It was making from 8 to 10 knots and was apparently bent on following the ANTARES into port. Exact distances are not known but at the time of the first shot the range was not more than 100 yards and for the second shot the range was 50 yards or less. The submarine passed very close to our stern.

W. W. OUTERBRIDGE.

| 12-7-41  | 0640 | Fired 2 shells at and dropped 4 depth charges on enemy submarine on surface. Sank submarine. See Commanding Officer, U. S. S. WARD Ltr. of 13 December 1941 to Commandant, 11th Naval District.                                                                                                                                                                                                                                                                                                                                                                                                                                                              | 4              |
| 12-7-41  | 0705 | Dropped 5 depth charges on sonic contact. Sighted black oil bubble 300 yards astern after attack.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            | 5              |
| 12-7-41  | 0840 | Dropped 2 depth charges on sonic contact. Results unknown.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 2              |
| 12-7-41  | 1020 | Dropped 3 depth charges on sonic contact. Observed oil on surface. Dropped 2 more depth charges on sonic contact under oil slick. No further contact.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 5              |
| 12-7-41  | 1127 | Dropped 4 depth charges on sonic contact. Sighted heavy oil slick on surface after attack.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 4              |
| 12-8-41  | 0619 | Dropped 5 depth charges on sonic contact. Results unknown. Dropped 4 more charges on sonic contact after circling to verify first attack.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    | 9              |
| 12-8-41  | 0655 | Dropped 2 depth charges on sonic contact. Observed heavy oil slick on surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | 2              |
| 12-8-41  | 1349 | Dropped 4 depth charges on sonic contact. Results unknown.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 4              |
| 12-9-41  | 1158 | Dropped 6 depth charges on sonic contact indicated by smoke bomb from patrol plane. Circled for second attack. Dropped 6 more charges. Contacts were excellent. Large air bubble came to surface. Heavy oil slick in bombed area was seen. Planes also dropped depth charges.                                                                                                                                                                                                                                                                                                                                                                                | 12             |

| 12-11-41 | 1547 | Dropped 6 depth charges on sonic contact. Considerable oil on surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       | 6              |
| 12-11-41 | 1637 | Dropped 6 depth charges on plane indication and sonic contact. Heavy oil slick on surface.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 6              |
| 12-11-41 | 1920 | Dropped 6 depth charges on sonic contact. Results unknown.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 6              |
| 12-16-41 | 2042 | Dropped 8 depth charges on sonic contact. Seventh charge brought up a large air bubble accompanied with a quantity of oil.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   | 8              |
| 12-17-41 | 1648 | Dropped 8 depth charges on patrol plane indication. Results unknown.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | 8              |
| 12-17-41 | 2012 | Dropped 8 depth charges on sonic contact. Contact was made at 1500 yards. Ranging was not stopped in order to listen for screw noises. Bearing was practically steady. Sound operator reported that it might be a surface ship at 800 yards the ship was 15° wide. Contact was clear and positive. Went ahead full speed. At 200 yards slowed to 15 knots. 10 seconds later dropped 8 depth charges at 4 second intervals. Charges set alternately for 50 and 100 feet. The seventh charge sent up a double column of water in a "V" shape which rose 25 feet higher than any other column. All charges exploded. No contact could be made after the attack. | 8              |

/s/ W. W. OUTERBRIDGE.

December 7, 1941

8 to 12:

Steaming as before.

0800 Mustered crew on stations; no absentees. Made daily inspection of magazines and smokeless powder samples; conditions normal.

0809 Sighted oil pool. Under intermittent gunfire from unidentified guns at times during air attack, and bombed several times, no damage being sustained. At one time enemy fighter planes repulsed with machine guns.

0840 Dropped two more depth charges, continuing search with sound gear.

## 1292 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

- 0901 Various units of U. S. Pacific Fleet commenced standing out of Pearl Harbor.  
1020 Made attack on enemy submarine, dropping three depth charges.  
1031 Dropped two depth charges on oil slick.  
1032 Steering gear jammed hard left.  
1035 Steering gear repaired.  
1127 Made contact with enemy submarine on sound gear. Dropped four depth charges. Sighted heavy oil slick on surface.  
1150 Made depth charge attack; none of charges exploded.  
12 to 16:  
No comment.  
16 to 20:  
No comment.  
20 to 24:  
Steaming as before.  
2110 Sighted anti-aircraft fire from Pearl Harbor. Sounded General Quarters.  
2130 Secured from General Quarters.

*December 8, 1941*

- 9 to 4:  
No comment.  
4 to 8:  
Steaming as before.  
0530 Sounded General Quarters.  
0610 Established sound contact on enemy submarine. Steaming on various courses and speeds conforming to attack, dropped four depth charges, no evidence of hits scored on enemy submarine.  
0645 Secured from General Quarters.  
0645 Established sound contact on enemy submarine and commenced attack, maneuvering on various courses and speeds conforming to attack; dropped two charges.  
0710 Returned to the position of attack sighted heavy oil slick.  
0742 Various units of U. S. Pacific Fleet standing out of channel.  
8 to 12:  
No comment.  
12 to 16:  
Steaming as before.  
1240 U.S.S. ALLEN stood into Pearl Harbor.  
1349 Made contact on sound gear and attacked, dropping four depth charges.  
1513 U.S.S. THORNTON escorting U.S.S. TRESKER, stood into Pearl Harbor.  
16 to 20:  
Steaming as before.  
1648 U.S.S. ENTERPRISE stood in with Destroyer Screen.  
1710 U.S.S. PERRY stood out.  
1745 Made contact with submarine, maneuvered for attack, lost contact.  
20 to 24:  
No comment.

Steaming as before. Mustered crew on stations; no absentees. Made daily inspection of magazines and smokeless powder samples; conditions normal.  
0940 U. S. S. PLUNGER, U. S. S. POMPANO, U. S. S. POLLACK and an unidentified submarine stood into Pearl Harbor.  
0943 U. S. S. LITCHFIELD stood in.  
1158 Spotted smoke bomb dropped from plane, sounded general quarters. Made contact with sound gear on object believed to be submarine, maneuvered on various courses and speeds conforming to attack and dropped six depth charges.  
12 to 16:  
1207 All engine ahead full. Made sound contact on enemy submarine, maneuvering on various courses conforming to attack. Dropped 6 depth charges.

1230 Secured from general quarters and resumed patrol in South Western Section of Restricted Area.

16 to 20:

1610 Sounded general quarters in accordance with air raid warning from Commandant, Fourteenth Naval District.

1658 Secured from general quarters.

1740 Sounded general quarters, having contact on sound gear.

1747 Secured from general quarters.

1910 Established contact with enemy submarine. Sounded general quarters.

1916 All stations manned and ready for general quarters.

1943 Lost contact with submarine; secured from general quarters.

20 to 24:

2320 Sounded general quarters; proceeded to position off Ahua Point to investigate report that shore battery was being illuminated by light from small boat off shore.

2345 Completed thorough investigation which revealed nothing, returned to patrol.

2355 Secured from general quarters.

*December 10, 1941*

0 to 4:

Steaming under bollers number 1 and 2 on various courses and speeds maintaining patrol station in Southwestern Section of Restricted Area, Pearl Harbor, T. H., standard speed 15 knots (184 r. p. m.).

0029 Sounded general quarters.

0033 Commenced depth charge attack on enemy submarine. Steaming on various courses and speeds conforming to attack. Dropped 4 depth charges.

0049 Secured from general quarters and resumed patrol.

0230 Observed U. S. S. TANEY commenced depth charge attack off starboard quarter, distance 700 yards.

0239 U. S. S. TANEY resumed patrol duties.

USS CONDOR AMc #14

*December 7, 1941*

0210-0445: Swept for Magnetic Mines in area off entrance bouys to Pearl Harbor.

0342: Sighted periscope of a submerged submarine. Following diagram illustrates contact:

(The diagram referred to, *supra*, illustrating contact with a Japanese submarine by the USS WARD on 7 December 1941 at 0342, will be found reproduced as Item No. 298, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

Submarine when first sighted was approximately 100 feet away on the port bow on a collision course with the CONDOR but turned sharply to the left. The following message was sent by yardarm blinker to the U. S. S. WARD, 'Sighted submerged submarine on westerly course, speed 9 knots.' About five minutes later the WARD requested by radio further information concerning the submarine. Information concerning the course was given and the WARD continued search while this vessel continued on its assigned mission. The submarine was not sighted again.

0758: General Quarters Sounded. (Moored at Section Base, Bishops Point.) Two .30 cal. machine guns were rigged and attacking Japanese Planes were fired on with no apparent results. Expended 50 rounds of .30 cal. ammunition.

0043-1015: Swept for Magnetic Mines in area off entrance bouys to Pearl Harbor.

1015: A Cruiser of the ST. LOUIS class evidently mistaking the Oropesa float of the CROSSBILL for a submarine turned sharply to the left and commenced firing at said float. In so doing she severed the magnetic cable of this ship approximately 100 yards from the out board end. The following diagram will serve to illustrate the situation:

(The diagram referred to, *supra*, illustrating attack by a U. S. cruiser on a float mistaken for a submarine, will be found reproduced as Item 299, EXHIBITS-ILLUSTRATIONS, Hewitt Inquiry.)

1205-1230: Swept for Moored Mines in area off entrance bouys to Pearl Harbor.

2110: General Quarters Sounded. (Moored at side to Berth #12 Navy Yard, Pearl Harbor.) Expended 50 rounds .30 cal. ammunition.

2140: Secured from General Quarters.

2400: No casualties to Personnel.

*December 8, 1941*

0435: Sounded General Quarters. Air Raid Alarm. (Moored port side to Berth #12 Navy Yard, Pearl Harbor.)

0703: Secured from General Quarters. No action.

1010-1105: Swept for Magnetic Mines in area off entrance bouys to Pearl Harbor and in the channel to the Net.

*December 9, 1941*

- 1600: Sounded General Quarters. Standing by for an air raid. (Moored port side to USS COCKATOO, Section Base, Bishops Point)
- 1815: Secured from General Quarters. No Action.

*December 10, 1941*

- 0401: Sounded General Quarters. Air raid Alarm. (Moored port side to USS COCKATOO, Section Base, Bishops Point)
- 0520: Secured from General Quarters. No Action.
- 0721-0905: Swept for Magnetic Mines in area off entrance bouys to Pearl Harbor and in channel to the Net.

UNITED STATES PACIFIC FLEET,  
U. S. S. PENNSYLVANIA, Flagship,  
c/o Fleet Post Office, Pearl Harbor, T. H., Jan. 4, 1942.

Cincpac File No.  
A16-3/PH/(11)  
Serial 040  
*Confidential*

*First Endorsement* on Com. 14 CA12-1/A16-3/ND14 (01531) of Dec. 30, 1941.

From: Commander-in-Chief, United States Pacific Fleet.  
To: Commandant Fourteenth Naval District.  
Subject: Report on Battle of Pearl Harbor, 7 December, 1941.

1. Returned.
2. The statement contained in paragraph 3 of enclosure (A) to the basic letter, regarding the CONDOR's sighting a periscope, at 0350, while sweeping off the channel entrance buoys, is information not previously reported to the Commander-in-Chief, United States Pacific Fleet. It is requested that the report be confirmed, if possible, and the Commander-in-Chief, United States Pacific Fleet, advised what action if any was taken to inform either the Commandant or the Commander-in-Chief, United States Pacific Fleet, in this case.

3. Return of all papers is requested.

C. W. NIMITZ.

*Second and* -----  
Con 14 C-A12-1/A16-3/  
MD14(01531) of Dec. 30 1941.

From: Commandant, Fourteenth Naval District.  
To: Commander-in-Chief, United States Pacific Fleet.  
Subject: Report on battle of Pearl Harbor, 7 December 1941.

1. Returned.

2. The information submitted in paragraph 3 of enclosure (A) was taken from report of Commanding Officer of CONDOR dated 19 December 1941, and verified by extracts from Signal Log of WARD.

3. Statements by the Officer of the Deck, Ensign R. C. McCloy, USNR, R. C. Uttrick Qm. 2c USNR, and R. B. Chavez, Sea 1c, USNR (Helmsman), on watch aboard the CONDOR at the time, indicate the following:—At about 0350 on 7 December 1941 the CONDOR was conducting sweeping operations approximately 1½ miles south west of entrance buoys. The attention of Ensign McCloy was attracted to what, in the darkness, appeared to be a wave. After studying it momentarily, he called Uttrick and with further examination with binoculars they both were convinced that what they saw was the periscope of a submerged submarine. Chavez could make out a wake but no periscope. The best estimate of least distance from CONDOR to periscope at any time is about 50 yards.

4. The CONDOR at 0357 informed the WARD, Channel Entrance Patrol, by visual of this contact. The WARD immediately instituted a search for the submarine. At about 0650 she sank an unidentified submarine and made report as recorded in her file 759 of December 13, 1941.

5. No report was made to Commandant, Fourteenth Naval District, or to Commander-in-Chief, Pacific Fleet, until the WARD had actually and definitely established contact with an unidentified submarine.

HEWITT INQUIRY EXHIBIT No. 77

OFFICE OF THE COMMANDANT FOURTEENTH NAVAL DISTRICT AND NAVY YARD, PEARL HARBOR, HAWAII, U. S. A.

3 NOVEMBER 1941.

C-A16-1/A&N/ND14  
(01171)

*Confidential*

From: Commandant, Fourteenth Naval District.

To: Chief of Naval Operations.

Via: Commander-in-Chief, U. S. Pacific Fleet.

References: (a) CNO Confidential dispatch 152227 of October 1941.

(b) Letter of the Commanding General, Hawaiian Department, dated 29 October 1941.

Enclosure: (A) Copy of reference (b).

1. It is recommended that no steps be taken at the present time to concentrate the Army and Navy in a common building as proposed in reference (a).

2. Since the visit of Captain Mountbatten, R. N., who gave his views on this subject and the experiences of the British along parallel lines, this and allied matters have been under consideration by: (a) Commander-in-Chief, U. S. Pacific Fleet; (b) Commanding General, Hawaiian Department; (c) Commandant, Fourteenth Naval District.

3. On receipt of reference (a), a paraphrased copy of this dispatch was sent to the Commanding General, Hawaiian Department; his comments in connection therewith are given in reference (b), enclosure (A).

4. The Commander-in-Chief, U. S. Pacific Fleet, accompanied by the Commandant, Fourteenth Naval District, has visited the underground chambers at Aliamanu Crater and had their functions explained in a brief way by the Commanding General, Hawaiian Department. If one or more of these chambers were to be assigned to the Navy, it is not apparent that any real benefit would be derived therefrom.

5. The Commander-in-Chief, U. S. Pacific Fleet, has offices ashore, as has Commander Submarines, Scouting Force. It appears certain that at the outbreak of hostilities, even though the Commander-in-Chief may return to his flagship, Commander Base Force will have to have offices ashore. Accordingly, the Commander-in-Chief has requested that suitable offices be constructed for the Commander-in-Chief, Commander Base Force, and Commander Submarines, Scouting Force. I do not believe that the Commander-in-Chief or the Fleet operations would be benefited by being in a common office building with the Commanding General and the Commandant, Fourteenth Naval District. As a matter of fact, I am inclined to believe that his best interests would be served by being in a building with only agencies of the Fleet therein.

6. There has been established in this district a joint harbor control post; this

## 1300 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

is located at District Headquarters. Here there are provisions for officers of the Coast Artillery, the Army Air corps, the Fleet Air Detachment, and the Submarine Force, all in addition to the district officers who work in connection with the local defense forces. So far as can be ascertained without actual experience in war, this post fulfills the requirements of the area.

7. In addition to the above, funds are available for and construction will soon be undertaken on a bomb-proof communication center adjacent to District Headquarters. Provision will have to be made in case of air raids for certain features of the harbor control post to occupy this bomb-proof shelter.

8. The Commandant feels that no delay is acceptable in providing for the present needs of the Commander-in-Chief. His needs are real and immediate. What should be done later in connection with a combined operating center can best be determined by actual experience.

C. C. Bloch.

HEADQUARTERS HAWAIIAN DEPARTMENT,  
OFFICE OF THE DEPARTMENT COMMANDER,  
*Fort Shafter, T. H., 29 October, 1941.*

*Confidential*

Admiral C. C. BLOCH,

*Commandant, 14th Naval District, Pearl Harbor, T. H.*

DEAR ADMIRAL BLOCH: Receipt is acknowledged of your letter of October 21, 1941, file No. C-A16-1/A&N/ND14 (01101), with reference to a combined operating center and command post for Army and Navy functions in this Department.

While I am strongly in favor of combined operating centers for equivalent units of Army and Navy forces, I do not believe that all of the operating centers should be combined into one single building. There are strong strategic and tactical reasons why the various Army functions cannot be located together in the same structure. The different elements have distinct missions, and while it is necessary to establish close liaison and communications between these various Army headquarters, it is equally necessary that they be located in separate command posts for efficiency of individual operation. Also if the various Army headquarters were to be combined in one location, we would be confronted with technical problems involving communications to subordinate elements which would be extremely difficult to solve. From a security standpoint, I do not believe that this combination of Army activities would be advisable; a lucky hit effecting either the structure or communication would have a far greater adverse effect than a similar hit on one of the separate command posts.

The Army already has its command posts under construction and these will be completed in the near future. The Department command post is in the Aliamanu Crater, the 18th Bombardment Wing is on the southwest outer slopes of Aliamanu, and the Interceptor command post consisting of fighter planes, antiaircraft artillery and the aircraft warning service, is at Fort Shafter. The command post of the Hawaiian Air Force is also to be located at Fort Shafter. Communications facilities are now available to all these locations, and arrangements can easily be made to expand each into a combined operating center for the equivalent Army and Navy units. All of these structures are being built underground by tunneling methods; this requires a minimum of material. A combined operating center located in the vicinity of Pearl Harbor would probably have to be a cut and cover type of structure and to afford the same protection that we now have in the tunnels, it would have to be very massive. Under present conditions securing the necessary materials would be difficult.

It is therefore suggested that instead of a single operating center, consideration be given to the construction of additional space for Navy units adjacent to the existing command posts of equivalent Army units. This suggestion would mean that the Navy structure for the Commander-in-Chief of the fleet, the Commandant 14th Naval District, and various fleet echelons would be located in the Aliamanu Crater, that the command post for Patwing two would be located adjacent to the Army command post for the 18th Wing, and that the Navy fighters could be located adjacent to the Army's interceptor command post.

and that space for the Navy Air Headquarters could be made available either adjacent to the headquarters of the Army Air Force, or with Patwing two.

Very sincerely yours,

/s/ WALTER C. SHORT,  
Lieutenant General, U. S. Army,  
Commanding.

5. In other words, if the duties of the Commandant at Pearl Harbor and the Commanding General at Fort Shafter, in Hawaii, are such that their local duties make it essential that they remain at the Navy Yard and with the troops, respectively, my answer is that there should be additional officers assigned specifically for the supreme command in Hawaii, and staff officers for Plans, Operations, Intelligence, and Communications transferred to these officers, and that a protected location for their offices be provided. Certainly the importance of the broader duties is such that their efficiency should not be confused due to the local duties and routine.

### *Second Memorandum Endorsement*

From : The Director, Radio Liaison Division.  
To : The Director, Naval Districts Division.  
Subject : Combined Operating Center for Army and Navy.

1. Forwarded.
2. Due to the many and complex facilities under the organization responsible for defense in any given land area bordering the ocean, the most perfect set-up for command is one in which the supreme command is exercised by one officer best equipped of any for the task, in direct and immediate touch with his staff, comprising intelligence, plans, operations, and communications.
3. Because our defense is under two officers, Army and Navy, we must try and arrange matters so that where component parts of the commands are interwoven these two can function as nearly as possible as one. If the duties of the Commanders beyond command and operation duties, i. e., training duties, materiel duties, and command of local units of their respective over-all commands, will interfere with the most efficient exercise of their primary duty, which is their higher duty in command of the over-all command, then the higher command should be relieved of detail duties (except for inspection for over-all efficiency) of the lower commands under him, and additional subordinate officers should be ordered to assume these duties. The two higher commands of the two services will then be free to choose together the joint operating center, with their respective staffs, without regard to the lower command duties.
4. Without opportunity for consultation and evaluation of the same information, it is not possible for two widely separated staffs to prepare efficiently decisions on complex matters of immediate urgency for the two opposite service commanders as well as if they have immediate access to one another. This is indisputable. Therefore, it should be accepted, and everything within reason subordinated to that principle, as the most efficient high command possible is necessary.

*1st Endorsement*  
on Com-14 C-A16-1  
A&N/ND14 (01171)  
dated Nov. 3, 1941

From: Commander-in-Chief, United States Pacific Fleet.  
To: The Chief of Naval Operations.  
Subject: Combined Operating Center for Army and Navy.

1. The Commander-in-Chief, U. S. Pacific Fleet has given careful consideration to the question of a combined operating center for the Army and Navy in Hawaii. On its face, the proposition sounds attractive, but unless it can be shown that the advantages of such an establishment outweigh the disadvantages, its creation is not only unjustified, but may be undesirable.

2. The conditions likely to exist on Oahu, in the event of war, are definitely different from those prevailing in Europe and which dictated the establishment of the combined headquarters and operating centers in Great Britain. Sustained attack of any kind is unlikely. The mission of the Army and the Fleet are considerably different—the operation of one being defensive and local while the operations of the other are offensive and far flung. Strategic, rather than tactical cooperation, is indicated and therefore the necessity for rapid receipt and exchange of information and arrival at quick decisions is of less importance.

3. On the other hand, there are manifest disadvantages, among which are the following:

(a) A combined operating center would not relieve the necessity for local centers for individual forces and its communication system would be very complex. This complexity might well complicate, rather than simplify, the flow of orders and information.

(b) It might well result in over centralization for large scale operations and thus tend to deprive subordinates of necessary initiative.

(c) It would result in loss of contact, by virtue of physical separation from subordinate commanders, with those commanders and their activities. A location suitable for the Army is not suitable for the Navy and vice versa.

(d) There would be serious consequences if such a center or its communication system were damaged or destroyed.

(e) It would tie the respective commanders to an immobile post—with the post necessarily in an inactive area.

(f) It would have at least a psychological tendency to divert Fleet units to defensive tasks.

4. The above considerations primarily apply to a combined operating center for the Army and the Fleet. They are applicable, also, but in less degree, to the Army and the Commandant, Fourteenth Naval District. Undoubtedly, there is need for close cooperation and liaison between those commanders, much of which is now provided for in current plans. The Harbor Command Post provides for liaison and joint control of shipping, identification of vessels, fire of coast artillery and related questions. Offensive air operates under unity of command by the Navy. Defensive air operates under unity of command by the Army. Command posts are in existence for the control of these operations and, as pointed out by General Short, it is very doubtful that a central command, superimposed on these separate and local command posts, would add much to cooperation. Nor would the disadvantages enumerated above be much reduced.

5. In view of the above, the Commander-in-Chief, U. S. Pacific Fleet, is of the opinion that the establishment of a combined operating center for the Army and Navy in Hawaii is not only unnecessary, but definitely undesirable. The recommendation of the Commandant, Fourteenth Naval District, in paragraph (1) is concurred in and it is further recommended that the construction of the building for the Commander-in-Chief, U. S. Pacific Fleet, Commander Submarines Scouting Force, and Commander Base Force be proceeded with without further delay.

H. E. Kimmel  
H. E. KIMMEL.

(A) Original 14ND-JCD-42, Reg. No. 19 including List of Effective Pages.

(B) Receipt and Destruction Form, in duplicate.

1. The Original 14ND-JCD-42 (Army Short Title HCF-41) is hereby promulgated to the officers on the Distribution List of 14ND-JCD-42, including those on the Distribution List of 14ND-JCD-13. It was signed and placed in effect by the Commanding General Hawaiian Department and by the Commandant Fourteenth Naval District on 11 April 1941, to remain effective until notice in writing by either party of its renouncement, in part or in whole, or until disapproved, in part or in whole, by either the War or Navy Departments.

2. This Original Plan, prepared in accordance with references (a) and (b), supersedes 14ND-JCD-13 (Army Short Title HCF-39) and will be handled as follows:

a. All holders of 14ND-JCD-13 remove and destroy by burning all pages now contained in 14ND-JCD-13.

b. Insert this letter and the pages of Enclosure (A) in their proper places in the old binder, if used, in accordance with the List of Effective Pages contained in Enclosure (A); new holders on the Distribution List for 14ND-JCD-42 provide own binders.

c. Report receipt, destruction of superseded pages of 14ND-JCD-13 and check of contents on the form herewith, Enclosure (B). New holders report receipt and check of contents only.

3. a. This publication will be handled and accounted for in accordance with the instructions contained in the Navy Regulations and in the Registered Publication Manual.

b. This volume *shall not be carried in aircraft*, and when not in use shall be kept in Class "A" stowage, as prescribed in the Registered Publication Manual.

4. IT IS FORBIDDEN TO MAKE EXTRACTS FROM, OR COPY, PORTIONS OF THIS PUBLICATION WITHOUT SPECIFIC AUTHORITY FROM THE CHIEF OF NAVAL OPERATIONS, EXCEPT AS PROVIDED FOR IN THE CURRENT EDITION OF THE REGISTERED PUBLICATION MANUAL.

5. It is hereby certified that the originator considers it to be impracticable to phrase this document in such a manner as will permit a classification other than secret.

C. C. BLOCH.

SECRET

HEADQUARTERS  
HAWAIIAN DEPARTMENT,  
Fort Shafter, T. H.  
11 April 1941

HEADQUARTERS FOURTEENTH NAVAL DISTRICT,  
PEARL HARBOR NAVY YARD, T. H.,  
11 April 1941.

JOINT COASTAL FRONTIER DEFENSE PLAN, HAWAIIAN COASTAL FRONTIER, HAWAIIAN  
DEPARTMENT, AND FOURTEENTH NAVAL DISTRICT

SECTION I—DIRECTIVES

1. **RESPONSIBILITY.** This Joint Coastal Frontier Defense Plan is prepared under the direction of the Commanding General, Hawaiian Department, and the Commandant, Fourteenth Naval District.

2. **BASIS.** This plan is based on Joint Army and Navy Basic War Plan RAINBOW No. 1, and Section V, page 61, Joint Action of the Army and the Navy, 1935, and will constitute the basis on which all subsidiary peace and war projects, joint operating plans, and mobilization plans are based.

3. **METHOD OF COORDINATION.** The Commanding General of the Hawaiian Department and the Commandant of the Fourteenth Naval District have determined that in this joint plan the method of coordination will be by mutual cooperation and that this method will apply to all activities wherein the Army and the Navy operate in coordination, until and if the method of unity of command is invoked, as prescribed in Joint Action of the Army and the Navy, 1935, Chapter 2, paragraph 9b.

4. **PLANNING REPRESENTATIVES.** The Assistant Chief of Staff for War Planning (G-3), Headquarters HAWAIIAN DEPARTMENT, and the War Plans Officer, Headquarters FOURTEENTH NAVAL DISTRICT, are designated as planning representatives respectively for the Army and Navy Commanders in the HAWAIIAN COASTAL FRONTIER. (Par. 40a page 61, Joint Action of the Army and the Navy, 1945).

5. **JOINT PLANNING COMMITTEE.** A Local Joint Planning Committee is established to consist of the Chiefs of Staff, HAWAIIAN DEPARTMENT and FOURTEENTH NAVAL DISTRICT and such other Army and Navy Officers as may be appointed by the Commanding General, HAWAIIAN DEPARTMENT, and the Commandant, FOURTEENTH NAVAL DISTRICT (Section VI, page 133, Joint Action of the Army and the Navy, 1935). The Joint Planning Committee shall take cognizance of all matters affecting joint coordination in all subsidiary Plans or Projects constituting the Joint Defense Plans, HAWAIIAN COASTAL FRONTIER. The senior member thereof is authorized to designate such standing or special sub-committees as from time to time may be necessary.

[6]

SECTION II—DELIMITATION OF AREAS

6. **HAWAIIAN COASTAL FRONTIER.** "The HAWAIIAN COASTAL FRONTIER consists of OAHU and such adjacent land and sea areas as are required for the defense of OAHU".

It has been determined that the HAWAIIAN COASTAL FRONTIER consists of land and sea areas bounded by arcs of twenty (20) miles radii with centers at OPANA POINT, MAUI; KAUIKI HEAD LIGHT, MAUI; LAUPAHOEHOE LIGHT, HAWAII; CAPE KUMUKAHI LIGHT, HAWAII; KALAE LIGHT, HAWAII; SOUTHWEST HEADLAND, KAHOO LAWE; LEAHI POINT, NIIHAU, LEHUA ISLAND, NIIHAU; KAILI POINT, KAUAI; and arc of thirty (30) miles radius with its center at KAHUKU POINT, OAHU, and the tangents connecting these arcs in the order named.

7. **HAWAIIAN COASTAL ZONE.** The Hawaiian Coastal Zone comprises the waters of the HAWAIIAN COASTAL FRONTIER.

8. **HAWAIIAN NAVAL COASTAL FRONTIER.** The Hawaiian Naval Coastal Frontier comprises the HAWAIIAN COASTAL FRONTIER plus the areas bounded by the territorial waters of MIDWAY ISLAND, JOHNSTON ISLAND, PALMYRA ISLAND, CANTON ISLAND, and WAKE ISLAND.

9. **HAWAIIAN NAVAL COASTAL ZONE.** The Hawaiian Naval Coastal Zone comprises the Hawaiian Coastal Zone plus the territorial waters of MIDWAY

ISLAND, JOHNSTON ISLAND, PALMYRA ISLAND, CANTON ISLAND, and WAKE ISLAND.

10. *HAWAIIAN DEFENSIVE SEA AREAS.* WPL-8, paragraph 2201, defines Defensive Sea Areas as of two kinds. In the Fourteenth Naval District of the first kind—2201.a.1 of WPL-8—is the Defensive Sea Area of the *HAWAIIAN COASTAL FRONTIER* approved by the Joint Board, Secretary of War and Secretary of the Navy and will be made effective by proclamation. Defensive Sea Areas of the second kind—2201.a.2. of WPL-8—have been established by executive order for *PEARL HARBOR* and *KANEOHE*.

(1) *DEFENSIVE SEA AREA OF THE HAWAIIAN COASTAL FRONTIER.* The Defensive Sea Area of the *HAWAIIAN COASTAL FRONTIER* includes all waters within an area bounded as follows:

By arcs of twenty (20) miles radii with centers at *OPANA POINT, MAUI, KAUAI HEAD LIGHT, MAUI, LAUPAHOEHOE LIGHT, HAWAII; CAPE KUMUKAHI LIGHT, HAWAII; KALAE LIGHT, HAWAII; SOUTHWEST HEADLAND, KAHOO LAWE; LEAHI POINT, NIIHAU; LEHUA ISLAND, NIIHAU; KAILIU POINT, KAUAI*; and arc of thirty (30) miles radius with its center at *KAHUKU POINT, OAHU*, and the tangents connecting these arcs in the order named. This area when made effective will be given the short title—*HAWAIIAN D. S. A.*

(2) *PEARL HARBOR—DEFENSIVE SEA AREA.* The *PEARL HARBOR—Defensive Sea Area* comprises—

The area of water in *PEARL HARBOR* lying between extreme high water mark and the sea, and in and about the entrance channel to [7] said harbor within an area bounded by the extreme high water mark at the bearing south true from the southwestern corner of the *PUULO A Naval Reservation*, a line bearing south true from *AHUA POINT LIGHT*, and a line bearing west true from a point three (3) nautical miles due south true from *AHUA POINT LIGHTHOUSE*. This area is given the short title—*PEARL D. S. A.*

(3) *KANEOHE BAY—DEFENSIVE SEA AREA.* The *KANEOHE BAY—Defensive Sea Area* comprises:

All waters enclosed by lines drawn as follows: A line bearing northeast true extending three miles from *KAOIO POINT*, a line bearing northeast true extending four (4) nautical miles from *KAPOHO POINT*, and a line joining the seaward extremities of the two above-described bearing lines. This area is given the short title—*KANEOHE D. S. A.*

(4) *PALMYRA, KINGMAN REEF, JOHNSTON, MIDWAY, and WAKE DEFENSIVE SEA AREAS.* These defensive sea areas comprise:

Territorial waters surrounding the islands from high water marks to a distance of three (3) nautical miles from these marks.

11. *OAHU DEFENSIVE COASTAL AREA.* The Defensive Coastal Area for *OAHU* comprises all water areas within the area of circles and the connecting tangents drawn with points as centers and with respective radii, as follows:

*KEAHI POINT*—Forty-nine thousand (49,000) yards.

*PUU KAPOLEI*—Forty-five thousand (45,000) yards.

*PUUIKI STATION*

*KAHUKU POINT* Twenty-three thousand (23,000) yards.

This area is given the short title—*OAHU D. C. A.*

### SECTION III—ESTIMATE OF THE SITUATION

#### *Tasks and Forces*

12. *CATEGORY OF DEFENSE.* Category "D", as defined in Section III, Chapter V, Joint Action of the Army and the Navy, 1935.

13. The estimate of the situation applicable to the respective forces is found in Estimate of the Situation, Hawaiian Department, and Estimate of the Situation, Fourteenth Naval District, *RAINBOW* No. 1.

#### 14. *TASKS.*

a. *JOINT TASK.* To hold *OAHU* as a main outlying naval base, and to control and protect shipping in the Coastal Zone.

b. *ARMY TASK.* To hold *OAHU* against attacks by sea, land, and air forces, and against hostile sympathizers; to support the naval forces.

c. *NAVY TASK.* To patrol the Coastal Zone and to control and protect shipping therein; to support the Army forces.

[8] 15. *FORCES.*

**a. ARMY FORCES.**

The present garrison augmented by personnel and facilities to be obtained locally and by reinforcements from Continental United States as provided for in Joint Army and Navy Basic War Plan, RAINBOW No. 1.

**b. NAVAL FORCES.**

Naval Local Defense Forces of the Fourteenth Naval District, augmented by personnel and facilities to be obtained locally and by reinforcements as provided for in the Navy Basic War Plan, RAINBOW No. 1.

**c. OVERSEAS REINFORCEMENTS.**

(1) Army garrisons and Naval Local Defense Forces in the HAWAIIAN COASTAL FRONTIER will be reinforced at the earliest possible date; to the extent practicable, this will be done prior to M-Day.

(2) M-Day is the first day of mobilization, and is the time origin for the execution of this plan. M-Day may precede a declaration of war. As a precautionary measure, the War and Navy Departments may initiate or put into effect certain features of their respective plans prior to M-Day. Such parts of this plan as are believed necessary will be put into effect prior to M-Day as ordered by the War and Navy Departments or as mutually agreed upon by local commanders.

**d. CIVIL ORGANIZATION.** A CIVIL ORGANIZATION, under the supervision of Army authorities, and in consultation and accord with Navy authorities, to organize the TERRITORY OF HAWAII for war, utilizing all personnel and material resources of the TERRITORY OF HAWAII in assisting the military and naval forces.

**SECTION IV—DECISIONS****16. GENERAL.**

**a.** The Commanding General, Hawaiian Department, and the Commandant, Fourteenth Naval District, to provide for the needs of the defense of OAHU in accordance with the tasks, paragraph 14 above, and submit these plans to the War and Navy Departments, respectively.

**b.** The Commanding General, Hawaiian Department, and the Commandant, Fourteenth Naval District, to prepare plans for the execution of the tasks given in paragraph 14 above, these plans to include initial deployment and assignment of reinforcements when received.

[9] **c.** The Commanding General, Hawaiian Department, in consultation and accord with the Commandant, Fourteenth Naval District, to prepare plans for the mobilization of man-power and material resources in the TERRITORY OF HAWAII and their allocation to the Army and Navy forces in the HAWAIIAN COASTAL FRONTIER in accordance with the detailed agreements covered under Section VI, Detailed Joint Agreements, of this document.

**d.** Army and Navy subordinate tasks are assigned in accordance with Joint Action of the Army and the Navy, 1935, listed respectively, in paragraphs 17 and 19.

**17. ARMY.** The Commanding General, HAWAIIAN DEPARTMENT, shall provide for:

**a.** The beach and land, seacoast and antiaircraft defense of OAHU with particular attention to the PEARL HARBOR NAVAL BASE and naval forces present thereat, HONOLULU HARBOR, CITY OF HONOLULU, and the SCHOFIELD BARRACKS-WHEELER FIELD-LUALUALEI area. The increasing importance of the KANEOHE area is recognized.

**b.** An antiaircraft and gas defense intelligence and warning service.

**c.** Protection of landing fields and naval installations on outlying islands consistent with available forces.

**d.** Defense of installations on OAHU vital to the Army and Navy and to the civilian community for light, power, water, and for interior guard and sabotage, except within naval establishments.

**e.** Defense against sabotage within the HAWAIIAN ISLANDS, except within naval shore establishments.

**f.** Establishment of an inshore aerial patrol of the waters of the OAHU D. C. A., in cooperation with the Naval Inshore Patrol (see par. 18. a.), and an aerial observation system on outlying islands, and an Aircraft Warning Service for the HAWAIIAN ISLANDS.

**g.** Support of naval aircraft forces in major offensive operations at sea conducted within range of Army bombers.

**h.** Provide personnel for and Army communication facilities to harbor control post provided for in paragraph 18. e.

## 1312 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

i. In conjunction with the Navy, a system of land communications (coordinated by means of teletype, telegraph loops, and radio intercepts, and detailed joint instructions) to insure prompt transmittal and interchange of hostile intelligence. Radio communication between the Army and the Navy will be governed by "Joint Army and Navy Radio Procedure, The Joint Board, 1940".

[10] j. An intelligence service, which, in addition to normal functions, will gather, evaluate, and distribute both to the Army and to the Navy, information of activities of enemy aliens or alien sympathizers within the HAWAIIAN ISLANDS.

k. Counter-espionage within the HAWAIIAN ISLANDS.

l. Control of dangerous aliens or alien sympathizers in the HAWAIIAN ISLANDS.

m. Army measures to assure effective supervision, control, and censorship over communication systems which will conform to Joint Action of the Army and the Navy, 1935, Chapter IX.

n. Supply of all Army and civil population in the HAWAIIAN ISLANDS.

o. Hospitalization of all Army and civil population in the HAWAIIAN ISLANDS.

p. Reception and distribution of personnel and supplies for the Army and of supplies for the civil population.

18. NAVY. The Commandant, FOURTEENTH NAVAL DISTRICT, shall provide for:

a. An inshore patrol.

b. An offshore patrol.

c. An escort force.

d. An attack force.

e. Provide and maintain a harbor control post for joint defense of PEARL and HONOLULU HARBORS.

f. Installation and operation of an underwater defense for PEARL and HONOLULU HARBORS. (Hydro-acoustic posts, fixed, when developed and installed probably will be under cognizance of the Army.)

g. Support of Army forces in the OAHU-D. C. A. and installation of submarine mine fields in the defense of the OAHU-D. C. A. as may be deemed necessary and practicable.

h. Sweeping channels and mine fields.

i. Distant reconnaissance.

j. Attacking enemy naval forces.

k. Maintenance of interior guard and defense against sabotage within all naval shore establishments.

[11] l. In conjunction with the Army, as provided for in paragraph 17 i., a local communication service to insure prompt transmittal and interchange of intelligence.

m. Navy measures to assure effective supervision, control and censorship over communication systems which will conform to Joint Action of the Army and the Navy, 1935, Chapter IX.

n. Operation of a Naval intelligence system, including counterespionage, for the collection, evaluation, and dissemination of hostile information.

o. Supply and hospitalization of all local naval defense forces.

p. Operation or supervision of all water transportation and facilities pertaining thereto.

### SECTION V—MOBILIZATION

#### 19. MOBILIZATION PLANS.

##### a. GENERAL.

(1) Mobilization plans to be prepared under directives of the Joint Army and Navy Basic War Plan, RAINBOW No. 1, will provide for the maximum possible effort to include the variant plan for the possible situation of a cutoff from the Mainland.

(2) The mobilization plans will present the detailed utilization of the manpower and material resources of the HAWAIIAN ISLANDS, as well as of the reinforcements to be received from the Mainland.

(3) Mobilization plans will provide that, where facilities do not exist for the defense of OAHU, all work possible under current appropriations will be done to prepare them so that M-Day operation will be possible.

**b. ARMY PLANS.** The mobilization plans to be prepared for the Commanding General, Hawaiian Department, will provide for :—

(1) A survey in time of peace of the resources of the HAWAIIAN ISLANDS in men, material, supply and installations and a tabulation of those of military value or necessary for the maintenance of the civil population.

(2) An allocation, in consultation and accord with the Navy, of the resources of the HAWAIIAN ISLANDS to the Army, to the Navy, and to the civilian population in conformity with Section VI, Detailed Joint Agreements, of this document.

[12] (3) Plan for recruitment of Army personnel.

(4) Reception and distribution of Army personnel procured by selective service.

(5) Operation of a labor pool, in consultation and accord with the Navy, for use by the Army, by the Navy, and by civilian establishments in conformity with the detailed agreements, of this document, and utilizing to the best advantage the Territorial Civilian Effort Plan.

(6) Operation and administration of martial law in the HAWAIIAN ISLANDS, except in localities under naval jurisdiction, in event of martial law.

(7) Control and care of the civil population of the HAWAIIAN ISLANDS (civil organization (Par. 15 *d.* above) to assist), in event of martial law.

(8) Operation or supervision, in consultation and accord with the Navy, of all civil utilities and establishments in the HAWAIIAN ISLANDS vital to military effort and civil life, in event of martial law.

(9) Maintenance and hospitalization of the civil population, in event of martial law.

(10) Operation or supervision of all local shipping facilities on shore allotted to the Army as covered in Section VI, Detailed Joint Agreements, of this document, in event of martial law.

(11) Reception, housing or storage, and distribution of all Army reinforcements and supplies received on OAHU.

**c. NAVY PLANS.** The mobilization plans to be prepared by the Commandant, Fourteenth Naval District, will provide for :

(1) A survey in time of peace of the Navy requirements in man-power, material, supplies, and installations desired from local sources.

(2) Plan for recruitment of Navy personnel.

(3) Reception and distribution of Navy personnel procured by selective service.

(4) Procurement and distribution of local civil personnel needed for naval employment through the labor pool operated by the Army in conformity with the detailed agreements covered under Section VI, Detailed Joint Agreements of this document, in event of martial law.

(5) Operation or supervision of such civil utilities and establishments in the HAWAIIAN ISLANDS as are assigned to the Navy, as covered in Section VI, Detailed Joint Agreements of this document, in event of martial law.

[13] (6) Operation or supervision of all civil agencies in the HAWAIIAN ISLANDS for the regulation of water shipping, in event of martial law.

(7) Patrol and police of water areas, to include patrol of coastal zone and protection of shipping therein.

(8) Control of harbor and coastal lights, buoys, and aids to navigation.

(9) Control of all shipping activities in the HAWAIIAN ISLANDS.

(10) Operation or supervision of all local shipping facilities on shore allotted to the Navy as covered in Section VI, Joint Agreements, of this document, in event of martial law.

#### SECTION VI—JOINT AGREEMENTS

20. The details of the allocation of local resources of man-power, supply, material, and installations will be determined by joint agreement. Agreements will cover the following general subjects and such others as may require coordination from time to time :

Allocation of military and civil man-power.

Allocation of utilities and installations for furtherance of military operations.

Allocation of transportation, land and water.

Allocation of signal communications.

Allocation of material and supplies.

Allocation of food supply.

21. This agreement to take effect at once and to remain effective until notice in writing by either party of its renouncement, in part or in whole, or until disapproved in part or in whole by either the War or the Navy Department. This

# 1314 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

HCF-41 (JCD-42) supersedes HCF-39 (JCD-13) except that the Annexes Nos. I to VII of latter remain effective and constitute Annexes I to VII, inclusive, of this plan.

(Signed) C. C. Bloch,  
C. C. BLOCH,  
*Rear-Admiral, U. S. Navy,*  
*Commandant, Fourteenth Naval District.*  
(Signed) Walter C. Short,  
WALTER C. SHORT,  
*Lieut. General, U. S. Army,*  
*Commanding, Hawaiian Department.*

## HEWITT INQUIRY EXHIBIT No. 81

Op-16-FE.  
(SC) A17-24(1).  
*Secret.*  
Serial 001434316.

THE SECRETARY OF THE NAVY.  
*Washington, 9 July 1945.*

From: The Secretary of the Navy.

To: John F. Sonnett, Special Assistant.

Subject: Testimony and documentary evidence to be presented to Admiral H. Kent Hewitt, USN, concerning further Pearl Harbor investigation.

Reference: (a) Precept, dated 2 May 1945, to Admiral H. Kent Hewitt, USN, concerning a further Pearl Harbor investigation.

1. Forwarded herewith are copies of the following dispatches, certified in jacket form NJA 24, to be used in the proceedings directed by reference (a):

(a) FE-2 Memorandum dated November 4, 1941—Subject "Japanese Fleet Locations".

(b) FE-2 Memorandum dated November 10, 1941—Subject, "Japanese Fleet Locations".

(c) FE-2 Memorandum dated November 18, 1941—Subject, "Japanese Fleet Locations".

(d) FE-2 Memorandum dated November 25, 1941—Subject, "Japanese Fleet Locations".

(e) FE-2 Memorandum dated December 1, 1941—Subject, "Japanese Fleet Locations".

(f) Conf. Dispatch #012358 (April 1, 1941) from OpNav to ComAllNav Districts NY Wash. Governments of Guam and Samoa.

(g) Conf. Serial #27-41 (April 29, 1941) from FE to Op-16-F-2 Subject—"Japanese Navy Organizations Fleets" with two routing slips.

2. Your attention is directed to the fact that letters (a) to (e) are classified Secret, and (f) and (g) are Confidential. When used in accordance with reference (a), the return of these dispatches to this office is directed.

James Forrestal.  
JAMES FORRESTAL.

## NOTES

(1) The Combined Fleet has been located somewhat more exactly than before, in the Kure-Saeki area. This includes the western portion of the Inland Sea, between the western parts of Honshu and Shikoku, and the northern part of Kyushu.

(2) Earlier in the year, the HARUNA was reported undergoing major repairs. Since the HARUNA has not been specifically mentioned among the active battleships for some time, it is believed that the ship is still undergoing repairs.

(3) It is believed that the various cruisers and destroyers in the Combined Fleet, which were formerly divided between Yokosuka, Kure and Sasebo, have now rejoined the main body of the Fleet in the Kure-Saeki area.

(4) The TAKAO (CA) is in dry-dock at Yokosuka.

(6) The Fifth Fleet has its flag in a light cruiser at Malzuru, but nothing else is known about the force as yet. It is possibly the nucleus of a Japan Sea Fleet.

(7) No new information concerning the location of individual submarines is at hand, so that the detailed survey given last week no longer holds good. However, certain units of the submarine fleet have been active in the Chichijima-Marcus-Saipan area, south and southeast of Honshu.

(8) The SATA has moved from Canton to Takao.

(9) The SHIRETOKO, previously reported in Jaluit, has moved near Yap.

(10) The detached torpedo boats and mine sweepers in the South China Fleet are believed to have rejoined the main force in the Hongkong area.

## NOTES

The fleets have remained in the same operating areas as previously reported. Several minor changes in the position of aircraft carriers and seaplane tenders have been observed:

(1) The ZUIKAKU (CV) and the NOTORO (AV) have moved from the Formosan straits to the Dure-Sasebo area.

(2) Two auxiliary seaplane tenders are now in the Sasebo-Kure area. One of these was formerly in the Gulf of Tongking.

(3) The KENJO MARU (XAV) has moved south from Takao to the Saigon-Camranh Bay area.

## NOTES

(1) The CHOKAI (CA) is in Yokosuka. The TAKAO is still in drydock at Yokosuka.

(2) The NAKA (CL), Flagship of Desron 4, is at Yokosuka. The destroyers in Desron 4 are still in the Kure-Saeki area.

(3) The NATORI, Flagship of Desron 5, sailed Amoy November 4th.

(4) Ten of the 12 destroyers in Desron 5, formerly at Sasebo, have been shifted—3 to Maizuru, and 7 to Bako.

(5) Three of the 8 destroyers in Desron 6, formerly in the Truk-Ponape area, have moved to Sasebo; and 2 to Salpan.

(6) The flagship of the Fifth Fleet, an unidentified CL, has moved from Maizuru to Yokosuka.

(7) Many of the units of the 6th Fleet have been located more exactly.

(8) The RYUJO has returned to Kure from Taiwan.

(9) The ISUZU (CL), temporary flagship of the 2nd (or South) China Expeditionary Fleet, has moved from Hongkong to Foochow.

# 1324 CONGRESSIONAL INVESTIGATION PEARL HARBOR ATTACK

(1) The Kure area includes the whole Inland Sea area, together with the Saeki area, which controls the straits between Honshu, Kyushu and Shikoku.

(2) The HIYEI (BB) has moved to Sasebo from the Kure area.

(3) The HARUNA (BB), formerly undergoing repairs at Sasebo, has rejoined the fleet as flagship of Batdiv. 3.

(4) The FURUTAKA (CA) is at Sasebo, separated from the other CO of the division which are near Kure.

(5) The TAKAO (CA) has left the drydock at Yokosuka, and rejoined 2nd Fleet units near Kure.

(6) The SUZUYA (CA) shifted from the Kure to the Sasebo area.

(7) The 13 of the 28 destroyers in the 2nd Fleet have been reported near Yokosuka. The other 15 are still near Kure.

(8) The Third Fleet has reduced the number of its units near Malzuru, and increased the number in the Formosan Straits. The NATORI, which sailed from Amoy on Nov. 4th, is now at anchor in Bias Bay.

(9) The Fourth Fleet has been augmented by the addition of 8 divisions of ex-merchantmen (about 32 ships). Increased activity has been noticed among other units of the Fourth Fleet, but except for the shift of 6 submarines to Truk, the total number of fighting ships in the Mandates has not been increased.

(10) The Fifth Fleet has moved from Yokosuka to Chichijima, with certain portions possibly near Marcus Island.

(11) The aircraft carriers SORYU, HIRYU, and HOSHO have moved from South Kyushu to the Kure area. The SHOKAKU has moved from Takao to Kure. The plane guard destroyers have shifted slightly.

(12) The KAMOI (AV) is near Truk.

(13) The Combined Fleet Train has made a number of minor shifts.

(14) The IZUMO is assumed to be in Shanghai.

(15) Ten transports left Shanghai between the 14th and 17th, with troops, supplied and landing boats; seven transports are still there. In addition, 17 transports, southbound, were sighted between Hongkong and Shanghai between the 10th and 14th. Over the week end, 18 transports sailed up the Pearl River, and 12 downstream.

## NOTES

- (1) (CL) SENDAI moved from Kure to Sasebo.
- (2) The ATAGO (CA), Flagship of the 2nd Fleet, has moved from Kure to Sasebo. Further southward movements are expected.
- (3) The CHOKAI (CA) has probably become flagship of the Southern Expeditionary Fleet, off Indo-China.
- (4) Desron 4, consisting of the NAKA (CL) and 12 DD have moved to Bako.
- (5) The NAGOYA MARU and the 4 Minelaying SS of Subron 6 (I-121-124) are now near Bako.
- (6) Airron 7 has moved from Kure to Bako.
- (7) At least one division of Torpedo Boats have moved to South China.

## TEXT

Personnel of your Naval Intelligence should be advised that because of the fact that from past experience shows the Axis Powers often begin activities in particular field on Saturdays and Sundays or on national holidays of the country concerned, they should take steps on such days to see that proper watches and precautions are in effect.
